HARDWARE AND METAL

Vol. XXX PUBLISHED EVERY SATURDAY SINCE 1888 September 21
No. 38 1918

THE MACLEAN PUBLISHING COMPANY, LIMITED
PUBLICATION OFFICE: TORONTO, CANADA

ASHDOWN
Electric Lighting and Power Plant

Hundreds of them are being sold to farmers by hardware trade of Western Canada. Easy to instal, as blue print is supplied. All connections marked so that a child could almost set it up.

Engine
3 H. P. one cylinder, vertical, water cooled, direct connected to generator

Fuel Tank
One gallon capacity.

Storage Battery
16 cell sealed glass jar type Special hard surface plates, which insures long life

Water Tank
Engine cooled by Thermo Syphon System.

Battery Connecting Wires
Two 15 ft. lengths of wire include to connect battery to switchboard.

Carburetor
Schebler gravity feed type giving highest efficiency.

Service Fuses
Two fuses to protect service wires.

Atwater Kent Distributer and Coil

Ammeter
Shows charging current to battery and load on generator.

Governor
Throttling governor automatically regulates amount of fuel to conform to the load on engine. Gives constant speed and steady light.

Voltmeter
Shows voltage of generator, battery and lights.

Pulley
For operating line shaft or small machinery from engine by belt

Rheostat
Regulates charging current to battery, which means long life for battery.

Oil Gauge
Automatically shows oil level at all times.

Automatic Contactor and Starting Switch
Raising lever causes current from battery to start engine and automatically connects generator to battery when proper speed is obtained. Disconnects battery automatically when engine stops.

Oil Filler Plug

Oil Drain Cap

Base
Gives rigid support to engine and generator and affords an easy method of mounting to wood or concrete floor.

Generator
Special generator for low voltage plants.

There is nothing new about the engine. It is a single-cylinder, 4-cycle, 3 h.p. automobile type of engine, 2¾ in. bore, 4 in. stroke, 1,150 R.P.M., a type familiar to all.

Good Live Agents Wanted.

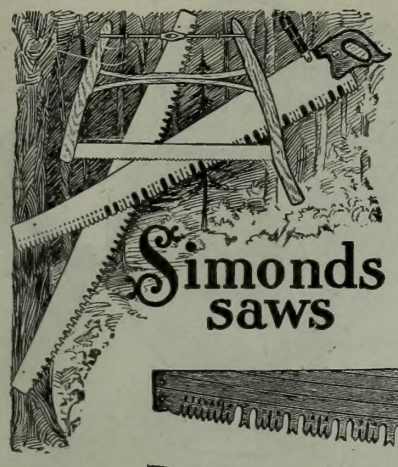
CALGARY WINNIPEG SASKATOON

High Speed Hand Drill

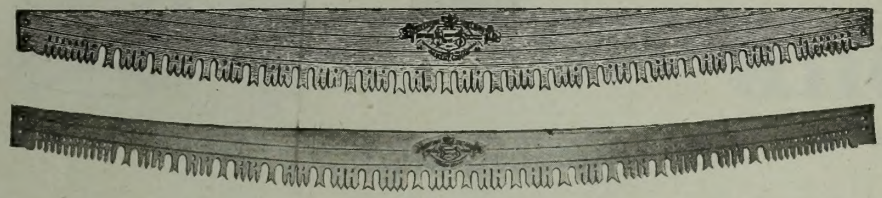
Every Shop, Home and Garage can save both time and money by adding the Goodell-Pratt High-Speed Hand Drill No. 486 to their tool equipment.



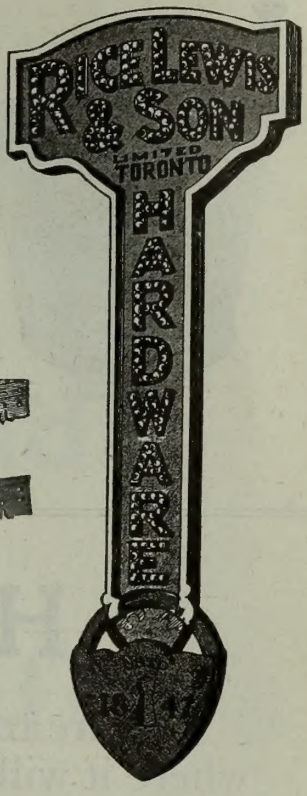
For drilling large numbers of small holes very rapidly this new High Speed Hand Drill will be found superior to any other type of hand-power drilling device made. It has a chuck speed of seven revolutions to one of the crank handle.

The machine-cut, carefully-fitted Gears, running in grease, are inclosed in an aluminum housing. The large End Handle enables the tool to be used as either a Hand or Breast Drill. The long Crank with a large Crank Handle insures good power. Ball bearings make the Spindle run easily. The Chuck holds Round Shank Drills from 0 to $\frac{1}{4}$-inch in diameter. The whole tool is $15\frac{1}{2}$ inches long and weighs $2\frac{1}{4}$ pounds, aluminum parts are polished, and those of steel are polished and nickel plated.

Goodell-Pratt Company



Toolsmiths Greenfield, Mass., U.S.A.



BUSHMEN'S TOOLS

—Cross-cut Saws
Buck-saws, Axes

The season for woodsmen's tools is about here. The word conservation as applied to fuel makes it most desirable for the farmer to look to his uncleared land to keep himself supplied with his winter needs.

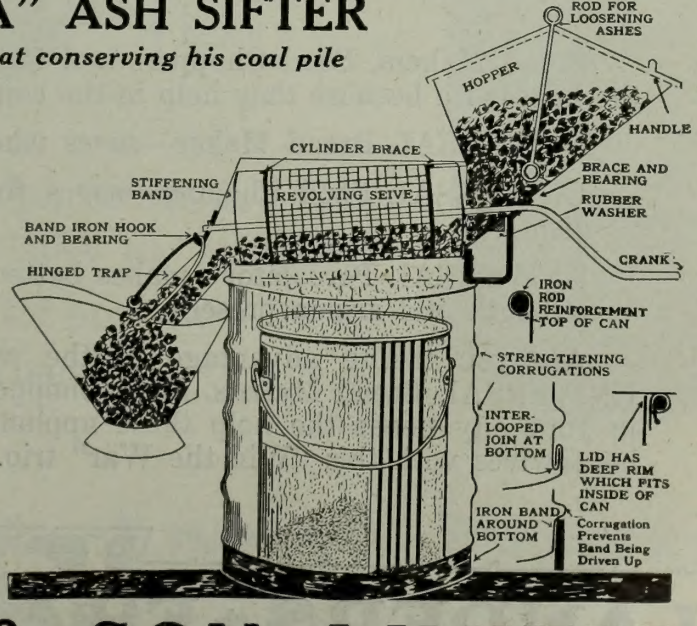
There is no doubt the demand for good tools will be more pronounced this season than ever. **We advise the early ordering of your anticipated requirements.** Our stocks are as complete as war-time conditions allow. We carry:

Cross-Cut Saws—Simonds', Shirley and Dietrich's, T. F. Shirley Co.'s, and "Our Jewel."

Buck Saws—Happy Medium, Happy Medium Lance, Strathcona or Prince Rupert.

Axes—Welland Vale and "Sager" in single and double bit.

SAMUELS' "CANADA" ASH SIFTER



—a great boon to the man who aims at conserving his coal pile

And who is there whose chief thought is not along this line?

The "Canada" is a big seller in ordinary times—these days we can only hazard a guess. Already the demand is apparent. **We can only guarantee delivery on early orders.**

We also carry a limited stock of square wood frame sifters of the hand type, and may be unable to replace them.

Don't wait for the Rice Lewis Traveller. Write to-day.

Help Win the War

We are trying to help direct raw material into channels where it will help most in the prosecution of the war. The production and distribution of war essentials is our patriotic duty.

UNIVERSAL

Bread Makers, Food Choppers and Coffee Percolators are war essentials to the housewife because they help in the conservation of food.

UNIVERSAL Bread Maker—saves wheat, makes war bread without waste.

UNIVERSAL Food Chopper—saves food, makes left-overs into palatable dishes.

UNIVERSAL Percolator—makes better coffee from less coffee, with all its strength and aroma preserved.

Are you taking advantage of the wonderful selling possibilities of UNIVERSAL Bread Makers, Food Choppers and Percolators? Every woman in your city needs the help these appliances can give her. Universalize the housewives with this "Win the War" trio.

National No. 88 Adjustable carries the door CLOSE TO THE RAIL

No. 88 Adjustable Barn Door Hanger always carries the door close to the rail. As its name implies, it is adjustable—vertically and laterally, **AFTER THE DOOR IS IN POSITION.**

Show your prospect how easily and effectively No. 88 operates.

No. 88 Hanger is fully flexible and is equipped with our Improved Storm-Proof Rail which really protects. It is packed the "National way," with everything necessary to its hanging, including a set of illustrated directions.

Have you a "National" Catalog.

Just a post card will get you one—and there are profits in handling National Products.

The Great West Trolley Door Hanger

A hanger built for service and especially recommended for use on heavy doors.

The axles pass through seamless tubes and turn on steel roller bearings, making it anti-friction and very easy running.

A leading feature of the "Great West" is the vertical and lateral adjustments, allowing the door to be raised or lowered, or the space between the door and building increased or decreased as desired.

The track is made of heavy steel and double grooved attached to the building with heavy corrugated brackets.

Ask our Hanger Dept. for further information.

The Economy of Spending Enough

True economy can never be measured by price alone.

It is well to remember that the cheapest is seldom the most economical at any time.

Durability—length of service—must be carefully weighed against the purchase price, and the correct balance is "economy."

As an example, we mention

SAMSON AXES

They may be found slightly higher in price than some, but their greater value in added service will prove from first to last that they are the "economy" axes in the end.

This is the result of years of experience in the selecting of fine materials—years of careful training of men who have become expert in the trade.

And back of this is our guarantee.

NEW SAFETY STOVE PIPE

Needs No Wiring
Cannot Pull Apart---It Locks Itself!

Stove pipe season is **here!**

Perhaps you have waited a little longer than usual to "look around." If so, you have waited wisely. Look over the features of this safety stove pipe, which is the best and easiest installed on the market, bar none!

Made in 6 and 7-inch sizes. Made of 29 Gauge Iron. Telescope Pipe does away with half lengths. Pipe is nested, saving freight rates and storage room in store. New patent lock effects saving on each pipe, making a saving of one length in every 12 of ordinary pipe. Can be used any place where ordinary pipe is used, or can be used along with ordinary pipe. Patented in Canada and the United States, and "Made in Canada" by Fairgreave & Sons, Toronto, Ont.

Just what you need for bigger sales.

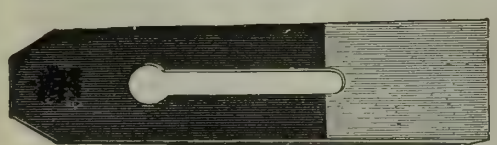
SHEFFIELD



A Reputation to Maintain

It is a pleasure for dealers to handle Ward & Payne's celebrated tools — for half a dozen reasons.

One is, that there's a reputation back of the W & P trade-mark for unvarying high quality that greatly assists in making sales. Behind every tool marked with the Anvil Brand stands the knowledge and experience gained in the manufacture of Light-Edge Tools for over one hundred years. No wonder Dealers like to handle them and mechanics prefer to use them.

Write now to our Canadian Representatives for full particulars.

The Needs of the Empire

NEVER BEFORE in the history of Canada has greater opportunity been offered her Sons and Daughters to render SERVICE to the Empire;—and

NEVER BEFORE have the needs of the Empire demanded as high a standard of QUALITY in thought, deed and product as at present.

HOW NOBLY CANADA has responded is now known around the World and history will record it for the future.

THE PRODUCTS OF OUR MILLS are at the Fronts and on the Seas, in the Shipyards and Factories and in the Fields, faithfully fulfilling their mission of reliable performance wherever the Government's War-Winning Programme directs, as we are, and have been, stripped for action since the first call to arms.

THE NEEDS OF THE EMPIRE are many and the War-Winning Programme changes as necessity demands; but it matters not, the needs of the Empire are paramount and must be supplied.

THEREFORE, if in these trying times, we do not deliver promptly to you such of the products of our Mills or Blast Furnaces as you may need, console yourself with the thought that through us, you are rendering Service to the Empire and to the Cause that matters most for the Liberty, Justice and Freedom of the World.

Increased Profits to Retail Rope Dealers

THAT is what thousands of retail merchants throughout the country are realizing, through the use of the Plymouth plan of selling rope by the foot. They make more money on their rope and their customers are better satisfied. A combination of results that no merchant can afford to overlook.

Plymouth Manila Rope

is good rope. There is no better rope made. It is 100 per cent. high grade Manila. Strong, durable, and flexible. It gives long service. It gives satisfactory service. It makes your customers ask for "more rope the same as I bought here before." If you sell your customer good rope he'll take a chance on your other goods being of the same quality.

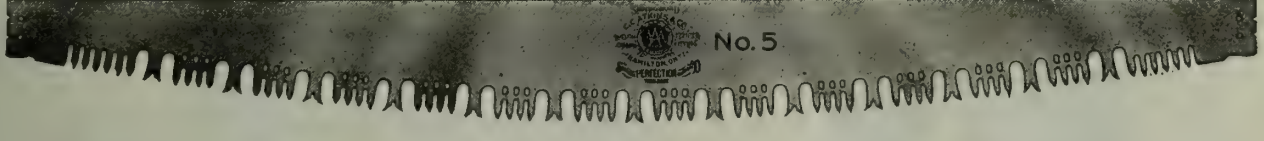
You Oil Your Car
Why not a Door Hanger?

It has metal parts which come in contact with each other, causing friction, and friction means wear. Added to this you have weather conditions which cause rust if there is no protection from lubrication.

ALLITH 1915 **is a distinctive sliding door hanger with oiling device.**



This feature, in addition to the several mechanical features, such as: **each wheel having double set of roller bearings, wheels operating independently of each other, round groove of track which prevents friction,** makes the Allith 1915 a hanger extremely popular.

With the special oiling device the trolley may be oiled regularly and with little or no inconvenience, thus ensuring the hanger having a long life and making it easy to operate at all times.

Now is the time to display the Allith 1915 in your window and in your store. Let the farmers know you sell the Allith 1915.

Produced at

THE JAMES SMART PLANT

BROCKVILLE, ONT. WINNIPEG, MAN.

You may have just paid a good-sized bill for carbon removing and valve grinding.

It may have occurred to you that these jobs are necessary more often than formerly, due to the unusually low grade of motor fuel you are obliged to use to-day.

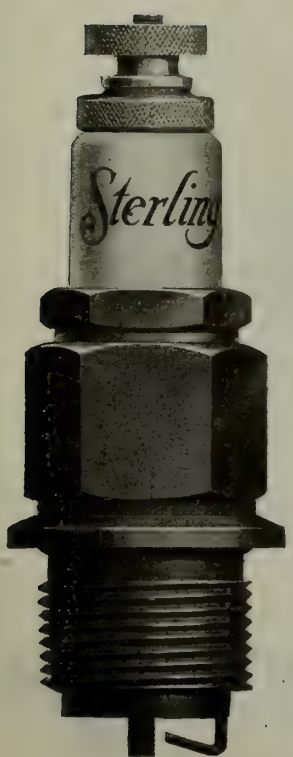
Another expense is called to your mind—spark plugs. They seem to become sooted oftener, just as the cylinders and valves.

You ask yourself, "Why should I have to buy new plugs every time the old ones become carbonized?"

That question, put to your dealer, will bring a recommendation which will lead you to say, "All right, put in the cleanable plugs—THE STERLING PLUGS."

He can recommend no other plug than a separable plug to meet this economy need.

STERLING plugs can be renewed over and over again because they are separable, therefore readily cleanable.



Easily Cleanable

And it does not take an electrician to re-assemble them properly. They simply fit back into perfect adjustment of the electrodes and become absolutely leak-proof.

When you clean a STERLING plug you know that it is **positively** cleaned everywhere.

STERLING spark plugs are sold everywhere by progressive garages and supply dealers.

EVERY SALE GUARANTEES A REPEAT

THERE are needs in every home for Ioco Liquid Gloss and Household Lubricant. Their many and varied uses keep them always in demand and make them easy to sell.

Every time you sell a can of Household Lubricant or Ioco Liquid Gloss, you make a nice profit for yourself, and you give your customer an exceptionally good value. Quality and quantity considered, you are able to offer just about twice the value in Ioco Liquid Gloss and Household Lubricant that you can offer in any other similar products.

Ioco Liquid Gloss is the most satisfactory polish to be had for finished surfaces of all kinds. It is excellent for polishing automobiles and carriages, as well as for cleaning and polishing furniture. It is unequalled for use on the dust cloth.

Household Lubricant is non-gumming, non-corrosive. It prevents rust, serves for all light household lubricating purposes, and is very effective for use in cleaning and polishing windows, mirrors, cut glass and automobile window-shields.

If you are not handling Household Lubricant and Ioco Liquid Gloss, write to us at 56 Church Street, Toronto, for our very attractive dealers' proposition.

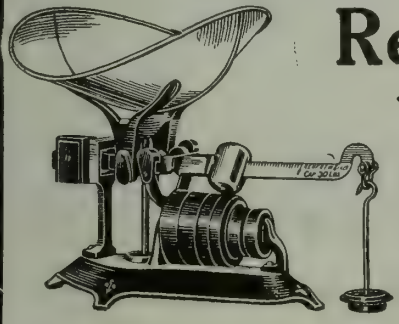
4 Good Reasons
---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.



NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

Stirs up Business

Precious few housewives realize the many uses of an accurate scale in the kitchen—saving losses in careless weighing at butchers and grocers—weighing produce before marketing—weighing flour and other ingredients while baking, etc., etc., etc. It is surprising what a little bit of salesmanship and displaying will accomplish in stirring up big business in Renfrew Scales! The Renfrew is compact, handy, and stands hard knocks. It doesn't get out of order and always tells the truth. A government inspector's certificate accompanies every Renfrew. These features make the Renfrew a lively seller these days. Push business with the

THOROUGHNESS

The "Ideal" Water Power Washer is an example of Dowswell, Lees & Co.'s thoroughness. In material, workmanship and efficiency it is thoroughly good.

Shortage of labor and lack of raw material may affect the quantity of washers that are turned out in our factory; but such temporary handicaps do not affect, nor will they be permitted to affect, the quality of those that are produced.

Inability to meet the full requirements of the trade may result in the loss of some business for a time; but we will never risk a loss of the confidence that has been attained by thirty years of consistent thoroughness in manufacturing.

The "Ideal" is only one of many models, each of them adapted to special requirements and all of them made to enhance our reputation with dealers and users.

Took a Chair in Borden's Kitchen

AND stayed right there until he got his place in the Cabinet. Such, in brief, is the story of how one Minister got in, as told by J. K. Munro in the course of an article in September MACLEAN'S.

"A Close-Up of Union Government"

This article will be found distinctly interesting and refreshing, for it appraises the various members of the Government on their nine-months' spell impartially, fearlessly and humorously. Mr. Munro is a member of the press gallery, and he has watched the Cabinet members with a close and critical eye for nine months, and he knows their weaknesses as well as their greatness, and he chronicles their foibles unerringly. It makes good reading.

The September issue contains the following other features:

"Our Mary," the first of a splendid story of Mary Pickford.
By Arthur Stringer

"Buried Alive!" a gripping story of underground warfare.
By Lieut. C. W. Tilbrook

"Less Petty Politics, More Common-Sense," a fearless discussion of the war situation. *By Lieut.-Col. J. B. Maclean*

Five splendid stories by well-known Canadian authors—Arthur Stringer, W. A. Fraser, Alan Sullivan, Archie P. McKishnie and Allen C. Shore.

The Events of a Warring World

The Review of Reviews section, made up of reprints from the best articles published the world over, contains an especially readable grist. Some of the articles are:

Lloyd George Founds New Secret Service.

Germany's Latest Plan to Enslave World.

Pretorius, Wonderful British Scout.

Is the Devil at Large?

Will Attack Holland Soon?

German Staff Live in Filth.

Germany Sought Peace in 1915.

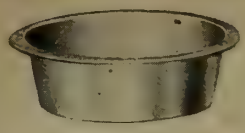
The Business Papers Got The Volunteers

EDWARD N. HURLEY, the clear-headed, resourceful Chairman of the United States Shipping Board —the man who induced Chas. Schwab to take the general management — puts a big rating on the national importance of the business paper. In the recent campaign for shipyard volunteers the business papers aided greatly in getting the required number of men.

Mr. Hurley, writing the Secretary of the Associated Business Papers, which includes a large number of the most progressive in North America, says:

> "I WANT to tell you and those connected with the division of advertising that the services rendered the United States Shipping Board and the Emergency Fleet Corporation by the Business Papers in our recent campaign for shipyard volunteers, deserves our highest commendation.
>
> "The editorials which these papers published and the advertisements bearing coupons and postcards to be filled in by those desiring to enrol in the shipyard volunteers, materially helped us in securing our full quota of volunteers.
>
> "I recognize the great force of the Technical and Trade Press of the country, and particularly in these critical times, both with relation to business as well as to the war.
>
> "Please accept this as a testimonial of my appreciation of your very valuable services and the assistance given us by the Associated Business Papers."

It is only since the beginning of the war that many have come to recognize the value and power of the Business Paper. Manufacturers who have subscribed for and used the Business Press in their own campaigns have long known its power in developing not only the business of its readers but the resources of the country. The Business Paper to-day stands high in the estimation of those executive heads connected with war endeavors, because they realize it is a mighty force in stabilizing business and in giving technical knowledge which cannot be secured in any other way.



Following MacLean Trade and Technical Papers and Magazines stand at the top for Service to readers:

Steel Magnates Busy Solving Problems

Many Important Conferences This Week and Next Will Settle Prices For Last Quarter of Year, and Also Decide Allocation of Supplies—Basis of Distribution Will be Strictly According to War Needs

MEETINGS which set prices for the last quarter of this year and which decided largely the allocation of supplies of steel and pig iron were held in Ottawa, Toronto, Washington and New York this week. It has been one of the busiest weeks in the whole of a very busy year for the steel magnates, and the results will be far-reaching in the trade. As a result of the conferences still other meetings have to be held with representatives of the iron ore interests in the United States and American steel makers who are in Class 3 as regards to priorities, that is all those who buy their own pig iron.

The meetings held in Ottawa on Tuesday and in Toronto on Wednesday were called to discuss plans for arranging for the most effective and fair distribution of steel so that the best interests of all those working on war necessities may be served.

Causing Anxiety

At the conference held in Toronto on Wednesday manufacturers declared there is a serious shortage of many basic materials. This is largely due to restrictions placed upon exports by the United States War Trade Board. The situation is causing considerable anxiety to many firms, and in order to make up the shortage all blast furnaces in Canada which are idle will be put in operation.

At the close of the conference, which was private, and attended by representative manufacturers from different parts of the province, it was announced that a committee of three had been appointed to wait upon the Canadian War Trade Board, with instructions to offer the co-operation of the users of pig iron and steel, it being believed that the manufacturers engaged in this industry might be of some great service from their knowledge of the situation generally in Ontario. By closer co-operation with the War Trade Board it was the opinion of the meeting that it would result in a better and more economical production and distribution of materials, thereby economizing to the best advantage.

Plan of Action

Before going to Ottawa the special committee will confer for the purpose of obtaining certain information that will be necessary in placing before the Canadian War Trade Board the lines upon which the manufacturers will be prepared to co-operate with the government, both as to increased production and greater development of natural resources. The matter will be brought to the attention of every branch of the Canadian Manufacturers' Association throughout the Dominion, plans for which are well under way.

At the Meeting

At the meeting were: Messrs. J. C. Frame, J. C. Notman, J. W. Russell, T. G. McGhie, H. B. Jenney, W. B. Scace, R. W. Gladstone, H. B. Callendar, W. L. Ham, Wm. H. Frost (Smith's Falls), A. Meadows, W. H. West, N. A. Hill, W. W. McBain, Frank Lewis, T. C. Tuskin, H. W. Fleury, A. Kinzinger (Niagara Falls), A. S. Christie, E. H. Jones, Fred Hatch, W. W. Star, A. F. Hatch, R. McCullough, L. Slater, W. E. Kellow, W. Gordon (Tweed), D. B. Marwick, A. McMahon, H. T. Hubbard, H. J. Waddie, W. H. Carrick (all of Hamilton), F. Tissington, F. M. Tobin, J. H. Paterson, A. S. Capewell and C. Redder (Bowmanville).

Pig Iron Producers

The pig iron producers met in New York on Wednesday and as a result of their discussion these groups will confer with the general steel committee and present their claims for advances. On Monday, a full meeting of iron and steel manufacturers was held in New York to formulate the position which the committee took before the Price Fixing Committee at Washington on Thursday.

Price questions for the next little while will hold the center of the stage in iron and steel. There is a well defined expectation that the American government in fixing schedules for the final three months of the year may recognize price inequalities in certain lines and make allowances accordingly. Interest especially has been turned upon pig iron. The widening gap in production costs in various districts due to higher ore, freight charges, dissimilar labor conditions, etc., has become a more insistent factor.

Keeping Up Production

Government machinery is being centered more upon the upholding or stimulating of production in pig iron, coke, raw steel and certain rolled lines where the immediate demand is most pressing, such as shell steel and plates. The high ranking given to blast furnaces, to steel works, including billet, bloom and slab mills, to plate mills and to coke plants in the enlarged classification of essential industries issued by the War Industries Board further signifies this purpose. These several industries are listed in Class 1. As such they are entitled to first preference in supplies of fuel, labor and transportation, as well as other essentials. Of special importance to the iron and steel industry is the statement that the preference lists will guide the War Department in the granting of industrial exemptions from the new draft.

Must Conserve

Measures directed at the conservation of steel are going forward constantly. Tin plate mills dating from October 1 will be kept within a 70 per cent. rate of operation and will be supplied with steel only to that extent. This means a drop of 20 to 25 per cent. from present operations, but this has been timed so that the demands for food containers will have been well covered.

Want Special Ruling

Discussing the American situation, "Iron Age" says:

"Smaller producers are more outspoken in calling for a separation of their case from that of the integrated companies, yet they are not ready to have the government take over all output at differential prices. Neither government nor steel trade wants to open that door.

There has been some surprise over information that the Lake Superior iron ore producers, whose prices were put up 45c per ton in June, are now asking another advance. Their claim is that the 35c increase in rail freight and the last

(Continued on page 97)

CANADA AFFECTED BY NEW CONSERVATION LIST

CANADIAN firms are affected by the latest export conservation list just issued by the United States War Trade Board. By the ruling the following commodities are added to the list, which becomes effective immediately:

Aluminum, metallic, and all articles containing 10 per cent. or more (in weight) of metallic aluminum, X-2. (Individual licenses not required to Canada and Newfoundland.)

Cartridges and shells, loaded and unloaded, and reloading and cleaning tools for same, X-2.

Lead, as follows: Pig, X-2; pipe, X-2; sheet, X-2.

Ore, as follows: Radium, X-2; uranium, X-2; titanium, X-2.

Tin, as follows: Bichloride of, X-4; crystals, X-4; oxide of, X-4; salts, X-4; sundry articles, all, either made of tin plate or coated or dipped in tin, X-4.

The removals from the Export Conservation List, as shown below, have been adopted, effective September 11.

TAKING INVENTORY OF U. S. STOCKS OF STEEL

A COUNTRY-WIDE inventory of stocks of steel on hand is being made by the United States War Industries Board at the instance of its chairman, Bernard M. Baruch, in co-operation with the Census Bureau of the Department of Commerce. Definite figures regarding the supply of steel is of first importance in view of the deficiency of production of steel for direct and indirect war needs.

The present estimated total production of steel in sight is 17,000,000 tons, and war demands total over 23,000,000 tons, with the demand constantly rising. Mr. Baruch announced recently that he could not approve requests for an ounce of steel for domestic uses, because of the imperative need of meeting the war demands.

The Census Bureau through its equipped census-taking organization is sending questionnaires to more than 40,000 manufacturers, asking complete reports of stocks of steel on hand down to the smallest holdings. It is sought to reach every manufacturer who uses steel in any way and in any amount in his industry.

A number of industries—such as the automobile industry—have been called upon to report stocks of steel on hand that the War Industries Board may be guided in making an intelligent administration of the steel stocks. Mr. Baruch decided, however, it was necessary to gather complete information from all steel-using industries, and the War Industries Board determined on a general inventory from all manufacturers.

SEARS, ROEBUCK ARE APPEALING DECISION

SEARS, ROEBUCK & COMPANY has appealed to the courts to review the finding of the Federal Trade Commission ordering the firm to desist from unfair and misleading advertising.

This is the first appeal ever made to the courts to review and set aside a final decision of the Commission, and was filed in August last. The petition for review was filed in the U.S. Circuit Court in Washington, and the Commission has certified to the courts the records in the case.

In this case, filed early in the year, and decided in July, the big mail order house was accused of committing several acts which the Federal Trade Commission declared constituted unfair competition. The charges were as follows:

"1. Circulating catalogues containing advertisements of sugar for sale, wherein it is falsely represented that because of large purchasing power and quick-moving stock the company is able to sell sugar at a lower price than its competitors.

"2. Selling or offering to sell sugar below cost, through catalogues circulated throughout the country.

"3. Circulating catalogues containing advertisements representing that its competitors do not deal fairly, honestly and justly with their customers.

"4. Circulating catalogues containing advertisements offering its teas for sale, in which advertisement it is falsely stated that the company sends a special representative to Japan, who personally goes into the tea gardens of that country and personally supervises the picking of the tea.

"5. Circulating catalogues containing advertisements offering coffee for sale, in which it is falsely stated that the company purchases all of its coffee directly from the best plantations in the world."

At the time the decision was announced the officers of the company intimated that further action would be taken, and in its report for August the Federal Trade Commission announced the appeal, which will be heard later.

BIG CHANCE HERE FOR RETAIL HARDWAREMEN

ONE of the most remarkable facts noted by visitors to many of the fall fairs this year is the means of transportation by which the visitors came to the exhibition. In previous years at fair time it was usual for the railways to put on extra coaches, and even then it was very often impossible to get more than standing room. All this was changed this year. For every person who took the train to a fair it is estimated that twenty were carried by autos. What is more to the point, the visitors to the fairs went in their own autos. Probably ninety per cent. of those who go to the fall fairs are people from the country. Mr. Retailer, do you realize just what this new situation means to you? Every year sees more hardware men stocking complete lines of auto accessories, and they are finding it the best kind of business. The farmers of Canada never had so much money in their history as they have right now, and in many sections of Ontario it is a poor farmer indeed who does not own at least one car. Many farmers own two or more. This means millions of dollars' worth of business for the hardwaremen. One of the largest fall fairs in Canada is that at London, Ont. It is in the heart of a rich farming country. This year the direc-

tors of the Fair, realizing just how important it is to bring all the farmers into the city and get their trade, spent $10,000 in providing a special "park" with cement floors, and special attendants to take charge of farmers' cars. In spite of this the "park" was not big enough to hold all the cars, and many farmers had to leave their autos on the side streets. Never in the history of London have there been so many autos in the city at one time, and nearly every one of those in the "park" was owned by a farmer. He not only came himself, but in many cases he brought half a dozen visitors with him. Many of these people motored in for fifty or sixty miles, and some of them stayed for several days. Did the merchants of London benefit? Did they? Just ask them. This is merely one instance of what is happening all over the country. What is going to happen when every farmer has a tractor? There will be a bigger market than ever for auto supplies and accessories, and the men who go after the business are the men who are going to make the profits, and it looks as if they would be big ones and well worth going after.

PROPOSED WAR TAX TO TOUCH EVERY POCKET

IF the new United States war revenue bill, which will be discussed in Congress shortly, becomes law it will touch the pocket of every man, woman and child across the line to the extent of about $75. The bill, as it stands at present, is one of the most complete and far-reaching pieces of legislation ever proposed, and was designed on the idea that it is better for the people to pay high taxes now than enormous charges for interest after the war. It is estimated that one-fifth of the total wealth of the United States will be turned to war purposes if the bill is passed. Following are some of the additions to the luxury tax which is already in force, the new tax to be assessed at the time of sale:

Motor trucks and parts, five per cent.

Motor cars and cycle and parts, ten per cent.

Sporting goods, baseballs, golf clubs, etc., ten per cent.

Cameras and films, ten per cent.

Firearms and shells for private use, ten per cent., except revolvers, which take a 25 per cent. tax.

Daggers, dirks, brass knuckles, ten per cent.

Electric fans, ten per cent.

Thermos bottles, ten per cent.

Trunks costing over $50, 20 per cent.

Freight transportation charges will bear a three per cent. tax, later included in the price of freighted articles to the consumer.

Telegrams and telephone messages carry a five per cent. tax between 14 and 50 cents, and a ten per cent. tax if the cost is greater.

Life insurance is taxed for each $100 of insurance.

Proprietors of any business that has gross receipts of $2,000 a year or more pay a $10 tax.

Aside from the original tax on the sale of all motor cars and accessories, there will be a tax for using them ranging from $5 for motorcycles to $50 for anything over 40 horse-power.

The Government hopes to raise $40,000,000 by taxes on gasoline, $100,000,000 by taxes on admissions to theatres, etc., and $1,481,000,000 by taxes on incomes.

NO SHEET STEEL FOR STOVE MANUFACTURERS

MANUFACTURERS of steel ranges, gas stoves and similar lines in which sheet steel is required will be seriously affected by a ruling of the United States War Trade Board, which has decided to release no more sheets for commercial purposes. Canadian manufacturers have even now been finding difficulty in obtaining sufficient materials to fill their orders, and the latest developments make the situation acute for them. Canadian jobbers are confining their sales largely to firms engaged in ranges and gas stoves being temporarily off the war work, and there seems little chance of the stove men getting much material from them. The situation may result in many lines of steel market.

HARVESTING TOOLS ADVANCE IN PRICE

SCYTHES, hay knives and reaping hooks are the only harvest tools to show price changes so far in orders which were accepted this week for May delivery. Hoes, sidewalk cleaners, hand garden cultivators and lawn rakes were advanced this week, and manufacturers are taking some lines of these goods off the market altogether. Many of the lines of goods which will be made will be put on the market with all polishing and special finishes eliminated. This is a measure which conserves both labor and materials, and helps to keep prices from going a lot higher than would otherwise be necessary.

SELLING ADVERTISEMENTS WITH REBATE PROHIBITED

AN important ruling by the United States War Board was handed out this week, when the following was sent to advertising agents and agencies:

"There has been considerable misunderstanding concerning the following ruling to all newspapers and periodicals:

" 'Discontinue selling advertising with a guarantee of circulation requiring a rebate if circulation falls below guaranteed amount.'

"The purpose of this ruling is to prevent the printing of copies of newspapers and periodicals which are not called for by the legitimate circulation, but are printed by the publisher and circulated by forced means in order to make good the guarantee and save this rebate. Such circulation is, of course, a waste of paper, and during the war must be stopped.

"There is nothing in our regulations which prevents the publisher from making a sworn statement of past circulation, but hereafter publishers can not guarantee future circulation. Advertisers must buy their advertisement upon the reputation of the newspaper or periodical and their belief that the circulation is a bona fide one and will be maintained. This is a positive order and must not be evaded."

Preference List May Restrict Canada

Latest Ruling Will be Governing Factor in Distribution of Labor, Capital, Facilities, Material, Transportation and Fuel—Canadian Firms Wondering Where They Stand in Regard to Getting Supplies For the Future

MANY Canadian firms will be affected by the new preference list of industries and plants which has just been prepared by the priorities division of the United States War Industries Board. The following list supersedes all others and is the masterkey which, from now on, will govern the flow of basic industrial elements to industries essential to the American war program. It will have a very important effect in governing many lines of goods being shipped to Canada and as such has far reaching results on retail trade and also on manufacturing. It may be regarded also as the governing factor, as far as the United States is concerned, in the distribution of labor, capital, facilities, material, transportation and fuel. This will also have its effects upon the supplies Canada is to get.

Many Are Anxious

Many Canadian firms are beginning to wonder just where they are going to stand as far as getting future supplies is concerned. It appears certain, many firms stated to HARDWARE AND METAL, that the situation will not be any easier. Manufacturers and others are hoping that it will not be any worse. One of the hopeful features is that with the production efforts they are making United States firms may catch up and be able to divert some of their surplus products to other than war essentials. It is stated that in some lines there is every reason to hope that this will be achieved. In the meantime some lines are already off the market and others will be very shortly. Just how long this condition will prevail manufacturers declare it is impossible to say.

Four Big Groups

The priorities division has grouped major industries according to their relative importance into four great classes, consideration being given in this grouping to the following factors: (1) Intrinsic importance of the product for use during the war and the urgency; (2) necessity for maintaining or stimulating and increasing the total quantity of production; (3) proportion of the capacity of the industry or plant devoted to the production of essential products. Each industry or plant is given a class number.

Facilitate Production

Judge E. B. Parker, chairman of the priorities division, states the determination of the relative importance of all industries and plants for both production and delivery by a single agency, the War Industries Board, renders it possible to maintain a well-balanced program with respect to the several factors entering into production, which includes, among other things, plant facilities, fuel supply, or electrical energy, labor, and transportation, without all of which production is impossible.

How It Works

Where it is imperative not only to maintain, but to stimulate and increase, production to supply abnormal demands created by war requirements, a high rating is necessary even though the intrinsic importance of the product may be less than that of other products placed in the lower classification, due to the fact that the supply of such other products equals the demand without the stimulus of high priority. Certain plants produce commodities of more relative importance, but at the same time produce other commodities of less relative importance and under such circumstances consideration and weight is given to the ratio of production between the more important and less important commodities.

Not Intended as Embargo

The inclusion of the industries and plants on this preference list does not operate as an embargo against all others, but the effect is to defer the requirements of all other industries and plants until the requirements of those on the preference list shall have been satisfied. The paramount purpose of priorities is the selective mobilization of the products of the soil, the mines, and factories for direct and indirect war needs in such a way as will most effectually contribute toward winning the war.

The Latest Ratings

The latest ratings show that Class I includes ammunition plants working on orders for the Allies and American Government, small arms plants working on war orders, blast furnaces producing pig iron, chemical plants engaged in war work; coal mines, oil and gas plants producing oil or gas for fuel for manufacturing purposes, all railways operated by the United States Railroad Administration.

Steel-making furnaces: Plants engaged solely in manufacturing ingots and steel castings by the open-hearth, Bessemer, crucible, or electric-furnace process, including blooming mills, billet mills, and slabbing mills for same.

Class II

Brass and copper plants engaged principally in rolling, and drawing copper, brass, and other copper alloys in the form of sheets, rods, wire, and tubes. Machine tools: Plants engaged principally in manufacturing same. Public utilities: Street railways, electric lighting and power companies, gas plants not otherwise classified, telephone and telegraph companies, water-supply companies, and like general utilities. Public utilities: Plants engaged principally in manufacturing equipment for railways or other public utilities. Railways: Not operated by United States Railroad Administration (excluding those operated as plant facilities). Steel-rail mills: Rolling rails, 50 or more pounds per yard. Wire rope and rope wire: Plants engaged principally in manufacturing same.

Class III

Chain: Plants engaged principally in manufacturing iron and steel chain. Mines: Plants engaged principally in manufacturing mining tools or equipment. Steel: All plants operating steel rolling and drawing mills exclusive of those taking higher classification. Tin plates: Plants engaged principally in manufacturing same. Tools: Plants engaged principally in manufacturing small or hand tools for working wood or metal. Foundries (iron): Plants engaged principally in the manufacture of gray iron and malleable iron castings. Insecticides and fungicides: Plants engaged principally in manufacturing same. Twine (binder and rope): Plants engaged principally in manufacturing same.

One Man's View

"Canadian firms or houses that have been looking forward to something better in the way of supplies from U. S. points have been living in a false atmosphere. The plain fact is that the war program of the United States increases every twenty-four hours. The war looks bigger to them every day, and they are expanding their war orders in proportion in keeping with this view." This is the view of Mr. Near of Drummond-McCall & Co., Ltd., Toronto, who spent the greater part of last week at American mills from which the firm for years has drawn a great share of its stock.

"Things are looking worse than I ever anticipated," said Mr. Near to HARDWARE AND METAL. "It seems to make no difference whether an article is on the embargo list or not, the government has its eye on it all the way through, and is determined to see that it goes to a war purpose shop and no place else. Previously Canadian warehouses have been getting sheets lower than 1-8 in. quite readily, but it seems unlikely that this condition will continue for any length of time. The best rating that is given to warehouse orders is B-4. They give that rating rather than a direct turn-down. A B-4 rating depends entirely on your standing with

Paints and Varnishes Will Be Higher

Paint, Oil and Varnish Association to Meet in Montreal on September 27—Prices on Specialties and Varnishes to be Increased—New Containers—Manufacturers' Difficulties—Early Buying Advised

AN important meeting of the Paint, Oil, and Varnish Association will be held in Montreal on September 27 to consider the whole position for the season of 1919.

Much interest attaches to the consideration of the many big problems to be discussed and the decisions are looked forward to with keener interest than in a normal season.

Manufacturer's Difficulties

There has been no time in the history of the trade when paint makers were placed in just the position which confronts them to-day. They have been dealing with big problems all through the season of 1918 and instead of improvement the various phases of the markets have made a more uncertain outlook in many respects than promised to develop say six months ago. In view of the complications it has been impossible to make changes from time to time which the trade might reasonably expect would answer for a long period—in other words to name prices for other than immediate and near future business.

Container Material Scarce

The amount of tin used to make the necessary containers for the average large paint factory is immense, and it has been well-nigh impossible to find, up to this time, a suitable material that could be depended upon to take the place of the much-needed tin, the supply of which has so rapidly been diminishing. It would seem that had it not been for the wisdom shown by the paint makers many months ago, containers would have been short long before this.

Just what the manufacturers of paint are going to do for their containers in putting up the 1919 paint which they soon will be grinding and assembling it is difficult to forecast. There is this to say, however, and that is that the paint manufacturer, confronted with a score of troubles, has been using his usual ingenuity to evolve a suitable container for paint. It is pretty safe to say that there will be something to put the 1919 mixed paint supply into when the time arrives when the regular tin package cannot be secured. Already, at least one large firm has satisfied itself in this respect, and the president of this company—with world-wide connections and factories—informed HARDWARE AND METAL that they were not worrying unduly over the container question.

What Will Manufacturers Do?

There will unquestionably arise in the minds of many, the question as to what will be decided at the meeting of the paint and varnish men on September 27. It is apparent that many of those who will then be most vitally interested do not know, at this time, what will be done. The past season has been a busy one, and in speaking of the matter in a general way with some officers of the various companies they had really not been able to give the matter of comparing costs the close attention it would require before new season's prices were finally arranged.

Advises Early Buying

"The sooner the buyer gets in on his wants after prices are announced the better for himself," said the president of one of the leading companies to HARDWARE AND METAL. "Anyone who wants supplies should act quickly. To make any definite or even any predictions whatever is something that we cannot do at this time. The whole position is one that will require careful attention and it is hard even to say whether prices can be fixed for the usual length of time."

Not Anxious to Sell Now

Somewhat significant is the attitude of the trade, in part at least, when it is considered that there is little inclination to take on any new business excepting such as may be fully absorbed during the present month. In other words, bookings are not desired.

The market conditions everywhere; the labor problem; the probability of supplies of lead being hard to get for a long time to come; the short supplies of turpentine, and the undefined linseed oil situation are all big factors which every man can weigh for himself. Difficulties are certainly not fewer.

U. S. Exports Show Enormous Increase

Exports of manufactures from the United States in the first four years of the war are as much in value as in the 17 years preceding the war; exports of foodstuffs in the war period are as much as in the 10 years prior to the war, while exports of manufacturing material actually show a decline. A compilation by the National City Bank of New York shows that the total foreign trade of the country in the first four years of the war was $29,232,000,000 and in the four years immediately preceding the war $15,972,000,000. The imports increased from $6,887,000,000 to $9,538,000,000, while the exports jumped from $9,034,000,000 to $19,674,000,000. The increase in imports is practically 40 per cent. and in exports 117 per cent.

These figures are based upon the official returns for the 48 months from August 1, 1914, in which month the war began, to August 1, 1918. The pre-war period is the four fiscal years ending June 30, 1914.

How much of the increase is due to higher prices cannot be at present accurately determined. It is possible, however, to show by great groups of articles the increases and decreases in imports and exports when measured by values. Exports of raw materials for use in manufacturing, for example, show an actual decline in value despite the higher prices, the total value of raw material for use in manufacturing exported in the four years of war having been but $2,733,000,000 against $2,961,000,000 in the four years preceding the war. This fall-off in the value of manufacturing material exported is due chiefly to a decline of about 33 per cent. in quantity of cotton exported, Germany, Austria-Hungary, Belgium and Russia, normally large importers of American cotton, having been practically out of the market.

In all of the other groups of articles exported, however, the figures of the war period are far in excess of those of the pre-war period. Foodstuffs exported in the four years of war aggregated $4,852,000,000 against $1,738,000,000 in the four years preceding the war.

Viceroy, Sask.—Gray Bros., hardware have dissolved partnership.

Record Demand for Sheffield Cutlery

A correspondent writes to HARDWARE AND METAL regarding business conditions at Sheffield, England, as follows:

"Visits to the cutlery and plate factories by distributors seeking to procure a little stock have now become a feature of business in Sheffield, and, as a rule, the buyers suceed in obtaining something saleable. Razors, pocket-knives, and scissors are the chief difficulty. In razors the demand is almost confined to the best qualities. The output of table cutlery continues on a large scale in spite of labor scarcity. Silver and electroplated goods sell freely, retailers experiencing no difficulty in obtaining the current high prices. The latter state that they are constantly turning away business because of the inability of the makers to supply sufficient goods. The demand from the public appears to be insatiable.

Alphonse E. Decarie was unanimously elected to the Board of Directors of the Montreal Automobile Association.

The Seal of Approval

Testimonials From Reliable Firms Are Valuable—They Speak For Themselves

The following are extracts from a few of the many letters received from the trade in all parts of Canada giving opinions of the 30th Annual Fall Number of HARDWARE AND METAL:

S. B. McClung & Co., Trenton, Ont.—"The Fall Number of HARDWARE AND METAL is certainly the best of many good issues and is a credit, not only to the MacLean Publishing Co., but to our country. The HARDWARE AND METAL has been our "guiding star" for many years and we feel we would not like to carry on business without it."

* * *

J. W. Walker, Belleville, Ont.—"Regarding the Fall Number, we wish to say that we think it is one of the best issues that has ever been published. We find your weekly issue very valuable, especially under the present conditions when prices are changing so frequently."

* * *

J. C. Wanless, Chatham, Ont.—"I do think you excelled yourself in your Fall issue and I want to say that I have read some of the most interesting articles on the hardware and stove business it has ever been my privilege to read. It seems to me that this issue is worth at least a couple of years' subscription and I must congratulate you upon your success."

* * *

McKelvey & Birch, Limited, Kingston, Ont.—"We have found the Fall Number of great value in locating manufacturers of certain articles who have advertised in this issue. We might say that we take two copies of the HARDWARE AND METAL weekly, and our clerks have found it of great assistance to them."

* * *

I. W. Bennett & Son, Gananoque, Ont.—"Annual Fall Number of HARDWARE AND METAL to hand. It sure is a masterpiece. How any hardware man could run a business in these abnormal times without this publication is beyond us. We have many visitors, but none more welcome than your weekly encyclopedia."

* * *

McDougal's Limited, Ottawa, Ont.—"We beg to acknowledge receipt of your Fall Number of HARDWARE AND METAL, and wish to congratulate you on your artistic and practical advertisements, contained in this number. We find HARDWARE AND METAL, throughout the year, a source of useful information, and we think no hardware house should be without it."

W. A. May, Creemore, Ont.—"The Fall Number of HARDWARE AND METAL which I have at hand is well worthy of very favorable comment. We look for every copy and find them very helpful from week to week in keeping posted on prices, etc., especially at the present time when prices are changing so rapidly. The photos of window trims and store interiors is another good feature which gives many good ideas in dressing windows and arrangement of stock. Wishing HARDWARE AND METAL continued success."

* * *

Dakin Brothers, Digby, N.S.—"We were pleased to receive the Fall Number of HARDWARE AND METAL and consider many of the suggestions contained therein invaluable, especially the article on business management. The writer considers HARDWARE AND METAL a necessity to every progressive hardware merchant. In your issue of August 17 page 38, you have an article entitled "The Question of Mark-up vs. Profit." This article with several others through the year on Cost Accounting give full value for the price of subscription, to say nothing of the articles on Window Trimming, Advertising, etc. The writer admires your fearless handling of the Government issues in the editorial columns. In closing might say that thanks to the never-ending prodding and the suggestions contained in HARDWARE AND METAL we know what we are doing."

* * *

W. F. Macpherson, Prescott, Ont.—"I must express my entire appreciation of the many good things in the Annual Fall Number of HARDWARE AND METAL. In your weekly issues there are always items of great interest and profit to the retail hardware man, but in this one issue you certainly give value covering more than a whole year's subscription. The articles of Messrs. Simpson and Kirkwood are worthy of special mention and I have read same with a great deal of interest. I am sure your efforts must be appreciated by the hardware trade generally throughout the country."

* * *

J. D. Smith, Richmond, Que.—"I think the Annual Fall Number of HARDWARE AND METAL is one of the very best numbers that has ever been issued to the hardware trade. It will interest every dealer and has a store of information which is necessary to every one in business to-day who wishes to keep abreast of the times. HARDWARE AND METAL to me is an indispensable paper and I always have it on my desk."

* * *

Whyte & Orr, Limited, Daysland, Alta.—"We have read through very carefully your Annual Fall Number of HARDWARE AND METAL which we received a few days ago, and wish to compliment you very much on the valuable and instructive articles in it as well as the admirable press work of the number. We found several of the articles very timely and useful, especially the one referring to the possibility of goods returning to pre-war prices. We have found HARDWARE AND METAL, with its weekly check on advancing prices and its very accurate forecast of future advances, an exceptionally good guide to assist us in our buying for the past three or four years. As your subscription file shows, we have a copy of HARDWARE AND METAL sent to each of our four stores, and the writer frequently calls the attention of our branch managers to timely articles contained in issues just to hand. It would indeed be inconvenient, at least, to have to do without your very aggressive and judicious national hardware weekly. We have appreciated very much for instance your articles on handling auto accessories by hardware merchants and are endeavoring to make this line a feature of our business. We find extremely useful frequently items in your paint section, and also articles on window dressings."

* * *

F. C. Bishop, Norwich, Ont.—"The Fall Number of HARDWARE AND METAL is the best issue that has been published. It brings us in touch with new lines."

* * *

E. H. Insull, Craik, Sask.—"We have received your Fall Number of HARDWARE AND METAL and think it is one of the best you have issued. We find the paper very valuable to us in our business and have followed out many of the suggestions contained therein with good results."

* * *

S. L. Adolph, Listowel, Ont.—"I think the Fall Number is one of the best that you have ever issued. It is certainly a good one and I know it will be of great value to us in a great many ways. You have certainly excelled yourself in issuing such a wonderful number. HARDWARE AND METAL has given me good service and I think it covers the ground pretty thoroughly every week. Hoping this is satisfactory to you."

* * *

Almy's, Limited, Montreal.—"The Fall Number of HARDWARE AND METAL

has been a 'mental feast' to me. I look forward to getting it every week as I find it important to my business. It is very instructive and I cannot conceive of any buyer doing without it. I cut out the things I see fit for my staff and pass some of the fine enthusiasm on. I guess you will agree with me that there are a number of buyers who try to get a lot of information and no doubt know a lot, but the big secret I think is trying to pass it on to the next fellow. Your Fall Number is particularly good for the simple reason that you seem to specialize on everything and it just helps to put some pep into us all."

* * *

Frank Powers, Bridgewater and Lunenburg, N.S.—"I am still reading with pleasure your Annual Fall Number, and think it is far ahead of anything you have ever put out, or any other trade paper that I have seen. Wishing you continued success."

* * *

T. McAvity & Sons, Limited, St. John, N.B.—"HARDWARE AND METAL Fall Number is the best yet. I have read HARDWARE AND METAL a number of years both in Winnipeg and here in St. John and it has steadily improved in my estimation both in usefulness and the readableness of its various articles. 'Markets at a Glance' and various market reports have proved very instructive and the biographical sketches have been a real source of inspiration. They should not be curtailed on any account. Keep up the good work."

* * *

F. Y. W. Brathwaite, Webbwood, Ont.—"The annual Fall number is excellent. HARDWARE AND METAL is invaluable to us, particularly at this time when prices are climbing."

* * *

C. Richardson & Son, Harrow, Ont.—"We received your Annual Fall Number of HARDWARE AND METAL and must say it is very fine. We appreciate very much your efforts in this as well as your regular weekly issues."

* * *

John H. Lee, Stoney Creek, Ont.—"I think the Fall Number of HARDWARE AND METAL, August 24th issue, is very valuable to us, and to the retail trade in general, not only in the number of important subjects you have handled so concisely and well, but the up-to-the-minute prices and market reports which we refer to almost constantly. We would not think of running a hardware business without an accurate price and market report like HARDWARE AND METAL gives us."

* * *

A. Prud'Homme & Fils, Limited, Montreal.—"We have found the Fall Number very interesting, and we have always advocated to the retail merchants that they become subscribers to your publication as the best we have in Canada treating hardware and metal in general."

Fortier and Beauchesne, Sturgeon Falls, Ont.—"We are always anxious to get the Annual Fall Number of HARDWARE AND METAL, but this year we are satisfied more than ever with it. We consider that it is the best that we have had. We considered, after taking knowledge of the interesting and stimulating articles which it contains, that the Annual Fall Number alone was worth the subscription fee. We are glad to thank you for same."

* * *

The Big Hardware House., Vermilion, Alta.—"We could not get along without this HARDWARE AND METAL as we look for it as we do an invoice for prices and the information it affords is very valuable. Any way you wish to use our name in boosting this wonder paper for the hardware trade you are welcome to do so."

* * *

William Lochead, Forest, Ont.—"Dear Sirs,—I was very much pleased with your Fall Number and as yet I cannot estimate its value to me, but I know it will be many times the year's subscription. In regard to my opinion of the service of HARDWARE AND METAL I might say that I would be very much lost without it and cannot see how any merchant gets along without it in the hardware business."

* * *

Colton & Lorimer, Burlington, Ont.—"We desire to record our appreciation and satisfaction of the good service given through your above publication. It has been a great help in our business, and we can always rely upon the accuracy of everything published. The Fall Number is a masterpiece, in all its various aspects, and we always keep such numbers at hand for reference, and would feel lost without HARDWARE AND METAL on our desk at all times. Thanking you for such good service."

* * *

The Steel Company of Canada, Limited, Hamilton, Canada.

September 6, 1918.

"Mr. G. D. Davis, Manager
"Hardware and Metal,
"University Avenue,
Toronto, Ont.

"Dear Mr. Davis,—The Thirtieth Annual Number of HARDWARE AND METAL is now in the hands of the public and while I am not prepared to speak for all your readers, I do wish to say, as one of them, that you are entitled to the most liberal compliments for the magnificent publication issued by you.

"In my judgment it is the best Anniversary Number issued in Canada during my period of residence here. This applies to the entire make-up and proves beyond question that considerable care, thought and attention has been extended by you to every detail. As issued it is a sample of good work, well done, and, in consequence, should be accepted by all your other departments as an example for superior publication and I have no hesitancy in permitting you to pass this word along.

"With kind regards and best wishes for your health and success, I am,

Yours very truly,
"GEORGE A. SIMPSON,
"Sales Manager."

* * *

The Beach Foundry Company, Limited, Ottawa, Ont.—Re your Annual Fall Number. Our copy of your annual Fall Number of HARDWARE AND METAL, August 24th issue, came safely to hand. This is a very admirable journal and we are pleased to have had space in it for our COMPOSITE advertisement. Although only a few days have passed, we already have had a considerable number of inquiries from dealers with whom we had no previous connection."

* * *

Beatty Bros., Limited, Fergus, Ont.—"Your Annual Fall Number of HARDWARE AND METAL came to hand this week and I wish to congratulate you on this splendid issue. It is just chuck full of good selling and trade building information. I am sure it will be appreciated by every dealer who receives it."

* * *

Morrisburg Tack Manufacturing Co., Limited, Morrisburg, Ont.—"We have pleasure in stating that of all the other issues we have received, we fully realize that this is far ahead of any of the others. This is valuable to us in many ways, and **helps a great deal in securing our different supplies.**"

* * *

E. C. Atkins & Company, Indianapolis, Ind., U.S.A., and Hamilton, Ont., Canada.—"We have just received our copy of your publication of August 24th and wish to congratulate you because we think you deserve it. You have some very good advertisements in the publication and we are pleased with our ad. on page 283, considering that you had very little time to get up a pen sketch."

* * *

The Johnson Hardware Co., Port Frances, Ont.—"Re your annual fall number of the HARDWARE AND METAL of August 24, would say that I think it is without any exception the finest number that has ever been issued and is worth the space it takes up on any man's desk. I refer to HARDWARE AND METAL every week and read its contents and take advantage of the pointers it gives. When I have not sufficient time in the day to peruse through its pages I take it to bed with me and consult it there, so you see that it is a valuable guide to me. As for any new suggestions, I cannot improve on anything you have done so far. Trusting that your copies will keep on improving as they have done in the past."

* * *

H. J. Smith, Springhill, N.S.—"I think that the fall number of HARDWARE AND METAL was all that could be desired. I always look forward for the next issue, and from a business point of view it is almost indispensable to me. Your special number are always a source of information which I keep on file."

Many Hardware Lines Not Affected by Latest Increase in Freight Rates

ANOTHER advance in freight rates to go into effect on October 7 is announced by the railways. Under the new tariffs the rate per hundred pounds is advanced by one-half cent for carloads and less than carloads at all points in the Dominion. An advance which was made in March of this year raised the rates at four points in Canada, Toronto, Montreal, Windsor and Walkerville. These points are again affected by the latest increase so that in Toronto, after October 7, the rate will be five cents per 100 for less than car lots and 3¾ cents for more than carloads. In Montreal the rate for less than car lots will be six cents. The minimum charges of twenty-five cents for shipments of 300 pounds and under, and thirty-five cents for shipments weighing over 300 pounds, remain unchanged.

Has Little Effect

Hardware men are not materially affected by the new schedule for the reason that a great many of the lines they handle are on the list of "Exceptions." In addition to previous lists the following have been placed on the "Exceptions."

Ash sifters, bakers' ovens, baths, brooms (straight shipments), cereals and pop corn (straight shipments), churns, cork, cotton batts, cotton wadding, cream separators, elevators and parts, electric light bulbs, globes, glass hats, machines and machinery (all kinds), portable buildings, stoves, furnaces and parts, utensils (garden), washing machines.

How It Works

The firms affected by the list of "Exceptions" make their own arrangements with the carters. Some of them have to pay more, but it is generally believed that they will continue to have their business handled by the firms who have been looking after it in the past rather than shift to other carters who have not been in the business long. One manufacturer stated to HARDWARE AND METAL that the new carters might not be as responsible when it comes to either looking after goods or settling for any damages as the firms which have been in business for years.

"As far as I have been able to learn," he said, "the cartage firms are fully justified in increasing rates. They have to pay more for labor, and feed was never so high. It costs more in every way to operate the business and they are faced with the alternative of either making an increase in their rates or of going out of business. They recently granted wage increases to teamsters and to the men who handle the goods. Every part of the cartage business now costs much more than it ever did before."

All shippers interested in the new schedule of rates are being urged to ascertain from cartage agents what rates will apply on these articles when the new rate becomes effective.

Stocks of Window Glass Are Steadily Diminishing

THE following is the outlook for window glass according to a letter just sent out to the trade by the Johnston Brokerage Co. of Pittsburg.

To the Trade

Conditions in the window glass business have developed about as expected by the manufacturers and jobbers. August showed some increase in the placing of orders. It doesn't require any large volume of business now to absorb stocks being carried by the manufacturers, as in all the hand-operated plants in the Eastern territory there is not to exceed 250,000 boxes, which is a very small quantity for this season of the year, and deducting a few slow selling sizes you can understand that the available supply in first hands is limited. The stocks in the hands of the machine-operated factories are equally light, therefore it is fair to assume that the jobbers and sash houses have the bulk of the glass of the country.

Stocks Getting Low

This letter is not written for the purpose of unloading stocks, as from day to day sufficient business is coming in to assure the manufacturer that their warehouses will be absolutely empty before new glass is made, but representatives of the railroads, sent out by the government, have told merchants throughout the country that it is advisable for them to secure their goods at the earliest possible date as they believed the railroad service would be less effective as the winter advances. In the eastern section there may be greater transportation troubles than in the West, but it is very likely to affect all parts of the United States.

We continue to advise our friends to stock up their warehouses. As long as they have the room and the funds to carry stock, the glass that is needed for the winter and spring should be purchased. It is much safer to have this glass in your warehouse than to run a chance of buying it at a later date.

War Work First

In manufacturing lines the government is urging more complete operation on actual essentials; this is making immense inroads on all classes of labor engaged in other occupations, and the predictions are that all labor conditions will be more serious from week to week. In window glass making it is going to be a greater problem than fuel, transportation, or the securing of materials. The hand plants operated but fourteen weeks in the blast of 1917-1918, but the greatest penalty connected with this curtailment has been the destruction of organization in the various ranks of labor. It is even more serious among the unskilled and semi-skilled workers than it is among the skilled workmen. The immense demand for labor in plants working on government contracts has attracted all kinds of labor, and when they can secure continuous employment at the highest wages ever known they will be indifferent to returning to jobs in glass factories that will only run from three to four months.

Costs Still High

Costs of operating will continue on a high basis, and when the factories attempt to start up this winter we firmly believe that the troubles mentioned in this letter will be found much greater than stated. If war conditions become more serious and strained the manufacturers' difficulties will increase, so there is absolutely no risk in your purchasing now on the cost feature. If you anticipate your needs you will be that much better equipped to take care of your share of what business is going.

Plans for operating during the coming season have not been worked out, and while it has been supposed that the manufacturers will be allowed to make as much glass this coming year as they did in the past year, which was a 50 per cent. curtailment, it may be even less. Washington has suggested that it be reduced to 40 per cent. of the production of either 1916 or 1917. In any event there need be no fear of more glass being produced than is going to be required.

Chevrolet Motor Co. Plans to Dissolve

Stockholders of the Chevrolet Motor Company will meet in special session October 11 for discussion of, and action on, a plan looking to the dissolution of the Delaware Corporation and the distribution of its assets. Announcment to this effect was made Wednesday when it became known that the directors had decided to call the meeting. The assets of the company are 732,684 shares of the common stock of the General Motors Corporation, and this will be distributed among the Chevrolet shareholders if the dissolution plan is favored. According to the tentative arrangements for the dissolution the 732,684 shares of General Motors common will be distributed to owners of Chevrolet stock at a rate of 1 1-7 shares of "G.M.O." for each share of Chevrolet held.

Current Events in Photograph

THE OLD WORLD MEETS THE NEW

In the present war there have been many striking contrasts, but none more so than this scene from somewhere near the Italian front. Here in the quiet cloister the monks meet for a moment the emissaries of the outer world with an evident cordial welcome.

Allies Pooling World's Supply of Tin

United States to Receive Two-thirds of the Entire Output—Expected Canada Will Get Her Supplies From Across the Line—Many Firms Using Substitutes For Containers to Help Conserve Metal For War Purposes

UNDER an inter-allied pooling agreement reached by representatives of the United States, Great Britain, France, and Italy, at conferences held in London, each country participating in the conference will get its needed supply of pig tin. The action amounts to an international monopoly of a beneficent nature.

The plan of distribution worked out allows the United States about 80,000 tons of pig tin or two-thirds of the world's entire production annually.

Canada it is expected will get her supplies through the United States. Every effort is being made to conserve supplies for war purposes and Canadian firms are falling in line with the policy adopted by United States firms as outlined in previous issues of HARDWARE AND METAL.

Regulate Supplies

With the War Industries Board supervising the allowance to the United States all imports of pig tin, tin ores and concentrates will be consigned to the American Iron and Steel Institute which will receive, pay for and distribute the metal to the industry through the United States Steel Products Co.

The price will be regulated by the War Industries Board and will be uniform to all consumers of 10 tons of pig tin or over. There will be another uniform price for users of less than 10 tons. These prices will be maintained at a level which will encourage production in the tin mining countries—Great Britain and the Straits Settlements chiefly—and stop profiteering. Prices, rules, and regulations will be announced later. It is probable that users and dealers may be licensed.

Steady Supply Expected

The American War Industries Board believes there will be insured by these arrangements a steady supply of material at a stable and reasonable price. Since the negotiations for the pooling arrangement began in London six weeks ago the price of pig tin has fallen steadily. The quotation on September 6 last showed a net decrease of 14 cents per pound as compared with the price on July 15, 1918.

Conservation Plans

That there may be a sufficient supply of tin in the United States to meet the war needs and to supply essential civilian uses, vigorous plans for conservation of the metal are being made effective through co-operative efforts by the War Industries Board and by the American Food and Fuel Administration in the enforced substitution of other than tin for containers, wherever that is possible. Tin container manufacturers have agreed with the War Industries Board in plans that will curtail their use of tin plate 30 per cent., which means a saving in the next three months of about 150,000 tons of tin plate.

Using Substitutes

The United States Food Administration is working out a tin conservation plan with various industries, including lard and lard compound packers, wholesale grocers, cracker manufacturers, tea and coffee packers, cocoa and chocolate manufacturers, and baking-powder manufacturers. All have been urged to substitute fibre, paper, or other containers where possible.

The Fuel Administration has taken up the subject with the oil dealers and the War Industries Board is working along similar lines with the tobacco manufacturers and all industries in which tin is used in turning out the finished product.

EVENTS IN THE TRADE

Business Changes

Hamilton.—J. Lyle, grocer and hardware, has sold out to Robert G. McFerran.

Montreal.—Anchor Wire and Iron Works dissolved and William C. Heron, registered.

Hamilton.—G. I. Evans has been appointed receiver for the Hamilton Stove & Heater Co.

Toronto.—Imperial Products Co., plumbers supplies, is succeeded by the Porcelain Products Co.

STROME, Alta.—W. J. Brown, of Daysland, Alta., has sold his hardware business to A. E. Lattimer, of Edmonton, South. A. W. Berry remains in charge.

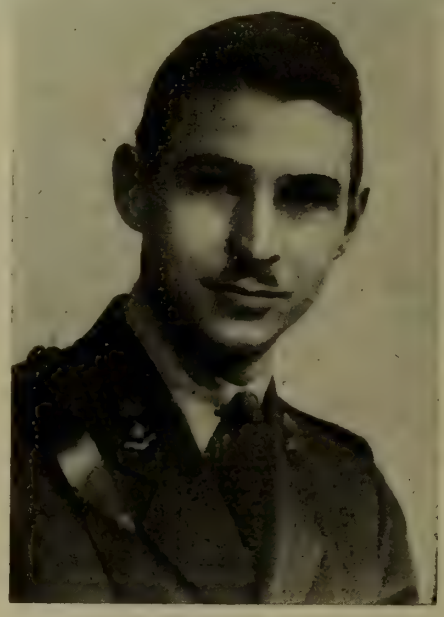
Personals

L. E. Mills, who has been with the Cochrane Hardware Limited at Copper Cliff, Ont., for the past three months has been transferred to Sudbury, where he will manage the retail store of the company.

Wiliam H. Ingersoll, formerly Canadian manager for the firm of Robt. H. Ingersoll & Co.,of New York, has been appointed national director of four-minute men of the Committee on Public Information at Washington.

J. G. Loriman, for upwards of a year manager of the Marine Specialty Branch of Brandram-Henderson, Ltd., Montreal, has severed his connection with this firm and joined the forces of the Advertising Service Co., Ltd., with headquarters at Toronto.

Obituary



The death occurred at Portage la Prairie, Manitoba, recently of Thomas W. Prout, aged 61, formerly agent of the John Deere Plow Co., and of the International Harvester Co. He was a former resident of London, Ont.

The death occurred at St. Thomas recently of E. G. Christie, aged 68, for many years in the hardware business at Waterford, Ont. After retiring he resided for a time in Saginaw, Mich., before returning to St. Thomas.

Napanee, Ont.—The death occurred here this week of M. S. Madole, aged 68 years, who for many years had been engaged in the hardware business. Mr. Madole was prominently connected with the affairs of the Ontario Retail Hardware & Store Dealers' Association for several years, and served as president in 1912.

Thomas E. Hoar, aged 61, for 28 years in the hardware business in Toronto, died at his home recently after an illness extending over five years. He came to Toronto from Galt and started business in the Campbell Block, later moving to 2924 Dundas street. He sold out two months ago to W. F. Moon. Mr. Hoar was a native of Bowmanville. He was prominent in Masonic circles, being a Past Master of Victoria Lodge.

Associate Editor Who Is Going Overseas

Lieut. H. L. Southall, associate editor, HARDWARE AND METAL, who is going overseas, will, it is understood, be connected with a tank battalion. Lieut. Southall is the third member of HARDWARE AND METAL'S editorial staff to go overseas. Forty-one members of the MacLean Publishing Co. staff have volunteered and gone on active service.

ANNUAL HARDWARE MEETING

The annual meeting of the Canadian Wholesale Hardware Association will be held in Montreal on Thursday, October 10. Many matters of much interest will be taken up, and in view of the abnormal conditions prevailing in all markets some interesting discussions are expected.

Fires

Fire caused slight damage to the Montreal plant of the Standard Paint Co. While causing a slight delay the loss will not be serious, the management stated to HARDWARE AND METAL. The fire occurred in one of the reduction units of the plant.

Trade Notes

The McGregor-Banwell Fence Co. Ltd. and the National Spring and Wire Co. Ltd. have amalgamated and have taken out a Canadian charter in the name of the Ideal Fence and Spring Co. of Canada, Limited.

The Canadian headquarters of the firm is at Walkerville, Ont., and the Eastern Ontario and Quebec and Maritime Division is represented by the Montreal office under direction of A. G. Young. Mr. Young stated to HARDWARE AND METAL that the new company intends carrying full stocks of wire fencing, barb wire, gates and supplies at Montreal. A change is also being made in the Montreal office which is removing from 14 Place Royale to 434-435 Coristine Building.

Montreal News

Mr. Shyne of the Peterboro Lock Co. was in Montreal this week.

Frank Odell, with the Atlantic Tubing Co. and Rhode Island Rubber Co., was in Montreal this week.

W. A. C. Hamilton, secretary of the Consumer's Cordage Co., Montreal, is away on his holidays.

R. C. Misson, sales manager for the Sherwin Williams Co. of Canada, Ltd., is away on his holidays.

W. G. Harris Sr., president of the Canada Metal Company, was in Montreal on his way to Halifax last week.

A. W. Poole, manager of the paint and color departments of McArthur-Irwin Ltd., was an Ottawa visitor this week.

Stanforth and Co., Ltd., Hackenforth, England, were represented in Montreal during the week by a direct traveller from the home plant.

Campbell's Pottery Factory at St. John's, Quebec, was damaged by fire to the extent of $500. Previously this place was used as a foundry and is an old structure.

Jean Valois, hurt at a fire at the plant of the Imperial Oil Co. here last week, died from the effects of his injuries in a local hospital. The jury absolved the oil company from any blame.

Pte. Ed. Morton, of 50 Hook Ave., Toronto, formerly employed with the Flint Varnish Co. of Toronto, fell in the recent fighting. He went over with the 255th Battalion.

Pte. James Loveridge, of 143 Langford ave., Toronto, is in No. 20 General Hospital, at Camiers, France, with gunshot wounds. He was formerly in the bicyc'e business in Toronto.

Pte. Norman (Mac) Clark, aged 26, son of Dr. A. M. Clark, of Woodstock, was killed in action. Before enlisting he was in the employ of the Canadian Explosives, Ltd., at Timmins, Ont.

Pte. Harry W. Turner, aged 21, son of Joseph Turner, of Woodstock, Ont., also fell in the recent drive. Previous to enlisting in the 168th Battalion he was employed in the Canadian Linderman Company..

Pte. James Howcroft, of 117 Lisgar street, is in No. 3 Canadian General Hospital, at Boulogne, with gunshot wounds. He was formerly with the Gutta Percha Rubber Co., at Toronto. He has five brothers in the Canadian army.

Official confirmation has been received of the death in action of Sergt. George Welsh, M. M., of the hardware firm of McKene & Welsh, of Vermilion, Alberta. He was a son of Mr. and Mrs. Richard Welsh, of Hensall, Ont., and went overseas with the 151st Battalion, soon winning promotion and also the Military Medal in the fierce fighting in Flanders.

Pte. Frank S. Gerry of 165 Montrose ave., Toronto, was killed in action in the big drive. He was 27 years old and before enlisting had been working with his father, F. Gerry of the hardware firm of Gerry and Walker at Brussels, Ont. He took out a commission in London, but reverted, being unable to secure an appointment immediately. He was for some time gas instructor at Shorncliffe, England, and then reverted in rank again to serve in the C. M. R. ranks in France.

Lieut. Newton Gurney, of 60 Arkledun avenue, Hamilton, died of wounds received in the recent drive. He was formerly with the wholesale and retail hardware firm of Wood Vallance & Co., at Hamilton, but when he enlisted was in the employ of the Marshall Wells Alberta Co., hardware, at Edmonton. He was the only son of the late Charles Gurney, and went overseas in May, 1916, with the 92nd Battalion. After taking a course at the Canadian military school, Shorncliffe, in June of that year, he left for France about the beginning of July, being attached to the 4th Battalion. He fought in the Ypres salient and later on the Somme, being wounded at the battle of Courcelette. He later rejoined his unit and went through the battle of Vimy Ridge, after which he went down with fever, and was given leave to Canada, returning one year ago last May on three months' leave. When his leave expired he returned overseas and joined the R.A.F. for a short time, reverting to return to the 4th Battalion as a lieutenant.

Robert Hobson Goes On New C.N.R. Board

Among the new directors named on Wednesday to take over the management of the Canadian Northern Railway is Robert Hobson of Hamilton, of the Steel Company of Canada. He has a long experience in railway work and has been very closely associated with the development of the iron and steel industry of Ontario. He has had an extensive business experience also and in 1908 was president of the Canadian Manufacturers' Association. Mr. Hobson is a member of the American Institute of Mining Engineers.

Dominion Steel Co. to Enlarge Plant

Extensive plans are under way for the enlargement of the plant of the Dominion Steel Corporation, and the cost of these, the president declares, will run about $15,000,000. Mr. Workman was seen by HARDWARE AND METAL just before he returned to Sydney, where he will remain for about a month. Although several years will be occupied in completing these extensions, some of the benefit will be derived by the company as early as January next. These plans include the plate mill, coke ovens, and absorption plants for the manufacture by-products from coal gas such as benzol, toluol, and sulphate of ammonia, and in addition extensions to the Wabana iron ore mines.

The construction of the new plate mill that has been guaranteed orders from the Government for five years is well under way, and it will be in a position to furnish plates for Canadian shipbuilding before the end of 1919. The cost will be in the neighborhood of $5,000,000, and the building will be a quarter of a mile long. The concrete foundation is now being constructed, and involved the removal o fa hill of 150,000 cubic yards in the course of the excavation.

One of the newer products of the company is benzol, the output of which now runs about 50,000 gallons a month. This is now used extensively as motor fuel in Nova Scotia, and it is claimed that it gives 33 per cent. more mileage than gasoline. Sulphate of ammonia is also produced at Sydney as a fertilizer.

AUTOMOTIVE SHOW TO BE HELD AT MONTREAL

It is now certain that there will be an Automotive Show in Montreal early the coming winter. The matter has been under discussion for many weeks and there was considerable diversity of opinion as to what should be done in these war days. Many concede the advantage of such an exhibition and the underlying idea will be the various tractors and mechanical devices so much in demand now on the farm. It will also be arranged to have a good showing of cars and trucks as heretofore.

WANT GASOLINE CARDS

The Montreal Automobile Association has petitioned Ottawa, asking for the immediate issuance of gasoline cards and the withdrawal of the ban on Sunday driving. Their contention is taken, obviously, because of the hardship worked on many a small owner who drives his car little, if any, during the week. They urge the advantage of having the card system in use here and their members are requested to observe the wishes of the Fuel Controller and use cars as little as possible on Sunday, and not at all for passenger driving on this day.

CATALOGUES

Catalogue No. 27, issued by the Vokes Hardware Co., 40 Queen St. East, Toronto, lists a complete line of automobile supplies of all kinds. It is well illustrated.

An interesting booklet entitled "How Many Birds Get Through Your Shot Pattern?" has just recently been issued by the Winchester Repeating Arms Co., New Haven, Conn.

A new washboard catalogue is being distributed in the Montreal territory by Richardson and Bureau, 55 St. Francis Xavier street, representatives for the Canadian Woodenware line of St. Thomas, Ontario. The catalogue is printed in four colors.

EDITORIAL COMMENT

IMPORTANT CHANGES

INDICATIONS are that the line which separates the "essential" from the "non-essential" is being slowly but surely drawn ever more tightly by the unseen hand of War Necessity. Many Canadian firms have been watching with much interest the course taken by the American War Board as this is a pretty good general indication not only of what goods they may expect to be able to import from across the line, but also of what the Canadian War Board may be expected to follow. The next few weeks may see some very important changes made.

THE STEEL OUTLOOK

THE next few days will be important ones for all firms and industries interested in or dependent upon steel supplies or pig iron. Conferences which are now in progress in the United States and Canada will form the basis for revised prices and for the allocation of supplies. A general tightening up in regard to all non-essentials is likely. Many firms because they will not be able to get supplies may have to temporarily discontinue some of the lines they are manufacturing. Indications are that Canadians will be made more than ever aware that there is a world war on by not being able to secure goods which they have been able to purchase. Before the end of the year the effects of the meetings of the coming week and of this week also will probably be very apparent.

BUILDING FOR THE FUTURE

AFTER the war is won, and the end, according to Lloyd George, now appears to be in sight, Canada will be confronted with a reconstruction period. The transition from a war basis to a peace footing will bring problems that will call for the most skilful efforts of the Dominion's best executive heads. Industrial Canada will have big questions to settle not only at home but in the call that is coming for materials to repair the war ravages overseas. Canada has her obligations to the Motherland and to the Allies and will have future obligations that will come with expanding export trade. Now is the time to build for the future and many firms are already giving these questions the most careful consideration. In much the same way the war has brought its own problems for the retailers and the time to prepare for the problems of the readjustment period is now, and then when normal business relations once more exist they will not strain the wise merchant's resources.

AGAINST COOLIE LABOR

IN spite of the difficulties that are being experienced in maintaining production owing to shortage of help public opinion in general will unquestionably be behind organized labor which through its representatives to the Dominion Trades Congress in Quebec this week agreed to use every means at its disposal to prevent the importation of Asiatic labor into Canada. The question is one on which a stand has to be taken sooner or later and there is no mistaking the views of the delegates to the Trades Congress. At the present time there are thousands of Orientals employed in various capacities in mining and other industries in Canada.

SAVING GASOLINE

PUBLIC opinion, backed up by the firm stand taken by the leading oil companies, has resulted in Sunday joy riding being practically eliminated all over Canada. The result is the saving of large quantities of gasoline which is being used as the nucleus of a reserve that will make a serious shortage impossible. There has been a big demand from the West for gasoline where harvesting operations are in progress and it is estimated that at least 100,000 barrels more than the usual demand will be required this month. Owing to war needs the city of Halifax is using fifty per cent. more gasoline than is usually required. The aviation training centres are also big users and with all these demands to meet in addition to their regular business the producers need the co-operation of everyone in conserving the supplies so that all essential needs may be filled.

THE sale of War Savings stamps in the United States is now nearing the $850,000,000 mark, and the treasury department reports that the revenue is not only coming in decidedly handy in helping to finance the huge war expenditures but is steadily increasing. Canada is to have Victory stamps SOME TIME. Some of the authorities at Ottawa seem to work on the plan that it never pays to do to-day anything that can possibly be put off until to-morrow.

Toronto

How Toronto is Maintaining a Premier Place in the Commercial World

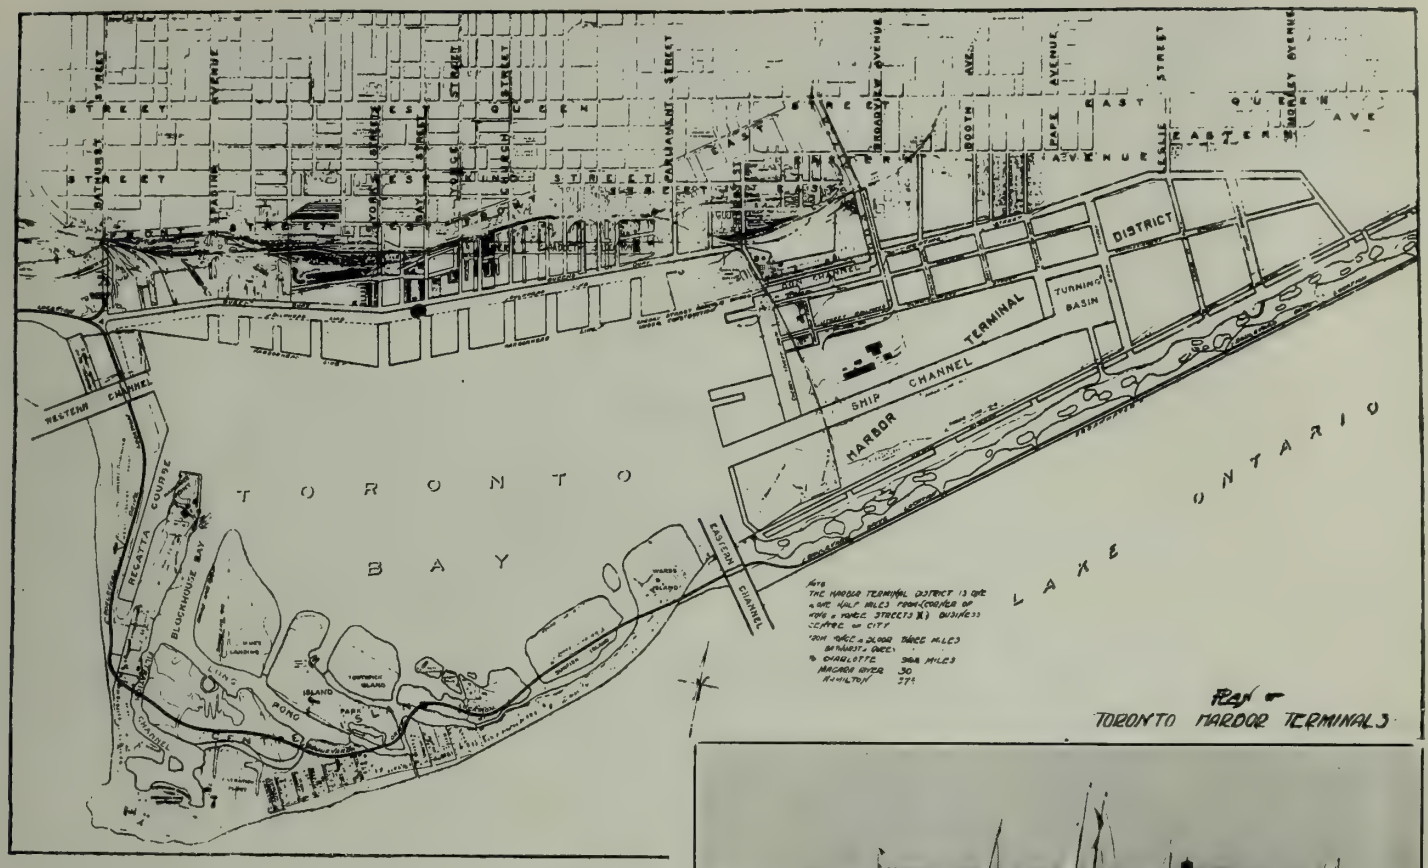
AS a business centre Toronto is very much "on the map." Because of its ideal location, its splendid facilities for railway and water transportation, its position as the distributing point for the richest districts in Ontario and the gateway through which everything must pass on its way to the huge north-western provinces, Toronto now occupies a leading place in Canada as a manufacturing, financial and shipping centre. Toronto's development has not been in the nature of a boom. The city has grown somewhat rapidly, it is true, but the growth has been most substantial. It has been a steady development and there has been no slipping back. Every year has shown a most gratifying increase in the industrial output, in the new factories added, in the bank clearings, and in population until now it may be truly said that Toronto is taking a proud place among the great commercial centres of the world.

Spirit of Toronto

Toronto has grown and prospered because in addition to the splendid natural advantages the city enjoys it has had energetic men who have adopted an aggressive policy. They did things and the city's splendid status is the reward of their efforts. Better still, they are continuing to do things and it is this progressive and aggressive spirit that will make the Toronto of the future a greater city than ever. In spite of war conditions huge projects have been carried on which make for the city's development. Some of these are government projects, others are civic works and others have been extensions planned and carried out by great manufacturing plants. There will be no prouder chapter in Toronto's industrial history than that which will tell of the city's share in Canada's war output. The manufacturers excelled themselves and have handled business that runs into many millions of dollars and supplied materials of all kinds to the Allies which have helped in holding the line and saving the world from the horror of Prussian militarism.

An Ideal Location

Few cities are as admirably situated for manufacturing and distributing as Toronto. Because it is the centre from which all the great railways radiate and through which three transcontinental lines run, and because of its importance as a lake shipping point, manufacturers are not only assured of easy means of getting in all supplies but get them at minimum freight rates, owing to the competition. That this is a most important factor and one that is fully appreciated by business men is shown by the fact that there are now more than 2,000 industries in Toronto. American manufacturers desirous of establishing branch plants in the Dominion have been quick to recognize the advantages Toronto offers and more than 100 of them now have factories here. Because the city is now the second largest city in Canada and holds the premier position as the Dominion's wholesale jobbing centre, buyers from all parts of the country come in thousands. From the manufacturers' standpoint there is in addition to this large trade a steady and substantial home market without any transportation charges to reach it. This is a big feature in itself and one that automatically is responsible for a great deal of trade development.



Power Is Cheap

There is another big factor in Toronto's steadily growing trade. Electrical power can be obtained at a cheaper rate than in any other city in the world of the same size. Manufacturers also have the choice of securing this from companies either publicly owned or in control of private corporations. All the power comes from Niagara Falls and the secret of the low rates is in the competition.

Improvements which are being made by the city of Toronto for the development and improvement of its harbor will result in the city having one of the most modern harbors in the world and unquestionably the finest on the Great Lakes. Notwithstanding war conditions the Toronto Harbor Commissioners have not stopped their work. Instead they concentrated their efforts entirely on the completion of what is known as the Harbor Terminal District, which will provide sites for industries seeking new locations in Toronto. The cost of the work being done by the Commissioners is approximately $19,000,000 and this is being borne jointly by the city of Toronto, the Dominion Government and the Toronto Harbor Commissioners.

Will Boost Business

The central section of the plan is devoted entirely to dockage and commercial activities. To business men and to manufacturers especially this portion of the development is of the greatest interest and value as through it the building up of Toronto as one of Canada's greatest inland ports will be made possible. Toronto harbor is being deepened and modernized to such an extent that the largest vessels on the Great Lakes can be accommodated. The harbor will have a depth of from 24 to 30 feet with the latest system of public and private dockage, extending a

The reclaiming progect now being carried out by the Toronto Harbor Commissioners as shown above is one of the most extensive ever undertaken in Canada.

distance of two and a quarter miles. A water front street, to be known as "Queen's Quay" and having a width of 86 feet, is being constructed. South of this street there will be an area available for storage warehouses and manufacturing purposes. This will have a depth of 140 feet and will have direct connection with the Canadian Pacific, Grand Trunk and Canadian Northern Railways and will be entirely free of interswitching charges. This unusual service will be obtainable because the Toronto Harbor Commissioners have already made arrangements with the three railways for the switching to be done by the Harbor Board. Service will also be received from the radial railways which will enter the city along the waterfront on elevated tracks.

The New Docks

Fronting on all of the above will be the new series of docks on which work is now in progress. All slips are being constructed 200 feet in width. The plans call for 26,000 feet of dockage walls. Already a fifteen-acre site which has been reclaimed has been leased to the Dominion Shipbuilding Co., which has practically completed a plant for the building of steel ships.

Each new dock is being provided with railway siding accommodation so that freight may be transferred from cars to boats or vice versa with the least possible amount of handling.

The impetus which all these modern improvements will give to shipping is inestimable.

For Factory Sites

Rapid progress is being made in the eastern section which provides for the reclamation of Ashbridge's Bay. This area will provide after all allowances made for streets, tracks, etc., more than 700 acres for factory sites. It is the intention to construct a further series of industrial docks here. One of these has already been completed and has been leased to the Canada Steamship Lines Ltd. as a coal terminal. It is the intention of the Commissioners to eventually own and control all railway tracks, so that maximum service may be offered to manufacturers and no interswitching charges made. Already located in this new area are the plant of the British Forgings, Ltd., the largest exclusive electrical steel plant on the continent; the Toronto Shipbuilding Co., the Bond Engineering Works, Lindsay Factories Ltd., a woodworking plant, Baines and Peckover, wholesale iron and steel dealers; E. Harris & Co., the British American Oil Co., Toronto Iron Works, Toronto Coal and Dock Co., the Imperial Oil Co., the Don Foundry and MacIver Bros.' meat packing plant.

Reasonable Terms

The Commissioners are in a position to either lease or sell sites on very reasonable terms. Properties are being leased on an annual rental of five per cent. on the cost of development only and range in price from those having private dockage facilities of $1 per square foot to the inland sites of fifty cents per square foot. With the facilities being provided and owing to its proximity to the business centre of the city, the Commissioners are firmly convinced that in this new district Toronto will be in a position to offer to manufacturers a home for factories unsurpassed anywhere on the continent.

Motorists from Everywhere Viewed the Vokes Auto Accessories Exhibit at the Canadian National

Nor did they stop with looking it over, but plied the salesmen in charge with a thousand and one questions about the various lines on display—sometimes the chief topic was "Motorlife"—the famous carbon remover and gas saver; again it was "Locktite"—the only patching material which vulcanizes a twelve-inch blow-out without heat.

Dixon's graphite greases, which were demonstrated in actual use on gears, came in for a great deal of interest.

Trusty Tread Tires distributors for Ontario, and Concrete Bumpers, for which the Vokes Hardware Co. are the Toronto agents, got much attention, inasmuch as they were new to most people and had many good features to recommend them.

Besides the above, such lines as the following were displayed:

ZENITH CARBURETORS
GARGOYLE MOTOR OIL
DIXON'S GRAPHITE GREASE
ESTA WATER AUXILIATORS
NEVILLE "MORE ROOM" STEERING WHEELS
JOHNSTON SPECIALTIES
ADELITE SPECIALTIES
VO-HA-CO SPECIALTIES
GLIDDEN'S AUTO PAINTS

Dealers—Send in your order now for "Kasement" Doors. If you have not received our 1919 prices write us at once.

Did you see the Canadian-made "Kasement" Doors at Toronto Ex?

One of the most interesting exhibits seen at Toronto Exhibition this year was that of the Kasement Skrene Dore Co.

The exhibit was attractively arranged with sample doors hung on both brick front and frame doorways, and a full line of stock doors of various finishes were effectively shown on the new display pillars recently designed by the company.

A "Kasement" door without wire was used for demonstrating the strength of the mortise and tenon construction; one of the company's representatives, weighing two hundred and ten pounds, swung on this door every few minutes, and neither the door nor hinges showed any signs of distress. This unusual test proved beyond doubt that "Kasement" doors will not sag or pull apart at the joints.

The ease with which "Kasement" doors are put up and taken down was continually demonstrated, and called forth very favorable comment from the large audiences which were continually attracted to the exhibit.

Another feature which proved of great interest was the new extension bottom, designed by the company to be attached to their regular stock sizes, where extra long doors are required.

There is no doubt that the thousands who saw "Kasement" doors demonstrated will be ready purchasers, and the door is destined to become one of the best sellers in the hardware trade.

"The Master Tire"

"First"

HAVING founded the tire industry in Canada; in other words, having made the first Canadian Quick-Detachable tire twenty-four years ago, it seems but suitable that we should be making the first tire today:—first in breadth of acceptance, first in uniformity of service, and first in rockbottom value—*Dunlop Traction Tread.*

Summed up, the facts concerning "Traction's" record are just these:—

We have been under rather than over in our claims, and "Traction" has been over rather than under in its service.

Two other excellent Dunlop Tires are "Special" and "Plain."

Moore's Paint Window at Exhibition

THE Benjamin Moore window display at the Canadian National Exhibition was a decided drawing card. It displayed a complete range of the firm's products in a true-to-life hardware window, located in a section of the Industrial Building which was frequented by hundreds of thousands of Canada's homemakers. The exhibit was most attractively arranged with display cards and advertising matter which worked into the general scheme of decoration in a way that caused much favorable comment. This Benjamin Moore window suggestion offered practical ideas not only to the good housewife for her future painting needs but also to the hardware clerk who was on the lookout for striking practical effects.

No better paints, varnishes or enamels are made than those manufactured by the Benjamin Moore Co. of Toronto. Moore's house colors, pure linseed oil paints, produce most delightful results, and are made for both exterior and interior work. They are all ready for immediate use, and are guaranteed to give satisfaction. Many beautiful effects are to be obtained by using the wide range of colors which the Benjamin Moore Co. manufactures. This firm also makes "Muresco" for wall and ceiling decoration. There is a quiet richness, elegance and restfulness about the Muresco tints that make an irresistible appeal to all lovers of clean, cheerful rooms. The variety of tints that "Muresco" comes in makes it an invaluable aid in all wall and ceiling decorating, and it is easily applied. "Tile-like" varnish made by the Benjamin Moore Co. in all colors, is another line that has unlimited practical uses in the home. It will restore weather-beaten lawn or porch furniture, renew chairs, linoleums or refrigerators, and can be used in scores of ways about the home for touching-up work. "Tile-like" dries hard and is elastic and durable, and the results, wherever it is used, are invariably satisfactory. It is a big seller, and purchasers always come back for more. The Benjamin Moore Co. has a most attractive line of advertising matter, color cards, etc., which are available for dealers handling its goods.

A great Toronto friend-maker

No product Toronto ever turned out has made more and better friends for the Trade than the Royal Oxford.

Toronto's industrial history takes in practically every line of quality goods that are manufactured. Since 1845, the foundation date of the House of Gurney, millions of articles have been sent out from the Queen City to make friends of the owners for the City of Toronto, but certainly none have better in this respect than Gurney-Oxford Stoves and Ranges. Our engineering practice and foundry methods have always been abreast of or in advance of the day: meaning friends amongst the public. Our sales and advertising methods have been bright, energetic and persistent, but always built on the bed-rock of Sincerity and Service: meaning friends for us amongst the Trade.

The Gurney-Oxford Dealer has a sales-making, friend-making franchise that has made good since 1845.

"Largest makers of stoves, ranges and heating apparatus under the British Flag."

AutoStrop Safety Razor Co. Limited

CANADIAN MANUFACTURERS OF THE AUTOSTROP SAFETY RAZOR

NEW YORK USA — LONDON ENGLAND

83-85-87 DUKE STREET
TORONTO

September 19, 1918.

To The Trade:

A friend dealer recently expressed surprise when he learned that the AutoStrop Razor is wholly manufactured in Canada. Although our advertising carries the "Made in Canada" slogan, there must be other dealers who are not fully informed on our operations, and we take this opportunity of imparting to you some "inside information."

The AutoStrop organization in Toronto, now numbers over two hundred employees. Our production of Razors for the first eight months of this year, exceeds the entire 1917 production by a hundred and ten thousand, and we are now providing to double the present output. To enable these accomplishments, some of our departments are operated day and night.

While our efforts are mainly for Canadian requirements, we have been called upon for assistance by our foreign branches, who cannot fully supply the demand for AutoStrop Razors, the bulk of which is for the Allied Armies.

Wherever Safety Razors for Army equipment have been adopted, the AutoStrop received first consideration, and the entire available supply was requisitioned by the respective Ordnance Departments.

This world-wide tribute to the AutoStrop is entirely due to its exclusive self-stropping qualities, which make it the most adaptable Razor for our and the Allied Armies.

While the AutoStrop is the best selling Razor in your stock, you are often called upon for advice by your customers as to the comparative merits of the Razors you sell. This is especially true when women buy Razors intended for overseas gifts, and in such instances you should remember that the AutoStrop is the most adaptable because of its freedom from blade renewals. A man on active service cannot purchase blades in the corner store, as is possible at home. With the AutoStrop Razor he is assured of satisfactory shaving results, because it is the only Razor that sharpens its own blades automatically, and is therefore always ready for use.

Yours very truly,

AUTOSTROP SAFETY RAZOR CO. LIMITED

S. C. Stapleman

Manager.

FINISHES FOR EVERY POSSIBLE PURPOSE

(Indoors and Out)

NO exhibit at Toronto Fair attracted more attention or more favorable comment than that of the Glidden Varnish Co., Limited, Toronto, in the Industrial Building. All day long the big display of Glidden products, Jap-a-Lac, Green Label Varnish, and flat wall finishes was a center which held interested crowds. The Glidden display was not only striking but interesting and profitable, especially to all home-makers and all automobile owners. The crowds watched with the closest attention the artistic effects so easily obtained by the demonstrator of Jap-a-Lac. It was apparent from the comments of the men and women gathered around the demonstrator that Jap-a-Lac suggested immediately to them a dozen practical uses to which it could be put in their own homes in touching up worn or discolored surfaces, fixing up floors, furniture and woodwork of all kinds. The lasting and delightful results to be obtained by its use made an instant and broad appeal, while the ease with which the work was done and the small cost for the material made it a doubly attractive proposition.

A feature of the Glidden exhibits which instantly caught and held every automobile owner who came by was the wornout body of an old Ford car. One half of it had been given a single coat of Glidden Endurance Auto Finish. The result was truly remarkable. That section which had received the Glidden finish shimmered with all the lustre and richness of a brand new car, in striking contrast to the dull, untouched surface which had not been coated. The fact that they could, in a few minutes, with no trouble at all, and at a cost of only $1.70 per quart, make their auto look as though it had just come out new from the factory, struck every auto owner forcibly, and when they realized that the Glidden firm manufactures Glidden Endurance Auto Finishes in nine different colors, the possibilities that exist were impressed. Handsome panels showing the really beautiful effects that may be obtained for carriage and similar work were shown in the Glidden booth also. The booth itself was finished most artistically with Glidden flat wall tints. They harmonized most effectively, and demonstrated to home-makers just what can be done with these goods. The exhibit was in charge of Messrs. D. B. Blackwell and J. Noble, who received many compliments upon its excellence.

TORONTO—the buying centre of Canada

For Every Finishing Problem, Glidden has the Right Material

For Skyscraper or for cottage, for the largest job or the smallest, Glidden Finishing Materials assure guaranteed results.

The practical painter for the big jobs, and the home-owner for the small jobs, are united in their enthusiastic approval of Glidden Products.

Green Label Varnishes, Jap-a-lac, Flat Wall Finishes, Endurance Auto Finishes and the complete Glidden line carry this uniform quality.

Made by paint and varnish makers of fifty years' experience, and with the most modern equipment and methods, this supremacy of Glidden Finishes is your safeguard in buying varnishes, paints and enamels.

Glidden eliminates chance in finishing materials by conforming in every product to the most rigid standards.

Carefully selected raw materials, scientifically manufactured, give assured results.

There is a Glidden Finish for every purpose—and each is *the* finish for its particular use.

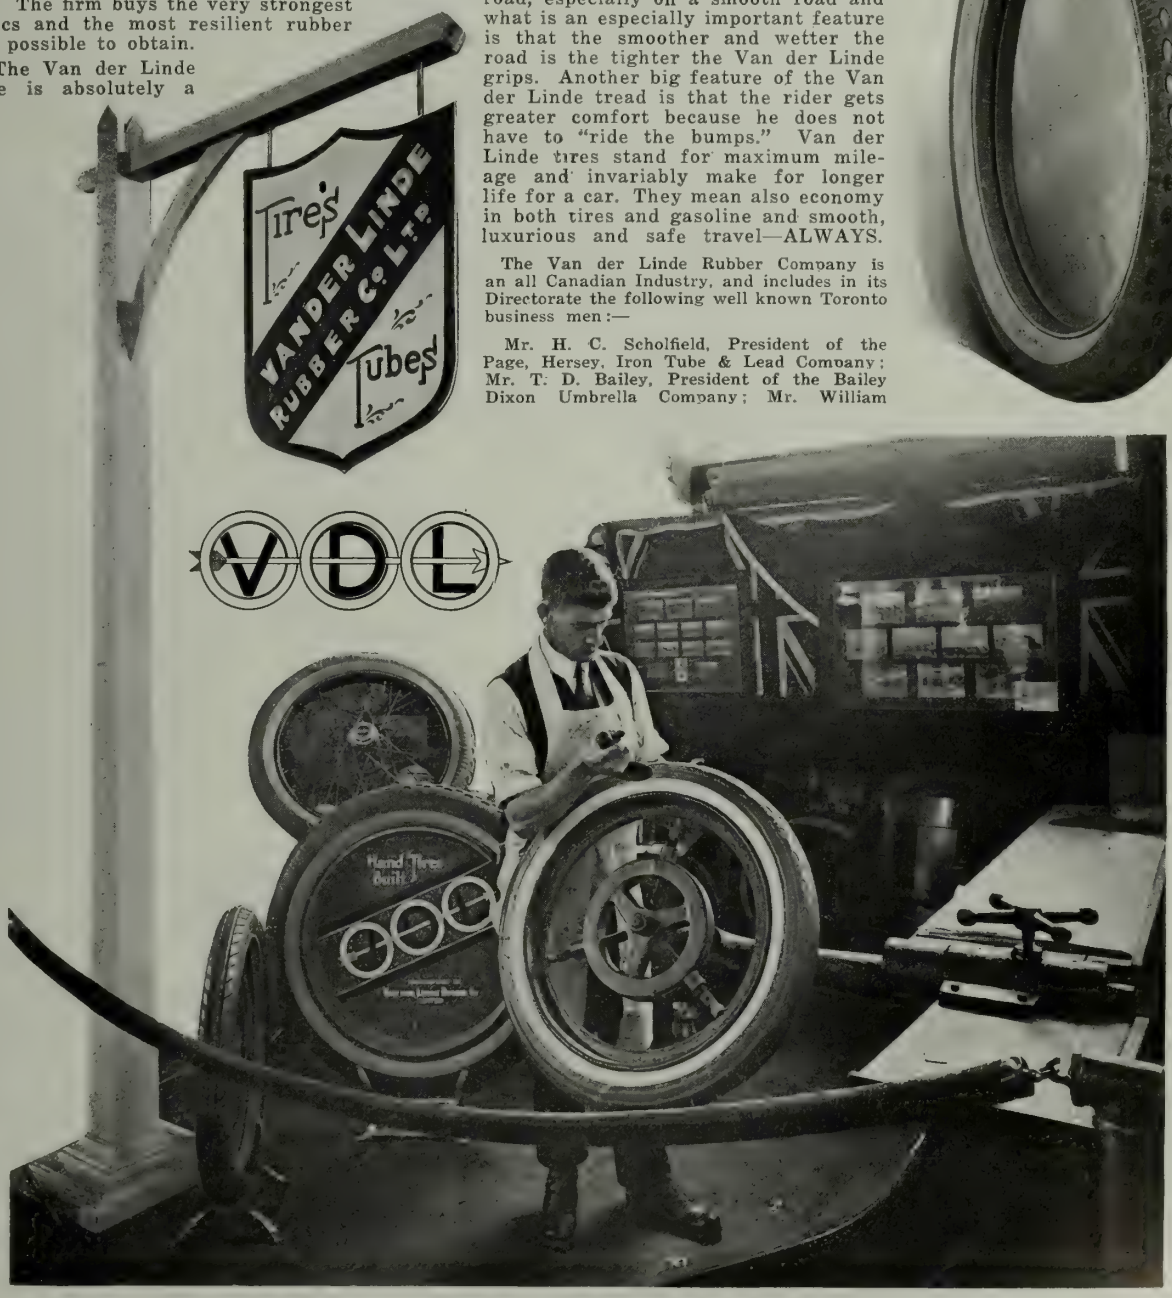
A High-Grade Hand-Made Tire

THOUSANDS of visitors to the Canadian National Exhibition watched with the keenest interest the process of tire making as demonstrated by the Van der Linde Rubber Company, 142 Weston Road, Toronto. Van der Linde tires are all carefully made by hand and the demonstration proved conclusively to those who saw it the advantage that a good, hand-made tire has over even a good machine-made tire. A feature that struck even the most casual observer at the Van der Linde display is that all the materials contained in the firm's products are selected with the greatest care and without reference to cost. The firm buys the very strongest fabrics and the most resilient rubber it is possible to obtain.



The Van der Linde tire is absolutely a high-grade product containing nothing but the very finest materials in its make-up. This, combined with good workmanship and a particularly smart finish, make it the ideal tire for the man who is looking for something "a little bit better." By the Van der Linde process of handmaking every size is a super size which means that they have a larger air capacity and a greater area of contact with the ground than is the case with the usual sizes.

The tread of Van der Linde tires differs radically from most makes in that the Anti-Skid effect is produced by suction instead of protuberances. This insures a firmer grip on the road, especially on a smooth road and what is an especially important feature is that the smoother and wetter the road is the tighter the Van der Linde grips. Another big feature of the Van der Linde tread is that the rider gets greater comfort because he does not have to "ride the bumps." Van der Linde tires stand for maximum mileage and invariably make for longer life for a car. They mean also economy in both tires and gasoline and smooth, luxurious and safe travel—ALWAYS.

The Van der Linde Rubber Company is an all Canadian Industry, and includes in its Directorate the following well known Toronto business men:—

Mr. H. C. Scholfield, President of the Page, Hersey, Iron Tube & Lead Company; Mr. T. D. Bailey, President of the Bailey Dixon Umbrella Company; Mr. William Croft, Sr., President of Wm. Croft & Son, Limited; Mr. Ralph King, Manager of the Dominion Glass Company, Limited; Mr. George C. Campbell, President of the Ontario Bar Association; Mr. C. J. Gibson, architect; Professor J. W. Bain, of the Toronto University, and Mr. C. B. Watts, of the Ontario Grain Growers' Association.

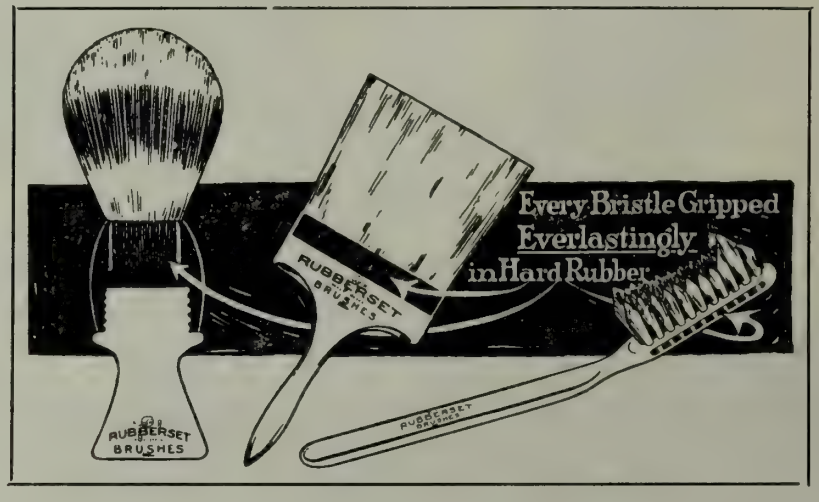
RUBBERSET BRUSHES

The Brushes that must make good or **we will.**



There is a certain definite standard in Brushes, below which it will not pay you to go. That Standard is measured by RUBBERSET—the Brushes with Bristles rooted firmly in a bed of Vulcanized Rubber.

Painters and decorators must have the very finest brushes to do their best work on carriages and motor cars, musical instruments, house interiors, furniture, etc. Men who shave themselves have RUBBERSET Brushes for the economical and invigorating morning shave. The busy Canadian housewife must have RUBBERSET Brushes to do her housework quickly and economically and she also needs the well-known RUBBERSET Toilet Brushes, Bath Brushes, Hair Brushes, etc., for her personal use. All these lines are on sale by Canadian dealers.

RUBBERSET Brushes are made by the RUBBERSET patented machinery for forming a solid bed of rubber around the base of the bristles in the brush. RUBBERSET bristles are not stuck in with metal, rosin, cement, glue or pitch, but held forever in vulcanized hard rubber, which cannot rust out, boil out, rot out or deteriorate in any other way and loosen the bristles. It will increase your business, your reputation and your profits to sell your customers the original—RUBBERSET—Brushes.

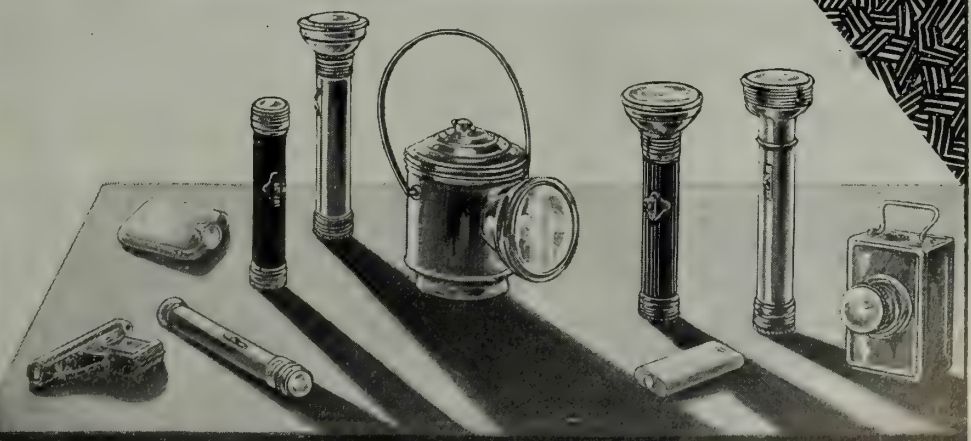
EVEREADY DAYLO

On Your Counter

—plus your window display and the right kind of sales effort in co-operation with ours—that's the winning combination for producing sales and multiplying profits.



Our consumer advertising, showing the many uses for DAYLO, impresses on the prospective customer's mind the need of DAYLO in every household. But the real buying incentive—the thing that makes him dig down into his pocket for the purchase price—is the goods on display.

A DAYLO window display says, "Here's the place to buy me," and ushers in many a sale. But DAYLO counter displays have created enormous sales amongst the class of trade that rushes in for something else and is caught and held by the display while making other purchases or waiting for change.

And don't forget that DAYLO sales bring repeats. No one expects a battery to last forever. You can build up a permanent and growing business in Eveready Tungsten Batteries and Eveready Mazda Bulbs. The big stores are doing it by keeping the Eveready line constantly on display.

Put in a complete Eveready line, push it and get *your* share of this business.

What the O-Cedar Polish Trade Mark Means

O-Cedar Polish Mops are well made—the mop itself being of the finest wearing texture—carefully treated. The fact that this product bears our trade-mark is the greatest assurance you can give your customer that this mop is the best that can be bought for the money.

O-Cedar Polish is skilfully tested. Before we place our trade-mark on a bottle of O-Cedar Polish we first make certain that this bottle of O-Cedar Polish is up to our standard—that it is just as good as any bottle of O-Cedar Polish we have ever manufactured. There is only one O-Cedar quality.

THEY SELL THEMSELVES—IF PROPERLY DISPLAYED

In order to create sales (other than those created by our advertising) you will find it very profitable to make frequent window displays of O-Cedar Products. Selling just as well in Summer as in Winter, these lines make an excellent profit for you. (Beautiful window cards and window hangers furnished upon request).

Write your jobber to-day about the O-Cedar special assortment and O-Cedar Profit Deals.

YOU CAN SELL ADVERTISED HARNESS

Made by SAMUEL TREES & CO., LIMITED., Established 1866 TORONTO, WHITBY

IMPERIAL BRAND HARNESS

THE PIONEER SADDLERY Manufrs.

Prompt and Reliable

HERCULES Leather-Chain Trace

A harness is as strong as the trace—no stronger. The trace takes the strain and the strongest trace is the best. The Hercules is a flat-shaped trace, strong as steel, flexible as leather, tough and unbreakable, made of steel chain covered with heavy leather, neatly finished in turned and rounded edges strongly stitched. Powerful heel chain and either clip or bolt piece at hame end; one and one-half inch solid leather billot. Does not chafe the horses and is tremendously satisfactory. If you don't have the Hercules Trace on your heavy harness, don' wait, order a set NOW. If your dealer does not have it, order from us direct. We will ship same day, on receipt of price.

Pioneers of Toronto's New Industrial District

THE above picture shows a true view of the refinery property of the British American Oil Co., situated at the foot of Cherry Street, in the Ashbridge's Bay section of Toronto's new industrial district.

The property, extending over twenty-two to twenty-three acres in area, is situated on the Keating Channel, which has a depth of sixteen feet, affording navigation for the largest lake vessels. It also has good switching facilities, which enables shipments being made over any line without delay.

This industry has been built up within the last thirteen years. To-day it keeps 300 to 400 tank cars on the move bringing in crude oil and reshipping the different refined products.

The following are the most important products made by the British American Oil Co.: **Gasoline, Benzine, Kerosene, Lubricating Oils, Paraffine Wax, Fuel Oil, Road Oils, "Ford" Motor Oils, "Chevrolet" Motor Oils, "Autolene" (name registered), three grades.**

We appreciate your enquiries and invite hardwaremen to look over the pioneer plant of the Toronto Harbor Commission's new Industrial District.

TORONTO MANUFACTURERS WINNIPEG

"1900" Washers Are Business Builders

AFTER twenty years devoted exclusively to designing and manufacturing Washing Machines we have perfected the most complete line of thoroughly efficient models on the market.

The "1900" Cataract Electric with copper tank (shown above) is a wonderful Washer. Large capacity, quick action, minor details highly developed such as Wringer pressure release, etc., quiet running, easy to operate and works off any ordinary light socket—washes and wrings at the same time.

The "1900" Agitator Electric Wood Tub machine is of smaller capacity but unexcelled for washing results and has the same swing wringer advantage and many of the minor features of the metal machine.

Our up-to-date line consists of two styles of hand operated machines, includes the famous "1900" Gravity Washer; the "1900" Agitator Water Power Washer which is a comparatively new model that is proving a tremendous success; the two new power (electric or engine) outfits already referred to, and a full assortment of high grade, beautifully finished hand and power Wringers.

We are also jobbers of the Simplex Ironing Machine—made in various sizes for heating by gas, electricity or gasoline and for turning by hand or power.

These Well-Known Washers Sell Themselves

We have built up this business largely by advertising. Before we obtained wide distribution we sold entirely by mail.

To-day we are still advertising; but every dealer who proves his worth is given all inquiries from his territory. The "1900" Washers are advertised in every publication that has proved its pulling power—and we've tried nearly every farm and class periodical in Canada. The papers now on our list bring in a satisfactory number of inquiries, which we immediately turn over to the dealers in whose territory they belong.

Displayed at the Fall Fairs

Our "1900" Washers have been displayed at the Toronto Exhibition, also Ottawa and London. Right now there is a splendid opportunity for you to stock the "1900" line. Women have seen our demonstrations and are in the market for a "1900" Washer. Every class of home needs some kind of a washing machine and in our complete line there is a "1900" Washer at a price any household can afford to pay.

The "1900" line will net you a splendid profit. In fact, the market is limited only by the number of houses in your territory.

If there is no "1900" dealer in your town, write to-day for further particulars of our dealer proposition.

SOMETHING ENTIRELY NEW

An Extraordinary Sifter at Ordinary Prices!

Fine screen has been adopted in making the Samuels' sifter which saves much more of the fine cinders than ordinary sifters, and is stronger. As the illustration indicates, the smaller ash can or pail of a Samuels' may be placed inside the waste can and so catch all the screenings which can then be removed more easily than when the larger can had to be carried out. The new feature also makes for longer life for the Samuels' sifter, since the waste can is not subject to the ashman's abuse.

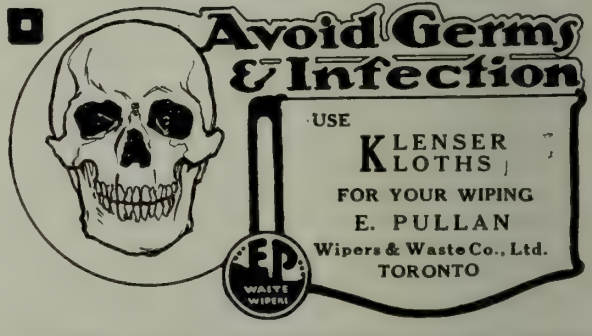
With this new method of collecting the screenings, the Samuels' leaves all other sifters hopelessly behind. The Samuels' is undoubtedly the sifter for sales and satisfaction, both from your own and your customers' point of view.

Order from your Jobbers.

J. SAMUELS 275 Queen Street West **Toronto**

Have You Figured It Out In This Way?

A salesman running to and from a cash office or register fifty times in a day requires, in the average, say, fifteen seconds each way. Detention at office for change making, thirty seconds, or ninety seconds to obtain change for each sale.



To be continued in our next advertisement.

P.S.—Nothing in the above is stated about the double check which our service affords against errors.

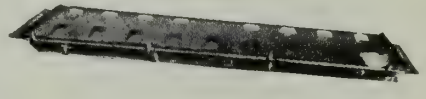
Here Is Your Way To Profits In The Trapping Season!!

New Humane Collapsible Animal Trap is Superior to Any Other Trap

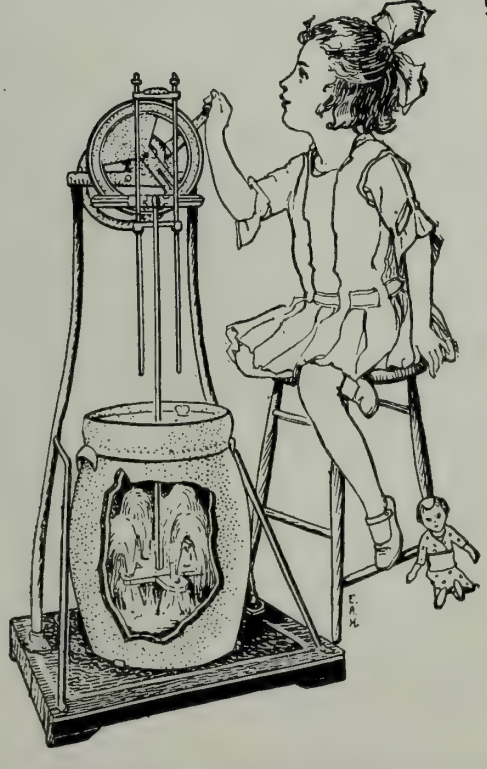


This is the only collapsible animal trap on this continent. Retails at $1.50.

Its method of construction is very simple, and easy to set—far less trouble is experienced than in the spring trap.

It is a surer catch than the spring trap, and in no way injures the fur.

It is freeze-proof and rust-proof—weighs only 1½ pounds, and can be carried in an overcoat pocket with ease.



Note: In this company every man is a returned fighter.

The Veterans Manufacturing Co.

17-23 Main Street, East Toronto

You Cannot Get Away From this Fact—

That the Reliable Patent Dash Churn (being an embodiment of the old-fashioned dash churn) cannot be excelled on this continent or anywhere else for speed and quality of butter produced.

Nor this One—

—that the Reliable Patent Dash Churn in addition to giving more butter in less time with less waste and less dirt, is always clean and sweet, always ready for use, and never gets out of order.

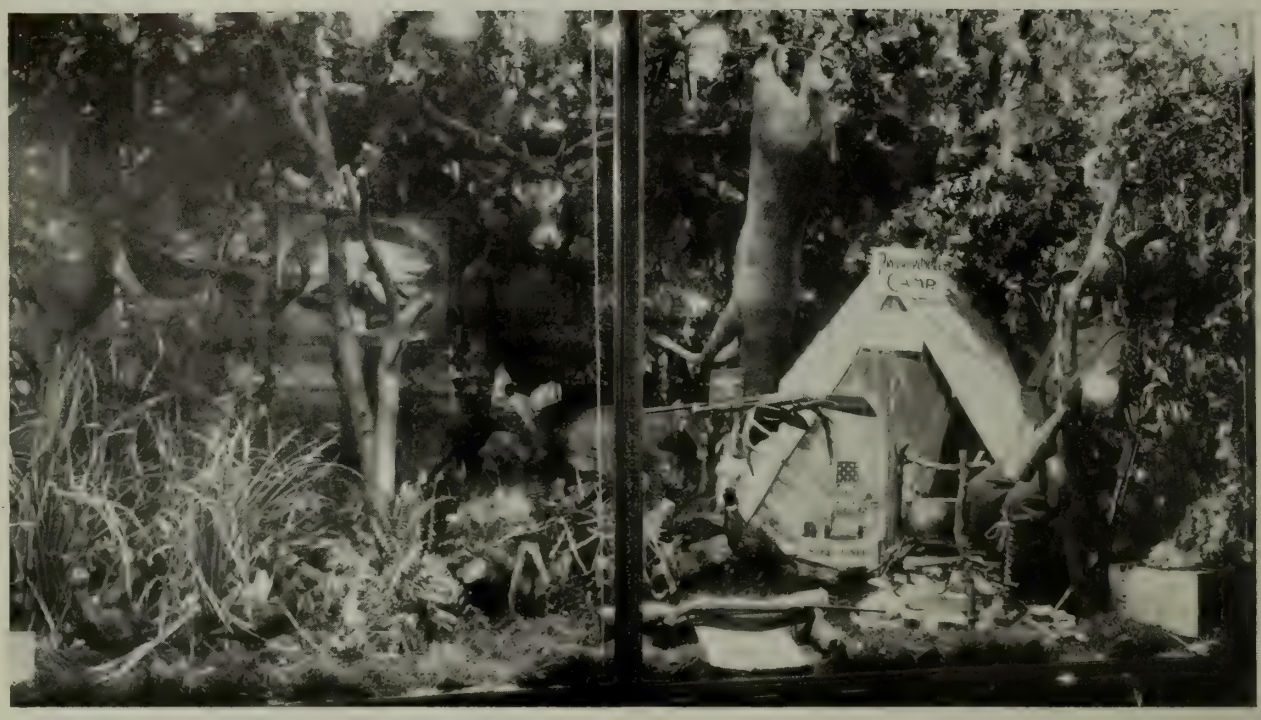
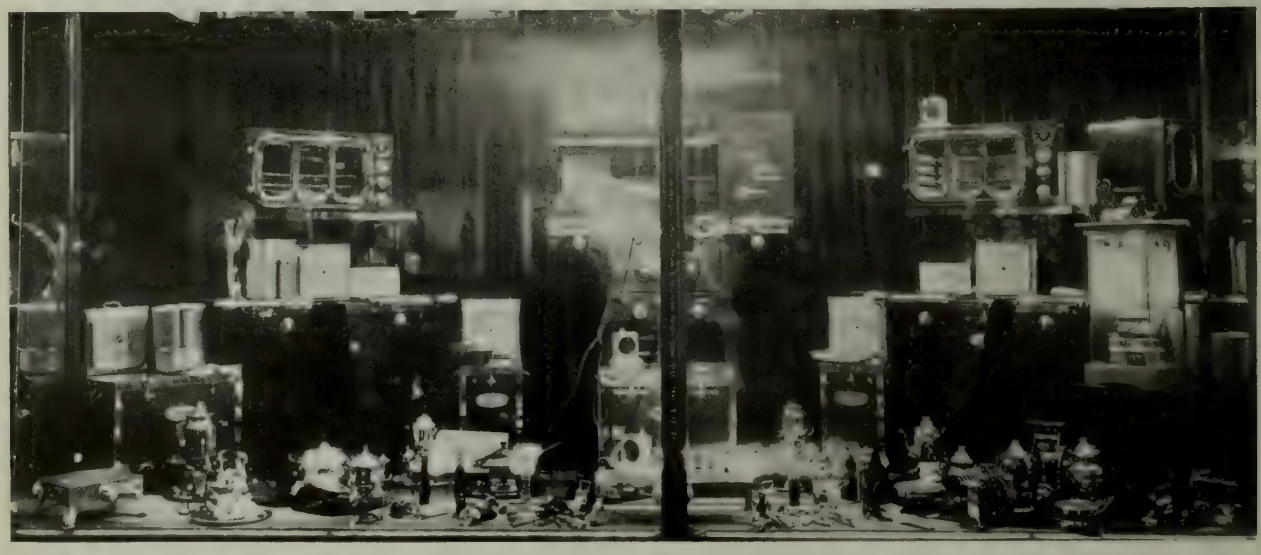
HEIRLOOM PLATE



FOR richness of design, high quality workmanship and that quiet elegance which marks really good goods from those which are poor or even mediocre, there was no more striking display at the Exhibition than that of the Canadian Wm. A. Rogers Co., Limited, of Toronto. Nearly a million visitors to the big fair took full advantage of the opportunity to inspect the exhibit of this firm. That they were more than delighted by the novelty of the exhibit—and the beauty and quality of the product of the firm, was demonstrated by the expressions of the approval to be heard throughout the groups which centered around the beautifully wrought pieces of Heirloom Plate. The life-like figures of the grandmother passing on to the young bride, the Heirloom Plate she had herself received as a bride half a century before, presented a picture to the visitors which made an instant appeal and compelled them to stop. Customers for Heirloom Plate were made right there.

The exhibit accomplished two big things. First—it demonstrated strikingly that dealers can sell a higher grade of silver plate than they have yet been given opportunity to sell. Second—it caught the attention of the buying public—your customers—and told them the story of the highest grade flatware on the market.



Thousands of people who in ordinary times would purchase Sterling are now, on account of the price of silver, looking for quality plated ware.

Unquestionably the exhibit was one of the most attractive in the building. Dealer helps, window cards, counter displays, etc., were also on display for the benefit of the many dealers who visited the booth.

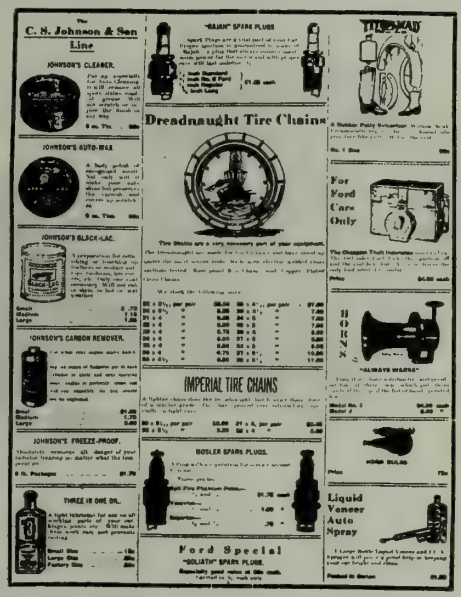
Suggestions for Fall Windows

Here is a display that will attract and hold the attention of every hunter who comes within sight of it and will bring him into your store to buy all the supplies he needs for that little shooting trip he is planning.

A display of electrical goods as shown above makes a most attractive showing at any time. Shown just now it will prove a big booster for fall business and incidentally furnish suggestions to many who may be planning Christmas purchases already.

Big Business in Motor Accessories

Steadily Increasing Number of Business Cars and Trucks Makes Splendid Chances For Hardware Dealers—Curtailment Spells Opportunity For Supplying Equipment—Are You "Cashing in?"



SOME idea of the way in which motor traffic is increasing in Canada may be gained from the figures for Ontario which show that no less than 83,790 cars were registered in the province during 1917. The other provinces bought in proportion and this year very large sales of autos have been made. They would have been still larger but for the fact that auto manufacturers could not meet the demands and there are, it is stated, thousands of orders unfilled. Few people at the present time have more money than the farmers and that they have been spending it freely is shown by the large number of new autos sold to them.

This opens a big field to the hardware man and many firms are cashing in on it extensively and doing a most satisfactory and profitable trade. Best of all, it is a business to which there seems to be no limit. There will be a constantly increasing number of autos and it will be only a matter of a short time before there will be thousands and thousands of tractors.

Spending Millions

The owners of automobiles and tractors will spend millions of dollars for accessories and supplies of all kinds. This is where the hardwareman can "cash in" and add a balance to the credit side of his year's business that will make him regard his accessory department as one of the best paying departments in his whole store. In addition to the autos and tractors there will be an ever increasing number of trucks to be used for delivery purposes. Thousands of

farmers in the Dominion are now using these and they are working out so satisfactorily that one sells another. The owner of a truck or a car has no horse to feed, or stables to clean, and not only this but he can go or come from market from two to three times as quickly as he could by old methods of travel and carry several times the load. In times like these when shortage of help is a problem, the truck or the auto means much to the farmer and they are buying them in large quantities.

Right After Business

Hardware men were among the first to see the possibilities of this trade and many of them have got in on the ground floor and as a result are doing a thriving business.

They are pushing the business aggressively and make a special point of keeping in touch closely with all car owners, whether in the city or country.

One of the best means of doing this some firms have found is to send out a bulletin. Sometimes this is one page, sometimes it is four. In these sheets are listed full lines of accessories and the returns from efforts of this kind have proven so satisfactory that the firms very often issue them several times a year.

How They Do It

The illustrations show three excellent pages from a bulletin issued by the Sumner Co. of Moncton, New Brunswick. It is attractively gotten up and contains much that is of real interest and value to every car owner in this firm's territory.

The firm says in making its announcement: "It has been the policy ever since our doors were opened to the public to increase our lines as local conditions seemed to demand. From time to time new departments have been added with this in view till to-day we have the folranges and fittings, chinaware, plumbers' tinsmithing, electrical, gas stoves, ranges and fittings, chinaware, plumbers' supplies, paint, oil and glass. It is our determination to make this automobile accessory department second to none of the others and we bespeak for it the same generous patronage you have given them."

Lots of Illustrations

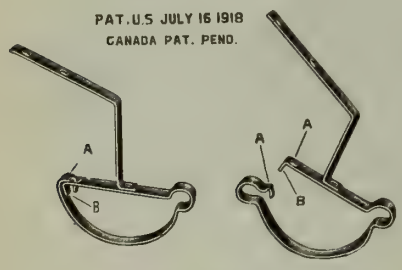
As will be seen from the cuts illustrations have been used plentifully and effectively. In addition there is a good description given of most of the goods and prices are marked. This is good business policy and has proven most effective in drawing trade.

A smaller sheet, but one that is well gotten up is shown on Page 97. It is that of the firm of Brace, McKay & Company, Ltd., of Summerside, Prince Edward Island. This firm specializes in Overland autos and accessories. Their bulletin contains only one page, but it is well illustrated and very attractively gotten up. Here also prices are given and description of articles besides the illustrations.

Splendid Business

There is another factor in the accessory business. Instead of spelling loss

Continued on Page 97



NEW HARDWARE GOODS

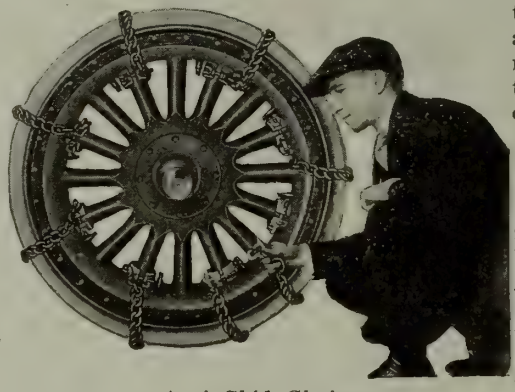
OFFERED TO CANADIAN HARDWAREMEN

TROUGH HANGER

Randolph A. Rehrauer & Co., of Two Rivers, Wis., have recently brought out a patented hanger for the attachment and support of rain troughs which it is said can be attached to the trough without the need of a single tool. Formed ready for attachment the hanger is so constructed as to allow same to be sprung upon the trough when by the aid of a novel locking device it is securely held in position and cannot be accidentally disengaged. Made of a single piece of band iron its practical arrangement

Handi-Klamp

Eaves Trough Hanger



provides a safe means of support even when in open position. This new hanger the concern claims can be attached in less than one minute, thus saving labor and expense. Made in standard shape and sizes for single and double bead troughs.

VLIT POLISH

Vlit polish for furniture and automobiles it is claimed puts a fine velvet finish on furniture, prevents dry rot and prevents furniture from becoming cracked from sun or heat. Vlit contains an ingredient which it is claimed repels flies. Used on automobiles, it is claimed Vlit puts on a polish which prevents mud from adhering to the enamel. Only one cloth is used in applying Vlit, and it is stated that it cleans and polishes in one operation, thus lightening the work greatly. Vlit it is claimed, cleans, polishes, and preserves a great number of articles. The polish is handled by Saunders & Co., 3 St. Nicholas St., Montreal.

AUTO SKID CHAINS

Prest-O Grip Anti Skid chains for autos and auto trucks it is claimed will take out any car that is stalled in the mud. Simply attach as many as needed and they will take you out is the

Anti Skid Chains

maker's claim. It is stated that they can be attached quickly and that there are no long pieces of chain to unravel in the rain. The short cross chains it is claimed are quickly and easily hooked on and there is nothing to wear out. Should one break simply unhook the broken pieces of chain, jump in and drive on are the maker's directions. The clamps are guaranteed against any defects in material or construction. The links are made with a wide flat twist which it is claimed results in maximum traction and wear with the least possible injury to tires. They are made by the Rowe Calk and Chain Co., of Plantsville, Connecticut.

VALVE LATHE

The Savidge Junior valve lathe, it is claimed, can be operated by anyone and takes the labor out of seating valves for Ford repair shops. It is equipped with a high speed steel cutter and is shipped ready for use. It is designed

Savidge Valve Lathe

for Ford valves and other valves with 5-16 inch stem and with cast iron valve heads up to 1¾ inches in diameter and forty-five degrees angle. It is claimed that the lathe can be held in one hand and operated with the other or that it may easily be clamped in a vise. This tool is manufactured by A. C. Savidge of Indianapolis.

ELECTRIC WASHER

The "Time Saver" electric washing machine is being manufactured by Beatty Bros., Limited, of Fergus, Ont. A feature of its construction is a solid foundation bed plate on which all the mechanism depends. It is claimed that the washer runs without noise, that it will endure the strain of continued use and that the parts will retain the careful adjustment given them in packing. The washer is made of cypress wood and has maple legs. It is driven by a one-sixth horse power motor. It is equipped with a dolly which makes sixty complete strokes per minute.

Beatty Bros. also make other lines of washing machines which are operated by water or hand power as desired.

Time Saver Washer

Future is Not Bright in Regard to Getting Supplies of Coal

"The coal situation in Canada will be at least as bad and probably much worse during the coming winter than it was last year" is the opinion expressed to HARDWARE AND METAL by those in closest touch with the situation. There is no prospect of getting anything like the supplies which are needed and everywhere people are being advised to make the coal that they can get go as far as possible. In many towns and cities all over the Dominion advertisements similar to the following are being inserted in the newspapers by either the councils or the special committees which have been appointed to deal with fuel problems.

GET READY FOR WINTER

It is satisfactory to know that you have a couple of tons of coal on hand, but this will not last long.

WHY NOT BE WARM ALL WINTER?

Try burning wood until the 1st of December while the weather is mild and save your coal for the months when snow drifts are high—the trains blocked and fuel of every kind impossible to get.

A WORD TO THE WISE IS SUFFICIENT

MUNICIPAL FUEL COMMITTEE

In the big cities it is feared that there will be much hardship especially among the poor and everything that can be done to meet the situation is being arranged for.

"A shortage of coal means a shortage of coal oil" said one of the large oil firms to HARDWARE AND METAL. "There has been an enormous demand for oil heaters of all kinds and this means that all available supplies will be drawn on. We have been endeavouring to meet the situation by increasing supplies and accumulating a reserve. We have been hampered by difficulties in securing labor and also in steel for building the tanks. It has been so hard to get steel that just as an instance of what we are doing I may say that we dismantled a steel tank that had not been in use for years, transported it a long distance and are rebuilding it in Toronto. This will cost us about three times as much as a brand new tank would have cost before the war."

Drain on Electricity

While there has been an enormous sale for oil heaters, the demand for electric heaters has been very great also. Thousands of them have been sold and there is still a great demand. This will create a drain upon electric power.

There is no question about it, the coal situation is not becoming serious, it is serious now. Just how acute it will become no one can tell. If anything, such as heavy storm periods, such as prevailed last winter, labor troubles, shortages of cars occur to handicap the railways in delivering the coal that is available the look out is not encouraging.

STEEL MAGNATES BUSY SOLVING PROBLEMS

(Continued from page 41)

10 per cent. added to wages have used up the June increment. Owners of some of the smaller underground mines in particular are urging their need of a higher price on next year's ore, to cover dead work which must be undertaken in the coming winter.

Ask Higher Prices

Galvanized sheet manufacturers will ask to have prices advanced at least enough to cover the higher prices they pay for spelter. Some wire and wire nail producers are urging claims for a higher price on those products.

Sentiment is divided between the view that the very number of the requests for higher prices will be convincing and the fear that the extent of the programme puts much of it in jeopardy.

Calls for More

The vast scale of the plans for the offensive in France appears in weekly calls for more steel. The distribution of 34,000 tons of barb wire for the government is just completed, with 22,000 tons fr France in abeyance, when larger war demands for this product came up than have been considered at any time thus far. In the Cleveland district, the placing of 10,000,000 additional shell forgings is one indication of the tremendous recent enlargement of the munitions programme. The ordinary consumer's chance of getting steel, judged solely by the developments of the past week, will grow steadily less in the final quarter of the year.

Some letting down of demand may come in the structural field. Probably all the fabricated ship work for next year has been contracted for, and it is expected that all essential work will be let before 1919, with a total that will not keep the monthly volume of awards to the 60 to 65 per cent. of capacity that has been the rule so far this year. The poor financial showings of the railroads may rule out much railroad bridge work that earlier was thought certain.

CHANCE FOR CANADIAN FIRMS

Chile, Argentina and Mexico are considered as being amongst most promising markets for toy makers in the future for Canadian firms. Last year there was a big demand from these countries and there is every indication that this year's will be even greater. The Japanese are after this business and have secured a good share of it, but owing to the difficulties in securing ocean tonnage have been unable to fill many orders.

BIG BUSINESS IN MOTOR ACCESSORIES

Continued from page 95

to the auto equipment merchant, the wartime curtailment of production recently announced spells opportunity. Because the new car output can at best be only twenty-five per cent. of full capacity, motorists will be forced to buy more accessories than ever before. Thousands who planned to buy new cars will "fix the old bus up" and that means business for the accessory dealer. Thousands of others who need cars and cannot get new ones will buy rebuilt cars temporarily. That spells more opportunity to the equipment dealer. Thousands of old autos have already been purchased and are being rebuilt and fixed up to meet the demands of the trade and the business has just begun. Motordom generally will, owing to conditions, try to make its cars last longer. Mr. Average Car Owner will give his car more care than ever. He will "tinker" with it more than he has ever done and naturally he will have to have more equipment.

Tainted Fruit Jar Ring Not Harmful

Elaborate Investigations Have Established the Presence of Phenol, but in Such Minute Particles as to be Entirely Harmless—No Fear of Ring That Has Not a Distinct Odor—Only Small Percentage Affected

WHILE investigations have proved conclusively that traces of phenol have been found in certain rubber jar rings, an elaborate series of investigations have gone to prove that beyond the characteristic and somewhat disagreeable odor of the product, the presence of phenol has had and can have no serious effects.

Ralph King, Toronto manager of the Dominion Glass Company, states that it is, as far as they can determine, the rings distributed by their company attached to glass jars of their manufacture that have caused the difficulty. These rings are manufactured for the company by a Canadian rubber concern, and through some fault in manufacture of a certain proportion of these rings traces of phenol have remained, which has given ground for this scare.

Only Small Proportion Tainted

Exhaustive investigations made by the Dominion Glass Compapny has demonstrated the fact that only a comparatively small proportion of the glass jars sent out have been equipped with these tainted rings. Unfortunately, however, they have been widely distributed, and it is impossible to get track of all of them. The company have also sold rubber rings in packages. These rings, however, they have been assured by the manufacturing company, have been made under a different process and are free from phenol. As the company have not had a single complaint from the many thousands of packages of these rings sent out, the statement of the rubber company is definitely corroborated. The Dominion Glass Company is doing everything in their power to get track of all of the offending rings. They urge that the merchants selling their goods should investigate to see if any of the goods in their stock give evidence of the odor of phenol, and they will gladly replace any of these goods on request.

Odor of Carbolic the Unmistakable Evidence

If the rings have no such odor the merchant may unhesitatingly recommend them. Phenol has an extremely penetrating and persistent odor, the minutest particle will make itself unmistakably evident. There is no possibility of it being present and undetectable.

As for the people who have already made use of jars that may possibly be tainted, there should be no thought of throwing the contents away. It has been definitely proved by numerous tests that the drug is present in such minute quantities that it could not possibly have the very slightest effect of an injurious nature. The odor alone is the chief trouble.

Absolutely no Danger

Phenol, or carbolic acid, it is stated, is not one of the more dangerous poisons, it is used internally as a medicine in vastly larger proportions than could possibly be found on a rubber jar ring. It would take half an ounce of the drug to prove fatal. It is therefore evident that there is no need for any fear in using the fruit even when the odor indicates it has been affected by phenol.

Odor Rapidly Disappears on Exposure to Air

It has also been discovered in the course of these investigations that especially with certain varieties of fruit the odor will entirely disappear if the fruit is left exposed to the air for an hour or so after the jar has been opened. For instance, rhubarb has been found to be tenacious of odor, while strawberries and raspberries, if left exposed in an open dish for a couple of hours before serving, will be found to be entirely free from any hint of odor, even though at the time of opening it was most marked. Moreover, the presence of this drug will have no effect on the keeping quality of the goods and the housekeeper need not consider the matter until it is time to open the jar.

Accusations of German Machinations a Silly Invention

So much for this phase of the subject. The serious part of the matter is not in the discovery of the presence of this drug, but the way in which the newspapers of the country have featured the matter. To ascribe it to German agencies is of course absurd, the newspapers publishing this childish yarn must have known that it was absurd, but it has caused a panic among the housekeepers who in many instances have readily accepted this suggestion. It is this factor that is the serious one for the handlers of these goods; for that reason the merchant handling these lines should be well posted in the matter, and should be able to convince his customers that it is only a comparatively infinitesimal number of these rings that have been affected, analytical examinations of various other brands of packaged rings having shown an entire absence of any undesirable substance, while even among those sent out by the company whose rings have been found to be affected a very large proportion would be found to be absolutely free from any undesirable characteristic.

Extensive Investigation

As has been stated, extensive investigations have been made. Mr. McGillivray, of the Canada Food Board and Dr. McCullough of the Provincial Board of Health of Ontario have made innumerable tests, all of which have demonstrated the fact that no danger was to be feared from the use of these imperfect rings. In view of these facts the Attorney-General of Ontario, the Hon. I. B. Lucas, has made a statement covering the matter. This statement is as follows:

The Attorney-General's Report

"After a conference between the Chief Officer of Health for the Province and representatives of the rubber company by which the rings were manufactured, the Dominion Glass Company and the Food Controller, the following facts were adduced:

"Phenol, or carbolic acid, is used in the manufacture of some of the rings supplied to the glass trade. Some 3,000 gross of these rings were placed on the market. In the preparation of the rings in question, .017, or seventeen one-thousandths of a grain of phenol is used in each. In their further preparation the process used is of such a character that even this trifling quantity would ordinarily become evaporated. In some cases it appears that the phenol has remained in the rings, and in the process of preserving may have communicated its odor, which is very penetrating, to the fruit. A number of chemists, including the chief chemist of the board, have given as their opinion that although odor may have been communicated to the fruit in some cases, there is absolutely no danger to the user of the fruit. These views are supported by the fact that the medicinal dose of phenol is one to three grains, while the maximum amount in a ring is only .017 of a grain. Of that the chairman of the Canadian Research Council says:

Only Small Percentage of Phenol

" 'Traces of carbolic acid were found all right, but the quantity was so small that a humming-bird might have swallowed the whole amount in one of them and not have suffered even a headache.'

"Mr. Rogers, government analyst, reported that in the Bracebridge case, while the rings contained a small quantity of phenol, the fruit showed none. The board has evidence in their possession to the effect that a gentleman had jars of all varieties of the fruit complained of and which had an odor of phenol brought to his home and emptied into glass vessels. Of these he partook freely at successive meals without the slightest ill effect, and further, that on exposure to the air the phenol odor rapidly disappeared. For this reason any fruit having an odor of the kind, which is very characteristic, should be

exposed to the air. There is no need to destroy it.

"Phenol is commonly used as an internal remedy in the dose already mentioned. The fatal dose is about half an ounce.

Absolutely no Danger

"The Provincial Board of Health, having these facts in view, desire most confidently to assure the public that preserved or canned fruit of any kind showing the odor of phenol may be used with perfect safety."

PREFERENCE LIST MAY RESTRICT CANADA

(Continued from page 44)

the mills. As a matter of fact it is becoming a saying among the mill men when they are approached by the warehouse men, 'I have an A-1 desire to serve you, but only a B-4 ability.' The arrangement as it stands at present gives the advantage entirely to the mills.

May Get Less in Future

"It looks as though there would be no increase in the allotment of material for this country. In fact, it really looks as though there might be a considerable cut in the volume of material for the Dominion. The sheet situation is causing not a little worry to a good many of the Canadian houses. There is a queer situation just at the moment. The big mills that can convert from sheets to plate have been ordered to do so by degrees. The first move was that 25 per cent. less billets should go to the sheet mills, that material being turned to the plate rollers. Now there has been notice sent out, and it will be operative in a few days from this, that another twenty-five per cent. shall be taken for the plate producers. The little mill that cannot turn over to anything but the rolling of sheets, is left more alone, and to-day there is more money in the turning out of sheets than in the making of plate. That condition is not likely to run much longer, and it is these purely sheet mills that have been looking largely after the Canadian trade in that particular line.

The "Vultures There"

"There was one mill man in Pittsburg," continued Mr. Near, "who gave me a pretty good outline of the demand for steel. He stated that there were jobbers hanging around there all the time in the hope that there would be a little over on the order of some firm that they might have a chance to buy. They also have the hope that there may be some half-spoiled material coming from the rollers that will not do for contract work. They hang around here for these pickings like a lot of vultures most of the time. Anything that is steel —that is about the extent of their specifications. He laughingly compared this to the specifications that the Canadians brought down, expecting to get them attended to at the mills at once. The Emergency Fleet Board has a faculty of sending out specifications for a lot of work that has been carefully worked out in advance and which requires an immense amount of care in the mills. There is generally a grand scramble to see if this particular order can't be loaded on to some other mill.

Have No Ruling

"As a matter of fact," concluded Mr. Near, "the Canadian warehouses have no ruling or standing at Washington. We are now, and have been for some time, practically at the option of the mills as to whether we keep going or run out of stock. The trade is gradually working into a narrower margin and I can't see anything that would make me believe that the situation is likely to be relieved in the near future."

SELLING CANADIAN HARDWARE ABROAD

After the winning of the war, says *Financial Post*, the best business minds in Canada are giving their thought to organizing Canadian trade so that we may be able to sell enough surplus goods made from Canadian raw material to enable us to pay our taxes and other debts arising out of the war, like pensions to the splendid men who have fought for us at the front and to their families who have been bereaved.

A number of public-spirited men have contributed large sums of money to carry on the work of organization. Sir Thomas White very wisely tells us we must produce, produce, produce. The Government, supported by the country, is preparing to spend large sums of money extending our foreign trade. Even one whose vision is as narrow as that of the editor of the Toronto *Telegram* must see that one of the things absolutely necessary to enable Canadians to live under the heavy taxes now upon us and still greater taxes to come is that we must sell more goods in foreign markets.

With all these interests agreeing upon and working towards this end we find a highly placed Government expert throwing obstacles in the way of this development, M. E. Nichols, director of public information.

The manager of HARDWARE AND METAL, the weekly business paper, encloses a letter received from the Rideau Specialty Co., Smiths Falls, Ont., which he says is typical of information he has received from many others. The letter says in part:—

"We have been securing quite a considerable business in Australia, South America and New Zealand, and in each instance it was our small advertisement in HARDWARE AND METAL that secured this business. We feel thankful that we advertise in your paper because it brings results."

The manager says further it would cost many thousands of dollars and take years for a representative of a Canadian firm to call on the 1,200 foreign buyers of Canadian metal goods who receive HARDWARE AND METAL.

In the face of this, Mr. Nichols, who has failed in his attempts to run two daily newspapers of his own, has the presumption to place his opinion before all these business experts and say that business papers, like HARDWARE AND METAL and *The Financial Post*, are of no public value, perform no public service and should be eliminated from the newspaper mails.

Flashlight Would Have Saved Loss of $40,000

A fire loss of $40,000 would have been prevented in Montreal this week by the use of a flashlight costing one dollar. A lad employed by the drygoods store of Thomas P. Oakes at 709 St. Catherine St., East, was sent into the basement to get some cotton. In order to find what he was looking for he struck a match. The burning match fell on some cotton and in a few seconds a fierce blaze was in progress. The lad was so terrified at the sight of the fire which he had accidentally started that, after screaming "Fire" a couple of times, he fainted. The employees called the department and when the fire fighters arrived the flames were spreading through the whole store so fast that they could do little to save the stock. They got the unconscious boy out of the basement. The fire was so fierce that a second alarm was sent in and for a time it looked as if the entire block would go up in smoke. Two firemen were overcome by smoke and had to be rushed to the hospital. After a two-hour battle the blaze was checked and the loss will be all of $40,000.

It is simple little accidents like this that have sent Canada's fire losses soaring in the past few years. Last month alone the fire loss in the Dominion was $3,034,000. The fire losses in the United States and Canada for the eight months ending August 31 were $200,036,285. Many of the losses were due to "accidents" or "carelessness." In this case at Montreal had the boy been provided with a flashlight there would have been no fire. There is a big selling point here for the retailer to make in selling flashlights.

American Automobile Shows Are Cancelled Because of Exigencies of War

THE National Automobile Chamber of Commerce has canceled the national automobile shows of 1919, to have been held during January and February in New York and Chicago, at the request of Bernard M. Baruch, chairman of the War Industries Board, and George N. Peek, commissioner of finished products.

Going further to meet the views of the War Industries Board, the automobile industry leaders have urged promoters of local shows for automobiles, trucks, or accessories to abandon all plans for such during the coming winter.

Desire for Co-operation

The reason given to the industry for this action by the Automobile Chamber of Commerce is a desire to co-operate with the War Industries Board in plans for conservation of fuel, labor, and transportation.

The question of advisability and practicability of holding these shows, both national and local, was taken up with the War Industries Board, by Hugh Chalmers and Alfred Reeves, of the National Automobile Chamber of Commerce. Mr. Peek strongly urged that all such exhibitions be abandoned for the winter. Mr. Chalmers presented the views of the War Industries Board to his chamber of commerce, and Mr. Peek has received from Mr. Reeves, general manager of the chamber, a letter stating that the directors of the chamber concurred unanimously in the opinion of the board and has adopted the following resolution:

Text of Resolution

"Resolved, That the promotion of national automobile shows during the winter of 1918-19, with consequent use of transportation, fuel, and labor, would in the opinion of this board be inconsistent with the patriotic obligations of the industry and that, therefore, national shows be suspended until further action of the association.

"Resolved, That for reasons expressed in the foregoing resolution, promoters of local and other shows be respectfully requested not to hold automobile, truck, or accessories exhibitions during the winter of 1918-19."

This action may have an important bearing on Canadian auto shows, which were in contemplation. Only recently, after a great deal of discussion, it was decided to hold an sautomotive show in Montreal. This exhibition is to include many lines of practical war value, especially tractors.

Retailers Are Being Asked to Check All Accounts Accurately

THROUGH the medium of the retail credit men's associations, boards of trade, chambers of commerce, and wholesalers and jobbers Commissioner of Internal Revenue Daniel C. Roper is sending to the retail merchants of the United States a personal letter urging the necessity for maintaining an accurate system of accounts.

The $8,000,000,000 revenue bill now pending in Congress means an average tax of $76 for every man, woman, and child in America. "In many businesses," says Commissioner Roper, "taxes will be one of the largest items of expense. It is of the utmost importance, therefore, that every concern, large or small, whether corporation or partnership, or individual, shall maintain an exact record of its receipts and expenses, in other words keep accurate accounts. Taxes should be considered as an expense for the year for which they are assessed rather than for the year in which they are actually paid, and the necessary reserves should be provided at once.

No Special System

"No special system of accounts is prescribed by the Bureau of Internal Revenue, but the books should show in detail inventories, purchases, sales, capital investments, depreciation, and similar items required in making up income tax returns.

"Every merchant should study the income-tax law and regulations and see to it that his accounts are kept in a manner that will enable him to determine his net income for taxation purposes. Aside from the necessity of keeping systematic accounts in order to comply with the Government's requirements, every progressive merchant should adopt an approved accounting system for the good of his own business. In no other way can he further his financial interests more effectively.

Bad Debt Losses

"The bad-debt loss of the nation, which runs into large figures annually, is due in large measure to inexperience and inability. If merchants would keep even the simplest books of account the bad-debt wastage would be reduced materially, for inability and inexperience are usually marked by the absence of an accounting system.

"The man who knows the exact conditions of his business from day to day has an immeasurable advantage over the individual who has no records upon which to base his operations. It is the duty of every citizen, especially in these war times, to keep in such close touch with his business through record keeping and otherwise as to maintain the greatest efficiency and render to his Government every cent due in taxes."

Standard System

It is expected through the various agencies employed by the bureau to place one of these leters in the hands of practically every retail merchant in the United States. The National Association of Credit Men, with headquarters in New York, not only has assured the bureau of its cooperation in the dissemination of the letter, but it is at work on a uniform system of accounting to be supplied merchants at cost.

Cause of Failures

"Credit men generally," said a representative of the national association, "have found by experience that a large number of failures result because the men who fail do not have a regular system of acounts, and, therefore, do not know their financial condition from time to time. The National Association of Credit Men recognises this condition and has been co-operating with retailers in a movement to remedy the situation."

Must Make Reports

Persons, corporations, partnerships, and associations liable to any tax imposed by the war-revenue act are required to keep such records and render under oath such statement of their accounts as the Commissioner of Internal Revenue may prescribe.

By adopting and maintaining an accurate system of accounting, the merchant, it is pointed out by Commissioner Roper, will be able to place before the internal revenue inspector book records showing how he arrived at his statement of net income, thus saving himself annoyance and expense and at the same time facilitating the Government's task of collecting the war revenues.

TRADE INQUIRIES

683. **Brushes.**—A London company of importers, exporters and agents possessing representatives in all the principal cities of the United Kingdom, and also in France, and claiming a large connection with buyers of brushes of all kinds, which they purchase outright or on commission, invites correspondence and samples from Canadian manufacturers, with a view to post-war business. Canadian, American and English references.

684. **Gardening implements and tools.**—A firm of importers, exporters and agents, represented largely in the United Kingdom and France, would be glad to hear from Canadian producers of gardening implements and tools, and to inspect samples, with a view to after-the-war business. Canadian, American and English references.

688. **Electrical material and machinery, etc.***—A house in Milan wishes to act on a commission basis as sole agent for the whole of Italy for Canadian firms interested in exporting to Italy electrical machinery, metals, iron and steel pipes for gas and water installations and for aviation.

691. **Agency.**—A firm in Milan would act as sole agents for Canadian companies on any of the following products: Metals, lumber, machine tools, electrical and railway material, chemical and colonial products.

*These inquirers specially state that they are interested in hearing from Canadian companies for after-the-war trade, even if present shipments are impossible.

THE CLERKS DEPARTMENT

THE OFFICIAL STEEL-BUYER FOR THE ALLIES SOLD NEWS

Almost Drowned in the Johnstown Flood—A Street News-vendor—A Messenger at $5.00 a Month, J. Leonard Replogle is Now Worth Many Millions

Young Replogle underwent a terrible experience, says B. C. Forbes, in "Forbes' Magazine." The sixty-foot wall of water which broke loose from the reservoir on the hills swept the Replogle home from its foundations. At the instant the upheaval came all the family were clustered around a bed, kneeling in praper. An aunt and cousin were at once killed. As the house reeled and pitched on the tumultuous tidal wave the Replogles clung to whatever they could seize. The mother clasped a three-months'-old babe and not once during the two miles of terrible tossing which was suffered did she release her hold. Finally the house was thrown against the Pennsylvania Railroad stone bridge. Through the whole horrible night the family crouched on rafters in intense cold, for every one of them had been immersed in the water oftener than once.

An Inquisitive Messenger Boy

In the morning the father succeeded in making his precarious way from one stranded house to another for help, and the mother and babe and the other children were rescued. They saved their lives but nothing else.

All "Len's" hopes of entering college vanished. He must immediately find work. He applied at the largest works in Johnstown, Cambria Steel, and was taken on as a messenger boy. His chief duty was to carry messages from the head office in the center of the town to the laboratories and the plants. It was not his business to study what any of the reports he carried meant. It was not his business to learn the difference between pig iron and tempered steel. It was not his business to poke his nose and his eyes into every department of the works while delivering his messages or at the lunch hour.

But Messenger Replogle did all these things. In the evenings he read whatever boks he could lay his hands on which discussed steel. He contrived to spend every spare moment in the laboratories.

The messenger was a nuisance to the laboratory workers—but was attracting the notice of his superiors in the office by his extraordinary intelligence, his boundless zeal and his restless energy. It was not long before he was promoted to the shipping department.

His dependability later won him the position of timekeeper. The position gave him an insight into other phases of how the company was run, but his inclinations ran to the physical manufacturing steel products. His laboratory knowledge was steadily widened, and by-and-by he came to be recognized as something of an expert on the treatment of metals by heating and the effect of adding different alloys to the new material.

The railroads were then having trouble with axles. The axles then in use were not always able to withstand the strain of increasing car loads and the greater speed introduced by the railroads. Young Replogle was made assistant superintendent of the forges, axle and bolt department. Bolts were added to his list largely because he had invented a thread-rolling machine which could turn out bolts faster and cheaper than anything then in existence. Replogle had such success in improving the composition and the strength of axles that he was soon made chief superintendent of the department and it was under his managership that Cambria won fame and millions as the maker of steel axles which rapidly displaced the old iron ones. These new axles were produced by what was called the Coffin process.

The Cambria had hit upon a good thing. How could they best profit by it? Their axles, treated scientifically by heat and with the proper chemical ingredients, were better than anything the railroads were using. But Cambria's problem was to convince the railroads of this fact—and to book orders. The management laid their heads together.

"Why not put 'Rep.' on the job?" they concluded. "He knows the whole business from A to Z. He knows how to talk the language of the fellows who handle the axles as well as the highbrows interested in their composition. And he probably will develop into a crackerjack salesman with that smile of his and his genial ways."

A Master Salesman

And Replogle made good — 100 per cent. good. He could talk chemistry to chemists. Laboratory sharks could not trip him up, for he knew all their tricks and formulas. He could explain to practical men exactly how and why Cambria's axles would outwear the iron ones and save a lot of money. He could handle buyers, too.

This master salesman was once questioned—what was the chief secret of successful salesmen, what was the key to the art?

"I know nothing about the art of salesmanship." he replied with a broad smile. "The only thing I have learned is that a salesman should be a good listener. Many salesmen try to do ninety per cent. of the talking and hardly let the other fellow get in ten per cent. Now people have their own troubles and their own problems, and you have to show a proper interest in them. You are far more likely to get an order from a man if you try to understand his position and enter sympathetically into his problems than if you rattle off a line of talk of your own. I tried always to put myself in the other fellow's place and, of course, if I was ever able to make a suggestion I was only too glad to do so. But there is no 'art' in that. That is simply exercising common-sense and being human."

Of course, Replogle's record impressed the management. He booked so many orders and cracked so many hard-selling nuts that he was made superintendent of the order department. But Replogle was more than a salesman. He had studied the steel business from under-the-ground up. So he was appointed first assistant to the president, Charles S. Price, who was very proud of his "find." So much faith had President Price in his brilliant young aid that, when obliged to take a long leave of absence because of ill health, he delegated all his duties and powers to Replogle.

At thirty-six J. Leonard Replogle was in charge of the plant which he had entered as a $5-a-month messenger boy. And under the ex-messenger boy's regime Cambria broke all its records for production and profits.

Ascribes Success to Baseball

When President Price resigned and William H. Donner was elected his successor, Mr. Replogle was made vice-president and general manager of sales, removing to the principal office of the company at Philadelphia.

"To what particular thing do you ascribe your early successes?" I once asked Mr. Replogle.

He laughed outright. His reply was typical of his modesty.

"To having been manager of the Johnstown baseball team. I know this is true because Mr. Price, our president, said so himself. He used to declare that it was the way I ran the team that took his fancy, and it was a good team, too," Mr. Replogle added quite seriously, showing more enthusiasm over this part of his career than any other I tried to get him to talk about. "Don't you know," he continued, "that the Johnstown baseball team was the finest independent team in Pennsylvania and that it licked every other team outside of the National League?"

Mr. Replogle didn't say that his success was in any measure due to the fact that for eighteen years he started work before seven o'clock every morning and that from the time he was given charge of other men—a thousand before he was twenty—he never quit until he had seen the night force safely started.

That a new star had risen in the steel firmament became generally known throughout the steel world. Various offers were made Mr. Replogle. One concern was willing to give him the salary paid the President of the United States. He had larger visions.

In time the kind of opportunity he sought came to him. The American Vanadium Company, after trying all other means, offered to engage his services on a commission basis. Under the arrangement finally made, if Mr. Replogle could not increase the company's business beyond its previous maximum

he would earn practically nothing; if he could expand it to new proportions he would share in the results.

This was a sporting proposition. It appealed to Replogle. He would have to win out or drop out.

Also, vanadium was a material dear to Replogle's heart. Here was a species of metal better than anything which he or anyone else could produce with all their chemical skill at Cambria or elsewhere in the United States. It had sold at $4.800 a pound twenty-five years before. It combined extraordinary strength with relative lightness — that is, a given weight and thickness of steel treated with vanadium would withstand strains and carry loads which would kill a like weight and thickness of other steel. It opened up new engineering possibilities.

Vanadium Mining Difficult

There are romance and difficulties attached to producing vanadium. The world's greatest deposit of vanadium ore is over three miles up in the air, so to speak. The Vanadium Company's mines are situated more than 16,000 feet up the Andes Mountains in Peru, up near eerie, snow-clad mountain peaks where the air is so rarefied that very few animals can exist in it. To lay a railroad or even build roads up the precipices which lead to the ore beds would be an utter impossibility. Not even horses, not even mules, not even donkeys can scale the mountain paths. Every pound of ore has to be strapped to the backs of llamas, those curious mountain-climbing beasts. Some 10,000 of them are constantly employed carrying the ore on the first part of its journey to the port of Callao, whence it is shipped to Pittsburgh, smeltered and wrought into vanadium steel.

So in the spring of 1915 he severed his connection with Cambria and became vice-president and general manager of sales for the American Vanadium Company with offices in New York. In the first month he didn't earn expenses; in the second month he was a little ahead —he maintained his own selling organization both here and in the principal cities of Europe, paying for them out of his own pocket. In the third month his income was quite good. Within a year he had expanded the company's business so that he was earning several times the salary of the President.

As with iron, Mr. Replogle tested and experimented with vanadium and found it adapted for many purposes beyond the reach of ordinary steel. Automobile manufacturers became convinced that they could use it most advantageously for certain purposes. It was the ideal material, also, for certain classes of the enginery of war—submarines, aero-guns, aeroplanes and big guns. Its power of resistance also made it invaluable for such things as steel helmets.

Within two years James J. Flannery, the creator of the vanadium industry, who was then the president, insisted that his friend "Rep." should take the presidency and relieve him of his many burdens. Mr. Flannery as chairman, and Replogle as president, are now the dominant factors in the vanadium business.

But meanwhile Mr. Replogle was planning and doing other big things. He blossomed out, not merely as a maker and seller of steel, but as a financier.

Quickly grasping what the European war would mean for the iron and steel industry, Mr. Replogle in 1915 began to look around for plants which he might acquire. Mr. Schwab had conceived the billion-dollar United States Steel Corporation; and now Replogle conceived plans for organizing an enterprise second only to it. His first thoughts naturally turned toward Cambria Steel. Although by this time he had left that company, he well knew its potentialities as a money-maker. His vision also reached to other plants.

Now it so happened that the courts had instructed the railroads to dispose of all outside interests and confine themselves to transportation. The Pennsylvania Railroad owned 240,000 shares of Cambria Steel, enough to form the basis of swinging control. Mr. Replogle approached the Pennsylvania people.

"I assume your Cambria Steel stock is for sale?" he asked the executive in charge, Vice-President Tatnall.

Mr. Tatnall said it was.

"What's your price?" asked Mr. Replogle in business-like fashion.

Cambria shares were selling around their par value of $50, but the Pennsylvania wanted a higher figure. A price of $60 per share was mentioned.

"I'll give you $750,000 for a three months' option on them at your own figure of $60 a share," Mr. Replogle boldly purposed. This dicker, with certain modifications, was agreed to.

Fights for Control of Cambria

Whispers of what had happened began to circulate in steel and financial circles, and President Donner, of Cambria, immediately started to fight for control. Neither he nor Replogle could plunk down the $15,000,000 involved. But each had friends and a battle royal for mastery of Cambria began. Mr. Replogle had been accumulating Cambria shares for his personal investment for years. And now lively activities ensued. Finally one Tuesday the Pennsylvania told Mr. Replogle that they would give him until Friday to raise the $15,000,000. They would not deal with any syndicathe; they would deal only with him.

Among others who had spotted the new steel wizard was the powerful international banking house of Kuhn, Loeb & Company. Negotiations were opened by the Kuhn-Loeb-Replogle-Campbell combination for the acquisition of control of the big Lackawanna Steel Company, the Youngstown Sheet and Tube Company, and the Inland Steel Company. The proposal was to merge all these enterprises and also Cambria Steel into a $250,000,000 organization, a new steel trust of formidable dimensions and capabilities, with Replogle as its practical head.

Another influential group headed by ex-President W. E. Corey of the Steel Trust and backed by tremendously powerful financial interests entered the field and competed for control of some of these properties.

The merger rumors sent the various stocks skyward. Cambria shares rose from $60 to $80 amid much excitement in Wall Street. Wall Street dearly loves mergers and merger rumors and reports.

Without warning, the Lackawanna Steel people kicked over the traces and refused to sell. In half an hour J. Leonard Replogle knocked at the office door of Mr. Corey, head of the other merger group.

"Do you want to buy Cambria?" asked Replogle.

"I might. How much?"

"Eighty-one dollars a share."

"It's a go. I'll take it," said Corey.

And before the news became known that the great Cambria-Lackawanna-Youngstown-Inland merger was off Replogle had signed and sealed his bargain with Corey—at a price higher than the shares had ever reached, even during the heat of the merger anticipations. When the news leaked out that the combination had fallen through the shares naturally relapsed. But Replogle had cleaned up over $8,000,000 for himself and his associates.

Even the presidency of American Vanadium, by far the greatest company of its kind in the world, could not absorb all Replogle's energies. The company was doubling and tripling and quadrupling its sales all over the globe; but he had still greater ambitions — and the capital with which to carry them out. He acquired the Wharton Steel Company of New Jersey, a concern owning three blast-furnaces and a twenty-two mile railroad connecting the Lackawanna, the Erie and the Jersey Central, a little road which promises to become of peculiar value. This latest acquisition of Replogle owns some 150,000,000 tons of iron ore and it is the young steel wizard's intention to develop it into a big steel producer.

Appointed Director of Steel Supply

His Government's call as steel adviser to the War Industries Board came to Mr. Replogle early in November, and his appointment as Director of Steel Supply of the United States and Allied Governments followed on November 14th.

No sooner had the new Steel Director taken office than the heads of every iron and steel plant in the United States were called to Washington. The prices which the Government and the Allies should pay for various products were threshed out at long, laborious meetings. Replogle knew exactly what it cost to turn out each class of material, he knew all about transportation charges, he knew all about the location of raw materials. All cards were laid on the table face up, and in a businesslike way prices were determined.

Regulate Distribution of Brass Condensers

Following a conference between American brass manufacturers and representatives of the Navy and the Emergency Fleet Corporation, it was decided, in order to conserve brass, to regulate distribution of surface type condensers, which are essential to ships

There are about 45 manufacturers affected by the decision. They are being notified to take no further orders and enter into no new contracts for sale or to sell or deliver to any purchaser, Government or civilian, except on a permit issued by the War Industries Board.

The manufacturers will be permitted to fill, where possible, existing orders with nonferrous condenser tubes on contracts for shipment prior to January 1, 1919. On contracts after January 1, 1919, the manufacturers are urged to put steel tubes on condensers for land uses, and are directed to send immediately estimates for steel required for this purpose.

Some months ago the Government took over control of and distribution of the turbine engine industry because of the shortage in the supply and their essential need in the Navy and Emergency Fleet war program. The nonferrous condenser is an essential integral part of the turbine, and shortage in its production caused the Navy and Emergency Fleet Corporation officials to appeal for Government regulations of production and distribution.

The effect of the taking over by the Government of the surface type condenser tube industry was considered carefully by the brass manufacturers

Move to Eliminate Paint-Selling Helps

Paint Manufacturers' Association of the United States Intimates That Very Large Reduction May be Made—In Line With General Conservation Policy—Suggestions in Detail

ALL along the line and in increasing numbers come orders to get behind the movement to minimize unessential effort and unnecessary expense in the marketing of products. This time it is suggested elimination of expense and conservation of efforts in furnishing the hardware and paint dealer with the selling help he has been given so lavishly for many years past. In accordance with the above desire the following letter has been sent to paint and varnish manufacturers everywhere on the Continent and Canada has been asked for an expression through the manufacturing trade.

To Paint Manufacturers:—

In line with the necessity of practicing conservation of materials, men and money and practicing the strictest possible economies in the conduct of our affairs, the War Service Committee of the paint manufacturing industry gave serious consideration to the question of extravagant use of advertising matter and features of various kinds, into which extravagance the industry has drifted over a period of years, because of competitive or imagined competitive conditions.

Got The Facts

The War Service Committee, considering the matter of sufficient importance to warrant careful consideration, delegated to the writer the responsibility of going into it in detail, which was done through a meeting attended by principals and advertising managers of several of the larger companies. This meeting considered in detail all of the various advertising features in general use and prepared the attached set of recommendations, which are forwarded to you at this time with the approval and strong endorsement of the War Service Committee, and the recommendation from that committee that the suggestions as made be adopted by all paint manufacturers.

Hope For Saving

The recommendations of the committee are being sent to you at this time in advance of the period when it is likely that manufacturers will be arranging for their supplies of advertising features for another year. The earnest hope is expressed that all manufacturers will be governed by these suggestions which will result in a substantial saving of material required for the preparation of the discontinued advertising features, in the saving of man-power required to prepare such features and in a substantial money saving to manufacturers.

If there are any points not perfectly clear in these recommendations or any suggestions which occur to any manufacturer upon receipt of the attached, will be very glad to hear from such manufacturers promptly.

Very truly yours,
ERNEST T. TRIGG.

The Recommendations

This letter emanated from the office of the secretary of the Paint Manufacturers' Association of the United States and the following are the recommendations in detail:

Color Cards

To be continued, strongly recommend to manufacturers that in the case of specialties such as stains, enamels, etc., that they do not use more than one size of card for each line; that is to say, in the case of varnish stain, for instance, where the full line is eight colors, do not get up a six or four color card, have just the one color card showing eight shades. Recommend that the distribution of color cards be made in a limited way and only upon definite request. Imprinting of the dealer's or jobber's name on color cards and literature of every description to be entirely eliminated.

Descriptive Literature And Price Lists

These should be prepared with care and employed only where it is considered absolutely necessary; such descriptive literature to be furnished in limited quantities for dealer distribution over the counter only. Not more than one piece of descriptive literature shall be employed for any one product, and manufacturers are urged to consolidate, so far as economically consistent, the various items of their manufacture in one feature. Imprinting of the dealer's or jobber's name on color cards and literature of every description to be entirely eliminated.

Window Displays

It is recommended that manufacturers be limited to supplying the dealer with not more than one window trim or window display feature intended for use as such, within a year, and that all window signs or signs of any kind heretofore furnished by the manufacturer requiring light or power for operation be eliminated.

Outside Signs

Eliminate dealer's field, road and fence signs; eliminate wet paint signs. Not over one type of so-called agency sign is to be furnished by any one manufacturer to the dealer. Each manufacturer shall determine the type of such sign which he will use and adopt as his standard. All special signs of every nature to be eliminated.

Inside Signs

Under this heading are included counter display cards, wall cards or cards or boards of any description with or without color chips or paddles, cabinets for displaying colors or containing packages of colors, counter cut-outs, etc. It is recommended that no manufacturer shall employ more than one inside feature at any one time applicable to any individual product.

Direct Mail Advertising To Consumers For Account of the Dealers

It is recommended that manufacturers restrict mailing of circulars or printed matter of any type or description to lists of carefully selected names known by the dealer to be actual consumer prospects, and that such lists be circularized by the manufacturer in the interest of the dealer, not over three times per annum.

Souvenirs, Novelties, Etc.

Everything coming under this description such as painters' caps, overalls, yard sticks, rules, painters' paddles, pencils, premiums, souvenirs for distribution, either through the dealer or at fairs, bazaars, conventions, etc., to be absolutely eliminated.

Stationery, Business Cards, Etc.

All letter heads, envelopes, bill-heads and stationery of every character, business cards, blotters, time record books, memorandum books, etc., must be absolutely eliminated.

Dealers' Counter Books

Counter books of every description such as have heretofore been furnished by some manufacturers to dealers are to be eliminated.

Trade House Organs

The publishing of house organs for all classes of trade to be eliminated.

Calendars

Calendars of every description, and for all purposes, are to be eliminated.

Lantern Slides and Moving Picture Films

These, when furnished to the dealer for use in local moving picture places are to be discontinued.

In addition to the foregoing it is also recommended that any other direct forms of advertising features now being used, which are not approved, shall be eliminated.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

SHARP advances have been made in reaping hooks and scythes, and some minor changes are also in evidence on harvest tools. Booking orders for spring are being accepted on basis of prices now adopted. Manufacturers of scythes intimate that they are eliminating from their product all features of appearance which in no way add to utility of the tools. This is done with a view to conserving labor and utilizing what material is available for only such purposes essential to efficiency.

Wood handles are again on the move upward, and an advance amounting to about 10 per cent. is now effective. This change does not embrace team and carriage goods, such as neckyokes, singletrees and doubletrees, the discounts on these remaining the same.

Higher levels have been reached on clay picks, rock picks, short and long cutter mattocks, grub hoes, wrecking bars and crowbars. The new prices named show an advance of about 10 per cent. over former figures, and there is no indication that the peak has yet been reached.

Stocks of galvanized sheets are becoming badly broken, 10¾ oz. and 28-gauge being virtually off the market, although the heavier gauges are not so scarce. A full range of gauges will be available in black sheets in a couple of weeks' time, it is expected. At least one jobber has been assured that shipments will be made this week from the mills, but distribution of these will be made to manufacturers engaged in essential war industries.

There are to be no more sheets released for commercial purposes, according to latest advices from the United States War Trade Board. Should this ruling stand stove manufacturers will be severely hit, their output of steel ranges, gas stoves and kindred lines depending on the release of sheets. Manufacturers of metal sidings, ceilings, roofings, eavetrough and conductor pipe are also feeling the restrictions very severely, and this new development will affect many other industries as well.

Lapweld wrought pipe has advanced from 5 to 10 points, and in some of the better grades prices on sizes larger than 2-inch have been withdrawn altogether. Steel pipe supplies are becoming very light, and greater dependence must be placed in deliveries of genuine wrought iron pipe.

Prices on poultry netting for spring are slightly higher, and increases are to be noted in quotations issued on plumbers' oakum, copper and brass rods, tubes and sheets, lumbering tools and some makes of shotguns.

Linseed oil has advanced 5c per gallon in some quarters, which serves to narrow the range of quotations materially. Turpentine is reported scarce locally, but shipments now rolling will relieve the situation in that respect. Primary points show a slight easing off, and indications are that prices may fall still further. Shipments abroad have not been as heavy as last year, and in spite of lighter production stocks in hand are heavier. Rosin is the reverse, an advance being registered for the week, and higher levels looked for.

MONTREAL MARKETS

MONTREAL, September 19.—Price advances this week are important, including changes for scythes, snaths, harvest tools, lumbering tools, cast steel, poultry netting, fork and other handles, crowbars, door closers, cross cut saws, dry batteries, wheelbarrows, etc. Indications point strongly to additional advances for various lines of builders' hardware. Food choppers are very firm. The nail market is active and supplies none too plentiful. Business has opened up well this season already and the only cry is that for goods.

It would seem that the price of various hardware will show larger increases than usual, the scarcer various manufactured goods become. This is brought about through the ever increasing labor, transportation and raw material costs, and the jobber is confronted to-day with a real lot of difficulties that are quite unique and quite unusual in the history of the trade.

Picks And Mattocks; Dry Cell Batteries Up

Montreal.

PICKS, MATTOCKS, BATTERIES.—Increased prices are in effect for clay and rock picks, mattocks, etc.; 5 to 6 lb. clay picks are quoted at $12.00 per dozen; 6 and 7 lb. at $12.75, and 7 and 8 at $13.50. Grub mattocks and pick mattocks are $13.25 per dozen. Columbia batteries are advanced and the new prices are as follows: No. 6, per bbl., 38c each; lots of 50 to 125, 40½c; 12 to 50, 41½c, and in smaller lots, 45c. These prices are f.o.b. Montreal, while the Toronto price in barrels is 31c each.

Wheelbarrows Higher; Crowbars And X-Cut Saws

Montreal.

SAWS, BARROWS, CROWBARS.—Advances this week are made for various wheelbarrows. Some of the new prices are as follows: Folding wood style, $60 per dozen; No. 1 F, $65; No. N.C.S., $46.50; No. 1 C.S., $75; No. 2 C.S., $96; No 3 M.S., $144; Tubular No. 4, $200, and Sterling No. 6, $144. Simonds X cut saws, No. 237, one man style by 3½ ft. are $2.70 each; 4 ft., $3, and 4½ ft., $3.30. Crowbars are advanced to $10.50 per 100 pounds.

Door Closers, Handles And Snaths Marked Up

Montreal.

SHELF HARDWARE, HANDLES,

SNATHS.—Advances for door closers of Yale and Towne Canadian make only are announced and the increase approximates about 7½ per cent. Handles are again up and this is effective at once through a change in the discounts. All hickory handles are now list plus 10 per cent. All others are net list, excepting hay fork, hoe, rake, manure fork, etc., which are 10 per cent. from the list. Snaths are higher in price, too, the prices in the current list prevailing here now, and approximating an advance of 10 per cent.

Poultry Netting Up; Harvest Tools Firm

Montreal.

NETTING AND HARVEST TOOLS.—Increases in the price of Canadian poultry netting are announced here, the former discount obtaining, 15 per cent., being reduced to 12½ per cent. from the list. Prices on harvest tools for spring shipment are also announced, the discount named being 17½ per cent.

Scythes Advance $2.50; Lumbering Tools, Too

Montreal.

SCYTHES, LUMBERING TOOLS.—A straight increase of $2.50 per dozen is made in the prices of scythes. Current lists elsewhere have the new quotations. Lumbering tools also are higher and this line is selling at 10 per cent. advance on list, the previous arrangement being based on net list.

Heater Sales Heavy; Iron Handles Firm

Montreal.

STOVES, HEATERS, WARES.—A most satisfactory volume of business is being done by the manufacturers at this time in heaters. Orders are being readily filled and if this can be kept up throughout the season it will be a fortunate matter. The undertone is strong and a further increase in prices will not be very surprising, labor costs and material being the big factors confronting the maker. There is a much better movement, too, of stoves and ranges, which are on a very strong price basis with advances again probable. Wares, on the basis of revised discounts made last week, are selling remarkably well, and one of the large manufacturers stated to HARDWARE AND METAL that it did not seem to affect sales materially.

Sad iron handles are firmly held, the No. 1 being quoted at $1.40-$1.65 dozen, and Universal $1.85-$1.90.

Gasoline Demand Less; Scarcer, Too

Montreal.

COAL OIL AND GASOLINE.—If the users of cars do not let up on their use of gasoline unnecessarily, it is very probable that a drastic measure will curtail the use of this commodity in the immediate future. Opinions differ as to the extent to which cars were used last Sunday. In any case the importers of gasoline state that, notwithstanding a decreased sale in this district, supplies are short. Prices are steady but have not changed, although a recent revision of price in the States to cover advancing costs through freight, etc., may be reflected here soon. For motor grade 34c is still prevailing. Coal oil sells still at 19c for Royalite, and at 22c per gallon for Palacine and Electroline.

Jute Prices Higher; Hard Fibres Steady

Montreal.

ROPE AND CORDAGE.—The feature of the week is that of an advancing basis for jute products. Soft fibres are unsettled and increases have been frequent. A real shortage of cotton products is indicated through most recent reports and this is borne out in a further increase in the cotton rope market, although the quotations elsewhere cover the prices asked here. Movement is better than it was, although this could be accelerated greatly.

Wire Nails Reported Scarcer; Baling Wire

Montreal.

WIRE AND NAILS.—Considerable business is being done by jobbers in wire nails. They are very much occupied with orders from both city and country sources and there is some expressed difficulty in maintaining a full line. The undertone is steady and very firm, with wire nail base price still $5.35 and cut nail base $5.60. Standard smooth wire 0-9 gauges is quoted yet at $6.25. There is a reported scarcity of baling wire at this time and the market is strong.

Tendency to Increase Sheet Prices Oftener

Montreal.

SHEETS.—While favorable prices are still obtainable on galvanized and black sheets, everywhere the comment is made that supplies cannot last and that they will be much shorter from month to month. Some are making revisions in accordance with their stocks now in hand and the market still has a range for this reason that would not otherwise obtain. There is considerable movement in some gauges and the only way to replace stocks is to produce evidence that they are to be used in essential war work.

BLACK SHEETS—	Per 100 lbs.		
10 gauge	$9 75	$9 75	$11 50
12 gauge	9 50	9 65	11 00
14 gauge	8 25	9 00	7 95
16 gauge	8 40	9 15	8 00
18-20 gauge	8 50	9 25	8 05
22-24 gauge	8 75	9 60	8 10
26 gauge	9 70	9 75	8 15
28 gauge	....	9 90	8 25
GALVANIZED SHEETS—			
10¾ oz.	$10 00	$10 50	$10 75 $12 00
28 gauge	10 20	10 25	10 40 11 65
26 gauge	9 90	10 00	10 10 11 35
22 and 24 gauge	....	9 75	9 90 11 15
20 gauge	....	9 60	9 70 11 05
18 gauge	....	9 45	9 70 10 95
16 gauge	....	9 35	9 55 10 85

NOTE.—These prices are for full bundles, an extra charge of 25c per 100 lbs. is made for broken lots.

Cast Steel Again Up; Rods and Bars Firm

Montreal.

STEEL AND IRON.—A considerable amount of interest centres around the probability of control over all steel prices being centred in the general committee of the American Iron and Steel Institute. This will doubtless be the arrangement, when made, that will govern the situation here. In the meantime it is none too easy to procure requirements for the trade, the volume of business being very good. The feature of the week is that of an advance for Black Diamond cast steel, making the price now 22c per lb.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05

Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Old Scrap Has Been Picked Up; Unchanged

Montreal.

OLD MATERIALS.—The buyers of old material are not receiving a great deal from the country, and they interpret this to indicate the scarcity of supplies out in the remote parts. Business is still very fair in some lines, while a dragging condition obtains for others. The quoted prices are steady and without change of any sort.

Tea lead	0 05	0 05¾
Heavy lead pipe	....	0 07½
Yellow brass	....	0 13½

Automobile tires	0 04¾	0 05

Lead Products Firmer; Solder Has Declined

Montreal.

LEAD PRODUCTS.—Due to the declines which have been recurring for a long time in the London tin markets, prices have been readjusted on solder and the reductions are from four to five cents, guaranteed now selling at 55c per pound. On the other hand, the position which pig lead has attained makes the probability of advances for lead products a strong tendency. The only thing which

has prevented an earlier consideration of revisions upward on these lines is that of a somewhat confined and quiet market.

Lead pipe, lb.	0 15
Lead waste pipe, lb.	0 16
Lead traps and bends	Net-list
Lead wool, lb.	0 14

Tin More Settled; Lead Scarcer Yet

Montreal.

INGOT METALS.—It would seem that the London tin market has stabilized itself considerably and with the greater possibility of supplies being regulated there is likely to be an arrangement effected both as to price and quantity. Some anticipate that price will be arranged somewhere around the existing market of to-day. For the most part general ingot markets are quiet.

COPPER.—Much remelted copper is sold and this commodity is not obtained easily. In the United States market there is plenty of crude copper, broadly speaking, but refined is scarce. Prices here on pure copper rule around 28¾ to 30c per pound, according to grade.

TIN.—Anxiety seems to be the portion of many at the moment, the position being so undefined, and announcement being expected from day to day as to the government's intention to fix prices. The United States is likely to get a good apportionment of the supplies, it is understood, and as far as Canada is concerned importers expect that needed requirements will be filled. Quotations here are ruling around 97c to $1 per pound.

SPELTER.—Local trading is light. The position is firm, reflecting the position in the States. Prices are unchanged at 10½ to 10¾c per pound.

LEAD.—Clamoring for supplies of lead on the part of users everywhere does not secure it. It is stated that the most careful use of supplies is the only thing that can be done to better the situation. Prices are decidedly firm at 10 to 10¾c per pound.

ANTIMONY.—As far as the local trading in this metal is concerned it amounts to but little in the total. Price is still 15-16c per pound.

ALUMINUM.—What little trading there is here has been passing on the basis of 50 to 55c per pound, according to the quantity desired.

TORONTO MARKETS

TORONTO, September 19.—New prices for spring have been named on scythes, hay knives and reaping hooks which show advances, and harvest tools, with a few changes in the list, are largely unchanged. Clay picks, rock picks, mattocks, grub hoes, crowbars and wrecking bars have all advanced substantially. Another 10 per cent increase in wood handles has been made and field rakes, horse pokes, team and carriage goods such as neckyokes, singletrees and double-trees are held without change. Poultry netting shows a small advance for spring and a change in shot guns has been made, immediately effective.

Oil heaters, electric heaters, horse blankets, in fact all fall lines are going forward freely and jobbers report a very satisfactory volume of business.

Booking Orders Now Being Accepted on Harvest Tools

Toronto.

HARVEST TOOLS.—Booking orders are now being accepted on harvest tools with May 1 dating. With a few changes in the lists on some lines, there has been little price revision. The discount holds at 17½ per cent and exceptions to the lists covered by this are scythes, hay knives and reaping hooks, new net prices on which are given below.

Items on which changes in the list to advanced figures have been made are Excelsior electric weld hoes; Excelsior sidewalk cleaners; 5 prong adjustable hand garden cultivators; 3 and 4 prong Midget garden cultivators; Eureka riveted brace straight tooth rakes; lawn rakes; post hole spoons, and pike pole ferrules.

Lines discontinued include No. 148, 5 prong malleable potato hook; No. 158½ and No. 158¾ Godward's Nhu hoes 7 inch and 8 inch respectively; No. 159 patent cultivator hoe; and No. 171A, 10 tooth concave steel garden rake, brace head, electric weld.

A new line to be known as the Excelsior light steel rake has been added to the line and list prices, subject to regular discount, are as follows: 10 tooth $6.20 per dozen; 12 tooth, $6.75; 14 tooth, $7.30; 16 tooth, $12.85.

Scythes Advanced for Spring; Finish Eliminated

Toronto.

SCYTHES.—Quotations just received on scythes for spring, May 1 dating, show a sharp advance over opening prices last year.

The manufacturers have also determined to eliminate polishing and special finishes. Their statement to this effect says in part: "In view of the necessity of conserving labor and utilizing what material is available for only such purposes essential to efficiency, we are eliminating from our scythes all features of appearance which in no way add to the tool. This means no withdrawal in any way from the quality of the product, the former high standard to be fully maintained."

Net prices now being named on scythes for some of the more familiar types are: Cast steel, $15.00 per dozen; Clipper, $16.00; Excelsior concave, $17.00; Double Beaded, $16.50; and Bush scythes, $15.50 per dozen.

Reaping Hooks Go Higher, Hay Knives Are Firm

Toronto.

REAPING HOOKS, HAY KNIVES.—Reaping hooks show an advance of about 20 per cent in new prices just issued, this being in line with change made in scythes. Orders are being accepted on the following basis for Spring delivery, May 1 dating: No. 2, $4.15 per dozen; No. 3, $4.25; No. 4, $4.35; No. 5, $4.55; Barden Patent, $6.00; Little Giant, $6.00.

Hay knives are held very firmly and prices remain unchanged at following levels, with booking business being solicited on this basis: Lighting, $12.50 per dozen; Heath's Patent, $12.50; Spear point T. H. or L. H., $14.00.

Copper and Brass Tube and Sheets Revised

Toronto.

COPPER AND BRASS TUBE, SHEETS.—A change has been made in copper and brass tube, rods and sheets. New prices now issued provide for advances in each instance. Supplies are hard to procure but so far the requirements of the trade have been largely met. Quotations to-day are being made on following basis: Copper sheets, 50c per pound; copper rods, 50c; copper tube, 57c; brass sheets, 44c per pound; brass rods, 41c; brass tubes, 53c.

Lumbering Tools Make Advance; Other Lines

Toronto.

LUMBERING TOOLS.—New discounts have been named on lumbering tools which provide for a sharp advance in these goods, peavies, cant hooks and kindred lines are now selling at 7½ advance on list.

Pump rod couplings have also joined the lines advancing, the black now being quoted at 35c per pound and the galvanised at 45c per pound. Smooth-on is higher, 1 lb. packages, being quoted as follows: No. 1, 46c per pound; No. 3, 46c; No. 5, 32c; No. 7, 29c.

Lamp wick is another item in cotton to go higher, size A selling at $1.00; size B at $1.45 and size D at $2.30 per roll 32 yards.

Wood Handles Revised, Show 10 per Cent. Advance

Toronto.

WOOD HANDLES.—Another 10 per cent advance has been recorded in different lines of wood handles during the week. The present scale of quotations

is given out as follows: All hickory handles list, plus 10 per cent; Maple cant hook and peavie handles, 10 per cent.; all fork, hoe, rake, shovel handles and malleable D, 10 per cent.; all other handles, net list; whiffletrees, neck-yokes and doubletrees, 10 per cent.; horse pokes, field rakes, 10 per cent. The discounts on whiffletrees, neck-yokes, doubletrees, horse pokes and field rakes show no change from previous figures.

Picks, Mattocks, Hoes, Bars Reach Higher Levels

Toronto.

PICKS, MATTOCKS, HOES, BARS.—Further advances have been made in clay picks, rock picks, mattocks, grub hoes, wrecking bars and crow bars. The prices as now issued apply to orders containing one dozen of a size or type and an extra charge of 5 per cent. is made on orders in smaller quantities, the exception to this is crowbars.

Quotations now prevailing on the various items are as follows: Clay picks, 5 to 6 lbs., $12.00 dozen; 6 to 7 lbs., $12.75; 7 to 8 lbs., $13.50; Rock picks, 7 to 8 lbs., $13.50 dozen; Short and long cutter mattocks, $13.25 per dozen; grub hoes, 3½ lb., $10 50; 4 lb., $11.00 dozen; wrecking bars, 30 inch, $6.50; 36 inch, $7.25 per dozen; in less than dozens, add 5 per cent. to these prices. Crowbars are now quoted at $10.50-$11.00 per 100 pounds.

Poultry Netting Higher for Spring; Shot Guns

Toronto.

POULTRY NETTING, SHOT GUNS.—New prices for Spring have been issued on poultry netting and show a small advance. The discount which has been 15 per cent is now changed to 12½ per cent, orders taking April 1 dating. Discount quoted applies to 1 and 2 inch mesh netting only. Other prices have been withdrawn and are quoted only on application.

Stevens shot guns have also gone to higher levels. The No. 235 is now selling at $26.25 each; No. 255 is now $26.95 and No. 335 is now $31.50, net prices. Princess electric irons are selling at $4.10 each.

Stove Manufacturers Face Greater Difficulties; Wares

Toronto.

STOVES, WARES.—Latest advices are to the effect that the United States War Trade Board will release no more sheets for commercial purposes. One of the first industries to be affected will be that of the stove manufacturer, steel ranges, gas stoves and kindred lines being directly influenced. Manufacturers have been laboring under difficulties as regards supplies for a very long period and no accumulation of stocks is available on which their activities can be bent for any length of time.

All lines of enamelware, tinware, galvanised ware, etc., on which new prices were issued last week are holding firm and the ruling on sheets, mentioned above, will undoubtedly exercise a restraining influence on output of many of these lines.

Oils Going Forward in Big Volume; Gasoline

Toronto.

OILS, GASOLINE.—Sales of coal oil are increasingly heavy and dealers report a splendid volume of sales. Prices have held firm and unchanged, quotations being made at 18c to 21c per gallon, according to grade. Gasoline sales are heavy but dealers indicate that effects of Sunday restrictions on use of gas were a decidedly noticeable factor. No scarcity is reported and sales are being made at 33c per gallon, an unchanged figure.

Plumbers' Oakum Up $1.00; Waste Strong

Toronto.

WASTE, OAKUM.—An advance of $1.00 per 100 pounds has been made in plumber's oakum, making to-day's lowest quotation $10.00 per 100 pounds. Sales of all grades are maintained at a high average and indications are that manufacturers have increased their output to keep up with heavy demands made upon them.

Sales of waste continue along very satisfactory lines, and a good volume of business is reported. Prices are very firm but hold unchanged at figures shown in current market quotations.

Cordage Still Firm; Twines Srong

Toronto.

CORDAGE, TWINES.—Cordage is holding steadily in a firm market and a fair amount of business is being transacted. Fall booking orders are pretty well shipped out, but a nice sorting business is looked for during the next few weeks. Quotations are unchanged, pure manila selling at a base price of 39c per pound; British manila at 33c and sisal at 27½c.

Soft twines are very firmly held, advances being recorded at United States points, which may be reflected here. No change is noted yet but the undertone to the market is very strong.

Nails Remain Steady; Wire Holds Unchanged

Toronto.

NAILS, WIRE.—There has been little change in the situation on nails during the week. The market is very firm and rules with a strong undertone. Prices have been held without change, the wire selling at a base of $5.30 per 100 pounds and the cut nails at $5.65. The demand continues to represent a very satisfactory volume of business.

Smooth steel wire at a base price of $6.25 per 100 pounds is unchanged, with the demand light.

Cement Demand Light; Plaster-of-Paris Firm

Toronto.

CEMENT, PLASTER OF PARIS.—Sales of cement have fallen off materially during the month and jobbers report a very light movement. This is rather unusual, as September generally is a very good month. Prices are unchanged at figures shown in current market quotations.

A fair movement of plaster of Paris is reported with supplies coming to hand in ample quantities. Quotations are unchanged.

Prices on Iron and Steel Bars Firm

Toronto.

IRON AND STEEL.—Prices have held firmly on all lines of iron and steel bars during the week. Sales are maintained at satisfactory levels and supplies are considered very good. Range of quotations follows:

TORONTO—		Per 100 lbs.
Common bar iron	....	$ 5 25
Common bar steel	....	5 50
Refined iron	....	5 65

Galvanized Stocks Light; Black Sheets Coming

Toronto.

SHEETS, PLATES.—Stocks of galvanized sheets are becoming very badly broken and it is intimated that little, if any, 10¾ oz. or 28 gauge is now held in jobbers' hands. In heavier gauges the question of supplies is not bad but in all galvanized sheets the matter of replacement is one causing grave concern to the jobbers. Latest advices are to the effect that the War Trade Board in the United States will release no sheets for commercial purposes, so conditions are bound to grow gradually worse.

In black sheets the outlook is a little more hopeful as regards supplies. Whereas stocks are becoming badly broken at least one jobber has been assured that shipments will be made during the week, so that a full range of gauges is looked for in the course of the next ten days or two weeks. Delivery of this, however, will be confined to industries engaged in war work as only on this basis are sheets available and further supplies procurable. Nominally, quotations range as follows:

BLACK SHEETS—		Per 100 lbs.
10 gauge	....	$10 00
12 gauge	....	9 60
14 gauge	$7 95	8 40- 8 90
16 gauge	8 00	8 50- 8 55
18-20 gauge	8 05	8 30- 8 80
22-24 gauge	8 10	8 35- 8 85
26 gauge	8 15	8 40- 8 90

28 gauge	8 25	8 50- 9 00
3-16 inch plate	....	10 00
¼ inch boiler plate	....	10 00

Prices shown are for full cases. An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—

10¾ oz.	....	11 00
U.S. 28	....	10 70
U.S. 26	....	10 40
22 and 24	....	10 25
18 and 20	....	10 10

14	....	9 85

Prices shown are for full cases. An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

Manf'd Sheet Metals In Difficult Position

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—The acute shortage of galvanized sheets, now an actual fact, is bound to exercise an influence for anything but good on all manufactured lines. Manufacturers of metal sidings, roofings, eavetrough, conductor pipe and kindred lines face a very serious situation and there is no encouragement towards a continuation of these activities being given by the dispensers of materials. This is shown in the latest announcement of the War Trade Board in the United States that no more sheets for commercial purposes would be allocated; the results are obvious and it would seem good policy for dealers wanting supplies to take delivery now of what they feel they will need for some months.

TORONTO—	Per 100 Gal'zed	Sq. Feet Painted

No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Boiler Tubes Scarce; Essentials Buying

Toronto.

BOILER TUBES.—At the present time stocks of the larger sizes particularly are very, very scarce—in fact it is intimated absolute suffering is being occasioned by the actual shortage. That more will come is fully expected, but their arrival is not looked for under about six weeks' time. The demand is not too heavy, only essential industries showing a disposition to buy. There are still some small tubes available, recent shipments not yet being fully absorbed. Prices are unchanged at following levels:

Toronto—	Per 100 feet Cold drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00
2 inch	50 00	36 00

3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Wrought Pipe Revised; Lapweld Goes Higher

Toronto.

WROUGHT PIPE.—Wrought pipe has been revised, but no change has been made in the standard buttweld, advances being confined to the standard lapweld. On this latter, sizes up to 4 inch are up 5 points and 4½ inch and larger 10 points. Steel pipe is becoming increasingly hard to get and greater dependence will have to be placed in genuine wrought iron. Sizes smaller than 2 inch in all grades are in fair supply, the greatest scarcity developing in 2½ inch and larger. In the XX strong buttweld pipe, manufacturers have withdrawn quotations on sizes larger than 2 inch. Prices are now shown on standard buttweld and standard lapweld in both steel and genuine wrought iron as follows:

WROUGHT IRON.

Price List No. 37

Standard Buttweld

Solder Holds Firm; Lead Products

Toronto.

LEAD AND ZINC PRODUCTS.—Solder holds firm at prices named last week and developments of a particularly interesting character are missing from the market this week. Supplies are good and the demand seasonable.

Prices on manufactured lead products still hold firm at unchanged levels. Stocks are equal to present demands and quotations range as follows:

Lead pipe, lb.	....	0 15
Lead waste pipe, lb.	....	0 16
Lead traps and bends	....	Net list
Lead wool, lb.	0 15½	0 16

No. 2 busheling	....	12 00
Country mixed scrap	....	16 00

Lead Not Plentiful; Tin, Spelter Unchanged

Toronto.

INGOT METALS.—Lead still remains a scarce commodity and supplies are largely going to what are considered essential industries. Tin shows no change for the week and spelter is also holding in a firm though unchanged position. Antimony is rather quiet and other lines normal.

COPPER.—The situation is largely the same. Production keeps pace with war requirements, but there is little left for commercial demands. These are light, however, and prices are steady around 30-32c per pound.

TIN.—The market seems to have steadied somewhat locally and price of $1.05 per pound holds this week. The trade still awaits definite news of a set price. Supplies locally are fair, the most urgent needs being met.

SPELTER.—Locally there has been no change in the situation. The market is ruling with a firm undertone, outside points showing strength. The price of 11c per pound holds.

LEAD.—Supplies are still considered light. War industries get practically entire output of producers and are clar oring for more. The effect on commercial enterprises in a continuation of this condition is obvious. Prices hold around 10½c to 11c per pound locally.

ALUMINUM.—Supplies continue to go for war work and the market is featureless. Price holds at 50c per pound.

ANTIMONY.—The falling off in the demand has eased the question of supply, though prices hold at unchanged levels, viz., 18c per pound.

PIG IRON.—More iron and more iron is the call sent to the foundries for pig and production, though heavy, continues to be largely absorbed in essential war industries. Commercially, supplies are hard to secure, but some allotments are being made.

LONDON MARKETS

LONDON, September 19.—Many important changes have been put into effect this week and among the lines will be noted several items which are now being booked for spring delivery. Among the lines on which new prices have been issued for Spring are garden drills, cultivators, sprayers, oil stoves and oil heaters, scythes and spring screen door hinges. Other items to register immediate advances include roofing, wood handles, resin, ash sifters, and buck saw blades. Cotton goods including wrapping twine, cotton rope, lamp wick, clothes lines, and awning cords are also on the upward trend. Dry batteries show an advance of $4.00 per hundred in new prices issued this week. Gasoline irons, bicycles, rifles, and stick fast paste are other lines which have been advanced. Linseed oil has declined somewhat, but turpentine shows no change. Putty has advanced $1.20 per hundred pounds.

Business during the week has been very good. Oil heaters, stoves and kindred lines are moving forward very freely.

Changes Made in Picks, Hoes, Mattocks and Bars

London.

PICKS, MATTOCKS, HOES, BARS.—Further advances have been made in prices applying to clay picks, edge and pick mattocks, grub hoes, and crowbars. New quotations now available represent a fairly stiff advance and there is no indication that the peak has yet been reached in the matter of price.

Clay picks from 5 to 6 lbs. are now quoted at $12.00 per dozen; from 6 to 7 lbs. $12.75; from 7 to 8 lbs. $13.50. Edge and pick mattocks are now selling at the new price of $13.25 per dozen. The new figure issued on grub hoes is $10.50 per dozen. Crowbars is another line which has gone to higher levels and the new price is $10.50 per 100 pounds.

Wood Handles Show Advance of 10 Per Cent.

London.

HANDLES.—Another advance in the price of wood handles has been made which follows closely on the heels of one recently instituted. To-day's prices are up a further 10 per cent and range as follows. Hickory handles are now selling at list plus 10%; fork, hoe, rake, shovel, spade and manure fork handles are quoted at a discount of 10%. Team and carriage goods such as single trees and double trees, etc. are now quoted at list less 10 per cent., an unchanged discount. Pike poles are quoted at net list and all other handles are quoted at net list also.

Dry Batteries Record Advance $4.00 Hundred

London.

DRY BATTERIES.—A sharp advance has been made in dry batteries during the week, the Columbia line now selling at an increase of $4.00 per hundred over former prices. Present prices f.o.b. factory in barrel lots for the No. 6 regular are 35 cents each and for the No. 6 Ignitor 35½ cents each. In small quantities the No. 6 regular is quoted at 39 cents each, and the No. 6 Ignitor at 40 cents each. There are indications that manufacturers are having difficulty in keeping up with orders. Materials are very hard to get and manufacturinng conditions are such that it is extremely hard to get the output.

Spring Prices on Harvest Tools, Scythes

London.

HARVEST TOOLS, SCYTHES, REAPING HOOKS.—Prices for Spring have been named on harvest tools and whereas some minor lines show a change in the list, the discount applying remains the same, viz; 17½ per cent. Orders are now being accepted on this basis, Scythes however, show an advance and manufacturers intimate that they will be eliminating all features that do not contribute directly to the quality of the article. This refers particularly to the finish and polishing, which manufacturers feel under present conditions in regard to materials and labor could be dispensed with. The new prices are as follows:—Cast steel $15.00 per dozen; Golden Clipper $16.00; Excelsior Concave $17.00; Double beaded $16.50; Dunns, $17.00; Little Giant $17.00 and Bush $15.50.

Reaping hooks have also gone to higher levels, the No. 2 show being quoted at $4.15 per dozen; the No. 3 at $4.25, No. 4 at $4.35; and the Little Giant at $6.00.

Sprayers, Cultivators, Drills Revised; Are Higher

London.

SPRAYERS, CULTIVATORS, DRILLS.—New prices have been named on the Eureka Planter Co. line of goods for immediate delivery and also for Spring booking. The present range of quotations shows an advance of about 10 per cent and prices on their goods are given herewith. No. 1 garden drills $8.00 each; No. 2 $10.00 each.; No. 4 Cultivator $4.25 each; No. 8 $5.00 each; No. 10 $5.50 each; No. 110 galvanized compressed sprayers $7.50 each; No. 113 glass jar sprayers $8.00 dozen; No. 112 tin sprayers, $5.50; No. 115 continuous sprayers, $10.50 dozen; Eureka glass seeders $16.00 dozen.

New Prices Named on Oil Heaters, Stoves

London.

OIL STOVES, OIL HEATERS.—New prices have been named on Perfection oil stoves, ovens and heaters. These prices become immediately effective and orders are also being accepted for delivery up to March 1. Already retailers show a disposition to book freely where there is any likelihood of a shortage of goods developing, and manufacturers indicate that anything into which steel or iron enters must be considered to some extent on the doubtful list. Oil heaters are selling very freely just now. New prices on the entire list of these goods is given herewith.

Perfection Oil Stove—2 burner, $14.06; 3 burner, $18.19; 4 burner, $23.06 each net.

Perfection Ovens—No. 41G, $4.31; No. 21G, $4.31; No. 42G, $5.44; No. 22G, $5.44 each net.

Perfection Cook Stove Wicks and Carriers, $3.15 doz.

Perfection Heater Wicks and Carriers, No. 500, $3.45 doz.

Perfection Oil Heaters—No. 525, list $7.00; No. 530, list $8.25, less 25 per cent.

Buck Saws Sell Freely; Blades Show Advance

London.

BUCK SAWS, AND BLADES.—Jobbers report a very good movement of buck saws and no change in price has been made. Quotations to-day on some of the more familiar lines are as follows — Happy Medium $9.60 dozen; Prince Rupert lance tooth $12.50 dozen; Disston lance tooth $12.50 dozen.

The lance tooth buck saw blades have advanced however, the Prince Rupert now being quoted at $7.90 per dozen.

Horse Blankets Up 10%; Carriage Heaters Up

London.

HORSE BLANKETS, CARRIAGE HEATERS.—A change is recorded in some quarters on horse blankets, and new prices now being made to the trade show an advance of 10 per cent.

Carriage heaters or foot warmers have also registered an advance, Clark's line No. 5B now being quoted at $2.40 each, and the No. 7B at $2.95. Heater coal is now quoted at 80 cents per dozen. The question of steel enters into the matter of new prices on carriage heaters very largely under present conditions, manufacturers facing the scarcity of raw material and high labor costs.

Cotton Rope, ClothesLines, Awning Cord All Higher

London.

COTTON GOODS.—The heavy advances made in the price of raw cotton have resulted in a sharp advance being made in the various manufactured lines. The items affected include cotton clothes lines, braided awning cord, cotton wrapping twine, cotton rope, and lamp wick. The cotton clothes lines 30 ft. are now quoted at $2.60 per dozen; the 48 ft. at $3.85; and the 60 ft. at $4.80. Braided awning cord No. 3 is now $2.00 per dozen; No. 3½ $2.25; No. 4 $3.60 and No. 4½ $5.00. Cotton wrapping twine in either balls or cones three ply is now priced at 75 cents per pound, and the 4 ply at 79 cents. Cotton rope 3-16 inch at 75 cents per pound, and the ¼ inch and larger at 74 cents per pound has also reached higher levels. Lamp wick is another item on which new and

higher prices have been made, size 0 selling at 80 cents per roll, size A at $1.00; size B at $1.45; size D at $2.35.

Higher Prices Reached on Gasoline Irons, Hinges

London.

GASOLINE IRONS, SPRING HINGES, ETC.—Among the many miscellaneous items which have undergone revision during the week is to be found gasoline irons. The Comfort has now reached a level of $4.25 each. Spring hinges, steel, have been revised in price, new quotations taking effect immediately, and also applying to spring booking orders. The No. 7-11 and No. 151 are now quoted at $20.00 per gross pair, or $1.75 per dozen pairs. Stick Fast Paste is another line on the hardwaremen's shelves to undergo revision. In one pound packages this is now quoted at $1.85 per dozen and in 2 pound packages at $3.50 per dozen.

Bicycles Up $5.00; Rifles 2½%: Roofing Climbs

London.

BICYCLES, RIFLES, ROOFING.—An advance of $5.00 each in Victor bicycles has been made. This becomes immediately effective or applies to spring booking orders as well. The new price on men's size is $38.50 each, and on the ladies' size is $39.75 each. Winchester rifles are up 2½ per cent and are now being quoted at 7½ per cent advance on list.

Ontario roofing has been revised, the 1 ply now selling at $1.95 per square, 2 ply at $2.40; and 3 ply at $3.00. These quotations represent advances in each instance.

Ash Sifters Higher; Stove Boards, Axes Selling Freely

London.

ASH SIFTERS, STOVE BOARDS. AXES.—An advance in some lines of ash sifters has been made, the Banner now being quoted at $3.45 each, and the Rocker Number 1 at $5.50 each. The common wood side ash sifter at $2.50 per dozen is unchanged. Stove boards are selling very freely, the wood lined being unchanged at a discount of 30 and 10 per cent.

Jobbers report a splendid sale of axes of all kinds. Prices have held firm and unchanged. In handled axes the Eagle is being quoted at $15.75 per dozen, Cherokee at $17.50 and the True Set at $19.00 per dozen. Axe heads only are quoted as follows—Keystone at $13.25 per dozen; Cherokee at $15.00; W.V. Special $14.75; Hand Made $15.50; Black Diamond $16.00 and True Set $16.00.

Putty Up $1.20; Rosin Also Higher

London.

PUTTY, ROSIN.—An advance of $1.20 per hundred pounds has been made in putty. The present quotations also reveal a differential between 100 lbs. and 25 lb. drums, these two sizes of containers in the past selling at the same price basis. Figures attained on standard putty in 100 lb. drums are $6.75 per hundred pounds, and in 25 lb. drums $7.00. Pure putty in 100 lb. drums is now quoted at $8.75 and in 25 lb. drums $9.00 per 100 pounds.

A change in the price of resin has been made, and new quotations reveal and upward trend in this line. In casks the price is now $6.90 per hundred pounds and in small lots $8.00 per hundred pounds.

Turpentine Steady; Linseed Oil Easier

London.

TURPENTINE, LINSEED OIL.—There has been no change made in turpentine prices during the week. The market in the south is holding up fairly well, and the question of getting supplies is wrought with difficulties at this end.

Linseed oil has declined slightly, and what the future may be is rather uncertain. The seed market has strengthened up considerably in the last day or two and this may influence prices upwards. To-day's quotations on oil and turpentine follow: Turpentine, 1 bbl. lots, $1.00 per gallon; 2 to 4 bbl. lots. 99c per gallon; 5 gallon lots, $1.10 per gallon.

Linseed Oil	Raw per gallon	Boiled per gallon
1 to 2 bbls.	$2.10	$2.13
3 to 5 bbls.	2.09	2.12
6 to 9 bbls.	2.07	2.10

Less bbls. add 10 cents gallon.

WINNIPEG MARKETS

WINNIPEG, September 19.—Price changes during the week are again fairly numerous, with the majority showing an upward trend of from 5 to 10 per cent. Linseed oil and Peerless horse nails are two lines to register declines. Most prominent amongst the lines to advance are wrapping twine, barrel bolts, screen door hardware, implement brackets, drilling frame clamps, store door latches, and mounted grindstones.

Business is reported good. Particular activity is noticeable on such fall lines as stoves, stove boards, coal hods, fire shovels, lanterns, etc., while stocks in general are very well assorted and orders being filled promptly.

Advances in Bumpers, Spot Lights, Carriers

Winnipeg.

BUMPERS, SPOT LIGHTS, TIRE CARRIERS.—Prices on several lines of auto accessories have shown further advances during the week. Included in the items which have gone to higher levels are bumpers, spot lights and tire carriers, in each of which steel is a vital factor and consequently affected by scarcity of material. High manufacturing costs are also a factor. New prices now in effect are given herewith:

Bumper—No. 6057, $8.20 each, lots of 24, $7.45; No. 6087, $8.20, lots of 24, $7.45; No. 6114, $7.85, lots of 24, $7.10; No. 6094, $8.20, lots of 24, $7.45; No. 6103, $8.60, lots of 24, $7.75.

Howe Spot Lights, No. 15, $4.50 each, lots of 6, $4.30 each; No. 5, $6.10, lots of 6, $5.75; No. 9, $7.80, lots of 6, $7.35.

Tire carriers—No. 6108, $4.50 each, lots of 24, $4.25 each.

New Prices Expected On Enamelware, Etc.

Winnipeg.

ENAMELWARE, TINWARE, ETC.—Owing to the continued advances in tin plates, black and galvanized sheets, together with the difficulty of obtaining stocks, further advances are expected on all lines of tinware, galvanized ware, japanned ware and enamelware. New prices are expected to be put into effect next week and will it is thought show an advance on all lines of at least 10 per cent. Prices ruling at present are given herewith:

Japanned Ware—List, plus 30%.
Stamped Ware, Plain, 40-10% discount.
Stamped Ware, Retinned, 40% discount.
Pierced Tinware—List plus 40%.
Sheet Iron Ware—List plus 20%.
Light Galvd. Pails and Tubs—List plus, 27½%.
Heavy Galvd. Pails and Tubs, 17½% discount.
Japanned Coal Hods—List plus 35%.
Galvanized Coal Hods—List plus 50%.
Enamelware, Scotch Grey—40-12½% discount.
Do., Colonial—Imperial or Pearl, 20-7½% dis.
Do., Premier—Canada or Diamond—2½% dis.

One Decline Noted; Horse Nails Lower

Winnipeg.

HORSE NAILS.—Prices on Peerless horse nails show a slight revision downward during the week and are quoted to-day as follows: No. 5, $5.15; No. 6, $4.90; No. 7, $4.70; No. 8, $4.50; No. 9, $4.25; No. 10, $4.25 per box of 25 pounds.

Cotton Wrapping Twine Advances 4c Pound

Winnipeg.

COTTON WRAPPING TWINE.—Due to the large demand together with increased cost of the raw material a general advance is expected on all cotton products, but to date the only change recorded is on wrapping twine. This shows an advance of approximately 4c per pound over former quotations, making to-day's prices as follows: 3-ply in cones 72c; 3-ply in balls 76c; 4-ply in cones 75c; 4-ply in balls 79c per pound.

Screen Door Hardware Advances 5 to 10%

Winnipeg.

SCREEN DOOR HARDWARE.—Prices just received from the manufacturers show further advances on several lines of screen door hardware, prices moving up from 5 to 10 per cent. This is thought due to increased cost of production along with scarcity of material. Screen door hinges, springs and door buttons are among the lines affected.

To-day's ruling prices are as given below:

Screen Door Hinges—No. 20, $1.80; No. 50, $5.50 doz.
Screen Door Springs—No. 2, 75c; No. 3, 80c; No. 4, 90c; No. 5, $1 doz.
Steel Door Buttons—No. 4, x 1¾ inch, 80c; 2 inch, 95c gross.

New Selling Base Established on Rope

Winnipeg.

CORDAGE.—As mentioned in a recent issue of HARDWARE AND METAL new extras have been established on all kinds of rope, the new base size being ¾-inch and larger instead of ⅝-inch as formerly. Extras now effective are as follows: ⅝-inch, ½c lb.; 9-16-inch, ½-inch and 7-16-inch, 1c lb.; ¾-inch, 1½c lb.; 5-16-inch and ¼-inch, 2c lb.; 3-16-inch, 2½c lb. Rope prices continue to hold firm at former quotations which are herewith confirmed: Sisal 28¼c base; pure manila 39¾c base; British manila 33¾c base; lath yarn 28¼c base; African hemp 33¾c base per pound.

Mounted Grindstones, Barrel Bolts Higher

Winnipeg.

MOUNTED GRINDSTONES, BARREL BOLTS.—New prices just received from the manufacturers announce a further increase in the prices covering mounted grindstones which become effective at once. These show a general increase of about 5 per cent., making to-day's selling basis as follows: Norka $7.50; Western No. 00 $6; Rural power grinder No. 015 $11 each; drip pan and pedal attachment for No. 015 add $1.25 each. Prices on steel barrel bolts again show a small advance in price due to manufacturing conditions and are quoted to-day as follows: No. 1105, 4-inch $1.50; 5-inch $2; 6-inch $2.20; 8-inch $3.25 per dozen.

Another 5% Jump in Brackets, Latches, Etc.

Winnipeg.

IMPLEMENT BRACKETS, LATCHES, ETC.—Implement brackets, barn door latches, building frame clamps and store door latches have again been revised. These move up approximately 5 per cent. over former ruling prices, making to-day's resale quotation to the trade as follows:

Implement Brackets—No. 29, $6.95; No. 31, $8.35 doz.
Barn Door Catches—No. 38, $1.45 doz.
Quilting Frame Clamps—No. 2, 95c; No. 4, $1.30 doz.
Store Door Latches—No. 0, $3.80; No. 00, $6.05; No. 06, $1.65; No. 016, $1.85 each.

Linseed Oil Shows Decline of 10c Gallon

Winnipeg.

LINSEED OIL.—Recent declines in the flax seed market are reflected in the price of linseed oil which has dropped 10c per gallon during the week. Reports indicate that the yield of flax seed will be larger than at first anticipated. The demand at present is reported as normal and oil is now selling at the following prices: Raw linseed oil $2.20 gal.; boiled linseed oil $2.23 gal. in single barrel lots. Terms, net 30 days.

Turpentine Firm in Unchanged Market

Winnipeg.

TURPENTINE.—No change is recorded during the week on turpentine prices which continue firm with stock reported low. Prices now ruling are herewith confirmed: Barrels $1.10 gal.; half barrels $1.13 gal.; 5-gal. lots $1.15 gal.; 1-gal. lots $1.15 gal., plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Sept. 19.—General Pershing wants at least 100,000 3-inch shells a day. As this is entirely apart from his requirements in other sized shells as well as such shells as the United States might be able to make for Britain and France a very large proposition is presented and the Ordnance Department is pushing hard on the semisteel shell program. Last week a meeting was held in the Pittsburgh Chamber of Commerce auditorium, attended by 300 representatives of foundry and machine shops in western Pennsylvania, eastern Ohio, West Virginia and Western Maryland. Representatives of the Ordnance Department stated that they wanted 33,000,000 semisteel shells during the next ten months and insisted that more than half of the total ought to come from this district. It was urged that even those who could perform only part of the work on a shell participate, machine shops without foundries attached being expected to take hold as well as foundries. The semisteel shell program includes as minimum requirements, in addition to orders placed, the following: 1,500 daily 12-inch high explosive; 5,000 daily 155 mm. shrapnel; 35,000 daily 155 mm. high explosive; 80,000 daily 75 mm. high explosive. Prior to last week's meeting 31 representative foundrymen had visited the American Radiator Company's plant at Buffalo, where there is now a daily output of 100 6-inch shells, with prospects of largely increased output in the near future. Representatives of the Ordnance Department stated at the meeting that the specifications would be made as simple as possible and that every effort would be made to assist manufacturers taking up this line of work.

Shell Steel and Rails

The demand for such large numbers of semisteel shells does not mean that there is any relaxation in the pressure for regular steel shells but of course, it shows that the total shell requirements have become so large that it is out of the question to meet it with steel shells alone. Rails and shell steel have come into sharp competition, because there has been a considerable production of shell rounds at rail mills and rail requirements having lately increased very sharply it is impossible to increase shell steel production at such plants and decreases might even be necessary. The recent decision to remodel two wire plants, Donora and Woodlawn, to produce shell rounds instead of wire rods, will eventually help. In addition to the 150,000 tons of rails ordered a few weeks ago for the A. E. F. it is understood there are large additional requirements, occasioned by constant advances in the battle line. Possibly the Franco-American drive initiated last week, whereby the St. Mihiel salient was promptly wiped out, has something to do with this, as large guns will have to be brought forward if the Metz fortifications are to be attacked, and the gun movement would require large quantities of rails. It has been known in the steel trade in Pittsburgh for months that the French have had large guns ready for a long time past against the time when activities should be initiated at this point. The steel trade, it may be mentioned, is naturally particularly interested in this phase of the military operations, seeing that its objective would be the control of the Minette ore district from which Germany secures nearly its entire supply of steel.

Tin Gets Another Cut

As a means of saving steel the War Industries Board has ordered, for the fourth quarter of the year, a 30 per cent. reduction in the supply of sheet bars to the tin plate mills, and it chances that the major portion, if not all, of the curtailment will be at the Edgar Thomson steel plant of the Carnegie Steel Company, which by reducing its output of sheet bars will be able to make correspondingly more rails. Last May a precise allotment of sheet bars to each tin plate plant was ordered, a definite weekly tonnage per mill, whereby there has been an absolutely full supply of steel for the tin plate mills, to insure a full supply of cans for the perishable food crops. This now being taken care of, it is feasible to reduce the output of tin plate. After January 1 the allotment will no doubt have to be increased. The saving in steel in the three months' tin plate curtailment will be between 125,000 and 150,000 tons. As a measure of comparison, it may be mentioned that one mile of track in 85-pound rails involves about the same amount of raw steel as 1,000,000 two-pound tin cans.

Apart from the rail requirements for the overseas military operations, Director General of Railroads McAdoo wants 60,000 tons of rails a week for replacement on domestic roads and for building new track. In the steel trade it is considered impossible to meet such a demand, but in the past few weeks the deliveries have at any rate been much heavier than formerly. Mr. McAdoo was in Pittsburgh last week in his inspection of railroad conditions and he summoned to meet him here A. W. Calloway, manager of bituminous coal production for

(Continued on Page 116)

WEEKLY PAINT DEPARTMENT

Service Counts in the Sale of Paints

Little Suggestions That Are Practical and Dependable Are Valuable in Helping Customers to Get the Right Goods—This Means a Satisfactory Job and Encouragement to do More Painting

TRADE follows the push. Just now the big "drive" is for business in the agricultural sections. The farmer needs the paint push from the dealer and the retail hardwaremen who are putting their paint department on the map are those who are spelling Push with a capital "P." Some of them by the business they are getting seem to be making every letter a capital and they give as an explanation that because the farmers never had so much money in their lives or got such high prices for their produce, that they are willing this season to spend in proportion and are fixing up their homes, painting up their barns and giving wagons and implements a coat or two—this last as a general means of making them last longer, protecting them from the destructive forces of the elements, and thus saving money by not having to buy new ones. This is a big item, too, especially at the present prices and the farmer is nothing if he isn't keen about saving money.

BUSINESS IS GOOD

Taking it all round the dealers report that business is good and they expect to sell more gallons of paint this fall than usual. What is even better, they say that with continued aggressive efforts the situation is capable of development and they plan to make the necessary efforts and get all the profits.

"One of my troubles," said a dealer to HARDWARE AND METAL, "is that I am not always able to answer the little questions that people ask. They ask me some practical point that I suppose I should know and yet very often I don't. I could sell more paint and more varnish too if I could answer these questions. Why not give us some information along this line?"

Here are some suggestions that will help in selling paint and in solving the problems of prospective customers.

THE COST OF LIGHTING

The expenses of lighting a house may be materially reduced by making sure that there are no dark walls. It is estimated that a black wall destroys ninety-six per cent. of the light. Every dark wall is one of the most perfect light destroyers that could be devised. White is the best color for keeping a house bright and cheerful. It only destroys twenty per cent. of the light and throws back the other eighty per cent. White paint therefore from the point of light is one of the most economical coatings that can be put on. It is astonishing how many dark walls there are in homes, shops and stores. If the owners ever stopped to figure it up they are losing money, throwing it away in fact. Light yellow is a good color for preserving light, but even at that it destroys forty per cent. Orange figures out fifty-fifty, while pink destroys 64 per cent. of the light. These figures may help some of your customers in picking colors for interior work.

DINING ROOM DECORATION

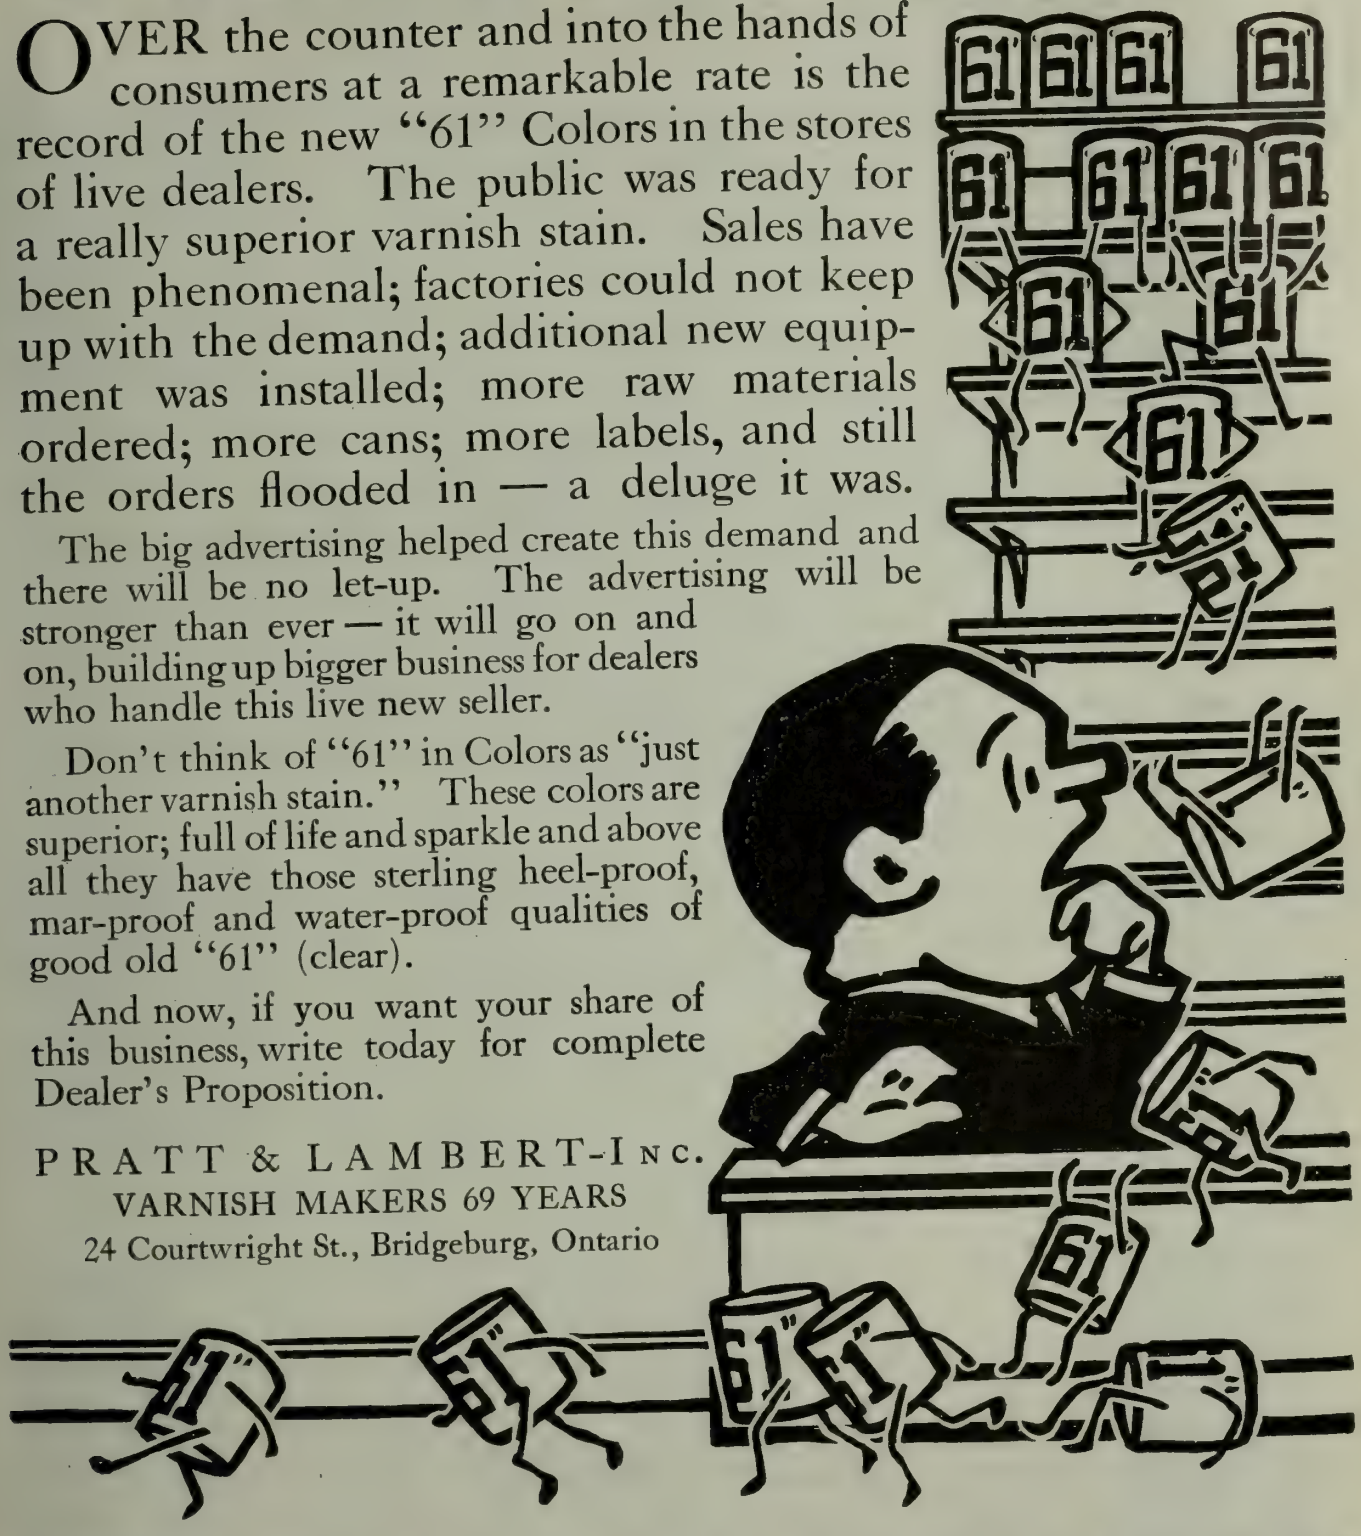
Many dealers are asked to select color schemes for dining rooms. Dining rooms as a rule are well lighted and therefore light colored paints are not used so often as in other rooms, although often it is found practical to use them in combination with some darker shade. The following color schemes are harmonious for dining rooms: reddish brown for the lower portion, with dark or olive green above, Delft blue and cream, brownish yellow and golden cream or dark green and light brown. Some rather striking effects may be obtained by these combinations when properly arranged and results will be obtained which will be a source of delight to the owner.

Various shades of red seem to be called for very largely for work in halls. In many homes the hall opens into the dining room and it is effective if the dining room paint harmonizes. In cases of this kind reddish tan, terra cotta or brown for the lower portions with the upper parts done in either very light shades of these colors or in cream or light ochre are effective.

WATCH THE CLERKS

Many firms are taking special pains to coach their clerks in this idea of service to the customer. It is really a valuable help, especially in building future business.

"Over the Counter"



OVER the counter and into the hands of consumers at a remarkable rate is the record of the new "61" Colors in the stores of live dealers. The public was ready for a really superior varnish stain. Sales have been phenomenal; factories could not keep up with the demand; additional new equipment was installed; more raw materials ordered; more cans; more labels, and still the orders flooded in — a deluge it was.

The big advertising helped create this demand and there will be no let-up. The advertising will be stronger than ever — it will go on and on, building up bigger business for dealers who handle this live new seller.

Don't think of "61" in Colors as "just another varnish stain." These colors are superior; full of life and sparkle and above all they have those sterling heel-proof, mar-proof and water-proof qualities of good old "61" (clear).

And now, if you want your share of this business, write today for complete Dealer's Proposition.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, September 19.—While all the items handled by paint makers are steady and firm there has been no change from the revised list of last week, in which putty figured so prominently. The changes in price of materials used by paint men have totaled much since definite changes of a general nature were made and it is very probable that the forthcoming deliberations of the manufacturers will call for some distinct and considerable advances, particularly on special lines, and very probably on varnishes.

Linseed Oil Holds; Seed Prospects Fair

Montreal.

LINSEED OIL.—Seed markets have fluctuated considerably for the past week. In comparing these with three months ago the quotations show a spread from then of only 35c, to-day's quotation being $4.10. Reports from the producing centres are somewhat varied and uncertain although one of the large flaxseed mill owners stated to HARDWARE AND METAL that his report, just received as this is written, indicated a real improvement in the Canadian West on growing flax. Others again state that the outlook now might be classed as "medium to poor." Present stocks of oil have been much depleted, and while oil is still to be had in limited lots of one to four barrels, future business, when new crop seed will be available, is more welcome to the crushers. Prices are somewhat stronger and raw is now selling from $2 per gallon up in 1 to 4 bbl. lots.

Linseed Oil—	Raw Imp. gal.	Boiled Imp gal.
1 to 4 barrels	$2 00-$2 10	$2 02½-$2 13

Seasonable Movement; Putty on New Basis

Montreal.

PUTTY.—Since the changes made effective September 9, full particulars of which were recorded last week, there has been nothing of note occuring. Sales are made on a seasonable basis and the undertone is steady and firm. Present quotations will probably rule for some weeks yet.

Standard Putty—	Per 100 lbs. 5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Turpentine Quiet; Prices Steady

Montreal.

TURPENTINE, ROSIN. — The local turpentine supply is sufficient to take care of present business which is now limited. Prices have held steady and are without change. There has been some small accumulation of supplies in the southern markets although this is not large.

Turpentine.	Per Imp. Gal.
1 to 4 barrels	0 94 1 00
5 barrels and over	....
Small lots	1 01 1 06

(Packages extra)

White Lead in Oil Steady; Sales Fair

Montreal.

WHITE LEAD IN OIL.—Corroders are looking ahead to their requirements for the next season and in view of this there is a great deal of speculation as to where requisite stocks are coming from. The great question in the matter of production is that of labor shortage, and how this will be met no one seems in a position to know. Present quotations are as follows: Five ton lots standard lead $17 per 100 pounds; ton lots $17.35, and smaller quantities $17.85.

Mixed Paint Prices To Be Arranged Soon

Montreal.

MIXED PAINTS.—Even at this late date there is still a fair amount of paint business passing and the manufacturers appear to be well satisfied. Prices are steady and the market undertone is very firm. So varied and changing are the costs of labor, material and transportation, as well as the uncertainty of an interrupted supply of raw material, that paint men are unwilling to make predictions as to the future position of paint. This matter will be under advisement very soon and announcement of paint prices may be looked for around the first of October.

TORONTO

TORONTO, September 19.—An advance of 5c per gallon in linseed oil has been made in some quarters which serves to narrow the range to that extent. Supplies though fair are none too heavy. Turpentine is easier at primary points whereas rosin is considerably higher. Neither change has affected prices locally as yet. White lead in oil is ruling with a very firm undertone and an early announcement in regard to mixed paints is looked for. Business is considered good.

Linseed Oil Higher; Range Narrows

Toronto.

LINSEED OIL.—An advance of 5c per gallon has been made in some quarters in linseed oil. The decline from high levels named last week combined with advance from low prices this week has served to narrow the range of prices materially. The seed market has been active as far as price revisions have occurred, sharp advances being made early in the week and a substantial decline being made on Wednesday. Stocks of oil in some quarters are decidedly scarce, whereas others report a fair supply available and the requirements of their trade being met. The range of quotations prevailing to-day follows:

Linseed Oil—	Raw Imp. gal.	Boiled Imp. gal.
1 to 2 barrels	$2 02-$2 10	$2 04½-$2 13

Turpentine Firm; Supplies Scarce

Toronto.

TURPENTINE.—Locally the market is holding firm though a somewhat easier tone is noticeable at primary points with indications that prices may fall still further. Only about 80 per cent. of shipments abroad as compared with last year have been made, and whereas production is lighter stocks are heavier. Supplies locally are generally pretty light, in fact as one jobber stated, "turps is too scarce to talk about." However, shipments now rolling are expected to relieve the situation, and in view of the comparatively small demand no real suffering is reported. Quotations are unchanged as follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$0 95 $1 00
2 to 4 barrels (barrel included)	0 94 0 99
5 gallon lots	1 05 1 10

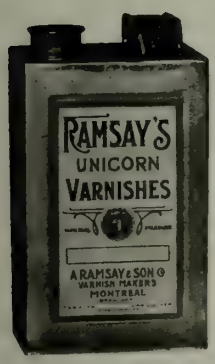
White Lead in Oil Firm; Demand Only Fair

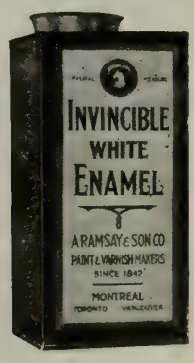
Toronto.

WHITE LEAD IN OIL.—The market is ruling with a very strong undertone. The situation in regard to pig lead is

FALL SALES

RAMSAY'S





Be With the Live Ones and Keep Your Paint Department Alive During the Fall

TORONTO MONTREAL VANCOUVER

If interested, tear out this page and place with letters to be answered.

very difficult and the position of the corroders on spring business is hard to determine. Production of lead to-day is being largely absorbed in what is considered essential war work and how generous the allotments may be to corroders is still a matter to be determined. Prices have held unchanged, putty being quoted at $17.80 per 100 pounds in ton lots and $18.15 in small lots.

Putty Holds At Recent Advances

Toronto.

PUTTY.—Putty has held at advances put into effect last week. A very fair movement is reported, fall trade showing up quite satisfactorily. Range of quotations now effective follows:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons.....	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

Mixed Paints Firm; Brushes Strong

Toronto.

MIXED PAINTS, BRUSHES.—Mixed paints are ruling very firmly and an announcement in regard to prices for spring is looked for at an early date. Fall business has been very good and sorting business is considered satisfactory. Brushes continue in a very firm market and manufacturers report business coming in very fair volume.

Glass is Strong; Rosin Higher

Toronto.

GLASS, ROSIN.—The feeling prevails that glass stocks must be getting rather low and when jobbers have to work on new stocks an advance is almost sure to become effective. In the meantime business is fair and the market strong, discounts prevailing being shown in current market quotations. Rosin shows a general advance of around 85c per barrel and indications are that the market will be firmer. As a matter of fact it is intimated that even at to-day's high figures these will look cheap in the course of the next few weeks or months.

PITTSBURGH MARKETS

(Continued from Page 111)

the Fuel Administration and J. Leonard Replogle, Director of Steel Supply for the War Industries Board. The motive was obvious. The Fuel Administration wants more coal to be produced and calls for more transportation facilities, while the Railroad Administration in turn wants more steel from the War Industries Board, hence Mr. McAdoo brings Mr. Calloway and Mr. Replogle together.

Other Steel Restrictions

The only precise fresh restriction in the use of raw steel in finishing departments is that mentioned above in the case of tin plate. Other restrictions are being considered, relating to the use of steel in merchant bar mills, pipe mills and wire mills. In the past few weeks these three classes of mills have been operating at an average rate of not more than 60 per cent. of capacity. Possibly decision in these matters will be aided by the inventory now being made of stocks of steel in the country, as a result of a questionnaire recently sent out by the Census Bureau in behalf of the War Industries Board, whereby steel producers, finishing mills, jobbers and manufacturing consumers are required to report their stocks in detail. Some stocks may be found that can be utilized for distribution to plants engaged in war work.

Production

The monthly report of the American Iron and Steel Institute indicates that steel ingots were produced in August at the rate of about 40,300,000 gross tons a year, against rates of 42,250,000 tons in July and 43,500,000 tons in June. The June rate was the best on record, barring only the rate last October. The July and August decrease reflects summer weather, particularly the record hot weather that prevailed in the central west during the first 12 days of August. On the whole, the midsummer drop in production was less than usually occurs, and there is good reason for expecting the June rate, or a higher rate, to be attained this month or next. Already there are reports of individual mills doing much better thus far this month than in the corresponding period of August. Some statistics gathered last May indicated an output of finished rolled steel equal to 78 per cent. of the production of ingots. Prior to the war the proportion was almost constant at about 76 per cent., the loss being in roll scale, scrap, etc., practically all of which is recovered. When shell steel manufacture for the Allies was undertaken the proportion dropped a trifle, on account of the heavy discards, but now it appears that some relaxation in the specifications, more skill on the part of the mills, and the employment of discard steel for various war uses are having their effect in pulling up the percentage. Using this factor, the ingot production in July and August would point to the production in the two months of about 6,000,000 net tons of finished rolled steel. This is to be considered in connection with the War Industries Board's recently increased estimate of 23,000,000 net tons of steel being required in the half year, with its very conservative estimate that only 17,000,000 tons production could be counted upon. If the two midsummer months produce 6,000,000 tons the half year ought to show at least 19,000,000 tons. This would still be 4,000,000 tons short of the estimate and the less important of the commercial uses, recognized as helpful in winning the war, cannot be allowed much steel.

TRADE ENQUIRIES

693. **Metals.**—A Milan firm invites correspondence from Canadian companies desirous of exporting metals.

695. **Aluminum sheets and utensils.**—A Milan house will buy on its own account or act as a representative of Canadian companies manufacturing sheet aluminum and aluminum utensils.

PARLIAMENT BUILDINGS, OTTAWA.

Tenders Wanted for "Iron Stairs and Ladders, etc.," for Boiler House.

SEALED TENDERS will be received by the undersigned until noon, September 27, 1918, for the Iron Stairs and Ladders, etc., required for the Central Heating Plant of the above building.

All tenders to be based on the execution, erection and completion; together with the furnishing of all material, tools, appliances, labour, etc., as required and described by the Plans and Specifications for the "Iron Stairs and Ladders, etc.," for Boiler House.

The work included under this contract shall be commenced immediately upon the signing of the same and continued as may be directed and in such a manner as to ensure the completion thereof by December 31, 1918.

Plans and Specifications and any other information required can be obtained at the offices of the General Contractors, P. Lyall & Sons Construction Company, Limited, Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Minister of Public Works, for a sum not less than five per cent. (5%) of the amount of the tender, which will be forfeited if the parties tendering decline to enter into a contract when called upon to do so. If the tender is not accepted the cheque will be returned. If the tender is accepted, an additional cheque for a sum equivalent to five per cent. (5%) of the amount of the tender must be deposited before the contract is signed. The total security will be forfeited if the contractor fails to complete the work contracted for.

Certificates of payment shall be issued monthly as the work progresses and shall not exceed in the aggregate, ninety per cent. (90%) of the value of labour and material furnished and set out in the work.

The lowest or any tender not necessarily accepted.

Envelopes containing tenders to be marked: "Tenders for Iron Stairs and Ladders, etc., for Boiler House" and addressed to the undersigned.

TOO LATE TO CLASSIFY

HARDWARE—AN OLD ESTABLISHED HARDware, stove and house furnishing business, in a good Western Ontario town, and a fine farming district. Box 767, Hardware and Metal.

Canada's Trade Position With U.S.A. Improves

A FIFTY MILLION DOLLAR improvement in Canada's trade balance with the United States is noted from records of the first seven months of 1918. Canada is buying less in the States, and America is buying more from Canada. This is good business, and offers an encouraging outlook. The details are contained in THE FINANCIAL POST of Sept. 14.

WHEAT CROP CONDITIONS

Threshing is now general throughout the North-West, and the yield is in almost every case ahead of expectations. The quality also is very good, the berries plump and of fine color. This matter is dealt with in detail, with the latest facts on the new method of financing the wheat harvest, in THE FINANCIAL POST of Sept. 14th.

FOOD CONTROLLER MAY FIX MILK PRICES.

"One of the most radical steps yet taken by the government in relation to price control" would be the fixing of milk prices. THE FINANCIAL POST of Sept. 14, from which the words are quoted, gives the latest business news developments in this direction.

$15,000,000 FOR DOMINION STEEL GROWTH.

The new plate mill being built for the Dominion Steel Co. will occupy a building a quarter of a mile long. Orders for it for five years' operation have been guaranteed by the Government. It is only a small part of the developments being undertaken though it will cost about $5,000,000. Total cost of the extensions going ahead will be over $15 000 000. On page 1 of THE FINANCIAL POST for Sept. 14 you will find further details.

OTHER CONTENTS OF THE POST

All the foregoing important business news items affecting Canada and eventually affecting your own business welfare are on the front page of THE POST of Sept. 14, and they are by no means all the interesting items on page 1, or one-tenth of the valuable contents of THE POST. "Jack Frost" *Can't* Play Havoc With Unprotected Plumbing

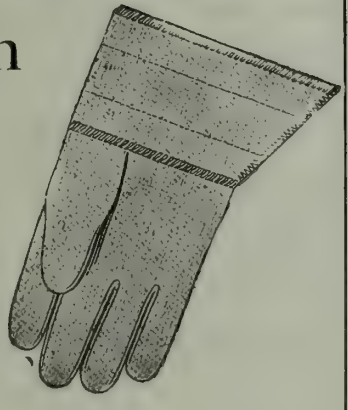
Where EMPIRE Non-Freezing Closets Are Installed!

Old King Winter will soon be playing havoc with unprotected plumbing—that is to say, in buildings where **"Jack Frost"** Anti-Freezing closets are not installed.

The secret of the Empire "Jack Frost" is that all parts are so arranged as to draw free from water, which prevents freezing.



It works automatically. Get in touch with us re prices in time for Fall trade.

Right Now—These Are Splendid Opportunities For Every Stephens' Representative Wherever He May Be!

Here are three Stephen lines that are in demand at this season of the year, and are given preference over every other line on the Western market.

Stephens' Paints are easily applied, cover much surface, and are remarkable in their wearing qualities.

You'll find them used by shrewd consumers and sold by wise dealers everywhere throughout the West.

GRINDERS

The Mehasco Line—well and favorably known throughout the West. Stocked in 4, 5, 6 and 7-inch fine carborundum wheels, spiral steel cut gears completely enclosed and entirely noiseless; working parts run in a bath of oil, no wear and tear. **The Champion** is a cheaper line, but exceptional value. It is stocked in 4, 5 and 6-inch wheels.

The **No. 6 Tilting Grinder** runs in oil and on ball bearings, is offset from the handle, and is easily adjusted to any position without the use of set screws. The **No. 5 Sickle Grinder** has the gears completely enclosed, and is furnished with two grinding wheels, one for grinding sickles, and the other general purpose farm work. We also have the **No. 60 Power Grinder,** driven by belt. We have a special proposition of a display stand with a one-dozen assortment. Write us for information.

The E-Z Telephone Bracket

Telephone brackets are very necessary in the home as well as in the office. They save time, valuable desk space, and eliminate accidents such as overturned inkwells and disarranged papers. They prevent the phone from falling.

UP OR DOWN

Always ready and in place

The phone is always out of the way, yet within easy reach, and several persons can use it without inconvenience to anyone.

Install one in your store, it will make sales for you

Talk No. One Hundred and Sixty-Five

We operated in August 88 per cent. on war work. The only galvanized sheets available now are for war use—direct or closely related purposes.

TINKER TOM

Look for Talk No. 166 next week.

DOMINION SHEET METAL CO., Limited
HAMILTON, CANADA

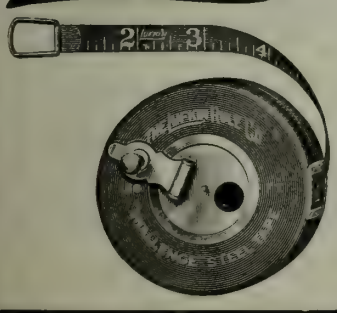
The E-Z Telephone Bracket

Telephone brackets are very necessary in the home as well as in the office. They save time, valuable desk space, and eliminate accidents such as overturned inkwells and disarranged papers. They prevent the phone from falling.

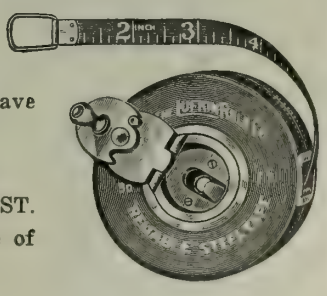
UP OR DOWN

Always ready and in place

The phone is always out of the way, yet within easy reach, and several persons can use it without inconvenience to anyone.



Install one in your store, it will make sales for you



Great West Electric Company, Limited

WINNIPEG

Distributors of Laco Tungsten and Nitro Lamps

LUFKIN Measuring Tapes

are the market's staple in their line, and while guaranteed, have a reputation for dependability better than any guarantee.
ACCURACY is the backbone of that reputation.
Our tapes are well fitted in every way to do their work.
ON SALE EVERYWHERE. CATALOGUE ON REQUEST.
Ask also for circular of *Instantaneous* Readings, one of the many improvements brought out by us.

"Delta" Files

— we'll help you sell them

TRADE MARK
DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

"Delta" Files

— we'll help you sell them

TRADE MARK
DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

The Woman in the Store!

Of course she can sell Gargoyle Mobiloils correctly.

Women clerks in hardware stores! Improbable? Not a bit!

Hundreds of sales clerks and other trusted hardware store employees have answered their Country's call.

Whether women, older men or boys take their places, there is and will continue to be an undoubted necessity for *new* clerks.

No need to worry about their learning to sell nails, hammers and other general hardware.

No need to worry either about their ability to sell lubricating oils correctly—if you stock Gargoyle Mobiloils.

The Gargoyle Mobiloils Charts of Recommendations for automobiles and tractors have made scientific oil-selling easy for anyone who can read. This is how it works:

A car draws up to your door. The car-owner wants oil. Your new clerk inquires, "Your car and model, please." "McLaughlin 1914." A quick finger runs down the Chart—the Chart your customer knows — the chart whose authority he respects. "Gargoyle Mobiloil Arctic is the oil for your car, Sir"—comes the answer. That answer bears scientific finality. Quick acceptance. A quick and satisfactory sale. And the same is true in selling Gargoyle Mobiloils for tractor lubrication.

In the same way your newest clerk can quickly and scientifically sell Gargoyle Mobiloils for any passenger car, commercial vehicle, tractor, motorcycle or motor-boat engine that you may be called upon to lubricate.

The testimony of an increasingly large number of successful Canadian hardware dealers is that Gargoyle Mobiloils take the uncertainty and dissatisfaction out of oil selling. And that a stock of Gargoyle Mobiloils attracts to their stores customers of the most desirable class.

GARGOYLE

Mobiloils

A grade for each type of motor

If you do not sell Gargoyle Mobiloils—write for booklet "Correct Lubrication" containing Charts of Recommendations and for full information regarding our offer to dealers.

The T-235 Gilbert & Barker Automatic Return Five Gallon Curb Pump

THIS PUMP GIVES YOU ALL THE PROFIT POSSIBLE IN GASOLINE SALES

If you sell gasoline to motorists, this pump will increase your profits by preventing spilling waste, giving quick service, saving your own and the customer's time. Exact measurement fairly treats both dealer and customer; indicator shows customer what he's getting; pump discharges five gallons at one stroke in twenty seconds, or single gallons, as desired. Mechanism always enclosed; absolutely dust and dirt-proof. No fire hazard.

If you are not handling gasoline, you are not only losing easy profits, but also additional profits on motor accessories that motorists buy where they get their gasoline. Install a Gilbert and Barker Gasoline Pump; it attracts trade. Get your share of the gasoline profits which growing commercial motor transportation makes bigger every day.

Write for our catalogue of gasoline and oil storage equipment for progressive dealers. Full information can be secured from

IMPERIAL OIL LIMITED

THE WORST MONTH IN THE YEAR FOR AUTOMOBILE ACCIDENTS

Brakes are worn down after a summer's use and need inspection

SEPTEMBER is the worst month in the year for automobile accidents, according to records kept by the police departments and safety societies. Here is the reason:

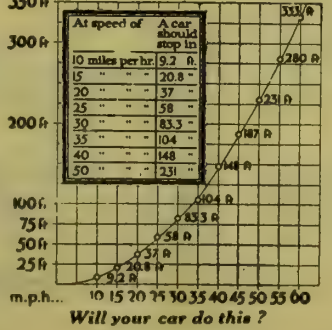
The cars have been used all summer—the brakes are worn down. Then, when the emergency comes, the brakes fail.

Your customers cannot afford to tolerate poor brakes. The protection of their cars and their own safety depend on the brakes being efficient. Their cars will be in service at least two or three months longer. In some cases they will be used right through the winter.

Your customers should have their brakes inspected regularly

Point out to your customers why there are so many accidents in September. Urge them to have their brakes inspected at regular intervals.

When their brakes need relining, put on Thermoid, the brake lining that is made for long, certain service.



Three reasons why Thermoid satisfies your customers

1st—Over 40% more material and 60% more labor is used in the manufacture of Thermoid than in any woven brake. This gives longest service.

2nd—Thermoid is the one brake lining that is Grapnalized. This exclusive process resists moisture, oil and gasoline.

3rd—Thermoid is hydraulic compressed. It wears down slowly and can be used until cardboard is thin.

Thermoid dealers are given the heartiest cooperation in building up a profitable volume of relining business. If you are not handling Thermoid, write to-day for information about the assistance which we give our dealers.

Will your car do this ?

Every foot of Thermoid Hydraulic Compressed Brake Lining is backed by *Our Guarantee: Thermoid will make good—or WE WILL.*

WINNING THE BUYER'S FAVOR

THE best possible buyer is not made an actual buyer at a single step It is one thing to win the buyer's favor for an article and another to make adjustments incident to closing the sale. Winning the buyer's favor is the work of trade paper advertising. Under ordinary conditions it should not be expected to do more.

Why You Should Be A Michelin Dealer

No. 23

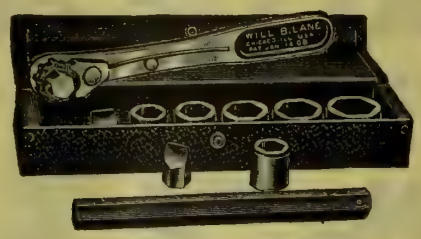
Only Michelin Tubes Fit Perfectly

The inner tube shown herein is another evidence of the superiority of Michelin Red Inner Tubes.

This tube was made by cementing together half a Michelin Tube and half a tube of another make. The composite tube was then slightly inflated and laid in half a casing cut longitudinally.

Notice the superior fit of the Michelin Tube (shown on the right).

This amazing difference is due to the fact that Michelin Tubes are made ring-shaped on ring-shaped mandrels, like the casing itself, whereas all other tubes are made on straight cores and hence are simply pieces of straight tubing cemented at the ends.



No matter what tube is used with the Michelin in this experiment, the difference is just as striking as shown in this photograph.

The great majority of motorists use Michelin Red Inner Tubes. Are you taking full advantage of this remarkable popularity? Write for dealer's terms and discounts.

Michelin Tire Co. of Canada, Limited
782 St. Catherine St. W., Montreal

Remember this :—
Michelin Tubes - Ring-Shaped
***All Others* - Straight**

MICHELIN

FORD SET

The Ford Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 1 Extension Bar 6 inches in length; SIX SOCKETS to fit all nuts and bolt heads on Ford Car, including the cylinder head.

STANDARD SET

Standard Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 7 Sockets to fit semi-finished Hex nuts, as follows: U.S. Standards from ¼ to ⅛ in.; A.L.A.M. Standards from 5-16 to 11-16 in.; Cap Screw Heads from 5-16 in. to ⅝ in.

Autoists like that ratchet feature

Lane's Unique Ratchet Wrench is ideal for close work

The autoist who has once discovered a few of the hard-to-get-at nuts and screws on his car is only too pleased to have some one introduce to him Lane's Unique Ratchet Wrench. He sees at a glance how effective the ratchet feature would be in close quarters where an ordinary tool would be absolutely useless.

Play up this ratchet feature and so arrange auto accessory displays that when motorists get up against the tool problem they will remember Lane's Unique Ratchet Wrench and come to you for a set.

Clark Carbon

The most efficient, satisfactory and economical heater fuel.

A scientifically prepared carbon densely compressed into bricks and yielding a much higher percentage of heat than any other heater fuel.

Clark Heaters

No. 5B Clark Heater

Oval type, end ventilators; strong, durable and of good appearance. Covered with Brussels carpet, asbestos lining. Used by farmers, mail carriers, cab drivers, etc. 12 inches long.

No. 3D, same as 5B, but 14 in. long.

No. 7C Clark Heater—Slanting Top.

Clark indestructible riveted steel body. Drawn steel ends, nickeled and polished. Heavy asbestos lining. Adjustable end ventilators. Covered with best quality green Brussels carpet. 14 inches long. Weight, 9 lbs.

No. 7D Clark Heater—Slanting Top.

Clark indestructible riveted steel body. Drawn steel ends, heavily nickel plated. Side and end adjustable ventilators, allowing perfect regulation of heat. Thick asbestos lining. Covered with extra quality of green Brussels carpet. A beautiful heater. 14 inches long. Weighs 9 lbs.

Above are three of our popular models. Catalogue of complete line sent on request. **Your Jobber can supply you. Insist on the genuine.**

ORDER NOW

Dealers Do This Before You Buy

Automobile, sleigh or carriage foot warmers.

Take a tube, package or cake of any heater fuel offered and test it beside a brick of Clark Carbon for heat-giving and lasting qualities, also for freedom from odors, gas and smoke.

The wonderful difference in favor of Clark Carbon will be apparent at once.

Clark Carbon radiates its maximum heat immediately, lasts much longer and is far more satisfactory in every way, also far more economical to use. From thirty years' experience in making foot-warmers and fuel we know that to satisfy users the heat must be quick and in good volume. A small amount of heat may do in some devices but is of no value in an automobile, sleigh or carriage heater.

Can You Beat It?

One brick of Clark Carbon in a Clark Heater will furnish a strong and steady heat for a period of from 12 to 16 hours. For short drives part bricks are used. Don't offer your customers untried and impractical heaters or heater fuel.

"The proof of the pudding is in the eating." Make the above test and you will stick to Clark Heaters and Clark Carbon Fuel—the old tried and reliable line that has made good.

Success and Your Associates

ALWAYS associate with men who are earning more money than you are. Such is the advice given by a man whose name is known the world over for his own success and the business which he created. It is good advice of a certainty, but we are not urging that it is the best advice. At the same time it is wise to associate with better or bigger men than you are yourself, because you are likely to be lifted up to their levels.

Most of us would probably like to be the intimates of J. P. Morgan, or of John D, or of Charlie Schwab, or Canny Andrew. If we had a speaking acquaintance with John Wanamaker, or Lord Beaverbrook, or Lord Shaughnessy, and with other distinguished and successful men, we would take comfort from the fact.

And most of us would feel rather small and uncomfortable if we were placed beside President Woodrow Wilson at a dinner table, or beside Sir Robert Borden, Sir Herbert Holt or Sir Wm. Mackenzie. And the reason would probably be that we know so little of the knowledge that really counts. If these successful business men engaged us in conversation we would probably find ourselves knowing very little about the things that matter.

This will illustrate the point:

Here's a true story. A Toronto manufacturer found himself on a train going to Albany in company with a number of distinguished Americans about to attend the inaugural ceremonies of a State Governor. A washout led to a delay, and the Canadian was thrown into close association with senators and congressmen and prominent lawyers. They bantered the little Canadian about Canada. He had the pluck of a bigger man. He had been a constant reader of THE FINANCIAL POST, and had absorbed many facts about Canada. He surprised his American traveling companions with his positive, well-informed and wide knowledge of Canada. When the company reached Albany, the Canadian was persuaded to attend the ceremonies, and was introduced as the man who knew all about Canada. The Governor was interested in Canada, and said so, and the little Canadian found himself telling the story of Canada very ardently to a very attentive listener, much to the amusement of his friends who introduced him.

This man made a hit on that journey, and many friends. One of the company gave him a stock market tip worth a fortune.

The point of this story is: You, as a Canadian, can make yourself informed very fully and intelligently if you become a regular reader of THE FINANCIAL POST. You can make yourself a worthy companion and intimate of presidents and magnates. The world likes to listen to men who know something well, and who can talk interestingly and informingly on the subject of their study.

You can become worth listening to if you know your Canada well. And you can get the kind and amount of knowledge concerning Canada which will make you interesting to others if you will read THE FINANCIAL POST regularly each week.

IF you read THE FINANCIAL POST REGULARLY you will find yourself keeping company with the highest paid staff of editors engaged on any publication in Canada—trained men who know how to make others know what they know and learn.

You will find yourself living in a most interesting world—the great, throbbing world of business. You will have your thoughts tremendously stimulated and helpfully directed. You will find yourself becoming a fit table companion for big men — this because you will have knowledge of a quality that will keep you from shame.

What is it that keeps you and THE POST separated? It cannot be its subscription price of $3. Probably it is because you are not very well acquainted with this paper.

We are going to put it to you this way: If you have the desire to be worthy of association with big men, then prepare yourself for such association by reading THE POST, and to make acquaintance easy, we provide the coupon below. It offers you THE POST for four months for a dollar bill.

The MacLean Publishing Company, Limited,

143-153 University Avenue, Toronto.

Send $\frac{\text{me}}{\text{us}}$ THE FINANCIAL POST for four months for One Dollar. Money $\frac{\text{enclosed}}{\text{to be remitted}}$

VLIT

FURNITURE & AUTOMOBILE

POLISH

Velvet Finish Instantaneous,
Lighter Labour. Troubles Over.

What is Vlit?

VLIT is the trade mark of a scientific chemical process which puts a fine VELVET finish on Furniture, Automobiles, etc.

Why should I use Vlit?

1. Because VLIT saves time and labor.
2. Because VLIT cleans, polishes and preserves a great variety of articles.
3. Because VLIT contains an ingredient that repels flies.
4. Because VLIT prevents dry-rot and furniture from becoming cracked from sun or heat.
5. Because VLIT puts a polish on Automobiles which prevents mud from adhering to the enamel.
6. Use only ONE cloth with VLIT. Vlit cleans and polishes in one operation.
7. You want the best for your money—an article that will give you entire satisfaction—VLIT.

An Expensive Conversation

Thousands of barrels of oil are wasted annually by overflowing receptacles, spilling, leaky containers, oily funnels, measures, etc.

The

Bowser System of Handling Oils

prevents all the loss of this kind. It is positively fool-proof. It saves time, labor and oil.

Let us explain fully how it pays for itself in a very short time. Our catalog is yours for the asking.

Wanted

HELP WANTED

WANTED — EXPERIENCED HARDWARE clerk. Apply stating experience and salary required to Matthewson Bros., Strassburg, Sask.

WANTED—HARDWARE SALESMAN, APPLY giving plenty of information, experience and salary expected to Mills Hardware Co., Hamilton.

SITUATIONS WANTED

CATEGORY C, SINGLE MAN, THIRTY YEARS of age, seeks permanent position with good salary to start, and prospects for future; twelve years' experience in hardware, wholesale and retail, also three years on the road. Capable of managing large concern. Prefer large town or city. Send your proposition in detail. I will satisfy you as to my ability. Apply Box No. 93, Hardware and Metal, Toronto.

EXPERIENCED HARDWARE SALESMAN now in retail store desires position as city representative for wholesale hardware or manufacturer soliciting business from retail trade. Have car which would be placed at disposal of firm for city business or immediate vicinity. Twelve years' experience: not subject to draft. Box 94, Hardware and Metal.

AGENCIES WANTED

DESIRED BY RESPONSIBLE FIRM HAVING representatives calling regularly on the hardware trade, fence dealers, and kindred trades in Eastern Ontario and Quebec, sale or exclusive agency for some staple line which might interest any of above trades. Communicate with P.O. Box 1842, Montreal.

MANUFACTURING AGENCIES WANTED FOR builders' hardware, cutlery, tools, auto accessories, etc. Could carry a stock. For further information write Box 90, Hardware and Metal.

FOR SALE

HARDWARE BUSINESS IN PORT DOVER. Stock and fixtures about $4,500. Reason for selling, ill health. J. G. James, Port Dover, Ont.

GOOD HARDWARE BUSINESS FOR SALE IN a live town of about 1,000. Situated in a splendid farming district. Stock in A1 condition. Box 86, Hardware and Metal.

HARDWARE IN ONE OF BEST SMALL towns in Saskatchewan, in splendid district that has never known a crop failure. Stock, fixtures and property, $15,000; turnover, $30,000 annually. No better buy in Canada. Half cash, balance easy, or will take choice half section improved land at good value, with or without stock and implements and balance cash. Box 98, Hardware and Metal.

A SPLENDID OPPORTUNITY TO BUY PROperty, store and hardware stock, 1¼ acres of land; house in connection; store lighted by gasoline; good barns and sheds; location main road; splendid locality for garage. This business selling; help short. Established 25 years. Box promises splendid opportunities; good reason for 94, Bailieboro, Ont.

FOR SALE—HARDWARE AND FURNITURE business in the best district in the West. Stock about $5,000, fixtures $500. Building can be bought or rented. Owner must sell. Very little cash will handle this. Box 92, Hardware and Metal.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

MISCELLANEOUS

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada. (tf)

ONEIDA JUMP

LONG SPRING ACTION -SURE TO HOLD

The **single spring** now used in all sizes of Oneida Jump Traps offers many advantages over the old-fashioned double spring used in similarly patterned game traps.

It travels much higher on the jaws, giving longer spring action and far greater holding power. No breakage due to short spring action under heavy pressure—no weakness due to rivet holes.

A typical improvement in game trap design—coming, of course, from Trapping Headquarters with seventy years' experience behind it.

National No. 806

Garage Door Set

The Sign of a National—

Note the neat, clean appearance from the outside. No structural iron work is visible, track and hanger being on the inside. Note also how the one door opens without disturbing the others, thus giving free access to the garage without necessitating opening of all doors.

These are two of the features which recommend this set to builders and motorists.

This set opens the doors inwards, preventing any trouble from ice and snow. Its action is easy and certain, without friction or binding. The Hanger operates on a swivel, which permits the wheels to follow the track without sticking. A gentle push opens the doors; a slight pull closes them.

Set No. 806 *includes*: *No.* 27 *Latch,* 1 *Swivel Hanger, 6-foot Braced Rail,* 4½ *pair* 4 *x* 4-*inch Jap. No.* 505 *T. P. Butts,* 1 *No.* 820 *Chain Bolt,* 1 *No.* 830 *Foot Bolt,* 1 *No.* 5 *Pull,* 1 *No.* 30 *Safety Hasp* (4½-*inch*), *and all the necessary bolts and screws.*

Increased Profits to Retail Rope Dealers

THAT is what thousands of retail merchants throughout the country are realizing, through the use of the Plymouth plan of selling rope by the foot. They make more money on their rope and their customers are better satisfied. A combination of results that no merchant can afford to overlook.

Plymouth Manila Rope

is good rope. There is no better rope made. It is 100 per cent. high grade Manila. Strong, durable, and flexible. It gives long service. It gives satisfactory service. It makes your customers ask for "more rope the same as I bought here before." If you sell your customer good rope he'll take a chance on your other goods being of the same quality.

THE DUST-FREE STORE

DUST can never be kept out of the store, but it can be effectively controlled by the use of

STANDARD Floor Dressing

which when applied to your floors, definitely lays and holds 90% of atmospheric dust. This is a condition of affairs that the old fashioned mop and feather duster can never bring about. They only disturb the dust to settle elsewhere.

Standard Floor Dressing is economical. A single gallon suffices for 500-700 square feet of space or shelving, and lasts for several months. It may be applied with an ordinary floor sprayer. To keep the dressed surfaces in order, all that is necessary is to sweep off the accumulated dust and dirt regularly with a stiff brush or broom.

Floors treated with Standard Floor Dressing help to promote a fresher, tidier store, and cleaner, quicker-selling stock on the shelves.

Supplied in one and four gallon cans, and in barrels and half barrels.

WELDING

Welding with Armco Iron, either for repair work or new construction, means economy of time, labor and materials.

Armco Iron's melting point is uniform. It welds more quickly and more smoothly than any other welding material, and the joints have the maximum strength and reliability.

Armco Iron welding material is extremely useful in establishments where repairs are made on steel castings for industrial and marine construction. Also in railroad construction and repair shops for welding cracks in locomotive fire-boxes, welding in place new side sheets, repairing worn engine wheels, etc. It is used extensively in the manufacture of iron and steel barrels, grave vaults, pressure tanks, and innumerable other metal products.

The welding quality of Armco Iron sheets and plates is of great advantage in making various welded articles with or without the use of additional welding material or flux. Leading stove manufacturers use Armco Iron polished sheets, welded directly together.

Take up your welding problems directly with our welding department. We'll give you the facts and the reasons.

Write to-day.

PAGE STEEL & WIRE CO., Monessen, Pa., are manufactures and distributors of Armco Iron Wire for welding and electrical purposes. They carry an ample stock of Armco Iron Welding Wire, 16 to 8 gauge, and Armco Iron Welding Rods, ⅛ inch to ¼ inch in diameter.

AMERICAN ARMCO INGOT IRON

The trade mark ARMCO carries the assurance that iron bearing that mark is manufactured by the American Rolling Mill Company, with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

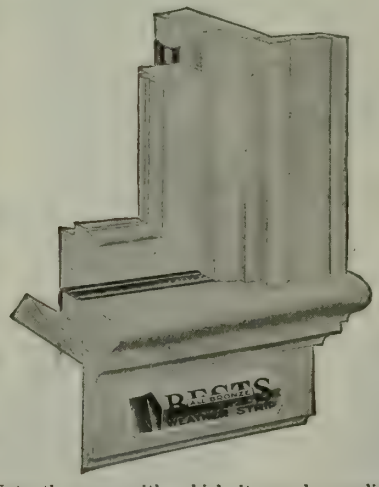
AT LAST



An all Metal Weather Strip that can be *applied easily*, and handled through the Hardware Store.

BESTS ALL BRONZE WEATHER STRIP

solves the problem of making a cold house PERMANENTLY WARM by simply nailing it around the doors and windows, without removing them. It is a strip of special quality SPRING BRONZE bent almost at right angles, so that the spring end excludes all drafts, and prevents all rattles. It actually DOES what other Weather Strips claim to do, and lasts a lifetime.

BESTS ALL BRONZE WEATHER STRIP

is packed in convenient lengths, 3 ft. (for windows), and 3 ft. 6 in. (for doors), with nails and illustrated instructions, and tied in packages of 21 ft., which retail for $1.25.

Note the ease with which it can be applied.

Every up-to-date Hardware Merchant in Canada should have this in his Stock this Fall.

NUMBER ONE

The WRIGHT BROTHERS

IN 1896, Wilbur Wright and Orville Wright of Dayton, Ohio, decided to abandon several small business enterprises in which they were interested and concentrate their entire force and inventive genius on the perfection of a flying machine. Up to the time they entered the field no one had ever studied the subject with such scientific skill or such undaunted courage.

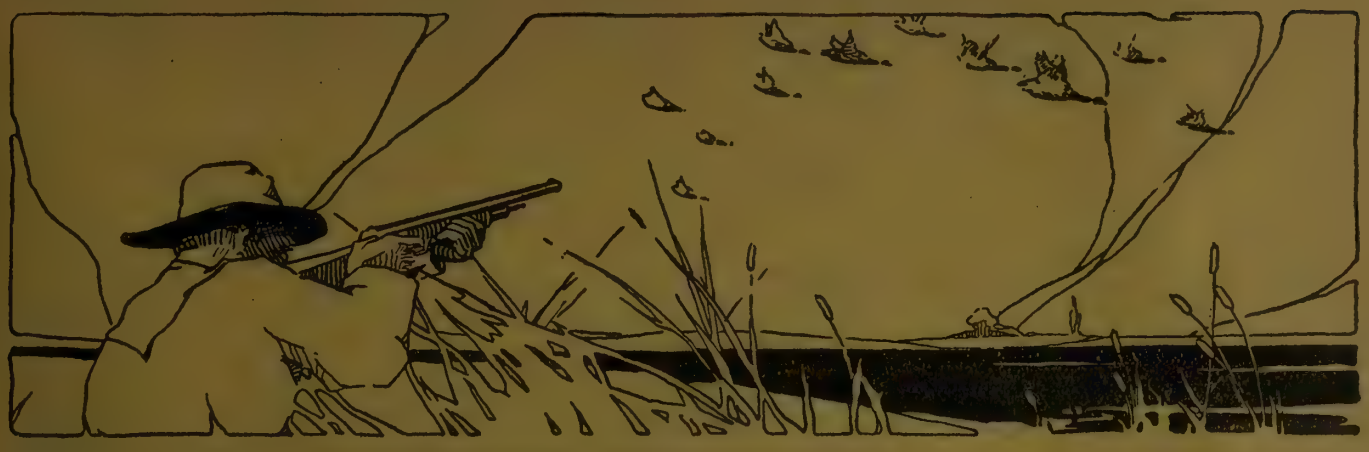
The Wright Brothers were masters in all their work. After years of concentration they gave to humanity a gift which ranks in importance with the noblest achievements the world has ever known.

The secret of Wright Brothers' success was

CONCENTRATION

The same principle of concentration, which enabled the Wright Brothers to perfect their Airplane, has enabled us to create the Victor Hack Saw Blade—which is recognized everywhere as the last word in Hack Saw Economy.

For twelve years we have focused all our force on the perfection of this one tool—the Victor Hack Saw. We have centered our powers on making exhaustive experiments and on the development of new processes.



Logic told us that by concentrating all our energies on one tool, we were more likely to produce a Hack Saw Blade which would excel all others, than if we tried to perfect a dozen or a hundred different tools.

As a result of this concentration, we have created the most enduring and efficient Hack Saw Blade known to science. There is nothing vague about the economy of the Victor Hack Saw Blade. It has been proven.

VICTOR

For the Old Boys

Yes, and some of the young ones, too, every dealer in Canada carries a stock of Black Powder Shot Gun Shells.

Dominion Crown

Black Powder

is the shell that the duck shooter means when he says to you, "Give me the Old Crown; I have used it for years, and it brings down the ducks."

The popularity of the Crown is due to its name, which is known throughout the Dominion—to its price, the lowest of the popular shells on the market—to its sure killing power, and to the fact that it can be used with safety in the cheaper grades of shot guns.

No stock is complete without Dominion Crown, made in 20, 16, 12, 10 gauges.

SOLE MAKERS

The Story of War Under The Earth

THE German sappers had discovered and broken into a Canadian tunnel. They had planted a machine gun at their end and sent a shower of bullets down the dark, narrow passage whenever the Canadians made any effort to enter their underground galleries. The story of how two Canadians nailed steel snipers' shields to the front of a push cart and shoved it ahead of them up to the very teeth of the gun, and how they dropped a can of deadly explosive, hopped on to the cart, and let it coast back down the tunnel, while bullets rattled on the shield like hail and, finally, how the explosive blew up the machine gun and its crew and blocked the passage again—this remarkable story is told by Lieut. C. W. Tilbrook (who was one of the two) in the course of an article, "An Underground Tank," in October MACLEAN'S.

Recently a Toronto newspaper declared editorially that the public was tiring of war books and war stories because of the sameness of them. The newspaper was right. But the public literally devours any story of the war that is new. The series of articles that Lieut. Tilbrook has done for MACLEAN'S has been read with an astonishing amount of interest *because they are different from anything that the public has yet read.* Warfare in the tunnels is a terrible business—grim, silent, cruel. It is a strangely technical phase of warfare and the "sappers" go about their business with queer instruments that might have figured in a Jules Verne phantasy. To read of underground fighting, as Lieut. Tilbrook tells of it, is to get a vision of a new kind of war altogether—something gripping, fearsome and mystifying.

"An Underground Tank," is the best of his series. But, after all, it is only one feature in a long array that makes the October issue of MACLEAN'S one of unparalleled interest.

A STRANGE CHANGE IN WOMAN'S WORLD. By Agnes C. Laut.
The new status of women, arising out of the war, is treated in the powerful style of this famous writer, who came from the Canadian West. It introduces a new thought.

CONSCRIPTION AFTER THE WAR. By Brigadier-General A. C. Critchley.
A young Canadian who rose from Lieutenant to General in three years and originated the "Critchley Method" of military training, tells what he thinks about the need for compulsory service after the war.

THE LIFE OF MARY PICKFORD. By Arthur Stringer.
The second of a series of articles on Canada's most famous woman. No expense has been spared to produce the beautiful illustrations specially posed for the photographs.

THE FOUR FACTIONS AT OTTAWA. By J. K. Munro.
That the House will split into four, more or less, distinct groups is the guess of the author, a trained political observer. He outlines the reasons, humorously, pungently and impartially. It is a political article on new lines and will be found refreshing.

BONEHEAD BILL—Another Service Poem.
Robert W. Service, most popular of poets, sends all his war verse to MACLEAN'S. In "Bonehead Bill" he depicts the grief of a soldier for his fallen foe.

THE EVENTS OF A MAD WORLD
are summed up in the "Review of Reviews" which gives reprints of the best articles from the magazines of the world. All the best and most important articles are selected—five dollars' worth for twenty cents!

Why You Should Be A Michelin Dealer

No. 24

Michelin Accessories are Best

Michelin offers the dealer a complete line of tire accessories, which are just as superior in quality as are Michelin Tires themselves.

The most important of these accessories are:—

1st. Michelin Mastic—a plastic compound used for healing cuts in casings. It is clean and easy to handle, and when it "sets" becomes practically a part of the casing itself.

2nd. Michelin Cement—this is a pure gum liquid of great binding power.

3rd. Michelin Patches—these are made of the same superior rubber that has made Michelin Tubes famous. Michelin patches are bevel-edged and made in a variety of sizes to meet all requirements.

These Michelin accessories are put up in various size cans and packages. They make good displays. By enabling motorists to make their tires go farther, they help the Michelin Dealer in building up good-will.

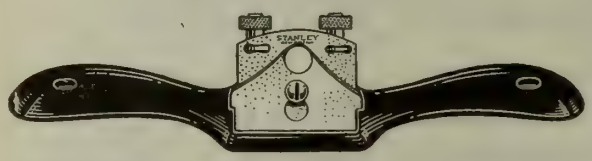
STANDARD STEEL AND BRASS CHAINS

MR. CHAIN USER: August, 1918.

For many years we have made a specialty of chain for manufacturer's use, and are well equipped for this business.



Our chain is made of special wire found by us to be best suited for the purpose. The links are well shaped, small and compact, making a heavy, strong chain.

A sample mailed to us of what you may need will be given immediate attention, and interesting prices quoted on any quantity.

Yours very truly,

The Andrew B. Hendryx Company, New Haven, Conn.

Stanley Tools

Stanley Adjustable Spoke Shaves Nos. 151 and 152

These new and improved Spoke Shaves have a Lever Cap fastening the cutter in such a manner as to bring an even pressure on the cutting edge.

The important feature is that the cutter can be quickly adjusted both endwise and sidewise by means of the adjusting screws which engage the slots near the end.

The Cutters are made from a high grade of steel, well tempered and sharpened ready for use.

The handles are japanned and through each a hole is made to enable the owner to hang the tool up out of the way.

Made in two styles—one with raised and the other with straight handles.

10 in. long, 2⅛ in. Cutters.

GILBERT TOYS

For a War Christmas—Gilbert Toys

Gilbert Toys are **genuine**—that's what makes them so popular with the youngsters. They **look** like, they **work** like, they are **made** like the real article, and boys are quick to see it, and parents come where the boys lead.

Gilbert Diving Submarine

This is the real toy submarine—it passes the critical eye of the boy who knows more about how a submarine should look probably than his father does. It fights, it dives, it discharges a torpedo, it rises. The Gilbert Submarine has realistic periscope, torpedo tube, conning tower, etc., hull of steel, finished in battleship gray, and all the look of a real fighting craft. Mechanical steel spring movement almost impossible to get out of order.

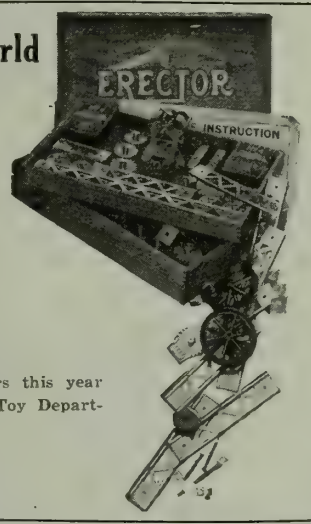
Retail, $3.00

Gilbert Machine Gun

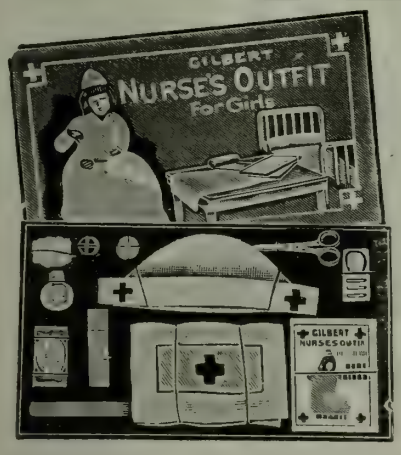
You can't fool a red blooded boy with a toy machine gun that doesn't look like the real article. The Gilbert Machine Gun is true to life—every boy who has seen war pictures at the movies, or in the Sunday supplements will recognize the Gilbert Machine Gun at once.

Retail, $4.90

Best Known Toy in the World



Since its inception five years ago Erector has been the most widely advertised, most talked about toy for boys, and this year, with the talk of the wondrous work of our engineers behind the lines in Europe fresh in every boy's mind, more than ever will



ERECTOR REG. U.S. PAT. OFF.

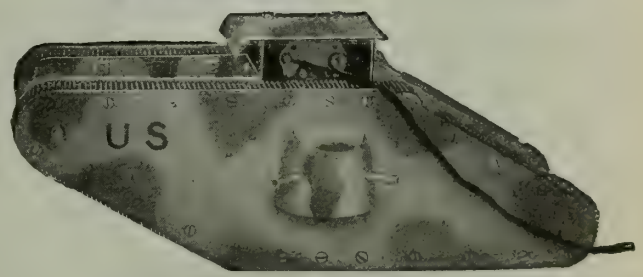
The Toy Like Strucutral Steel

be the toy for real boys. A display of Erectors this year will bring a sure stream of customers to your Toy Department.

Retail, $1.50 to $37.50

GIRLS TOO!

Here's the true motherly, merciful, war-plaything for girls — they can be Red Cross Nurses, make bandages, treat wounded dolls and feel the thrill of patriotism with



GILBERT

Nurse's Outfit

Contains all the details of a nurse's kit, true to life, and a "First Aid Primer," written in child's language. Little girls have been overjoyed with this handsome outfit—packed in most attractive cartons.

Retail, $3.75

GILBERT B-M Tank

The very latest addition to the Gilbert Toy line. This Tank is a genuine miniature model of the famous British Tank—it works in true tank style, climbing over ditches or any sort of obstacle. Will set your boy customers wild with delight. Equipped with electric motor caterpillar feet, gun houses, etc.

Northern Electric
"DREADNAUGHT" TIRE CHAINS

Electric Welded

A season of showers and slippery roads; the time for ***pushing*** Tire Chains is NOW. What effort are ***YOU*** making to "land" this profitable business?

Northern Electric "DREADNAUGHT" Tire Chains, although not the most expensive, are made to a quality standard that cannot be excelled. The Electric Welded Cross Sections are inspected, tested, and carefully bone-hardened, assuring dependable service. The Rim Chain is rust-proof and the Cross Chains are copper-plated.

They are fully guaranteed as to quality, material and workmanship.

There is a NORTHERN ELECTRIC "DREADNAUGHT" TIRE CHAIN for every car and truck; any style or size.

For Light Cars, IMPERIAL GRIP CHAINS, although costing less than "DREADNAUGHT," are very satisfactory and of good value.

STANLEY Peerless Storm Sash Hardware

ADVISE your customers to get ready NOW for cold weather. Suggest that they fix the windows weather-tight and prepare to protect themselves against the wintry blasts, which will surely come.

Substantially made, with features of design that insure the maximum of strength, convenience and utility, Stanley Peerless Storm Sash Hardware is now of special importance.

Keeping windows shut, keeping heat in and cold out means coal saved, and this is the year when coal must be conserved.

Write to-day for this new Storm Sash folder, and state number of copies you can use—they will be sent imprinted with your name and address free on request.

Manufacturers of Wrought Bronze and Wrought Steel Hinges and Butts of all kinds, including Stanley Ball Bearing Butts. Also Pulls, Brackets, Chest Handles, Peerless Storm Sash Hangers and Fasteners; Screen Window and Blind Trimmings; Twinrold Box Strapping, and Cold Rolled Strip Steel.

Stanley Garage Hardware is adaptable for factory and mill use.

IT PAYS TO SELL A DEPENDABLE LADDER

This ladder has a steel galvanized top which is ten times more durable than the wood tops on other ladders. It never warps or cracks or breaks. The iron hinge is fastened to it with six rivets and is always held firmly and in perfect alignment. There are no rails to pull out and make the ladder wobly. No other ladder in America has the all-steel top.

A galvanized iron plate binds every step to the risers on both sides to keep the ladder stiff under the hardest usage. It is fastened over the nails that hold the steps to the sides and thus prevents them pulling out. It also makes impossible any danger of the steps splitting. An iron rod supports each step.

You cannot afford to handle any other line.

Vol. 30 TORONTO, SEPTEMBER 28, 1918 No. 39

War Work Basis Now for Getting Steel

Many Firms Not Engaged on Essential Work Cannot Obtain Supplies—More Changes Coming—Conservation of Labor and Shipping Space For War Purposes Big Factors in Determining Future of Many Industries

STEEL and iron continue the center of the keenest interest throughout the manufacturing and mercantile world. Important announcements regarding restrictions, allocations and prices have been coming so quickly lately that it seems certain that little steel will be available for anything but war work from now on. Many firms will probably have to cease their present operations altogether and go into war work or close. Conservation of labor and of shipping space are also big factors in the changes that are yet to come, and important announcements will be made shortly regarding essentials and non-essentials. It was stated to HARDWARE AND METAL that wire fencing and furniture may very shortly be classed as non-essentials, and that several other lines are now being considered.

Important developments have occurred across the line this week that will have far-reaching results in Canada. President Wilson has approved the recommendations of the War Industries Board on iron ore, pig iron, and iron and steel products, maintaining the maximum prices now prevailing for the three months ending December 31, with the following exceptions:

Prices Increased

Base prices of Lake Superior iron ore delivered to lower lake ports are increased 25 cents per gross ton on October 1, subject to the condition. These increased prices are based on the rail freight rates now in effect and on present lake rates, and in the event of any increase or decrease in either rail or lake rates, said prices shall be increased or decreased accordingly on all deliveries made during the continuance of such increased or decreased freight rates.

The base price on basic iron is increased to $33, f.o.b. furnace. The base price on No. 2 foundry is increased to $34 f.o.b. furnace. The price of standard Bessemer iron is fixed at $35.20, f.o.b. furnace.

Subject to Change

The above prices are subject to the following changes from previous practice as regards delivery: (a) Pig iron produced in the Virginia, Tennessee and Birmingham districts and the scattering districts south of the Ohio and Potomac Rivers, including furnaces at St Louis, Mo., but not including furnaces bordering on the Ohio River, shall be sold on an f.o.b. Birmingham, Ala., basis. (b) Pig iron produced in the eastern district, i.e., from all blast furnaces located east of the Allegheny Mountains and north of the Potomac River, shall be sold on an f.o.b. Pittsburgh basis. (c) Pig iron from all other producing districts or furnaces shall be sold f.o.b. furnace as heretofore.

Important Notice

The United States Steel Products Co. is sending the following to the Canadian trade:

"Under present rulings it has now developed that orders from our Canadian customers are not subject to automatic classifications given domestic orders by the priorities division of the United States War Industries Board.

"It will be necessary for you to secure a priority certificate to cover any orders you have placed with us where you have not already done so, and we suggest you give the matter immediate attention, advising us of action taken by you."

From now on it would appear that all Canadian firms wanting steel must have a priority certificate from Ottawa. If steel from across the line is sought they must have certificates from both Ottawa and Washington before their request will even be considered by American mills. Firms are automatically classified in regard to priorities according to the importance of war work they are doing.

Extreme Shortage

Reports from Montreal state that no relief has been given to the general steel situation and conditions are still marked by an extreme shortage in many lines. The scarcity of pig iron has virtually eliminated the commercial market and many foundries operating on this class of work have had great difficulty in meeting the trade requirements. In some cases business has been partly maintained by using larger quantities of scrap, but even here the available supply is not equal to the demand. The War Trade Board will only furnish the raw material to those working in the most essential war enterprise.

Plates are Scarce

This also applies to other lines of steel activity so that considerable tension is felt in general manufacturing establishments owing to the inability to obtain sufficient steel for repairs or replacements. The constant demand for light plates has caused a drain on the dealers and no 3-16 inch plates are available in Montreal. This is a size constantly asked for owing to its suitability for tank repairs and replacements. The importance of this phase of industrial requirement has apparently not been fully recognized by the War Trade Board and essential activities are in danger of suspending business, in part, for want of facilities to maintain maximum production.

May be Easier

A feature of present conditions is the satisfaction among Canadian shipbuilders over the regular shipments of plates from American mills and in most cases the yards here are nearing easy street respecting their requirements for present and early future activity. It is the opinion of dealers that the plate situation may shortly take on an easier tone, as a result of the present large production, a factor that will influence the market once the yards are supplied with ample material.

Orders for Wire

The situation across the line is shown in the following received by HARDWARE AND METAL from New York:

"The close relation between steel works' output in the United States and the steady pushing forward of American lines in France has been emphasized in the past week. Manufacturers of barbed wire were called to Washington to plan for quickly increasing output, after many weeks of restricted production. The entire capacity, which is 50,000 tons a month may soon be engaged. Besides American requirements a new call has home for 60,000 tons for Italy and 65,000 tons for Great Britain, and the latter amount may be increased to 90.000 tons.

(Continued on page 53)

BICYCLE MANUFACTURERS STANDARDIZING ALL LINES

CANADIAN bicycle manufacturers are planning many changes with a view of standardizing their output and conserving materials. A great deal of work along similar lines is being done also by makers of bicycle parts. One firm which formerly made sixty different styles of bicycle seats will in future only put two on the market. A general curtailment following more or less closely that ordered in the United States by the War Board is expected. The American War Board has ruled that men's bicycles are to be made hereafter only in twenty and twenty-two inch frames, and women's models only in twenty-inch frames, and the manufacture of racing and juvenile models, steel guards, tool boxes, metal stands and metal tanks is discontinued entirely.

MANY GLASS PLANTS MAY CLOSE SHORTLY

MANY American plants producing window glass will likely close next week, and a great reduction in the general output is expected from now on with the others. Conditions in the trade were discussed at the convention of the Western Glass Jobbers' Association in Chicago, and it was decided to fully accept the orders of the Government and of the United States War Industries Board.

An international aspect was given by the presence of men from the Canadian office of an English firm, and from a London concern. Among the well-known glass men in war work to attend was R. M. Torrence, a member of the War Industries Board and president of the Hyland Glass Co. of Washington, Pa. Mr. Torrence delivered a very interesting address.

The glass industry is now getting along with about a 50 per cent. reduction, due to curtailment in demand and the drafting of labor and supplies for war work in strictly war essential lines. The trade could exist, the convention developed, with a 35 or 40 per cent. production, and it was the sense of the meeting that a greater reduction on production, with a probable increase in costs, and naturally in selling prices, will obtain perhaps by Oct. 1.

One of the most interesting of the features on the program was the address of W. M. Neenan, of Cleveland, O., president of the National Window Glass Workers' Association, who predicted that many of the plants would likely have to be closed. The average age of the workers in the industry, he said, is 44, and, as glassmaking is a non-essential industry, the effect of the new draft will be to still further deplete the labor supply.

HIGHER PRICED AUTOS CANNOT BE IMPORTED

UNDER Canadian Customs memo. 2208-B, issued this week, the importation of automobiles adapted or adaptable for passenger use, valued at $1,200 and upwards f.o.b. place of manufacture is prohibited except under license approved by the War Trade Board.

This prohibition of importation also applies to the body and chassis for such automobiles when the value of the body or chassis, together with the usual parts required to complete the automobile, amounts to $1,200 or upwards f.o.b. place of export.

MERCHANTS PLAN TO STOP PETTY THIEVING

THE Merchants' Association of Montreal, which for some time has been trying to solve the problem of stopping various forms of thieving, car robbery, etc., is taking up with the Dominion authorities at Ottawa the work being done in the States. A Federal law which was passed there to meet similar conditions is working out most satisfactorily, and the Montreal merchants believe a similar plan might be tried here. In the States fines and imprisonment for car robbery and other merchandise thefts are very severe. The American plan makes it possible to convict from a centralized bureau at Washington, no matter in what part of the Union the thieving was done.

At the Montreal meeting Mr. Burke, manager of the Imperial Tobacco Company, stated that the co-operation of the civic, provincial and Federal police might be secured in dealing with the evil.

It was pointed out by the Grand Trunk Railway, through Mr. Arnold, that before the taking over of the railways in the United States, all the railway companies had extensive detective and legal departments. Convictions had been hard to secure, for sympathy seemed to lie with the party committing theft. Subsequently there had been an improvement, through the action of law making it illegal to steal freight when in movement through the State. The great drawback there had been that of an irksome law, which had made it well-night impossible to prosecute, excepting at heavy cost. Unless the case were a large one, it was not worth while to press a great many cases.

CANADA HAS IMMENSE SUPPLIES OF POWER

THE important place which Canada's huge water powers will play in the industrial future of this country is indicated in a report sent to Ottawa by the Water Power Commission of the Conjoint Board of Scientific Societies. The report urges the importance of making a systematic investigation of all water powers in the Empire by the British Government. The report states that Canada possesses at least 18,000,000 out of the 50,000,000 to 70,000,000 horse-power estimated to be the potential water power of the Empire. It recommends the formation of an Imperial Water Power Board or Imperial Conservation Commission to include a representative from each of the Dominions and dependencies. The board would act in an advisory capacity.

Canada, the report adds, is one of the few portions of the Empire where investigation of water power resources has been made.

IMPORT RESTRICTIONS ON MANY LINES REMOVED

AS a result of representations made to the Canadian War Trade Board by the Canadian Manufacturers' Association, the import restrictions on a number of articles needed by hardware firms and manufactured in Great Britain have been removed. The list includes burlap, cotton and manufactures of cotton, furs and manufactures thereof, glass and glassware, optical glasses, manufactures of grasses, textiles and vegetable fibre, jute, oilcloth and linoleums for floors, wool and manufactures of wool.

While this measure does not affect the restrictive measures against export in force in Great Britain, it is considered that the War Trade Board's action will induce Great Britain to release goods held in that country over and above war requirements. Manufacturers of textiles are likely to be among those most affected by the new regulations. Makers of both men's and women's wear will benefit by the order. Binder twine, straw braid for hats, and flax yarns are included under the heading of vegetable fibre manufactures. The total effect of the War Trade Board's action is likely to be a freer movement of commodities from Great Britain to Canada.

The restrictions were originally imposed partly to prevent shipment of commodities to the United States, the importation of which were prohibited by direct shipment from Great Britain. Under present conditions, importation of goods from the United States is regulated to the same extent as the movement of merchandise into and from Canada.

MAY RESTRICT COAL FOR MANY MANUFACTURERS

AN important ruling that will temporarily make or break manufacturers of cement, automobiles, enamelware, and window glass, will be given very shortly by the Fuel Controller. He conferred with representatives of the above industries for the purpose of discussing the question of restricting the coal supply. Steps in a similar direction have been taken by the United States Fuel Administrator.

It was represented by most of the firms affected that the climatic conditions in Canada were such that the measures of restriction under contemplation in the United States would result in a very great hardship, and in certain cases in destruction of property. It was also alleged that severe restrictions had already been imposed as a result of several years of war conditions in Canada, and to further restrict some of these industries at this time would be tantamount to destroying them.

At the close of the conference representatives of the various industries submitted written statements dealing with the whole question of fuel consumption, and the special conditions surrounding each industry. These representations are now receiving the careful consideration of the Fuel Controller, and after certain further information on the subject has been gathered and compiled, he will make his ruling as to the measure of restriction that will be imposed in each case.

CANADIAN RAILWAYS ARE CONSERVING FUEL

THE Fuel Controller this week went thoroughly into the question of coal conservation with representatives of the Canadian railways. After a detailed investigation he found that economies have already been brought into force which it is anticipated will result in saving approximately 50 per cent. of the amount by which Canada's bituminous coal supply for the current coal year has been reduced. It is expected that the restriction of industries of a less essential character will result in a further saving, which will render a sufficient tonnage of industrial coal available for necessary war industrial work.

BANKS ARE HELPING RETAILERS GET CASH

A NEW factor in the fight which many hardware firms and other retailers are making to put their business on a cash basis is the attitude the banks are taking. The support the banks are giving retailers in their efforts to eliminate long-standing "carry" accounts will go a long way toward solving the problem and bettering business conditions. The banks are realizing as never before just what many retailers have been up against, particularly those in the country districts who have had extensive dealings with farmers. In the face of the greatest prosperity in their history, many farmers continued to ask, not even ask but demand, that retailers who were being forced to buy on a cash basis, carry them for indefinite periods. Many of these farmers had big bank accounts, and simply would not pay up until they got good and ready, even though they were well able to do it. The farmers have been obtaining automobiles, gramophones, machinery of all kinds, paint and hardware goods, electric vacuum cleaners, and a host of other things, and not paying for them. Matters came to such a pass in many districts that the banks saw that something would have to be done. When they discussed the matter with hardware merchants and other retailers, they understood more than ever just how many farmers were imposing on merchants. Definite steps have been taken in many parts of the country now, it is stated, with a view of ending this kind of a nuisance for good, and in future the plan is to make the farmers and others pay up when they get the goods or go without. Financial men who are in a position to know stated to HARDWARE AND METAL that more and more the retail business of the Dominion will be placed on a cash basis, and they think it will not be long before matters will be as they should be, that is, that when any credit is necessary, the merchant shall have the "say so" and not be dictated to by the customers, and especially by the farmers.

Persistent Advertising a War Time Necessity

Chairman of Federal Trade Commission Points Out Danger in Policy of Discontinuance or Curtailment of Advertising—Good-will the Most Valuable Asset of a Business—To Relax Now is to Invite Bitter Competition Later

By HON. WILLIAM B. COLVER, Chairman, Federal Trade Commission

DISCONTINUANCE or even sharp curtailment of advertising because of temporary war conditions would seem to imperil the most valuable asset that any business has—namely, its good-will. No more faulty logic can be found than that which would impel a manufacturer to cease building for the future by means of advertising simply because the output of his factory is, for the time being, restricted; or because diversion of his facilities to war work has operated to withhold his goods from accustomed markets. In modern business there can be no sufficient-unto-the-day policy.

In advertising the business man has built up the intangible or spiritual side of his business, if such it may be designated, as distinct from the material side. It is the spiritual side, as represented by good-will, that is slower of growth and that is the more seriously jeopardized by neglect—neglect which could take no more disastrous form than an interruption to advertising.

For example, if I have the requisite capital I can build alongside the plant of the Columbia Graphaphone Company a factory equal in all respects to the Columbia manufactory. Assume that I can turn out an instrument comparable in every way to the Columbia product and in equal numbers. Yet I am not even a going concern. I cannot sell that instrument to the public in profitable quantities until I build up the good-will that the Columbia Company has acquired by years of advertising.

Good-will, in my estimation, is far more valuable than the physical property with which it is linked. The physical property is, in a measure, useless without the vitalizing spark of good-will. A soap company's plant might be completely destroyed by fire, and yet the havoc would not extend to the commercial identity represented by the name of their soap. Far from sustaining loss, the good-will inherent in the trade name would, if anything, be enhanced by reason of that trait of human nature which makes the public the more eager to obtain that which is denied to it or which is obtainable only with difficulty.

That at times such as the present there should be some hesitancy regarding advertising policy may be because it has never been scientifically determined what proportion of advertising expense is an operating charge and what proportion a capital charge. In my estimation, only a small part, if any, of advertising expenditure is properly chargeable as a current item of sales expense; but is, rather, when translated into terms of good-will, a permanent investment and hence a capital charge. Given this conviction, it must appear quite as short-sighted to discontinue advertising merely because the war has momentarily interrupted distribution as it would be deemed unwise of a manufacturer to junk a portion of his factory equipment because there had been interruption to its use.

The manufacturer who has converted his factory to war work and has therefore interrupted the production of his original line, does not tear down and discard his expensive machinery to save the insurance premiums or other similar expenses. It would be just as sensible for a manufacturer, whose commercial integrity is founded upon advertising, to abandon his advertising campaign in order to save the carrying charge on his greatest asset—good-will.

Many "Sales" Made Long in Advance

Not the least of the considerations, certainly, that argue for the continuance without interruption of the advertising of all concerns that will come back after the war, is that sales are in reality made long in advance of the actual transaction that we commonly refer to as the "sale." This will be especially true in the war period.

For example, I have no doubt that, even under the normal pre-war conditions, thousands of persons who did not possess a musical instrument were sold on, say, the Chickering piano. They might be without means for the time being to carry out their determination to own a Chickering, or there might be other deterring reasons—for instance, a family might be planning removal to a new home, and therefore disposed to postpone purchase. The underlying fact in each such case is, however, that the prospect had absolutely made up his or her mind to some day own a piano and had come to the conclusion that the piano when it is purchased will be a Chickering.

Such anticipatory sales may not be precisely on a plane with transactions where an initial payment has been made, but certainly they do have a real value, and are a part of the intangible assets of the business. For the maintenance of such an asset, however, it is essential that there be reiteration and reminders in the form of continuous advertising that keeps alive the interest and the conviction of the prospect once won. Otherwise a competitor, with repeated well-told selling talks, will effect the mental sale and hold it. It would appear that the opportunities for thus, in effect, making sales for future delivery must be especially favorable during the war, when the barrier to immediate consummation of the trade is likely to be found not in lack of purchase price, but in inability to obtain delivery of the goods.

Seemingly the prospect who is converted by advertising under such circumstances is likely to be especially firm in allegiance. I fancy I hear him saying: "I may not be able to get Wesson's Oil now, but when I can get it I am going to have it." The more rapid turnover of money that has come to a considerable portion of the population incident to the war period is bound to encourage the planning in the present for purchases that will be made in the future, when stocks of goods again become available. I imagine I can hear many a citizen reasoning somewhat in this wise: "I have always wanted that set of Dickens or that Pianola, but I put off making the purchase, and now I can't get them. However, you can bet that as soon as we get out of this war mess I am going to act without delay and before anything else occurs to interfere."

Persistent Advertising is Insurance

There is scant justification, it would seem, for the misgivings of the advertiser who is prone to allow his investment in good-will to go by default merely because he suspects that popular demand or the conditions of distribution may undergo some radical change after the war. If a business man is basing his expectations upon an unworthy product he might as well abandon it at once and for all. For the manufacturer, however, who has faith in his product there is every reason to have faith in the future and every incentive to take out insurance in the form of persistent advertising.

The form that this war-time advertising can take to best advantage is a question for the judgment of the experienced advertising men who are familiar with the business interests whose good-will is to be safeguarded. The copy may take the form of good-will advertising, so-called. It may be explanatory of the Government demand, which curtails civilian supply. Again, it might specifically aim at creation of after-the-war demand. If the responsibility were mine I believe that I would be tempted to try, in the present predicament, what might be termed tantalizing copy—messages that would provoke the Damn-the-Kaiser sentiment on the part of Americans temporarily deprived of articles on which they are, if anything, more solidly sold than ever before.

Dominating the minor considerations

(Continued on page 53)

Current Events in Photograph

THE CRUSADERS OF TO-DAY

Over five centuries ago the words that are to-day in the mouths of everyone were commonplace on the lips of the mail-clad warriors for the Holy Sepulchre. The burning sands that they fought over, are being fought over once more; General Allenby's advance is over historic ground. The accompanying photo gives some idea of the nature of the natural difficulties that have to be met. A Lewis machine gun crew bringing their gun into action in the swirling sand of the plains of Palestine.

Ten Thousand Stove Styles Cut Out

Models Drastically Reduced by American Makers as Result of Government Order—Firms Are Advertising Strongly Now to Keep Names Before Public and Win After the War Business—Mail Order Houses Are Hit Hard by Ruling

ALL stove, range and furnace manufacturers across the line have been ordered by the government to reduce their lines by about 75 per cent. This means that approximately ten thousand styles of stoves will be abandoned at one sweep. There is no "ifs" or "whys" about it. A government order is a government order, and the American manufacturers are taking their medicine.

This means that all the big manufacturers have cut their lines from as many as 2,500 different numbers down to three or four hundred, or less—in one case down to twenty styles.

One big maker who has had 2,100 style numbers has cut his line 77 per cent., or from 2,100 to around 700, at one slash.

This maker now has about seventy-five basically different products, each with a few variations in the way of sizes, kinds of equipment, etc.

Nickelling Cut Out

The Government already has forbidden the use of nickel trimmings on gas stoves and ranges, which means that all the numbers which are different only in nickel trimmings have been dropped. The same order is expected soon with regard to coal stoves, heaters and ranges, which will mean a much further cut.

The porcelain enamel trimmings also are being ordered off—coal is being withheld from porcelain enamel makers as non-essential—which means that the fancy white doors, handles, tops, etc., are to go and with them each a considerable number of "differentnesses" which constitutes separate style numbers.

A well-posted stove man estimates that, taking all of the stove makers together, probably not less than 10,000 style numbers have been discontinued as a direct result of this Government order, in one mighty slash.

Were Hit Hard

Anyone who knows anything about the merchandising problems of the stove man will not need to stretch his imagination very far to hear a mighty sigh in stovedom—the war probably has done enough for the stove industry just by this partial solving of the stove merchandising problem to pay the stove industry all the war is going to cost it in loss of business, loss of sales organizations and in other big ways.

Imagine a stove manufacturer—or any other kind of manufacturer—even with a factory so large that its employees would support a good sized town, making 2,100 kinds of products! And some of the stove manufacturers have been worse afflicted than that!

Think of only 500 stoves of one kind in an order for a million!

Of course it isn't as bad as that, because some styles in each line have sold better than others, but it has been plentifully true that stove factories have been almost, contractors-to-the-trade, making stoves to order because there were so many styles it was hard to anticipate requirements much ahead of samples.

Hard For Salesman

Stove factories have had their troubles, as the above will suggest, but the biggest problem has been the merchandising problem.

The stove salesman has had to be a walking encyclopedia to know even his own line. He has had to be a living catalogue.

And the stove dealer, requiring a

(Continued on page 46)

What Hardwaremen are Doing

Notes of Hardware Advertising Appearing Throughout Canada — Many Hardwaremen Show They Have Some Idea of the Seasonableness of Particular Lines —Boosting Fall Business

Andrews' Store News is the title of an attractive sheet which is sent out each month by the hardware firm of A. S. Andrews of Pangman, Saskatchewan, to their customers. The issue for September contains an attractive list of harvest supplies, threshers' supplies, stoneware and churns, barb wire, a description of a high oven range the firm is featuring, a price list of automobile tires for Ford cars, a well written statement that will appeal to women who want a washing machine, telling just how well the machine the firm is handling will do the work, its price, etc. "Sold on an absolute guarantee of satisfaction or money refunded" concludes the washing machine announcement.

Another section draws attention to the opening of the duck hunting season and lists a line of shells and shot and concludes with the appeal: "Let us supply you with what shells you will need this year."

Two other features planned to bring people from all over the district to the store are announcements that members of the Pangman Motor Club who call at the store will receive their membership certificates and an offer regarding the handling of some goods for the Grain Growers' Association.

Taken altogether the sheet is a live one, containing much of interest to all in the town and district and should prove a good business puller.

* * *

Ingram and Davey, of St. Thomas, Ont., have a quarter page ad. filled with six fairly good cuts of stoves, ranges and heaters which they are featuring for the retail trade. The ad. is headed "The Stove Season Is Now Here," and with each cut is reading matter which explains various features about the goods shown and information regarding the number of sizes carried in stock, their heating efficiency, etc. The ad. is in many ways one of the best that has appeared in the papers of the Dominion in connection with Fall stove selling.

Manager Dean of the auto accessories department of the Vokes Hardware Co., Ltd., Toronto, says: "Business has been excellent and is growing steadily. We can notice the difference in the demand for accessories since action was taken to limit the production of cars. There is a big demand for accessories of all kinds and indications are that it will increase. Car owners are "fixing up" the old machine and more of this will be done. We are basing our business on the principle of never offering to our customers lines which we have not tested. There are so many untried auto goods on the market that it is unwise to recommend them to buyers unless one knows they are all right. We never sell any accessories until they are thoroughly tried out and we know they are O. K. We believe this is real service to our customers and are finding that it works out splendidly."

* * *

The following letter is being sent out by George Stirrett & Son, of Toronto, to householders:

Dear Sir,—We want to draw your attention to a few of the Fall lines on which there will soon be a big demand, We feel sure that on account of the great coal shortage the wise householder will buy his Fall requirements earlier than usual this year and extend every effort to help save the coal. We carry a very large stock of household hardware, in fact over fifteen hundred lines, and our service we aim to keep up to the highest standard and our prices reasonable. Below we list a few of the goods which we think might interest you.

Hoping to receive our share of your valued patronage,
We remain, yours sincerely
GEORGE STIRRETT & SON.

Weather stripping, glass, both plain and fancy; putty, storm doors, water pipes and fittings, gas pipes and fittings, stove pipes and elbows, furnace pipes and elbows, special pipes made to order, coal oil heaters, gas heaters, coal oil, paints, oil and varnishes, etc.

* * *

"Fall is the Ideal Time to Paint Up" is the headline in display type of an ad. of the Ashdown Hardware Co. of Calgary. Below are given reasons why Fall painting is best and then follows an attractive list of paints, stains and roof coatings. Prices of all the goods are given and in a box at the bottom is the following: "Ask Our Paint Man About Any Problems in Painting. He will give you Expert Advice."

The ad. also includes a list of harvesting oils and greases and ends with a section devoted to gas heaters which the firm is featuring. Throughout the advertisement prices of everything mentioned are given in prominent type.

* * *

The Manitoba Hardware Co. of Virden, Manitoba, has one of the best arranged and best illustrated ads. of any of those which have appeared in connection with the duck shooting season. The top is taken up with a large cut showing a sportsman in his canoe with his gun ready to fire at a flock of approaching ducks.

"Prepare now for your Fall shooting by procuring your supply of ammunition at once," reads the ad. "Those who look after their shells early in the season will have the best results because the demand is greater than the supply. Do not put off ordering or you will have to take what you can get."

This is well displayed and below is a list of guns and shells and suggestions for what the hunter may require besides, shooting coats, gun implements, pocket knives, flashlights, etc. Many of these are illustrated by small cuts.

* * *

"Now is the Time to Fix That Leaky Roof," is the announcement, well displayed, which leads a list of roofing materials carried by Macnab Bros., hardware dealers of Orillia, Ont. Prices per square are given for all materials listed, so that the prospective customer can figure quickly just what it will cost him for the various kinds of roofing. This firm's ad. concludes with items of interest to housewives—preserving kettles, electric irons and bread mixers. No prices are quoted for any of these goods.

* * *

"It's the Little Things That Count," is the way in which the Cowan Hardware Co. of London, Ont., heads a long list of articles needed in every home. Many of the things are especially appropriate for the fall, others are articles of general use all the year round. The ad. is brightened up by ten small cuts and every article listed is priced. There are many real bargains in the list and the ad. is splendidly arranged with a view of drawing housewives to the store.

Will Express Rates be the Next to Join the March Upward?

WHILE no move has been made yet it is expected that the express companies doing business in Canada may shortly ask the Railway Board for power to increase their rates. Officials of the company stated to HARDWARE AND METAL that there has been no revision of the express tariffs for a long time, notwithstanding there has been general increases in salaries all along the line, and the firms are also facing greatly increased costs in operating expenses.

"Drivers who formerly were paid $40 to $50 a month," he said, "are now making $100. Express handlers, messengers and clerks have received salary increases from coast to coast. Our volume of business has been good, but it is costing us far more to handle it than formerly. The railways have increased their freight rates and the cartage companies also, but tariffs for express carriage and delivery are unchanged. It is not unlikely that a move for readjustment will be made soon."

This will probably be hastened by what is happening across the line.

Want $12,000,000

The $10,000,000 advance in express rates recently allowed by the Interstate Commerce Commission has been entirely absorbed by the American Railway Express Co. in making advances in the wages of its employees. The company in order to raise $12,000,000 additional revenue has suggested plans for increasing its rates. It recommends that the rates in zone 1, both intra and inter-zone, be increased three scales—that is to say, that the minimum rate of 55 cents be increased to 71 cents, and each rate above that increased accordingly, and further, that 10 cents per 100 pounds be added to the commodity rates. This will make an increase of first-class as a maximum of 16 cents, or 17 cents per 100 pounds, on second class 12 cents, and on commodities 10 cents, with proportionate increases on shipments of less than 100 pounds; that the rates, both intra and inter-zone in all other zones, be increased by advancing two scales and adding 10 cents per 100 pounds to commodity rates. This will result in a maximum increase on first class of 10 cents or 12 cents; second class, 8 cents; and commodities, 10 cents per 100 pounds, with a proportionate increase on shipments of less than 100 pounds. It is estimated that this will produce on zone 1 business $17,037,000; and on all other business $6,642,300, or a total of $23,679,000, of which the express company will get $11,780,303, the balance, $11,898,697 going to the Director-General in increased express privileges.

Meets October 8

The Interstate Commerce Commission will meet on October 8 at Washington to go thoroughly into the case.

At the present time the express business is being conducted at a deficit which will be largely increased by the advances in wages which must be made. This deficit is borne by the United States Railroad Administration.

Canadian Trade Affected by Ruling Which is Effective October 1

CANADIAN firms exporting to or through the United States will be affected by a new ruling of the United States War Trade Board, which goes into effect October 1 and governs the certification by American consular officers of invoices covering shipments. The changes are designed to obviate certain irregularities and misunderstandings which have occured in the past and also to facilitate the administration of the import restrictions.

After October 1 American consular officers will certify no invoice for any ocean shipment to be made on or after that date to the U.S. except upon request of official notification from the War Trade Board of the issuance of an import license and of the import license number.

Won't Take Numbers

American importers are being requested to note particularly that for the purpose of consulting invoices covering shipments made on or after October 1 consular officers are not permitted to accept import license numbers furnished them by shippers as they have done heretofore.

The number of any import license, together with all necessary information will at the request and cost of the applicant for the import license be cabled or mailed by the United States War Trade Board to the consular officer whose district is designated by the applicant.

Need New Forms

New forms of application for import licenses will be available shortly for American importers and will contain a blank to be filled out by the applicant for the purpose of indicating whether he desires official notification of the issuance of the import license and of the number by cable or by mail. All requests for such official notification made after the filing of the application should be, whether mailed or telegraphed, addressed as follows:

Bureau of Imports, War Trade Board,

Washington, D. C.

Such request should refer to the application or license number and should designate the appropriate consular officer.

For Ninety Days

American import licenses will continue to be issued valid for a period of 90 days, but, under the new regulations import licenses issued on or after October 1, 1918, will be valid if ocean shipments thereunder are made within 90 days from the date of such license. It will no longer be necessary, as in the case of licenses issued prior to October 1, 1918, that entry into the United States be made within the 90 days. This change will be of benefit to shippers and importers who, heretofore, in many cases, have found it difficult to prepare merchandise for shipment, arrange for freight space, and obtain entry into the United States within 90 days.

Licenses Outstanding

With respect to import licenses which are outstanding and unused on October 1, 1918, if the shipments covered by such licenses have not been consulated by that date and the ocean shipments thereunder will be made on or after October 1, 1918, it will be necessary that official instructions be cabled to the appropriate consular officer at once by the United States War Trade Board. That there may be no delay in such shipments the holders of such outstanding licenses should immediately notify the War Trade Board that they desire the appropriate American consular officers to be officially notified by the War Trade Board, either by cablegram or letter, of the issuance of such outstanding licenses and of their numbers.

The date of ocean shipment, for purposes of these regulations, will be the date of a through ocean bill of lading to the United States.

Must Keep Record

Inasmuch as consular officers will be governed, when consulating invoices, by the dates of the licenses and the dates of the through ocean bills of lading, importers are cautioned to keep accurate record of the expiration dates of licenses in order that they make certain that the through ocean bills of lading are issued to them within the 90-day period or, in the event that such through ocean bills of lading are not issued within such period, that they may apply in due time for extensions or new licenses, thus avoiding delays and possible loss. Applications for extensions of expired licenses and for reissuances may be filed and will be disposed of according to the circumstances of each case.

Partial Shipments

It will be possible, as heretofore, to make partial shipments against a license, providing such shipments are made during the life of the license. All such partial shipments will be governed by the same rules as those that govern complete shipments.

Invoices for shipments of commodities covered by general import licenses, known as "PBF" licenses, will continue

(Continued on page 53)

TEN THOUSAND STOVE STYLES

(Continued from page 43)

train load for a set of samples, has seldom been a heavy buyer of any one number.

The advertising manager, because of the absolute impossibility of advertising 500 to 2,500 kinds of stoves with the human advertising appropriation, has relied mostly on listing in catalogues. Some of the companies have been making so many entirely different lines of stoves that if they covered each general line one single time each year they would have to run one different advertisement every day. If all companies advertised one of their lines only one time each year, the general magazines, for instance, would have to be a stove catalogue every month, or every week.

So with the exception of a few mail-order stove concerns, few of the manufacturers have even attempted to advertise more than the company name and trade-mark.

After The War

After the war is over, part of this problem will be solved, for the average large stove maker will be down to twenty-five or thirty different styles of stoves and ranges, possibly even including his gas and electric lines and his furnaces.

Each stove, of course, will always be made with some variations in sizes and possibly with some optional trimmings, but the war is going to standardize these features down to bed-rock and if excess variations get back into the market again it will be because stove men put them back, which they are far from likely to do.

Stove men, according to one of the Detroit executives, have long wanted to cut down their lines, but it was hard for any one of them to take the radical step alone.

Bring More Advertising

At least one of the big Detroit manufacturers has been seriously considering national advertising for his line, now that the number of styles have been whittled down to a size that may permit it being advertised efficiently.

The Government, however, according to a stove man who has just returned from a talk with Government officers, is frowning on any attempt to push stoves strongly at this time, and there is more than a possibility that those stove people who do not now "see" advertising would make a protest that might have some bearing on the amount of steel the stovemaker who advertises now would get, and the maximum is expected to be plenty-small. So this prospective advertiser, who sees big possibilities in advertising just himself, may not dare to take the step.

Asking For Steel

Stovemakers are asking for steel for 50 per cent of normal production, but they are not sure they are going to get any at all for stove production. Most of them are on Government work of various kinds. however, and the failure to get steel for stove production will not necessarily affect the ability of the factories to keep running, though several of them are now getting squeezed pretty hard.

Most of the stovemakers have great foundries, where Government work requiring iron or steel castings can be handled, but for the most part they are not equipped to handle munition work or other heavy work requiring lathes and similar heavy tools.

Some of them are equipped to handle the first processes in some of the shell work, and some can handle such work as ship shapes, or certain parts and trimmings or finishings used in shipbuilding.

Don't Expect Much

The Priorities Board has not classified the stove industry to determine its status in getting steel or iron for castings. But the position of the industry is not over bright, for the Government may, in the face of heavy steel needs for Government work, take the position that stoves in use and in stock may enable the public to squeeze through for the present without more new stoves.

The Government, of course, is using thousands of the big special army ranges in the camps in this country and in France, for it requires a lot of cooking to feed the millions of men of the immense American army. One stovemaker is looking forward to a Government order for 20,000 army special ranges to go to France.

Called Them In

The sales organizations of the stovemakers have been hit particularly hard. One manufacturer with 450 salesmen on the road, has called in all of the men.

An effort has been made to hold these great organizations together by providing places in the factory for those of the road men who are in deferred classes in the draft and who are willing to go into factory work. It is anticipated that the time these men spend in the factory, besides keeping them with the organization, will give them a more thorough knowledge of the manufacturing processes and possibly make them better salesmen when they go out again.

They also will be, during the work at the factory, in close touch with the executives and with the immense sample line carried at the factory, and will practically be "in school."

Mail Order Houses

If the mail-order houses make another cut of 75 per cent in compliance with the Government order, their lines will be trimmed down to almost specialty lines, for the cut they made—several months ago—was at least equivalent to the present cut by the balance of the industry. The cut they had made may perhaps have had some bearing on the Government's order, for it showed that instead of a hardship such a cut was something for the stove man to look forward to.

The cut made by those stove houses was brought about simply by advertising. It was found that by emphasizing the lines that it was desired to sell, by showing them large and in colors—usually by illustrating the background, as kitchen surroundings, etc.—the particular styles they desired to sell were the ones that everybody ordered.

Kalamazoo formerly made over 700 style numbers, but found that they really needed only to have a dozen or so styles, and each in only a few sizes and styles of trimmings—less than a hundred variations in all. The new order cuts out some of these variations in sizes and finishes—not affecting the remaining lines or general styles.

Influences Advertising

After the war ends, and possibly even before in the case of some of the big makers, advertising along the general lines of the Kalamazoo campaigns will be the rule. Instead of a stovemaker advertising his trade name only, the tendency almost certainly will be to advertise a particular line—as a Garland, or a Jewel, or a Peninsular, or a Buck, or a Kalamazoo—electric line, or a gas line, or a coal line; or perhaps a line of gas ranges, or of coal heaters, or of hot-water or steam heating systems,

In the past the different makers have each had so many kinds or different lines of stoves, even in the same classes, that to advertise any one meant to knock all of the others, for, as was pointed out in the Kalamazoo campaign, the particular stove or range featured was the one most certain to be ordered, and unless it happened to be the one the factory preferred to make the result was apt to be a clash between the office and the factory.

Making Big Change

Now, with the lines cut down and great emphasis put upon making what is easiest to make—because Uncle Sam says that will help to win the war—there is certain to be a great revolutionary change in stove merchandising as a whole.

An executive made a statement a few days ago, in speaking of what the war had done for industry, that in the automobile industry, for instance, the saving which will result from the standardizing and efficiency-increasing influence of the war will aggregate a sum greater than the total cost of the war in no excessive length of time. The same thing may also be said of the very great stove industry, the leading branches of which also are in Detroit, though perhaps the aggregate of the saving may not be so great.

Will Reduce Cost

The effect of the standardizing and efficiency-increasing will be to reduce the manufacturing cost of stove lines,

as well as the selling cost, and will leave the manufacturers a greater margin for advertising. Competition likely will be especially keen, and there may be some lowering of prices made possible by the savings effected, but it is more likely that prices will stay substantially as they were and part of the larger margin put into greater selling effort in this and foreign countries.

Stovemakers, of course, have also been watching the modernizing effect of mail-order advertising on the stove business, and with several stove concerns grown great in a few years by national advertising in the magazines and through immense distribution of catalogues, as well as mail advertising, there is pretty certain to be a general tendency to more keen competition on an advertising basis.

It is pretty certain that at least one of the big Detroit stove concerns will go into the magazines in an aggressive way after the war ends, if not before. And when one of the older concerns goes in the magazines in an aggressive way it is pretty certain that most of the others will follow. National advertising has not seemed practical to many of these makers in the past, but the main difficulty has been swept away by the necessities of war.

A rather surprising angle developed in the conversations of the stove men with the Government officials on the changes that have been made. The suggestion was made to one of the executives of one of the Detroit stovemakers that any use of advertising or of salesmen at this time in the stove industry would be unpatriotic.

The suggestion was based on the theory that any advertising of stoves would have a tendency to persuade people that their present stove wouldn't do, and thus to make them want to scrap their present stove and get a new one, when the old one might do them very well for the present.

The position was taken that the stove men should not push for orders and should not want more than come to them without solicitation of any kind at this time. This apparently will be all, or more, than the Priorities Board is willing to allow steel for at this time.

This angle of attitude may in some measure explain the predicament of the automobile industry—most of the automobile makers have continued to advertise to some extent in the face of the Government's desire to slow them up, but this advertisingn has not been undertaken primarily to sell machines now. Its purpose has been to retain the good will built up by previous advertising, just as in England automobile manufacturers continue to advertise, so that they will not have to rebuild the market after the war ends.

Stove manufacturers have the same opportunity for present advertising. If sales are reduced now, the time is coming when they will be greater than ever, and the companies that make their name and product known now will get in on the ground floor when they can go after sales once more.

HIGH COLORS SCARCE

Wall Paper Prices Advanced—Improvements in More Subdued Effects—Tapestries Strong for Spring.

WALL papers for the Spring that are now going out to the trade will show an advance of 25 to 35 per cent. over prices of last season. This is due partly to increased prices of paper, but mainly to labor advances and higher costs of colorings and other raw materials that form so large a part of the cost of manufacture. As before, the high colors, especially the reds and greens will be very scarce, as well as browns. These colors cannot yet be secured in Canada, the States, nor England, although marked progress in colorings has been shown in scores of other shades. Indeed most of the colorings for wall paper manufacture, according to one of the largest firms, now come from Canada. This line of manufacture has been greatly developed recently among the paint firms, and the results are reported as very satisfactory. The heavy colors it has seemed almost impossible to reproduce; this applies to textile colorings as well as those used in the making of wall paper for at base they are practically the same.

Canada Exports Wall Papers

The situation in regard to plain papers shows no difference. All of these of English manufacture are still shut off, in fact most of the mills there are working on munition orders so that home supplies are not looked after either. It would be difficult to start the making of the oatmeal and other ingrain papers in this country as special machinery of a costly nature is required. This applies also to tile papers, but apart from this aspect the Canadian makers are so busy that they have no heed to branch into new fields. HARDWARE AND METAL is informed that there has been a very gratifying development in export trade, especially in the past year or so, and prospects for the present season are very bright. All that prevents an enormous development is the lack of shipping, but the facilities from Vancouver at least have much improved. In one of the factories HARDWARE AND METAL was shown large shipments ready for South American centres, Brazil, Chili, etc. Much of this trade was held before the war by the Germans, so that the Canadians in getting into the field are helping in an economic war. It is hoped to hold a large portion of this when the war is over.

Trade with Australia and New Zealand has been good for several years, and had reached a respectable figure even before the war. This has increased very considerably since. In addition the West Indies is proving a good market, so also is South Africa. It is interesting to notice the labels on the outside of the bales that are being shipped to some of the countries of South America. On one there were three inscriptions as a warning:

USE NO HOOKS
NO USE CARBATOS
NO USE GANCHOS

One of these words was said to be Spanish for hooks, for the other the informant could not vouch, but it was genuine enough to be understood on the docks of South American countries.

As to Patterns

Tapestries will be strong for Spring, especially for halls.

Cut-out borders are in greater demand even than during the past season. They are favored for ceiling finishes as well.

The all-over flower patterns for bedrooms are shown very extensively. Some have an overprint treatment, producing a soft shadowy effect in some new and pretty designs.

One firm calls special attention to one of its new lines featuring a silky monotone design with brightly contrasting border in different tones. They add, "public taste has been improving for some time, and by well-directed efforts it is possible to sell the better grade papers to emphasize the attractiveness of them rather than making a special feature of low prices. In this way business can be placed on a higher level and made more profitable for the dealer."

Old tapestry hangings are reproduced on paper retaining the appearance of cloth.

Japanese leathers are quite distinctive in wall hangings. They range from burlap weaves to hand-tooled designs.

VINEGAR SUBSTITUTE FOR ACID IN PARIS GREEN

Since the supply of acetic acid, used in the manufacture of Paris green, was taken over some time ago for the manufacture of airplane "dope" to make airplane wings impervious to moisture, the Food Administration and the War Industries Board, according to the "American Paint Journal," have conferred on plans to find a substitute so that the quantities of Paris green needed for agricultural purposes need not be cut down.

Vinegar, which contains about 10 per cent. acetic acid, is now being supplied to manufacturers of Paris green, thus assuring at least a normal supply for the protection of crops. Arrangements have been made with the makers of yeast cake for supplies of this vinegar. Other substitutes for Paris green for agricultural uses, Department of Agriculture experts say, are lead arsenate and calcium arsenate.

EDITORIAL COMMENT

THE NEW VICTORY LOAN

FROM all sides in these days come news of triumph, everywhere the armies of Democracy are moving forward, and Victory seems just within their grasp. In these days of triumph we are however facing an insidious danger, the danger that we may come to think of the cause as won and relax the high tension that has made these things possible. Victory is within our grasp, but it is not yet ours and any half heartedness may snatch it away. No one knows just when the war will end, all that concerns us now is that it should be fought to a finish that it need never be fought again. Our present triumphs have been built up on a preponderating efficiency in men and materials achieved by generous self-sacrifice and fabulous expenditures. To ungenerously spare ourselves now, to curtail our expenditures, at a time when success means increasing demands, is to prove ourselves unworthy of victory.

In the days approaching Canada will be faced with another appeal for aid in financing this enormous burden of expenditure. Last autumn the Finance Minister asked a loan of $300,000,000, a sum unprecedented in Canadian history. The response of the Canadian people was a loan of $420,000,000. This year the call will be for a still larger amount, and there is no reason to believe that Canadians will not respond as generously as before. What better investment can a man make than an investment in his own ideals of justice and right and law, in his own land and his own people that those ideals and that land and that people may prosper?

TO CURB GERMAN TRADE

BEAUMONT ALEXANDER of New York, vice-president of the Allied Industries Corporation, has gone overseas and will make a tour of England and France to discuss with British and French manufacturers the feasibility of the enactment of a "country of origin" law in the Allied and neutral countries, as a part of a plan of curbing Germany's after-the-war policy of trade rebuilding.

The "Made in Germany" mark, which has meant so much to German trade in former years, will not be accepted in these countries after the war, Mr. Alexander said, and that country naturally will resort to subterfuges in order to place its products in the world's markets. It is the part of the Allied countries, and of the neutrals as well, to see that something is done to prevent any effort of German capitalists and manufacturers to produce and sell their goods under false labels.

This can only be accomplished by the adoption of what will become an international law, to the effect that all goods imported shall be stamped with the name of the country of origin. Simply as a method of holding Germany to her responsibilities and compelling her to reap some of the harvest she has sown, the proposition would stand upon solid ground. Japan has already followed Germany's example, and intends to standardize Japanese merchandise by general use of the phrase "Made in Japan." Were this policy to be followed by Great Britain, Canada, France and the others, the custom thus set up would become the determining factor in the development of future foreign trade, of fair dealing, and would put the entire trading world on an equal basis.

Details of the "country of origin" law should be worked out, and enforced by forming an international trade association, or an international commercial trade union which would be under the international governments' control, in which the financial backing of all manufacturers, importers, jobbers and merchants would be tabulated.

GREATER ECONOMY

THERE are many indications that thousands of people in Canada do not even yet understand the vital relation which personal economy bears to the nation's effort in the war. Many are willing to do anything except reduce their personal expenditures. They will give their sons, brothers and husbands to the battle line, but do not see that in order to support them there with the full man-power of the nation, labor must be saved and released from its ordinary pursuits. The limiting factor in our efforts is man-power. We must save labor, save coal, save power, save shop-room, save railway capacity, at every possible turn.

POWDER OF ADVERTISING

WHEN war was declared with Germany the United States had 350,000 bond owners. Now there are 17,000,000. There could scarcely be a more striking demonstration of the power of advertising. The application of advertising to the needs of Canada since the war, in the sale of Victory bonds

the Y.M.C.A., patriotic funds and other activities has unquestionably been of inestimable aid.

The increase from 350,000 to 17,000,000 bond buyers is suggestive of what happens when the retailer of a worthy product advertises it to the public. He multiplies the users of his goods by thousands. Advertising, properly used, takes the speculation out of production and delivery of goods, for through advertising, the manufacturer can control the market of his goods. If business is dull, he only needs to apply more steam (advertising), and sales go forward in their usual volume.

SCIENCE IN INDUSTRY

THE interest aroused by the British Scientific Products Exhibition in London, organized by the British Science Guild, is a healthy sign of the times. The assumption that Germany had the monopoly of original scientific work is a popular fallacy. Most modern industries originated with British science and invention, and Britain has been the pioneer in scientific and modern research. The advantages which Germany enjoyed are largely due to the fact that Britain has been deficient in the practical use of the results obtained and the application of her natural scientific genius to the solution of industrial problems. How few, for instance, are aware of what Sir H. Jackson, Professor of Chemistry in King's College, has done to provide the chemical glass and optical glass urgently needed when supplies from Germany and Austria were cut off. Working with a Committee of the Institute of Chemistry, Sir Herbert Jackson determined the composition of numerous glasses required and placed the formulae freely at the disposal of manufacturers. The result was a re-awakening of the glass industry in Britain, and a position has now been secured which is strong enough to enable manufacturers to meet all assaults upon it.

The magneto industry has established itself in a sound position and the German instrument has been displaced for good. Hard porcelain for electrical fittings and laboratory ware is now British-made, thanks to scientific work and industrial enterprise. Britain now produces all the tungsten required for special steel and metallic filament lamps, and can supply the world if necessary. She has made aluminum alloys superior to any of the German pre-war products, and like success has been attained in other directions.

GERMANY'S STEEL TRADE

IT is a curious reflection that two Englishmen helped Germany to make steel, and, therefore, to make war. In 1878, about seven years after Germany had obtained Alsace and the greater part of Lorraine, with their deposits of iron ore, Sidney Thomas and Percy Gilchrist invented the basic-Bessemer process. Up to that time phosphoric iron ores had been considered of small account, but then they became available for the production of steel. British ore had previously allowed England a natural advantage, which was to no small extent neutralized by the Thomas-Gilchrist discovery. How Germany's output of steel increased in the next forty years is almost as well known a story as the use she has made of it in the last four years.

The outbreak of war found England in a serious situation with regard to ferrous metallurgy. Essential materials were largely in German hands. Again disaster was averted by the co-operation of science and industry. One of the triumphs of these allies was with tungsten, a constituent of high-speed tool steel and of magnet steel. The raw material of tungsten existed within the Empire, but the manufacture was entirely a German industry. Germany took British raw material, worked it up into finished products, and sent them to England. The Sheffield tool-steel makers, quickly realizing their deficiency in tungsten, formed a company to supply their need. Science worked out a process, industrial enterprise helped, and the no-tungsten danger was overcome.

HOW TO KILL BUSINESS

SO far as can be judged Bolsheviki rule is nearing its end, and with its fall will disappear the great plan for the immediate establishment in Russia of a communistic millenium. As set forth in the innumerable decrees issued by Lenine and Trotsky, the scheme for the confiscation of all property and the carrying on of the country's industries for the sole benefit of the proletariat looked remarkably simple, but when it was sought to put it into practice it suited nobody except the robber-gang who call themselves the representatives of the Soldiers and Workmen. The Bolsheviki idea of conducting business was that no one should pay his debts and that all undertakings for producing wealth should be managed by the least-instructed classes, who were to compel the better-educated minority to do their bidding on pain of death.

AN UNNECESSARY STRIKE

THE prompt action of the British Government in settling the strike of locomotive drivers in Wales is gratifying in that it ends a situation that caused much anxiety owing to the vital importance of maintaining an ample supply of coal for the navy and for war work. Few classes of workers are better paid or better looked after than the locomotive engineers and that they really had little to strike about is shown not only by the attitude of the public toward the walkout but by the action of their secretary, Mr. Thomas. In tendering his resignation he declared that the men by their action had undone all his good work and shattered the prestige of their organization. Forty thousand men were out and their strike necessitated a large number of miners being idle.

EVENTS IN THE TRADE

Business Changes

Winnipeg.—C. Mulvery, hardware, is discontinuing business.

Palmer, Sask.—A. D. Bahdley & Son, hardware, sold to F. L. McRae.

Killaloe Station, Ont.—H. D. Moss, tinsmith, is succeeded by G. F. McCarthy.

Star City, Sask.—Hamlin & Rierderer, hardware, succeeded by D. K. McLeod.

Birnie, Man.—The hardware business of Wilson Ewen has been sold to John A. White.

Auburn, Ont.—James Johnston has taken over the hardware business of G. Denstedt.

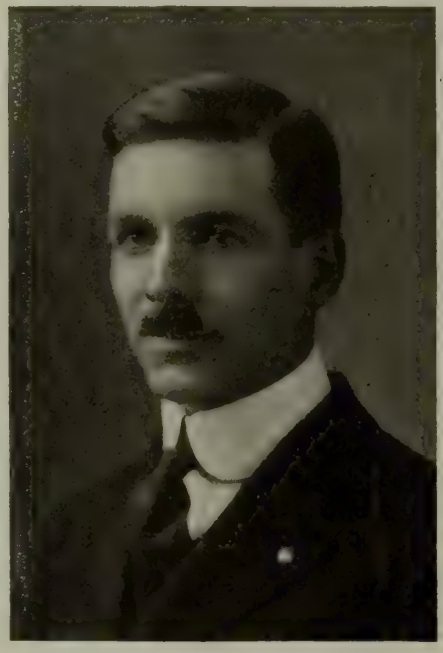
Winnipeg.—The Manitoba Linseed Oil Co. Ltd. has sold out to the Dominion Linseed Oil Co.

Obituary

Ex-Alderman Edward W. Barton, for many years a brush and broom manufacturer, died at his home in Toronto on Monday. He was 73 years old.

The death occurred at Sault Ste. Marie, Ont., of Miss Sinclair, daughter of Manager Sinclair, of the Cochrane Hardware Co. Internment was made at Arnprior, Ont.

Fires



Fire, which started from spontaneous combustion in a big pile of coal in the cellar of Ingram and Davey's hardware store at St. Thomas, for a time threatened to cause heavy damage. It was spreading rapidly when noticed by an employee. Fast work by the fire department kept the flames from reaching the stock, and the damage will not be heavy. Forty tons of coal in the basement are now being removed to sheds outside to prevent any recurrence of fire from this source.

Fire which is supposed to have started from spontaneous combustion in the basement of W. H. Rumball & Company's hardware store at Victoria Harbor, Ont., completely destroyed the fine store, causing a loss of $30,000. Spreading both ways the flames did damage to adjoining premises that will amount to $20,000 more. Rumball & Co. had just put in a big stock of winter goods and not a dollar's worth was saved. Rumball & Co. showed real enterprise by immediately securing temporary premises in the New Era office and re-opening for business. Their loss is a heavy one as only $10.000 insurance was carried.

NEW CANADIAN INDUSTRY STARTED

Manufacturing Kasement Screen Doors In Canada

The manufacture of "Kasement" screen doors in Canada has been started at Burlington, Ontario. The manager of the Canadian plant, W. H. Cunningham, stated to HARDWARE AND METAL that a complete line of the company's goods would be made at the new plant. Previously all supplies came in from the United States. The establishment of a Canadian factory eliminates the necessity of further importations. The firm will operate under the name of the Kasement Skrene Dore Co., with factory at Burlington and head office 183 Church St, Toronto, Can.

W. H. CUNNINGHAM

manager of the new Canadian plant of the Kasement Skrene Dore Co. at Burlington, Ont.

Personals

Joseph Gearhart has joined the staff of the Malloy hardware at Nanton, Alberta.

A. MacFarlane, of A. MacFarlane & Co., of Montreal, was in Toronto for a couple of days this week.

J. W. Kennedy, hardware merchant, Georgetown, Ont., motored to Toronto during the week on a buying trip.

Allan Quantz, employed in Paterson's Hardware at Walkerton, Ont., was painfully hurt while operating the stove-pipe machine.

Dr. Kohr, formerly superintendent of Lowe Bros.' factory at Dayton, Ohio, has been promoted to the position of Assistant General Manager and Mr. Gilbert, formerly with the Trus-Con Co., of Detroit, has been made Superintendent.

W. C. Jackson, who has been Western Ontario representative of the firm of Brandram-Henderson, with headquarters at London, has been transferred to Hamilton and is now residing in the Oxford Apartments in that city.

Corporal Robert Quinton, of 46a Galley avenue, Toronto, is home on furlough after two years' service in France. He enlisted with an ambulance unit in 1914. Before that he was employed with the hardware firm of H. S. Howland Sons & Co., Toronto.

James Blue, who was recently honorably discharged from the navy at Halifax, has joined the staff of the Vokes Hardware Co., 40 Queen street E., Toronto. He was formerly connected with the retail hardware trade in Calgary and was also in the manufacturers' agency business there. His home is in Collingwood.

Montreal News

Montreal plans to make street traffic more safe. Representatives of the transportation companies operating within the city, automobile owners and others conferred with Director of Public Safety Tremblay and it was decided that a regulation affecting the carrying of display lights must be observed. All vehicles carrying merchandise which protruded from the rig three feet from the rear must carry lights at night, white in front and red in the rear. In the daytime a red flag must be shown. Subsequent discussion of the new regulations resulted in relief being granted to the heavier-loaded rigs.

Trade Notes

The Vlit Manufacturing Co., makers of polishes, waxes, etc., has been registered at Montreal.

The Good Products Manufacturing Co., of Montreal, manufacturers of auto accessories, has been registered.

Montreal.—Petition for winding up Hardware Limited, wholesale hardware, has been granted, and Frank E. Donovan named provisional liquidator.

The Denby Motor Truck Co. of Canada has purchased a site at Chatham, Ont., and will erect a new factory.

H. O. Boult of Hull, Quebec, is erecting a new store, and as soon as it is completed will engage in the hardware business.

The British American Oil Company plans to locate a big branch factory at Windsor, Ont., and a vote of the ratepayers will be taken on October 15 in connection with the project.

The Imperial Oil Co. lost 350 barrels of gasoline when the 70-ton schooner Belle of Burgeo went down with all hands on the Sambro Ledges when caught in a hurricane off the coast of Newfoundland.

The Willys Overland Co., of Toledo, has acquired control of the Moline Plow Co., tractor manufacturers, with plants at Moline, Chicago, Rock Island and Freeport, Ill.; Stoughton, Wis.; Minneapolis, Minn.; and Poughkeepsie, N.Y.

By an agreement drafted between the Finance Committee of the Calgary City Council and the Security Trust Co., liquidators for the Alberta Nail and Wire Co., the new purchaser of the company may use the plant for other lines of manufacturing.

The K. & S. Canadian Tire & Rubber Co., Ltd., capitalized at a million dollars, has been granted a provincial charter with power to manufacture autos, bicycles, and all kinds of lubricants, cements, etc., connected therewith. The head office will be in Toronto.

Porcelain Products, Ltd., a $40,000 company with head office in Toronto, has been granted a charter. The firm plans to manufacture hardware, tools, plumbing supplies and electrical goods. The head office will be in Toronto.

Bicycle News

The Dunlop Tire and Rubber Goods Company, Limited, of Toronto, has decided to hold its annual Dunlop Trophy bicycle team road handicap race on Saturday, October 19. The course will probably be over the Danforth road and the riders will cover about twenty miles.

C. R. Dixon, bicycle and accessory sales manager of Hyslop Brothers, Limited, Toronto, Canadian jobbers, has returned from a trip through the Province of Quebec. He was more than enthusiastic about prospects after he returned than when he started because the dealers showed every indication of prosperity and confidence in the future. Many reported only a slight falling off in bicycle sales since September and every time the automobile gets a rap from the Government there is a jump in bicycle sales.

J. Sturdy, of the Sturdy Hardware Company of Revelstoke, B.C., has had considerable success with his bicycle department during the year. He reports that sales of new bicycles were double the turnover of last year and there was also a very nice increase in the bicycle accessory business. He has an agency for the Columbia bicycle.

Marlatt and McKenzie of Kamloops, B.C., hardware dealers, have added the Columbia bicycle to their various hardware lines. N. S. Dalgleish of Kamloops, another hardware dealer, also reports that he has done well with the bicycle this year.

Lester and Thomson, Salmon Arm, B.C., are another hardware firm of British Columbia to stock bicycles. They have taken an agency for the Columbia bicycle and will run their bicycle department in conjunction with their garage.

Captain Stanley H. Brocklebank, son of D. Brocklebank of Arthur, died of wounds. He enlisted in the 71st Battalion, but later transferred to the 46th. He was 28 years old.

Pte. W. H. Turner, aged 31, of Elmwood, Ont., died from a gunshot wound in the chest. He was formerly employed in Reuber's hardware store at Elmwood. He went over with the 147th Battalion.

Pte. Harry G. Beetham of 552 Gladstone Avenue, Toronto, is in the hospital with a gunshot wound in the ankle. Prior to going overseas with the Beavers Battalion in 1917 he was employed with the Canadian Fairbanks-Morse Co.

Captain Lambert Carson, paymaster of the 195th Battalion, and formerly manager of the Massey Harris Company's branch at Edmonton, is in an English hospital with multiple wounds received in the recent fighting.

O. B. Henry, hardware, Drayton, Ont., has official word that his son, Gunner Alfred H. Henry, died in France from gunshot wounds received in the recent fighting. He was in his second year in Arts at Toronto University when he enlisted in the University Battery.

Company Sergeant-Major Lawrence D. Pridham, of Winnipeg, Man., has been officially reported killed in action. Before serving with the colors, he was a popular member of the Winnipeg bicycle trade. For some time he was in the accessory department of the Canada Cycle and Motor Company, Winnipeg.

Pte. James McGeary, son of Mr. and Mrs. James N. McGeary, of Strathroy, Ont., was killed in action in the recent fighting. Before enlisting he was employed in the hardware store of B. O. Parker & Co. at Strathroy.

WARNING TO SHIPPERS

United States Vice Consul Hansen cables from Bangkok, Siam, that exporters of motor cars and accessories should be warned against making shipments to Bangkok by way of Singapore without having previously obtained a transshipment permit from the Singapore Government.

METAL SPOONS

Recent Customs decisions and Departmental rulings contain the following:
File No. 95535.

Metal spoons declared to be dutiable not as cutlery but according to material.
File No. 68788.

Enamelled copper wire declared to be dutiable under tariff item 351.

Departmental Rulings

File No. 85702

Glass refills or receptacles, to be placed in Thermos bottles, dutiable under tariff item 326. This cancels ruling in Appraisers' Bulletin No. 327, page 35.
File No. 95626.

Radiators imported with tractor attachments and furnished only to supply sufficient cooling when the attachments are placed on an automobile, may be admitted without duty under the terms of the order-in-council contained in Memo. 2166B.

CATALOGUES and BOOKLETS

Catalogue No. 27 of automobile supplies issued by the Vokes Hardware Co., Limited, of 40 Queen street E., contains 64 pages of most useful information for all car owners. It is most attractively illustrated.

Wood, Alexander & James of Hamilton, Ont., have issued Catalogue No. 3 of automobile supplies. It is most attractively arranged and profusely illustrated. A most complete line of auto goods is listed in this catalogue which contains eighty pages.

The Northwestern Chemical Company, of Marietta, Ohio, have issued a 20-page booklet entitled "Care of the Cooling System." This booklet is illustrated, and gives the motorist many practical suggestions.

The Louis McLain Company of Winnipeg, manufacturers of the "Ideal" line of modern kitchen equipment, have just issued catalogue No. 7, profusely illustrating in a most attractive manner a large and most complete assortment of high grade aluminum goods. The features which mark "Ideal" goods, non-porous durable welds, strong, sturdy beads which make bending impossible, no burn raised bottoms, convenience, quality and service are emphasized. Many new lines which are practical and desirable and should prove fast sellers are shown. Special attention is called to the solid cast aluminum goods manufactured by the Louis McLain Company, kettles, coffee pots, etc. There are no rivets or solder in these and they have been tested and endorsed by the Tribune Institute. This catalog is well worth careful study by dealers.

THE CLERKS DEPARTMENT

WEALTHY MEN VERY GENEROUS, BUT SOME A LITTLE STINGY

Habit of Conserving Cash Occasionally Inclines to Close Otherwise Freely Disposed Fists—Munificence of Millionaires Often Concealed

THERE is a popular theory that the wealthy are stingy. Not always. When the characteristics of a number of the wealthiest men on the continent are looked into, charitable tendencies, even lavishly generous tendencies appear numerously. But the search has often to be very penetrating, for the power to give lavishly in money carries with it the power to conceal effectively the origin of the gift, and the list of munificent anonymous donations bestowed upon various needy objects of recent years would fill long columns.

Yet there are occasional instances of actual and self-recognized inability to give of the wealth that has been so strenuously toiled for. Long habit has warped the sinews of the coin-conserving hands until they have become unchangeably close-fisted.

None ever made a fortune who could not save the cents, however much the process may have gone against the grain of a naturally generous nature. In some cases the iron-willed repression of the desire to scatter money lavishly amongst those in need has come to dominate the character of the wealth-winner. In some cases there never was very much instinct to dissipate funds regardless of all return save in the evanescent coin of gratitude. These are the cases the public learns about and remembers, so that the sweeping generality as to the wealthy being root and branch niggardly also is still made, and cases are instanced to prove it. How few are those actual cases of marked meanness on the part of the very wealthy is found in an interesting sketch of the mean or generous impulses and achievements of America's financial magnates written by B. C. Forbes in the *Wall Street Journal*. One instance of wealthy "nearness" very evidently developed in its subject through the influences of the financial career is found in Russell Sage.

Russell Sage frankly confessed in his will that he was not temperamentally fitted to distribute his fortune or any part of it for philanthropic purposes, but added that his wife was more qualified for this task. "Uncle" Russell had developed the acquisitive quality to such an intense degree that no space was left in his make-up for any distributive ability. He left $66,356,718. Mrs. Sage immediately formed the Sage Foundation with an original endowment of $10,000,000. It has not, however, accomplished all that had been hoped. Also, I understand that the Sage fortune has shrunk very materially owing to less skilful handling of investments than, for example, Mrs. Harriman has been able to command.

Railway Kings Less Generous.

Curiously, our two foremost emperors of industry, Rockefeller and Carnegie, have earned even greater distinction by the giving than by the accumulating of their money, whereas neither of the two greatest railroad kings the country has ever known, James J. Hill and E. H. Harriman, gave lavishly in his lifetime or left even a fractional part of his fortune to philanthropy. Hill left everything to his wife and his nine children; Harriman left every penny to his wife.

At one time Hill planned to leave a large sum to be divided among the more worthy small colleges of the country, as he believed it was more democratic and more helpful to have a hundred vigorous, well-equipped colleges dotted throughout the country than to have half a dozen gigantic universities in metropolitan cities or exclusively in the East. What caused him to change his mind I do not know. Perhaps when he came to write his will he decided that the sooner the ordeal was got over with the better, and he accordingly took the easier method of simply willing everything to his family.

Americans Give More Than Known

Far more money, far more thought and far more time are given to philanthropic purposes by our captains of industry than is known or suspected by the public. I know this from my own investigation.

The late J. P. Morgan was one of the largest-hearted men America has ever produced. The public learned only of a few of the larger Morgan benefactions which could not well be concealed. His unannounced gifts to one hospital alone reached millions over a series of years; indeed, he was the mainstay of the whole institution and never begrudged responding to calls from it.

I have already told how Mr. Morgan saved one of his clerks who embezzled firm money. Let me relate another incident characteristic of the man:

Among the daily pile of begging letters addressed to the banker there came one from an inmate of Sailors' Snug Harbor on Staten Island, an old man who said he had known Mr. Morgan as a boy, and he wondered if Mr. Morgan would advance him $10 to add to what he had already saved up for the purchase of a certain type of wheel-chair which would enable him to get about the grounds in comfort. The busy banker gave orders to have the case investigated.

Morgan Always Ready to Help

On ascertaining that the old man had known him as a boy and that his other statements were true, Mr. Morgan personally wrote him a letter, recalled incidents of their boyhood days and enclosed enough money to keep the old man comfortable and happy for the rest of his life.

So ready, indeed, was Mr. Morgan to help all sorts and conditions that his secretarial force had to be most careful as to whom they allowed to approach him. Almost any person who could reach his ear with a tale of woe could "touch" him for money.

Frick as a Giver

Many years ago a man was walking along a street in Pittsburgh when an old-fashioned ambulance rambled past. "Is that the best Pittsburgh can afford?" he asked a companion. On learning that it was, he presented the city with a set of the finest ambulances money could buy.

That man was H. C. Frick. Mr. Frick is one of the half-dozen ablest, one of the half-dozen richest, and one of the most misjudged men in America. His attitude during the Homestead riots placed him in a false light, and though the facts subsequently revealed were creditable rather than discreditable to Frick, his reputation suffered permanently.

Mr. Frick's motive in building a very costly palace on Fifth Avenue and in spending millions on pictures and art objects for it is also not correctly understood by the public. The truth is that he planned these palatial buildings and is assiduously enriching them with priceless treasures solely with the idea of presenting them to the public. Also, he is to leave a sufficient sum to maintain them without entailing any cost to taxpayers.

His Will

Mr. Frick's will, I have reason to believe, will be very different from those left by many other men of abnormal wealth in that it will not pass the great bulk of his fortune to his son and daughter. Mr. Frick and Mr. Carnegie do not agree on most points, but they do agree that it is unwise for a multi-millionaire to leave every dollar to a son.

Mr. Frick is extremely reticent about his benefactions. Several years ago a Pittsburgh financial institution failed just before Christmas, when many hundreds of children and others were about to withdraw the Christmas Club funds which they had been depositing during the year. The failure struck sorrow into many a heart.

Then came the joyful tidings that every dollar of the Christmas fund would be paid out, the money having been provided from an unnamed source. When it leaked out later that Mr. Frick was the Santa Claus, he was not at all pleased—publicity spoiled the fun of having done it.

CANADIAN TRADE AFFECTED

(Continued from page 45)

to be certified by consular officers under the general license numbers, without official instructions governing each individual shipment except that shipments covered by general license PBF No. 1 require no certified invoices.

The Licenses

Among the general import licenses are included:

PBF No. 3.—Covering the importation into the United States from Canada and Newfoundland of all articles except those mentioned in the President's import proclamation of November 28, 1917, and except calcium carbide, olive oil, tapioca, sago, peanuts, rabbit skins, toys, manufactures of cotton not produced in Canada, tallow, cocoa beans, feathers, pumice and wheat products. Where commodities are restricted, this general license covers them only when shipped by other than ocean transportation and when they originate in Canada or Newfoundland or in a country from which they would be licensed for importation direct. Shipment from Newfoundland to Canada and thence overland or by lake to the United States is not considered ocean transportation.

PBF. No. 5.—Covering the importation of goods previously exported from the United States where the value thereof does not exceed $500.

PBF. No. 6—Covering the importation of personal baggage accompanying a passenger when containing only articles necessary for personal use on his journey.

PBF. No. 12—Covering the importation of all commodities of the origin and/or destination specified below which arrive at any port of the United States and or which are conveyed in transit through the territory of the United States either in bond or otherwise as follows:

(a) Commodities originating in Canada or Newfoundland and destined for any country in the world; or originating in Great Britain, France or Italy or any of their European or West Indian possessions and destined for Canada or Newfoundland.

(b) Commodities originating in Great Britain, France or Italy and destined for any West Indian colony, possession or protectorate of said countries, or originating in any of said West Indian colonies, possessions or protectorates and destined for Great Britain, France or Italy, except (e) below.

(c) Commodities originating in Canada or Mexico and destined for another point in the same country, passing through the United States except (e) below.

(d) Commodities of whatever origin or destination not now or hereafter placed on the restricted list except (e) below.

(e) Shipments under paragraphs (b), (c) and (d) are not to be included in the general license when such shipment would cross the United States from an Atlantic to a Pacific or Gulf port, or from a Pacific to an Atlantic or Gulf port, or from a Gulf port to an Atlantic or Pacific port.

PBF. No. 18.—Covering the importation when shipped from Yarmouth, Nova Scotia, to Boston, Mass., by vessel, approved by the War Trade Board, of all commodities the importation of which is permitted without individual license overland or by the Great Lakes from Canada.

PBF. No. 25.—Covering the importation of all commodities arriving at United States ports in bond in transit to Canada, provided the Canadian import license covering the shipments, or proper proof of the issuance of such license is presented to the collector of customs. (This supersedes PBF. No. 12 as to in bond transit shipments to Canada.)

PBF. No. 26.—Covering the importation of surplus stores and supplies, which the Bureau of Transportation of the War Trade Board may order removed from vessels in United States ports.

Notice to Ship Companies

The United States War Trade Board has notified all shipping companies and shipping agencies that vessels sailing from foreign ports on or after October 1, 1918, will not be permitted to unload any shipment of restricted commodities for importation into the United States, except coin, bullion, and currency, unless such shipment is covered by an invoice duly certified by the appropriate United States consular officer, or unless said shipment is covered by one of the "PBF" or general licenses; and that, if any shipping company shall bring to the United States any restricted commodity not so covered by such consular invoice, said company will be compelled to return said commodity to the port of origin at its own expense. Shipping companies will be protected, however, in accepting freight, provided they make certain that the invoice covering the commodity has been duly certified by the American consular officer.

Had No Licenses

This policy has been made necessary by the fact that, since the restrictions upon imports became effective, many shipments have arrived at United States ports, for the importation of which no licenses have been issued. These shipments have, in many instances, been unloaded, and have caused great congestion of the docks and warehouses.

It is expected that the precautions now taken will prevent this, and thus facilitate the handling of foreign trade, as well as the enforcement of the import restrictions adopted for the purpose of conserving tonnage.

WAR WORK BASIS FOR GETTING STEEL

(Continued from page 39)

"One Pittsburgh mill, on an urgent order for 80-lb. rails for France received Wednesday, rolled 20,000 tons before the end of the week. There is an entirely unprecedented volume of shell steel orders; sheets are wanted in large quantities for trench shelters and rolling kitchens, and in all ways the needs of the American army have been pressed upon the steel mills, until for one week the incessant call for ship plates has become an undertone.

"At Washington, while the cry still goes up for greater production, there is little encouragement to the pleas for higher prices, though some producers, both of pig iron and finished steel, are claiming that in the last quarter of the year their costs will be higher than present prices.

"Attempts to bring steel plants under the rulings of the National War Labor Board continue and the situation is tense, not so much from actual differences between the manufacturers and employees as from the efforts from without to raise issues that will bring government interference."

PERSISTENT ADVERTISING IN WAR TIME

(Continued from page 42)

of ways and means is the big idea that an advertiser is justified, in the face of suspended animation, commercially speaking, in doing everything within his power to sustain his commercial integrity and preserve his commercial identity. Let the corporation with such an asset use its surplus, employ its undivided profits, or even borrow money to protect, by means of consistent and insistent advertising, that invaluable intangible asset—good-will, which is the one thing that cannot be bought out of hand after the war.

They told me when I was a youngster that "even the Lord can't make a two-year-old calf in a minute." Big advertising spreads after the war will meet equally big spreads. Business will bid for public attention and interest on a bull market. The purpose will be to put a punch into the good-will that has gone flabby. The man who goes into that contest with a public attention and interest which he has never allowed to relax will go in with his good-will trained to the minute. He will win.

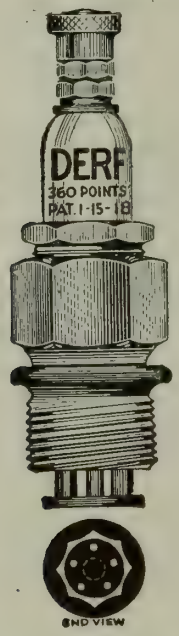
Keen Demand for Sheffield Steel

Writing from Sheffield, England, a correspondent of HARDWARE AND METAL says:

"A fair volume of overseas trade is being done in steel, tools, cutlery, and agricultural implements, especially with the colonies and dependencies and South America. France and Italy are taking a good deal of steel.

There is no particular tightness in commercial steel, though for certain war requirements the demand is very keen.

A little more basic iron is being called for, though most of the North Lincolnshire make is going in the direction of South Wales and to the north. A few Sheffield firms are using it at branch works outside the city. Derbyshire irons continue in short supply, and virtually only holders of "A" certificates can obtain delivery. What bar iron is made is very quickly absorbed. It is almost impossible to obtain "ordinary," makers producing little else than best and best-best, for which with treble best, they can ask extra rates upon the official maximum.



The coal supply situation has been made worse by the strike. Very few firms have anything worth mentioning on the ground, and most of them have no room for reserve stocks even if they could secure them. They are, therefore, working from hand to mouth. Even the reserve stocks at the gasworks are far below normal, and the railways are on short commons. Collieries are badly in arrears with deliveries."

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

DERF SPARK PLUGS

The Derf 360 points ignition spark plug, it is claimed, increases over the present maximum amount of power the revolution of the engine. It is claimed also that it embodies the most advanced ideas of design in connection with spark plug construction, gives more mileage

Derf Spark Plug

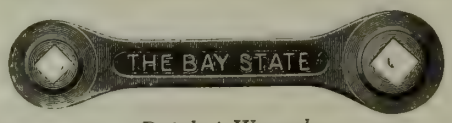
and is most satisfactory in every way. There is no porcelain to break, the core being composed of a compound known as "Lavaette," which, it is claimed, is practically indestructible. The spark plug is made by the Derf Mfg. Co., 90 West Broadway, New York.

COLLAPSIBLE TRAP

The Humane Collapsible Animal Trap is manufactured by the Veterans Manufacturing Co., 17-23 Main St., East Toronto. Every man connected with this organization has seen service in France

Collapsible Trap (Open)

and has been invalided back to Canada on account of wounds. The trap weighs only one and a half pounds and it is claimed can be carried in an overcoat pocket with ease. There are no springs animal trap on the continent. The claim to rust and break with the frost and it is claimed this is the only collapsible is made also that it is a surer catch



Trap Folded Up

than the spring trap and that it does away with the suffering a little animal endures in a spring trap. The trap can be set on top of the snow and it is claimed that it is impossible for it to freeze up. By using this trap it is claimed the fur is better and there is no waste caused from cuts in the hide or inflammation caused by bruises from steel jaws. Trappers, it is stated, can by using this trap supply fur farms with live animals without a blemish. The trap, it is claimed, is absolutely rust proof. There is, it is stated, no necessity of building a house for bait as this trap is a house if itself. It is also claimed that it is far easier to set than a spring trap.

RATCHET WRENCH

The Bay State carriage and tire bolt ratchet wrench is being manufactured in three sizes by the Bay State Pump Co. of 100 Purchase St., Boston. It is claimed by the makers that only the very best material procurable enters into the construction of this product and that their wrenches are practical, pow-

Ratchet Wrench

erful and real labor savers. No. 1 size has a six-inch handle and ⅜-inch and 15-32-inch square openings. No. 2 has ½-inch and ⅝-inch openings and a 7-inch handles and No. 3, which has an 8-inch handle, has openings 13-16-inch and 7-8-inch. Nos. 2 and 3 take hexagon as well as square nuts and bolts.

A WOODEN BICYCLE TIRE

Newspapers state that a bicycle dealer in the Province of Gelderland, in Holland, has invented a bicycle tire made of elm wood. It is said to have been tested satisfactorily on the clay and gravel roads of Holland. If successful the invention will be a great boon to Holland. Probably no other country uses relatively so many bicycles—nearly a million, or a bicycle to every seven or eight people. Rubber tires are now practically unobtainable.

"MOTH GO"

"Moth Go" which is being put on the market by the Moth Go Chemical Co., 507 East 10th St., Kansas City, is claimed to be an effective exterminator of moths. Its use, it is claimed, converts any clothes closet in which it is placed into a cedar chest. The bottle contains

Moth Go

a compound of cedar which feeds a cap. The cap being porous spreads the odor and it is claimed means death to every moth. It is stated that "Moth Go" does not in any way fill clothes with obnoxious odors.

STEP LADDER STOOLS

Step ladder stools manufactured by the Stratford Manufacturing Co. of Stratford, Ont., are made from hardwood, are twenty-five inches high and have an eleven-inch top. They are very light, open automatically and it is claimed are absolutely non-collapsible when in use. It is stated that they are one of

Step Ladder Stools

the most compact products of the kind on the market and that they are exceptionally strong and most useful in stores, offices, libraries, work shops and in the home. They come in varnish finish only.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

NEW prices have been announced on garden hose. These become immediately effective and apply on spring business as well. Present quotations represent a substantial advance over opening prices of last year.

Lawn goods have been revised to higher levels, a 15 per cent. increase being shown in new prices issued on hose nozzles, sprayers, sprinklers, hose clamps, hose menders and kindred lines. The question of delivery remains uncertain.

Saddlery hardware has also come in for a sharp advance, amounting to about 15 per cent. The lines affected include harness snaps, rope snaps, breast strap snaps, bridle bits, hame staples, hame clips, trace cockeyes and breast strap slides.

Wrought washers have been placed on a new selling list, and manufacturers intimate that orders placed should be specified by size of hole. The present basis provides for a stiff increase.

Heavy increases are also noted in new list prices issued on flashlights, batteries and bulbs. Chemicals, brass and tungsten are employed in the manufacture of these lines, and prices on these raw materials have reached figures which the manufacturers intimate leave them no alternative in the question of prices on the manufactured article. The scarcity of all materials and labor are also contributing factors which have combined to shove prices up from 25 per cent. to even 50 per cent. in some instances.

A further advance of 10 per cent. has been made in quotations on hand saws, compass saws, back saws and pruning saws, while buck saws are up as much as 20 per cent. Two lines of wrenches are also on the upward trend, showing an increase of about 10 per cent.

The tin market is somewhat easier, and declines of from 5 to 10c per pound are noted in some quarters. Trading is rather limited owing to uncertainty still prevailing re Government action. First advices intimated that the United States were to get two-thirds of the available supply. Now there are indications that the British Government may handle the entire product, appointing one importing firm as their agent. This would probably work out to best advantage as a more accurately gauged basis of the available supply could be secured and allocations made to essentials in the order of their importance. Solder is down 1c per pound in sympathy with lower prices of tin.

Other important changes during the week have been made, all providing for advanced prices. The lines affected include tin roofing caps, washboards, wheelbarrows, saw sets and roofing.

Business is good, fall lines moving forward freely. Jobbers intimate that there is a marked increase in difficulties surrounding securing of merchandise. The question of procuring goods for next spring is going to be a big factor in determining to what extent prices will advance. Manufacturers cannot give any assurance that shipment of orders booked now for spring delivery will be made.

MONTREAL MARKETS

MONTREAL, Sept. 26.—Several important changes are announced this week. The advances made apply to wrought iron washers, saddlery hardware, shoe and stove polishes, warehouse trucks, shot, plumbers' oakum, squares and flashlights. Orders for many of the staple lines of hardware are coming to hand even better than was looked for and the ability of the jobbers to fill these is taxed in many cases. The feature of the trade that jobbers seem pleased with is that of both city and country trade being on a more active basis than it was. All tendencies are of a firming nature, particularly as affecting steel products and cotton goods.

Wrought Washers On Advanced List

Montreal.

WASHERS.—A new list sent out by Canadian manufacturers shows a sharp advance for wrought washers. Elsewhere in panel will be found the latest price list.

Another Advance for Plumbers' Oakum

Montreal.

OAKUM.—A 50c advance per 100 pounds has been made for oakum. This applies to plumbers' grade, and makes a new high price basis. Quotations are shown in the current lists.

Cordage Steady Without Changes

Montreal.

CORDAGE AND ROPE.—Markets are steady but without change. The volume of business has increased and improvement in this respect shows advance over the same period last year. Some manufacturers are still of the opinion that a new price schedule will later be effected. Pure manila still sells on the basis of 39c per pound; British manila at 33c and sisal at 27½c.

Gasoline Scarce; Heavy Demand

Montreal.

OILS, GASOLINE.—There was little or no observance of the Sunday restriction on the use of gasoline, which had the tendency to increase the demand a little. This may have the effect of hastening the increase in price which has gone into effect in the United States. This should be offset by the laying up of cars for the winter. Motor gasoline is still holding at 34c, Royalite coal oil 19c, Palacine and Electroline 22c.

Saddlery Hardware Advanced 5 Per Cent.

Montreal.

SADDLERY HARDWARE. — All saddlery hardware takes a jump, and al-

ROUND WROUGHT WASHERS

Canadian Manufacturer's Standards
Cancelling list March, 1902
List of Sept. 23rd, 1918

In ordering specify only the size of hole wanted.

Net Extras	Per 100 lbs.
26 to 49 pounds of a size	$1.00
25 pounds of a size or less	2.00

Package Allowances

If taken in kegs about 175 lbs. each, allowance 10c per 100 lbs.
If taken in bags about 100 lbs., allowance 15c per 100 lbs.
For special Washers, prices will be quoted on application.

Galvanized Wrought Washers

Washers are galvanized by the hot process. Extra quoted on application.

though it is only five per cent. the trade in Montreal is of the opinion that the price will not remain at that long, and another raise can be looked for at any time. The new prices apply for present business only.

Shoe and Stove Polishes Advance

Montreal.

SHOE, STOVE POLISHES.—An increase in the price of shoe and stove polishes as affecting the Dalley line is made effective. This brings the regular line sold through the trade to $1.30 per dozen.

Warehouse Trucks Advanced 10 *Per Cent.*

Montreal.

WAREHOUSE TRUCKS.—Warehouse trucks show an increase in price, and the following revised list is about ten per cent. over previous prices. No 1½ $8 each; No. 2½ $10; No. 3½ $12.50; No. 4½ $14.50; No. 5½ $17.60; No. 1 $9.35; No. 2 $11.40; No. 3 $13.75; No. 4 $16; No. 5 $19.25 each. These prices are at once effective

Shot Prices Show Substantial Gain

Montreal.

SHOT.—A new price on lead shot is reported to-day, which is caused by the tightening up of the supplies, and it is now quoted at $18 per hundred, less 10 per cent. There is not a great deal of demand for this at present, although the season of greatest activity has arrived.

New High Prices For Iron Squares

Montreal.

IRON SQUARES.—New prices on iron squares on the following numbers are given out, recording an advance. No. 492 $6.60; No. 493 $7.20; No. 494 $9.25 per dozen. Other numbers have been revised, the changes being recorded in these markets recently.

Revised Prices on Flashlights

Toronto.

FLASHLIGHTS.—New prices are announced to the trade on both Franco and Eveready lines of flashlights. Some of the new quotations on flashlights follow: No. 6781, $1.90 each; 6782, $5.20; 6787, $2.20; 6788, $2.65; 6789, $3.15; 6791, $2.60; 6792, $2.30; 6794, $1.70; 6798, 1.75; 3506, 3507, 3508, $1.90 each; 3429, 3430, 3434, 3435, $1.80 each; 4755 and 4758 $2.50 each. These are list prices, from which usual dealers' discounts of 33 1-3 per cent. apply.

Wire Nails Steady; Good Movement

Montreal.

NAILS, WIRE.—The wire nail situation is steady and the undertone firm. Changes have been anticipated in some quarters but the basis of $5.35 per keg still obtains for standard wire nails and $5.60 for cut. Smooth wire is slow moving and the base price of $6.25 per 100 pounds is unchanged.

Sheet Steel Basis Will Likely Advance

Montreal.

SHEETS, PLATES.—It is more evident than ever that jobbers will ask more money for sheets as they become sold up on supplies. Being unable to replace their various gauges it will be impossible to do other than advance quotations. There has been some movement during the week and the range is unchanged.

BLACK SHEETS—	Per 100 lbs.			
10 gauge	$9 75	$9 75	$11 50	
12 gauge	9 50	9 65	11 00	
14 gauge	8 25	9 00	7 95	
16 gauge	8 40	9 15	8 00	
18-20 gauge	8 50	9 25	8 05	
22-24 gauge	8 75	9 60	8 10	
26 gauge	9 70	9 75	8 15	
28 gauge	....	9 90	8 25	

GALVANIZED SHEETS—

18 gauge	....	9 45	9 70	10 95
16 gauge	....	9 35	9 55	10 85

NOTE.—These prices are for full bundles, an extra charge of 25c per 100 lbs. is made for broken lots.

Steel Bars Firm; Iron Moves Well

Montreal.

IRON AND STEEL.—Jobbers report good business and some difficulty in keeping their stocks complete. Steel has been very firm and the tendency has been to advance the special lines of these.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Firmer Lead Market May Advance Traps

Montreal.

LEAD AND ZINC PRODUCTS.—The continued difficulty of securing needed supplies of lead for manufacturing has resulted in a firmer undertone for manufactured lines. It is quite probable that a new basis may be arranged soon for lead traps and bends, waste pipe and other lines. Trading in some parts is fairly good.

Lead pipe, lb.	0 15
Lead waste pipe, lb.	0 16
Lead traps and bends	Net-list
Lead wool, lb.	0 14
Lead sheets, 2½ lb. s. ft., lb.	0 14½

Scrap Metals Hold; Machy. Scrap Moving

Montreal.

OLD MATERIALS.—The Montreal dealers state that there is very little trading in scrap metals, and prices remain the same. There is some movement in heavy machinery scrap and the demand for this is sometimes in excess of supply. Shipments from the country are not large.

Dealers' Buying Prices:		
Tea lead	0 05	0 05¾
Heavy lead pipe	....	0 07½
Yellow brass	....	0 13½
Red brass	....	0 23½

Overshoes, lumbermen's rubber boots	....	0 05
Bicycle tires	0 04½	0 05
Automobile tires	0 04¾	0 05

Refined Copper Scarce; Lead Still High

Montreal.

INGOT METALS.—Dealers state that they are unable to procure a great deal of refined copper and that considerable remelted scrap has been offered to the trade lately.

There is no new interest in lead, the same being scarce and firm. Tin is a trifle easier.

COPPER.—The amount of copper used is rather large and it is scarce. Prices are steady and firm, the local market ruling at 28¾ to 30c per pound.

TIN.—A price basis for tin has not yet been reached, the Government gathering data still regarding distribution, etc. Prices here are still ruling at 97c to $1 per pound.

SPELTER.—There is a firm but unchanged situation here, prices remaining at 10½ to 10¾c per pound.

LEAD.—Supplies are limited and there is a reported shortage of requisite supplies here. Prices are firm but without change at 10 to 10¾c per lb.

ANTIMONY.—Trading operations are without much change here and quotations still hold on the basis of 15 to 16c lb.

ALUMINUM.—There has been little movement of aluminum here for some time. Sales usually are confined to small lots and prices range from 50 to 55c lb.

TORONTO MARKETS

TORONTO, Sept. 26.—Further important changes have been made in lines affecting the hardware trade during the week Saddlery hardware including snaps, bits, hame staples and clips, trace cockeyes, and breast strap slides have advanced about 15 per cent. New prices have been announced on garden hose for spring which show an advance over opening prices last year. A further advance of 10 per cent has also been made in hand saws, compass saws, back saws, and pruning saws, while buck saws are up about 20 per cent. Hay rakes, garden barrows, food choppers and washboards are other lines to undergo revision. New lists have been issued on flashlights and batteries which show very considerable gains.

Business is very good, but jobbers report increasing difficulty in securing shipments. The question of securing supplies for next spring is going to be a big factor in the extent that prices will advance. The trade feel that those merchants who can afford it, would be exercising good business judgment to take into stock now a fair proportion of the goods they will require for Spring. Their reason for this is that manufacturers cannot give any assurance that orders booked now for spring shipment will be delivered.

Hand, Compass and Buck Saws Higher

Toronto.

SAWS.—Higher prices have been named on the various lines of saws. These show a general increase of 10 per cent. The lines affected include hand saws, compass saws, back saws, pruning saws, and buck saws. Prices named on buck saws are up about 20 per cent. Quotations which are now being made to the trade on buck saws are as follows: Happy Medium, $11.45 per dozen; Happy Medium, lance tooth, $12.60; Maple Leaf, plain, $12.60; Maple Leaf, lance tooth, $13.55; New Century, $14.25; Prince Rupert, $15.30. Extra blades are also higher, the Happy Medium now being quoted at $6.45 per dozen, the Maple Leaf at $6.55 and the Prince Rupert at $9.35.

Maple Leaf saw sets at $5.50 per dozen have also followed the upward trend.

Harness Snaps, Bits, Kindred Lines Up

Toronto.

SADDLERY HARDWARE.—New prices on harness snaps, bridle bits, hame staples, hame clips, trace cockeyes and breast strap slides have been named. These show an advance approximating 15 per cent. on the entire line. New prices now being quoted to the trade are given as follows:

Champion Snaps—No. 149, ¾, ⅞ and 1 inch, $5.25 per gross; 1¼ inch, $9.00; 1½ inch, $10.00; 1¾ inch, $11.00. Buckeye Snaps—No. 444, by 1 inch, $6.35 per gross; 1¼ inch, $9.50; 1½ inch, $11.20; 1¾ inch, $12.95. Champion Round Eye—No. 300 by ½ inch, $5.00 per gross; ⅝ inch, $6.20; ¾ inch, $6.20; ⅞ inch, $8.55 and 1 inch, $9.40. Roller Breast Snaps—No. 150 by 1½ inch, $2.75 per dozen; 1¾ inch, $2.95 and 2 inch, $3.15. Bridle Bits—No. 37, $1.85 per dozen; No. 47, $2.00; No. 137, $2.00; No. 500S and 500J, $3.25; No. 865, $2.45; No. 866, $3.10 and No. 825, $6.55. Hame Staples—No. 960, 42c per dozen; Hame Clips, No. 982, 45c per dozen. Trace Cockeyes—1¼ inch, 78c per dozen; 1½ inch, 90c; 1¾ inch, $1.10 and 2 inch, $1.40. Breast Strap Slides—No. 10, $1.25 per dozen.

Wheelbarrows Higher; Roofing Caps Too

Toronto.

WHEEL BARROWS, ROOFING.—A higher level of prices has been reached on garden barrows, the large size now being quoted at $71.40 per dozen and the boys' small at $64.20. The navvy steel wheel-barrow is also higher, to-day's quotations reading $60.00 per dozen.

Tin roofing caps have also gone to higher levels, to-day's quotation of $9.75 per 100 pounds showing a stiff advance.

Wrenches Advance; Animal Traps

Toronto.

WRENCHES, TRAPS.—A further change has been made in double head engineers' wrenches and quotations to the trade are now being made at net list. Higher prices have also been named on socket wrench sets. The Ford Unique now selling at $3.10 per set, and the Standard Unique at $3.10 per set.

The Humane collapsible animal trap is now being sold by the jobbers, prices to the trade ruling at $13.90 per dozen, including two doors.

Spring Prices Out on Garden Hose

Toronto.

GARDEN HOSE.—Higher prices have been reached on garden hose and quotations being made to-day are immediately effective and also apply on orders for spring shipment. The present scale of quotations shows a fairly substantial advance over opening prices last year and range as follows:

Garden Hose, No. 300, 3 ply, ½ inch, $11.50 per 100 feet; ¾ inch, $15.50; No. 400, 4 ply, ½ inch, $13.50 per 100 feet; ¾ inch, $17.50; No. 500, 5 ply, ½ inch, $14.50 per 100 feet; ¾ inch, $19.50; No. 600, 6 ply, ½ inch, $16.50 per 100 feet; ¾ inch, $21.50.

Corrugated Hose—½ inch, $17.50 per 100 feet; ⅝ inch, $20.50; ¾ inch, $23.50, full rolls of 500 feet taking a special discount of 5 per cent. On the above, orders for five hundred feet or more take a special discount of 5 per cent. Orders shipped before May 31, 1919, which are fully specified before December 1, also take a special discount of 5 per cent.

Banner Sheeting Hose—½ inch, 3 ply, $11.50 per 100 feet and ½ inch by 4 ply, $13.00; ⅝ inch, 3 ply, $13.50 per 100 feet and 4 ply, $16.00; ¾ inch by 3 ply, $15.50 per 100 feet and 4 ply, $17.50.

15% Advance in Nozzles, Sprinklers, Etc.

Toronto.

LAWN GOODS.—Prices on the various lawn goods, including hose nozzles, sprayers, sprinklers, hose sprayers, hose menders and kindred lines show an advance for next year of 15 per cent. Advices are to the effect that manufacturers hold out no guarantee of delivery but every effort will be exerted to take care of the trade requirements.

Five Per Cent. Jump in Wash Boards

Toronto.

WASH BOARDS.—Higher prices have again been named on wash boards, quotations showing an advance of 5 per cent. over former figures. List prices on the various lines are given as follows: Pony, $2.25 per dozen; Improved Globe, $4.90; Neptune, $4.90; Standard Globe, $4.90; Original Globe, $5.40; Jubilee, $5.50; Newmarket King, $5.50; Western King (enamel), $7.00; Beaver (brass), $7.00. Selling prices to the trade are now list plus 5 per cent.

Wrought Washers Take New List

Toronto.

WROUGHT WASHERS. — Manufacturers have adopted a new standard selling list on round wrought washers which appears complete in panel on another page. It will be noted they state in ordering to specify only the size of hole wanted. Full details as to outside diameter, size of bolt and even the average number in 100 lbs. is given. The discount from lists shown is 33 1-3 per cent., subject to change without notice.

Hay Rakes Up For Next Season

Toronto.

HAY RAKES.—New net prices issued on hay rakes for next season's requirements are now available and these show an advance over opening prices named last year. Prices range as follows: Wire bow, straight, $5.95 per dozen; wire bow, bent, $6.35; wood bow, straight, $6.40; wood bow, bent, $6.85.

Batteries, Flashlights, Revised Upwards

Toronto.

DRY BATTERIES, FLASHLIGHTS.—New quotations to hand on dry batteries show an advance over former quotations, the No. 6 in barrel lots now selling at 36½c with the regular extras for small quantities.

A sharp revision is noticeable, too, in new list prices issued on flashlights. It is intimated these range up 25 per cent. and sometimes even 50 per cent. All materials are becoming increasingly hard to get and the labor question is such that manufacturers feel this advance is warranted. List prices shown herewith on some of the best selling numbers are subject to a discount of 33 1-3 per cent. Prices on the flashlights are given, complete with battery.

Eveready Daylos; list prices—No. 1650, $6.55 each complete; No. 1657, $1.90; No. 1901, $2.20; No. 2602, $1.90; No. 2604, $2.20; No. 2606, $2.20; No. 2612, $2.65; No. 2616, $2.65; No. 2619, $3.15; No. 2622, $1.75; No. 2624, $1.75; No. 2625, $1.75; No. 2626, $2.05; No. 2627, $1.70; No. 2628, $1.40; No. 2630, $2.20; No. 2631, $2.50; No. 2632, $3.15; No. 2633, $4.05; No. 2634, $3.45; No. 2637, $5.65; No. 2638, $4.90; No. 2653, $6.55; No. 2659, $5.30; No. 2675, $2.50 No. 2683, $1.90; No. 2684, $1.90; No. 4702, $9.40; No. 4703, $5.00; No. 4706, $3.75; No. 4707, $6.25; No. 4708, $6.25; No. 4709, $4.10; No. 4716, $2.00; No. 4718, $2.50; No. 4719, $3.20; No. 4720, $3.70; No. 6900, $1.40; No. 6901, $1.85; No. 6902, $1.90; No. 6903, $1.85; No. 6904, $1.85; No. 6909, $2.50; No. 6954, $1.90; No. 6961, $1.40; No. 6962, $1.75; No. 6970, $1.40; No. 6971, $1.40; No. 6972, $1.75; No. 6980, $2.20; No. 6981, $2.20; No. 6982, $2.50; No. 6990, $1.75; No. 6991, $1.75; No. 6992, $2.20.

Batteries, list prices—No. 700, 50c each; No. 703, 55c; No. 705, 75c; No. 706, 45c; No. 708, $1.20; No. 710, $1.40; No. 711, 80c; No. 715, $1.25; No. 734, 80c; No. 750, 50c; No. 751, 55c; No. 775, 80c; No. 790, 50c; No. 791, 50c; No. 792, 50c; No. 793, 55c.

"Franco" Flashlights, list prices—No. 6781, $1.90 each complete; No. 6782, $5.20; No. 6784, $2.20; No. 6786, $2.65; No. 6787, $2.20; No. 6788, $2.65; No. 6789, $3.15; No. 6791, $2.60; No. 6792, $2.30; No. 6794, $1.70; No. 6798, $1.75; No. 6761, $2.20; No. 6762, $4.90; No. 6764, $2.50; No. 6766, $3.15; No. 6767, $2.50; No. 6768, $3.45; Nos. 3506, 3507, 3508, $1.90; No. 3418, $1.10; No. 3423, $1.10; No. 3426, $1.45; Nos. 3430, 3434, 3435, $1.75; Nos. 4755, 4758, $2.50; No. 4709, $2.55; No. 4725, $1.30; No. 4730, $1.80; No. 4734, $2.20.

"Franco" Flashlight Batteries, list prices—No. 1008, 45c each; No. 1020, 55c; No. 1027, 75c; No. 1028, 50c; No. 1029, 50c; No. 1040, 50c; No. 1042, 50c.

Food Choppers Under Revision

Toronto.

FOOD CHOPPERS.—Food choppers have come in for a slight revision in price during the week, the Universal being the line affected. Quotations adopted on these now range as follows: No. 1, $23.40 per dozen; No. 2, $28.20; No. 3, $36.60.

Roofing to Go Higher; Sheathing

Toronto.

ROOFING, SHEATHING. — Higher prices are expected on some lines of ready roofing, dating from October 1. The change on R. S. Special one and two ply shows an increase of 25c per square, and on the three ply of 40c per square, making to-day's prices read as follows: 1 ply, $1.75 per square; 2 ply, $2.00; 3 ply, $2.40.

New figures have been issued on double coated asphalt sheathing paper also, which provide for an advance of 5c, making quotations now 70c per square. Manufacturers' difficulties are multiplying, as will be noted by a recent order in the United States prohibiting the export of asphalt except under license. This will probably result in a curtailment of amount available and most certainly slow up deliveries.

Stove Founders Take on War Work

Toronto.

STOVES, ENAMELWARE.— Reports from the United States are to the effect that stove founders are rapidly taking on war work, including several large contracts for semi-steel shells. Several of the large pipe shops are already casting such shells and other founders are rapidly converting their plants for similar work. It looks as though stove manufacturers here will have to undertake a much greater percentage of war work, too, if they are to maintain their organizations.

Enamelware shows no change for the week. Prices are firmly maintained and the future presents a more difficult aspect. Manufacturers are not booking future business at all as yet and prospects are that they will continue to sell for immediate delivery only.

Oil Sales Good; Gasoline Moving

Toronto.

OILS, GASOLINE.—Sales of coal oil have been maintained, in fact are on the increase weekly. The greater use of oil heaters is a factor along with the use of oil for lighting purposes. Prices are firm and unchanged at from 18 to 21c per gallon, according to grade. Gasolene is selling quite freely and the basis of prices shows no change at 33c per gallon.

Cordage Steady; Twines Unchanged

Toronto.

CORDAGE, TWINES.—Cordage of all kinds is steady and the situation contains no particularly interesting feature. Prices are ruling with a strong undertone on the following basis: Pure manila, 39c per pound; British manila, 33c; sisal, 27½c.

All lines of twines are very firm, the markets ruling with a very firm undertone.

Nails Hold at Unchanged Figures

Toronto.

NAILS, WIRE.—An unchanged basis for quoting is to be noted in nails, wire selling at $5.30 and the cut at $5.65 per 100 pounds. The market is very strong at these prices and the tendency is towards higher levels. Shipments are maintained at a very satisfactory point.

Quotations on smooth steel wire are also unchanged at $6.25 per 100 pounds base. The demand is small.

Iron and Steel Bars May Be Revised

Toronto.

IRON AND STEEL.—A slight change in pig iron is reported, but details as yet are not complete enough to say whether bars will be affected or not. The fact remains, however, that when pig iron records an advance, higher levels on bars are sure to follow. The market in the meantime is steady with supplies fairly good.

Signs of Improvement In Conditions

Toronto.

SHEETS, PLATES.—Toronto warehouses are far from well stocked in plates or sheets, but they are expecting that trade in plates will be easier. They have assurance that the Canadian allotment has been increased by almost fifty per cent. per week. This has been made possible by the cutting off of industries in the United States that could not come up to the classing that would put them down as essentials. The output of plate has also been increased by changing a large number of mills from rolling sheets. Steel is shipped to Canada at the rate of 1,500 tons per week. Of course that refers to material heavier than No. 11 gauge. There is a large amount of stuff coming in under that gauge, though, and there is a tendency to get consumers to use the lighter material.

Local dealers have received schedules showing just what the various ratings given by the Washington authorities mean. This is done so that jobbers and others can study the list and find out for themselves just where they stand in the line. The chances are that there would hardly be room in Washington for enough clerical help to figure out where all the varied interests stand on the preference and priority lists. As a matter of fact Ottawa shows a tendency now to weed out orders more strictly than was the case a few months ago.

The situation does seem easier in so far as the securing of material is concerned, but there is no possibility of the supply getting neck and neck with the demand and creating a surplus. There have been no price changes.

Firm Tone to Manf'd Sheet Metals

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—The marked scarcity of sheets for commercial lines is affecting manufacturers of sheet metals very seriously and a general revision in prices to higher levels may be found necessary. Supplies of sheets are very light and little improvement is looked for as far as commercial requirements are concerned. Business is coming along in fairly good volume and the outlook anything but bright.

Discount, 7½ per cent.

Wrot Pipe Firm; Boiler Tubes Same

Toronto.

WROUGHT PIPE, BOILER TUBES.—Quotations on wrought pipe are very firmly held at levels reached last week, new prices being shown in current market quotations. The question of supplies remains a difficult one and little improvement is looked for for some time to come.

Boiler tubes remain in about same position outlined last week. Replacement of stocks is very hard to secure and supplies on hand, though fair in some sizes, are totally inadequate in others.

Solder Down 1c; Lead Products

Toronto.

LEAD AND ZINC PRODUCTS.—Solder is down 1c per pound all around in some quarters. Tin is slightly lower this week, which is the contributing factor in this change. Prices now show the following range: Guaranteed, 57c to 59c per pound; strictly, 53c to 57c; commercial, 46c to 50c; wiping, 45c to 54c; wire, 55c to 70c.

Manufactured lead products are unchanged. The demand is comparatively light and stocks are fair. Pig lead is none too plentiful and a strong undertone to the market is noticeable. Range of quotations follows:

Lead pipe, lb.	....	0 15
Lead waste pipe, lb.	....	0 16
Lead traps and bends	....	Net list
Lead wool, lb.	0 15½	0 16

Solder, wire, lb.	0 55	0 70
Zinc sheets, per lb.	....	0 26

Scrap Materials Quiet; Prices Steady

Toronto.

OLD MATERIALS.—There does not seem to be a very large volume of business moving through the local yards. The dealers are very positive in their statements that there is a great deal of scrap metal in the yards of the steel mills and the foundries. "In some places they are fairly clogged with scrap, so much so that they are asking that deliveries to them shall be deferred for a few weeks," declared one dealer. And there are a good many foundries that have never had so much scrap under their shed roofs. I am not inclined to take very seriously the stories we hear about a shortage of material. There is nothing to indicate any such thing. Prices are not going down yet, but one thing is certain, and that is that they are not firm. As soon as a seller or buyer comes in here the first thing spoken of is a lower price for scrap. There is no saying where it may lead to."

No price changes are noted in the local market this week.

Tin a Little Easier; Lead Firm

Toronto.

INGOT METALS.—Tin is easier and the trade generally awaits details of government control. Previous information was to the effect that two-thirds of world's supply was to come to United States and be distributed at regulated prices, now it appears that the British government has taken control and is operating through one importing firm as its agent. This action would probably work out to best advantage as available supplies could be determined more readily and allocations made according to importance of various industries. It would probably mean lower prices to the consumer as well. Lead is firmly held and spelter quiet.

COPPER.—Heavy demands continue to tax capacity of refineries but most essential needs are being taken care of. Locally the situation is without feature, prices holding firm at 30c to 32c per pound.

TIN.—The market is easier locally at $1 to $1.05 per pound, and some transactions at around 95c are reported. Supplies are fair and essential industries securing sufficient to keep operating.

SPELTER.—No change in prices has been made, the market being steadily held. The demand is comparatively light just at present with supplies ample. Price remains at 11c per pound.

LEAD.—Labor scarcity is affecting output of this metal and there is little obtainable. Prices are very firm, producers holding at level recently agreed upon. Locally quotations are being made at around 10½c to 11c per pound.

ALUMINUM.—There is no news or excitement in this market. Supplies are being absorbed in government work and quotations nominally hold at 50c per pound.

ANTIMONY.—A fair demand exists and the undertone to the market is steady, with price unchanged at 18c per pound.

PIG IRON.—Approval of recommendations of the War Industries Board on pig iron has been secured. The base price on basic iron is increased to $33 f.o.b. furnace. The base price on No. 2 foundry iron is increased to $34 f.o.b. furnace. The base price of standard Bessemer iron is fixed at $35.20 f.o.b. furnace, subject to changes from previous practices as regards delivery and covered in special article elsewhere in this issue.

LONDON MARKETS

LONDON, Sept. 26.—Higher prices have been named on rubber garden hose taking effect immediately and applying also to spring booking orders. Blacksmith vises, anti-rattlers and apple picker's baskets are other lines on which advances have been made during the week. A very heavy sale of oil heaters is reported and ash sifters are also going forward in good quantities. Prices on all lines are very firm and jobbers intimate that deliveries from the manufacturers are slowing up materially.

Business here is considered very good. Stoves, ranges, oil heaters, roofing, horse blankets, and all other Fall lines are selling freely.

10% Advance in Blacksmith Vises

London.

BLACKSMITH VISES.—A 10 per cent. advance has been made in blacksmith vises and this change is just representative of all lines in iron and steel which may be expected to show continued advances as raw materials grow scarcer and labor scarcer and higher. New prices on the Columbia lines are given as follows: No. 35, $14.75 each; No. 40, $15.50; No. 45, $16.25; and No. 50, $17.00.

Sales Oil Heaters Good; Ash Sifters

London.

OIL HEATERS, ASH SIFTERS.—A good sale of oil heaters continues to be manifest. The use of these seems to be on the increase and the recent advance in price has apparently had no effect in the demands from the trade. Prices on the Perfection No. 525 are $7.00 each, list; No. 530 nickel plated, $8.25 list; No. 630, blue enamel, $10.25 list. these prices being subject to a discount of 25 per cent. Wicks and carriers No. 500 for the above are quoted at $3.45 per dozen net.

Ash sifters are another line which are enjoying a very good sale. There has been no change in the prices, the Banner now selling at $3.45 each, and the No. 1 Rocker at $5.50 each, the common wood side sifter remains at $2.50 per dozen.

Higher Prices on Garden Hose

London.

GARDEN HOSE.—Higher prices have been named on rubber garden hose, which take effect immediately and apply on spring booking orders. This line has remained stationary for several months, but the present scale of prices shows a substantial increase over opening figures of last year. New prices to-day are given as follows:

Garden Hose—No. 33, 3 ply x ½ inch, 11½c ft.; ⅝ inch, 13½c ft.; ¾ inch, 15½c ft. No. 44, 4 ply x ½ inch, 13c ft.; ⅝ inch, 16c ft.; ¾ inch, 17½c ft. No. 55, 5 ply x ½ inch, 14½c ft.; ⅝ inch, 17½c ft.; ¾ inch, 19½c ft.

Corrugated—½ inch, 17½c; ⅝ inch, 20½c; ¾ inch, 23½c ft., these prices being subject to a discount of 5 per cent in full reels of 500 feet.

Stove Pipe, Elbows, Coal Hods Firm

London.

STOVE PIPES, ELBOWS, COAL HODS.—Dealers generally have taken into stock their booked orders of stove pipes, stove pipe elbows and coal hods. However, there is a fair amount of business for these lines developing and prices have held at unchanging levels. The made-up stove pipes, 6 inch, are quoted at $24.67 per hundred lengths. and the 7 inch at $26.07. Stove pipe elbows, light pattern, 6 inch, are selling at $2.30 per dozen, and the 7 inch at $2.50. Coal hods, open japan, 16 inch are quoted at $5.32 per dozen; 17 inch at $6.72; the open galvanized, 16 inch, at $8.25, and 17 inch, $9.75; the 17 inch funnel japan, $7.98, and 17 inch funnel, galvanized, $12.00 per dozen.

Anti-Rattlers Up: Picker's Baskets

London.

ANTI-RATTLERS, BASKETS. — A further change has been made in the Johnson anti-rattlers, No. 1 which represent a considerable advance over previous figures. To-day's price is $1.50 per dozen pairs for this line.

Apple picker's baskets have also gone to higher levels, the new price being $5.50 per dozen.

Wire Nails Firm; Lanterns Selling

London.

WIRE NAILS, LANTERNS.—A very good sale of wire nails is reported and prices are holding very firm. Wire nails are holding at a base price of $5.30 per 100 pounds and cut nails are selling at $5.60.

Lanterns are moving forward fairly well and no change in the price has been made, the long and short pattern globe both selling at $12.50 per dozen. Lantern globes both short and long pattern are also unchanged, selling at $1 per dozen in one dozen cases, 90 cents per dozen in three dozen cases, and 85 cents per dozen in six dozen cases.

Putty Moving; White Lead Steady

London.

PUTTY, WHITE LEAD IN OIL.—A very good sale of putty is reported and a very desirable feature is the fact that no further change in price has been made. New quotations named a couple of weeks ago are still in force, the standard putty in 100 lb. drums selling at $6.75 per 100 pounds and in 25 lb. drums at $7. Pure putty prices are $2 per 100 pound above quotations on standard. White lead in oil rules without any change. There is very little excitement in this market, and only a fair movement is in evidence. Quotations rule without change so the market is in a very firm position. The pure in ton lots is quoted at $17.80 per 100 pounds, and in less than tons, $18.15; pure Elephant in ton lots is quoted at $18.30, and in less than tons, $18.65.

Linseed Oil Holds; Turps Unchanged

London.

LINSEED OIL, TURPENTINE. — There has been no change made in linseed oil during the week, although the flax seed market shows some variation. Supplies of oil here are very fair and the trade as a whole is being taken care of quite satisfactorily. Turpentine is also ruling on an unchanged basis. Supplies are none too plentiful but requirements of the trade are being met. Quotations on both lines are given as follows: Linseed oil, 1 to 2 bbls, raw, $2.10 gal., boiled $2.13; 3 to 5 bbls, raw $2.09 gal., boiled $2.12; 6 to 9 bbls., raw $2.07 gal., boiled $2.10. Less bbls. add 10c gallon. Turpentine, 1 bbl. lots $1 per Imp. gal; 2 to 4 gal. lots 99c per Imp. gal.; 5 gal. lots $1.10 per Imp. gallon.

Sharp Advance in Flashlights and Batteries

London.

FLASHLIGHTS, BATTERIES—New list prices have become effective on Eveready Daylos and Franco flashlights and batteries. These provide for very substantial advances, the cases going up about 50 per cent. and the batteries a good 25 per cent. Increased cost of materials combined with their scarcity and the shortage of labor have proved factors influencing this move. The new list on the Daylo batteries which is subject to a trade discount of 33 1-3 per cent. follows: No. 700, 50c each; 750, 50c; 751, 55c; 703, 55c; 791, 50c; 790, 50c; 705, 75c; 792, 50c.

WINNIPEG MARKETS

WINNIPEG, September 26.—This week's price changes are again numerous and with two exceptions are all on the upward trend. Many of the staple lines are included among which are white lead, cotton rope, sash card, clothes lines, lamp wick, kraft wrapping paper, Columbia batteries, rod couplings, fusible plugs, Air-O-Lite lamps, putty and galvanized sheets. Half soles and solder are two lines which register declines.

Business for the week is reported to be brisk, as fall and winter lines are being shipped, such as stoves, stove boards, coal hods, etc.

Sash Cord, Cotton Rope, Etc., All Up

Winnipeg.

SASH CORD, COTTON ROPE, ETC.—As predicted in last week's issue of HARDWARE AND METAL, new prices have been announced on numerous lines of manufactured cotton goods. These include such lines as sash cord, cotton rope, lamp wick and clothes lines, all of which move up approximately 5 per cent. To-day's selling prices are as follows:

Cotton Rope—3-16 inch, 72c lb.; ¼ inch and larger, 71c lb.

Sash Cord, in Hanks or Coils—No. 6, 78c; No. 7, 77c; No. 8, 76c; No. 9, 76c; No. 10, 76c lb.

Clothes Lines—40 ft., $3.20; 48 ft., $3.85; 60 ft., $4.80 doz.

Lamp Wick, Flat—No. 0, 80c; No. A, $1.00; No. B, $1.50; No. D, $2.35 roll.

Rochester Lamp Wick—No. 1, 44c; No. 2, 62c; No. 3, $2.10 doz.

Flat Stove Wick—3 inch, 53c; 3½ inch, 62c; 4 inch, 73c; 4½ inch, 98c; 5 inch, $1.12 doz.

Rayo Lamp Wick—$1.40 doz.

Kraft Paper Up; Rod Couplings Too

Winnipeg.

KRAFT PAPER, ROD COUPLINGS.—New prices just received show a further advance in kraft wrapping paper. This moves up ¼c per pound, making to-day's selling price 11½c per pound.

Prices on pump rod couplings have shown a slight advance in price during the week, moving up from 38c to 40c pound, while reducing couplings are now quoted at .08½c each.

Decline Made in Half Soles

Winnipeg.

HALF SOLES.—During the week prices on half soles have shown a slight decline, this being due to a re-arrangement of sizes. New prices now in effect are given herewith on a few of the more familiar lines: No. 37½, $2.50; No. 122, $4.20; No. 123, $3.95; No. 126, $2.70 per dozen pairs.

Higher Levels on Dry Batteries

Winnipeg.

DRY BATTERIES.—Due to increased costs of chemicals and kindred products entering into the manufacture of dry batteries, prices have undergone a further revision and the Columbia line are now being quoted at the following prices:

Ignitor No. 6—	Less than 12..	$47.85	per 100
	Less than 50..	43.85	"
	Less than 125..	42.85	"
	Barrel lots	39.85	"
Ignitor No. 8—	Less than 12..	$119.00	per 100
	Less than 25..	106.40	"
	Less than 50..	103.40	"
	Barrel lots ...	98.40	"

Fusible Plugs Up 5 Per Cent.

Winnipeg.

FUSIBLE PLUGS.—Prices on fusible plugs, which have remained firm for the past few months, have undergone a further revision and move up approximately 5 per cent. This is said to be due to the high prices of brass entering into their manufacture. To-day's selling prices are given herewith:

Fusible Plugs, Standard—½ inch, 72c; ¾ inch, 90c; 1 inch, $1.20; 1¼ inch, $1.80; 1½ inch, $2.40 each.

Fusible Plugs, Extra Long—½ inch, $1.45; ¾ inch, $1.80; 1 inch, $2.40; 1¼ inch, $3.60; 1½ inch, $4.80 each.

Linseed Oil Firm; Turpentine Same

Winnipeg.

LINSEED OIL, TURPENTINE.—Linseed oil prices still hold firm on the local market at $2.20 gallon for raw and $2.23 gallon for boiled, while shipments are reported as normal.

No change is recorded during the week on turpentine. Prices are holding very firm as stocks are only fair, and transportation difficulties make it hard to secure replacement. To-day's prices are herewith confirmed: barrels, $1.10 gal.; ½ barrels, $1.13 gal.; 5 gal. lots, $1.15 gal.; 1 gal. lots, $1.15 gal., plus the usual extras for containers.

Galvanized Sheets Moving Higher

Winnipeg.

GALVANIZED SHEETS. — With stocks of galvanized sheets reported as very low and the difficulty of replenishing same due to embargoes, prices have been forced up from 10 to 50c per 100 pounds. Even higher prices would not come as any great surprise should present conditions continue. To-day's prices are given herewith:

Galvanized Sheets: Apollo or Premier—10¾ oz., $12; 28 ga., $11.50; 26 ga., $11.20; 24 ga., $11.05; 22 ga., $11.05; 20 ga., $10.90; 18 ga., $10.90; 16 ga., $10.75 per 100 pounds.

Gasoline Lamps Up Fifty Cents

Winnipeg.

GASOLINE LAMPS.—New prices have been established by the manufacturers of Air-O Lite gasoline lamps, due to the ever increasing costs of raw material and labor. New prices show an advance of 50c each over former quotations, making to-day's selling prices as follows: No. AQ 307, $8.50; No. A 307, $8.50; No. A 317, $9.50; No. A 318, $9.50; No. A 322, $8.00 each. Air-O Lite lanterns No. QL 327, $8.00 each.

Stiff Advance Made in Putty

Winnipeg.

PUTTY. — Prices on putty show a heavy advance during the week, moving up approximately 25 per cent. The demand is reported good and stocks sufficient for all requirements. To-day's prices are as follows: 100 lb. drums, $7.20 100 lbs.; 25 lb. drums, $7.80; 5 lb. tins, $9.20; 1½ lb. tins, 14½c each.

White Lead in Oil Up Fifteen Cents

Winnipeg.

WHITE LEAD IN OIL.—Market prices on white lead again show a slight upward trend, due to revision in freight tariffs. New prices just issued are 15c per 100 pounds over former quotations. To-day's selling prices are as follows:

Decorator's Pure—Ton lots, $18.40; less $18.75 per 100 pounds. Decorator's Special—Ton lots, $17.40; less $17.75 per 100 pounds.

Solder Goes Down Five Cents

Winnipeg.

SOLDER.—Due to the recent decline in the market price of tin, prices on solder have shown a drop during the week of 5c per pound. This is now quoted by the jobbers as follows. Standard half and half, full case, 64c per pound; less than case 65; strictly half and half, less than cases, 66c.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Sept. 26.—Military tactics certainly change rapidly. It is only a few weeks ago that a light demand for barb wire was noted, because the Allied forces were advancing. Now there is a tremendous demand for barb wire, and it does not mean that the forces expect to stop advancing. Apparently it is considered better to hold gained ground with wire than with men. Heavy orders for barb wire have been placed in the past few weeks, over 50,000 tons, and 150,000 tons or more is immediately on the boards. The size of individual orders, however, is not indicative, as the time element in delivery enters. It is more illuminating to note that the barb wire making capacity, running the usual single turn, is about 50,000 tons a month and the authorities are considering the making of arrangements whereby some of the barb wire departments will run a night turn

Continued on page 66.

WEEKLY PAINT MARKETS

Service Will Boost Your Paint Sales

No Section of Hardware Store Offers Better Opportunities For Making Satisfied Customers—Know All About Your Goods and Help Buyers Make Selection That Will Give Them First-class Results

NO department in the hardware store offers more opportunities for real service to the customer than the paint section. Working on this basis and seeing to it that every one connected with the selling of paint is imbued with the same idea many a hardware retailer all over Canada has watched with pride his paint department steadily expand. Service is the corner stone on which most successful businesses are built. People now, perhaps as never before, want to do business with store keepers who can put them in touch with what they want quickly and can talk intelligently about the goods they handle. Retailers have realized this and in many of the most successful stores in the Dominion instruction is given regularly with a view of helping all clerks to attain maximum efficiency in selling.

ONE DEALER'S OBJECTIVE

"I want to sell satisfaction as well as paint" said one of the most successful paint dealers in Ontario to HARDWARE AND METAL. "When a farmer drives in twenty miles to talk over what kind of paint he had better buy for the work he is planning we do more than hand him a color card and ask him to pick out what color he likes. Paint that will make a good job for him on interior floor work would not give him satisfaction if he put it on the porch. The farmer does not know this so we take pains to find out just what he is planning to do and then explain to him why certain paints we suggest will give him the best results and make a better job all round. We give him a little talk about the good results that follow a little sand papering and make sure that he gets the right brushes. Times have changed and we find that our customers appreciate our efforts to help them. They tell one another and when they produce a real bang up job after following our instructions they not only want to do more painting but they bring in other customers to whom we can render the same service."

KNOW YOUR BUSINESS

It will pay you well, Mr. Dealer, to know all about what each kind of paint you handle will do. Unless you do this you are not giving the paint, the paint manufacturer, your own paint department or your customers a fair deal. You are inviting trouble by either neglecting to tell some prospective and puzzled buyer who is looking for just the right thing that you have the very article that will give him the best results or else by handing out a paint that is not intended for the work for which you are selling it and will not produce satisfactory results. There is no surer way to kill business than to hand out goods that will produce indifferent or unsatisfactory finishes, especially in the paint trade. On the other hand there is no surer way of laying the foundation for a permanent and steadily expanding trade than to have your customers know that they can depend absolutely upon getting the results you tell them they will get.

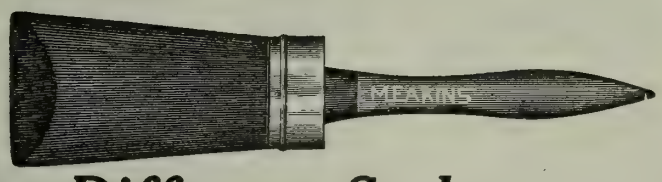
BOOST THE BUSINESS

When Mrs. Jones drops in for some house paint, don't neglect the very excellent chance you have of talking up any lines you have which she can use to advantage for other work in the house. Show her what she can do in a few minutes, by herself too, and without any hard work with a little can of paint that is suitable for touching up that old chair she was planning to discard. Ask her if she has a floor that is showing signs of wear and show her what she can do with a little of the floor paint you handle. Ten chances to one she will not only buy but she will complete a job that will be a source of the greatest satisfaction to her, save her money and encourage her to go on doing more work around the house.

Be prepared to give real service in your business and the effects on your business reputation, standing with your customers and on your profits too, will be a little more than gratifying.

Moore's *Will* Stand the Test—

Moore's paints, varnishes and house colors are made to stand the severe test of thirty below or one hundred and three above the zero point.



You can recommend Moore's paints, varnishes and the famous Muresco and feel sure that you are making a good friend of your customer.

One hundred per cent. efficient under every condition common to Canada.

WEEKLY PAINT DEPARTMENT

MONTREAL

MONTREAL, Sept. 26.—The paint manufacturers are more or less resting on their oars awaiting the annual meeting. Several modifications in manufacturing methods and standardizing of sizes are questions which will be disposed of. Individually the makers of paint are not condensing their output, but rather spreading such stocks as they have to their entire trade. Varnish markets are strong, raw supplies being scarcer.

Linseed Markets Firm Interest in New Crop

Montreal.

LINSEED OIL.—Seed crushers are much interested in the forthcoming crop yield. Reports are somewhat varying as to the yield of seed in Western Canada, some of them being quite favorable and others not so encouraging. Quotations as for last week still obtain here, supplies being light and trading limited.

Linseed Oil—	Raw Imp. gal.	Boiled Imp gal.
1 to 4 barrels	$2 00-$2 10	$2 02½-$2 13

Light Trading For Turpentine

Montreal.

TURPPENTINE.—Dealers are watching the south particularly at this season, as it is a safe indication what trend the market will take. They are not taking any new business, and only supplying old customers with enough to keep them going. Prices remain the same as last week, and until there is more offering from the sources of supply there will be little or no change.

Turpentine.	Per Imp. Ga.	
1 to 4 barrels	0 94	1 00
5 barrels and over	....	....
Small lots	1 01	1 06

(Packages extra)

White Lead in Oil Trading Light

Montreal.

WHITE LEAD IN OIL.—The output is inadequate to meet the demands as heretofore indicated. All that is forthcoming is absorbed by standing orders, these being largely those of manufacturers. Five ton lots are quoted at for standard lead $17.00 per 100 pounds, ton lots $17.35 per 100, smaller quantities $17.85, an unchanged basis.

Paint May Advance For Next Season

Montreal.

MIXED PAINT.—Indications are that advances in price of mixed paint will be made at the present week's meeting. As to whether changes that may be decided upon will go into immediate effect, there is a diversity of opinion. A full report of the considerations and new schedules will appear as soon as announced.

Putty Prices Steady; In Fair Demand

Montreal.

PUTTY.—The recent advance in putty prices is expected to hold for some time. Demand seems to be steady at the new prices, which indicates that there is some considerable work being done.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Rosin Advanced Seventy-Five Cents

Montreal.

ROSIN.—Since last week further advances were made in the local rosin markets, totalling 75c per 280 pound barrel. This is in sympathy with the continued strong position at producing points and local importers state that they have been unable to maintain anything like ample stocks. Further advances may be looked for.

TORONTO

TORONTO, September 26.—Firm tendencies are noted in all the markets during the week. Linseed oil is steadily held and whereas the seed market shows lower levels light stocks of oil are a factor towards maintaining present basis of quotations. Turpentine is quiet and dull, stocks in jobbers' hands being comparatively light and importers experiencing difficulty in securing deliveries. Putty is in fair demand at new price levels and white lead in oil remains unchanged. Mixed paint is moving forward fairly well and trade generally is satisfactory.

Linseed Oil Holds Unchanged

Toronto.

LINSEED OIL.—The situation shows little change during the week. Supplies are by no means any too plentiful and this is a factor in upholding prices. The seed market shows a decline for the week of about 15c in the cash prices, but this is not an unusual condition at this time of year. Crop reports show decided variation and as yet are exerting no particular influence on quotations on the exchange. The feeling prevails, however, that flax seed will not be very much, if any, below present levels. Generally, however, the situation in oil is considered just a little easier, crushers and jobbers both sharing in a short breathing spell after a long, tense period of uncertainty. Prices range as follows:

Linseed Oil—	Raw Imp. gal.	Boiled Imp. gal.
1 to 2 barrels	$2 02-$2 10	$2 04½-$2 13

Add 10c per gallon in smaller quantities.

Turpentine Now Selling at $1.00

Toronto.

TURPENTINE.—Prices have attained a uniform level of $1.00 per gallon in 1 barrel lots, which represents an advance of 5c in some quarters. Supplies in some sources are still light, while others again report stocks now in very good shape. Altogether the trade is being taken care of, the demand at the present time being comparatively light. Markets in the south are dull and without feature. A further slight decline is recorded, but this has not proved a factor in quotations locally. Higher prices are expected to be ruling in another 30 days at primary points. Quotations locally now range as follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1 00
2 to 4 barrels (barrels included)	0 99
5 gallon lots	1 10

Putty Moving Fairly Well

Toronto.

PUTTY.—A very good sale of putty is reported and the trade requirements are being met from ample stocks. Prices show no change from following levels:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

Help Your Customers to Fix Up Their Cars for the Winter

EVERY year more and more auto owners drive their cars throughout the Winter. But they must make adequate provision for cold weather motoring, and one of the most necessary measures is to protect all exposed surfaces against the destructive action of snow, sleet and zero weather.

The top should be made weather-proof. A coat or two of B-H Leather Dressing or Mohair Top Dressing will do it. The cushions and leather trimmings should be treated in the same way, and the result will be not only a more weather-tight car, but one that will better resist the disintegrating influences of Winter.

Then, of course, the spokes, running gear and the body itself should be coated with B-H Auto Enamel, in a wide choice of attractive shades. Any amateur can apply it with pleasing results.

Put our handsome B-H Auto Enamel Display Card in your window. Show the B-H Auto Enamel store cards in your show-case, urging motorists to "Make your car look like new with B-H Auto Enamel." Place a few cans of it on your counter, and talk it up to your motoring customers. Every can you sell will be a good advertisement for you, and will help you make more sales.

NOTE:—B-H Auto Enamel is one of the products included in our Special Varnish Proposition. Write and ask us to explain how you can make more money by selling more B-H Varnishes and gaining our quantity rebates.

Sorting on Mixed Paints Very Good

Toronto.

MIXED PAINTS.—Sorting business on mixed paints is considered very good for this time of year and a review of the past season's activities shows remarkably good volume of business for the entire period. Spring prices are expected at an early date and until they are announced there is no tendency to accept booking business. That higher levels will rule seems the consensus of opinion.

Glass Rules With Firm Undertone

Toronto.

GLASS.—There is no mistaking the decidedly firm undertone to the market. Jobbers are selling some breaks at less than replacement values from the manufacturers and this condition cannot exist for very long. The demand is comparatively small and the prices shown in current market quotations are unchanged.

Brushes Hold At Firm Levels

Toronto.

BRUSHES.—There is no definite announcement forthcoming as yet on spring business and manufacturers show little disposition to commit themselves when conditions are so uncertain. Supplies are increasingly hard to secure and prices on all bristles are constantly on the increase. The outlook is hard to determine, but no recession from present values can be looked for.

PITTSBURGH MARKET LETTER

(Continued from page 61)

also, because 50,000 tons of barb wire a month does not seem to be sufficient. The wire makers seem to expect the demand to continue throughout the war, hence they have become concerned as to the large tonnages that will at some time or other be left unemployed. They have pointed out, therefore, that the painted barb wire commonly used in the military operations deteriorates rapidly and is not salable in large quantities for ordinary purposes. Hence they suggest that a larger proportion of the orders be for galvanized wire.

More Steel Conservation

Week by week the military operations call for more steel for direct use, this being a reflection of the aggressiveness of the Allied forces and the advances they are making. The increases are chiefly in shells and rails, although there are many other items. As the raw steel supply is only so much, there must be further curtailment in the consumption of steel for the less direct war purposes, and every finishing line in the steel industry that can possibly yield any steel for the direct purposes is being minutely studied. Illustrative of the fact that the War Industries Board is overlooking no tricks, however unimportant relatively, the tin can, apparently insignificant, continues to receive close attention. Our letter a week ago noted that the allotment of steel sheet bars to the tin plate mills, representing hitherto a full supply, had just been cut by 30 per cent. for the fourth quarter of the year, the occasion being the close of the canning season. It turns out that did not end the case. The conservation division of the War Industries Board has since been holding daily meetings, one line per day, with the packers of various non-perishable food products, for the purpose of arranging a curtailment in their tin plate consumption. It will be understood, of course, that at no time has any tin plate been allowed to go out except on Government orders and for food products. The expectation is that the absolute requirements in tin plate will be so curtailed that it will be possible to get along with the tin plate mills operating at still less than 70 per cent. of capacity. As noted in last report, it requires about a million two-pound cans to release the amount of steel needed to provide rails for one mile of track, so that it requires a great deal of industry on the part of the Conservation Division to enable General Pershing to lay more miles of track for the big guns that will be pointed at the Metz stronghold, and for other purposes. Incidentally, it may be mentioned that the American steel trade is quite thrilled by the idea that the advances in the Lorraine district are aimed at the territory whence the enemy obtains the great bulk of his steel.

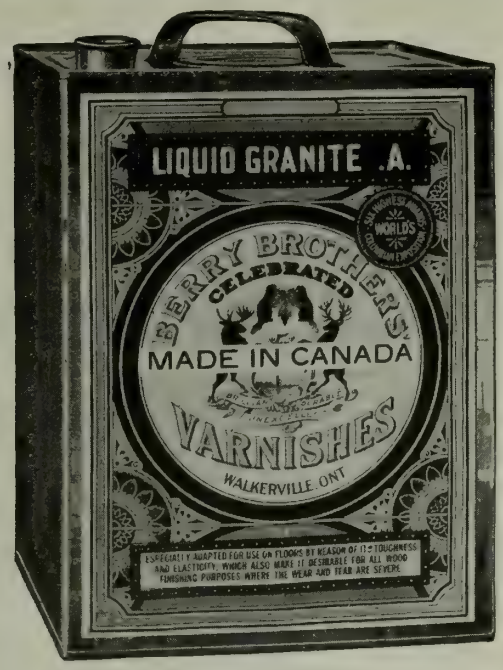
How About Pipe?

Conservation of steel in connection with tin plate is only one item. A meeting is scheduled for to-day with the pipe mills, to consider how much curtailment in the use of steel for pipe making can be effected without serious derangement to the supplies of pipe for direct war purposes for shipbuilding, and the most essential commercial operations. With the greatly increased barb wire demands there will be no further curtailment in wire manufacture as a whole, but some wire products may yield wire to be made into the barb variety. The merchant bar mills are being given further consideration.

For the time being at least there is to be no further curtailment in steel for sheet mills. The supply permitted an operation of about 57 per cent. of capacity in July and the August average was just a shade higher, while present operations are close to 60 per cent. Sheet requirements for war purposes have increased somewhat in the past few weeks and with a 60 per cent. sheet mill operation there will be less sheets for the preference industries, but more for direct war use.

The 33,000,000 Semisteel Shells

Foundrymen are making progress in their study of the semisteel shell program, referred to in last report, the Ordnance Department having announced that it requires 33,000,000 semisteel shells in the next ten months and that it expects the major portion to be made in this district. While a definite announcement was made, detailed in last report, as to the sizes of shells and the description, whether shrapnel or high explosive, it is now very definitely rumored that the department wants more gas shells than shrapnel or high explosive and it may be therefore that the total of semisteel shells will exceed the figures already given.



Local foundrymen do not expect to encounter much difficulty in making the shells to specifications, provided they are furnished the pig iron, and there's the rub. There has been no free pig iron in this district for months, all the output going on contracts involving the filling of war orders or on allocations either for the filling of war orders or for export. The proportion of foundry iron in the total make has been unprecedently small and this foundry iron has been going for the manufacture of mill and other machinery and quite essential requirements. A general committee for the country was delegated a fortnight ago to seek cases of foundries employing pig iron for purposes that could be dispensed with, but indications are it has found very little. A general meeting of pig iron manufacturers and the War Industries Board was held in Washington last Monday to discuss the problems of increasing production and allotment of foundry iron orders in connection with the semisteel shell orders that are to be placed. This was one of a series of meetings aimed chiefly at speeding up production, the pipe, plate and structural shape makers to be met in turn, one group each day.

Coke and Pig Iron

All the investigations thus far have pointed to the same conclusion, that the chief barrier to a heavier production of steel is the quality of coke that many furnaces are forced to use. There are other barriers, but this is regarded as the chief. Coke production in the United States in the last week reported upon was the largest on record, with but two exceptions, and the gain in production, compared with the rate in 1916, would, by proportion with the 1916 pig iron output, compass a pig iron output now at the rate of 44,000,000 tons per annum, whereas for several months past the rate has fluctuated within the limits of 40,000,000 and 41,000,000 tons. A comparison of the number and capacity of furnaces in blast, considering their past performances, also indicates that with similarly favorable conditions the rate of output now should be close to 44,000,000 tons a year. With more pig iron, more steel would be made. The Fuel Administration is increasing its inspection force as rapidly as possible, and purposes to penalize, in price, all coke that is not up to standard in quality. It appears that operators and miners are both in part responsible, some operators being less careful than usual, while miners are not careful to take out clean coal, and any refuse mined increases the ash in the coke and thereby reduces the daily output of the furnace using it.

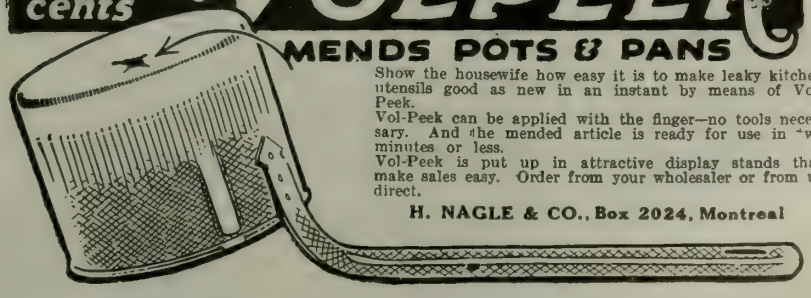
Quick Results

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word for first insertion, and one cent per word for subsequent insertions, with 5c additional for Box Number or Address.

VARNISH ECONOMY

Varnish buyers are realizing more and more that labor is the biggest item of cost in finishing operations, and that true economy suggests the use of Finishes of unquestionable quality in view of the present high cost of labor.

Liquid Granite Floor Varnish, Luxeberry Enamels (white ivory and three shades of gray), Luxeberry Wood Finishes and Luxeberry Wall Finishes are among the celebrated "Berry" products that produce a lasting finish and cost no more to apply than the kind that wears off in a few months.



The recognized quality and long wearing period of Berry Finishes makes them easy to sell.

"Jack Frost" *Can't* Play Havoc With Unprotected Plumbing

Where EMPIRE Non-Freezing Closets Are Installed!

Old King Winter will soon be playing havoc with unprotected plumbing—that is to say, in buildings where **"Jack Frost"** Anti - Freezing closets are not installed.

The secret of the Empire "Jack Frost" is that all parts are so arranged as to draw free from water, which prevents freezing.

It works automatically. Get in touch with us re prices in time for Fall trade.

Right Now—These Are Splendid Opportunities For Every Stephens' Representative Wherever He May Be!

Here are three Stephen lines that are in demand at this season of the year, and are given preference over every other line on the Western market.

Stephens' Paints are easily applied, cover much surface, and are remarkable in their wearing qualities.

You'll find them used by shrewd consumers and sold by wise dealers everywhere throughout the West.

Trojan Roller Bearings for Ford and Chevrolet Cars

Trojan Roller Bearings were designed to provide high grade and easy-running bearings for the front wheels of the Ford and Chevrolet 490 cars. They eliminate all the trouble in steering as they hold the wheels rigidly in line and parallel.

They Save Wear and Tear on the Tires

Made of high grade material, they will sustain a load many times greater than the old bearings.

No machine work necessary. Changed in 30 minutes. No fear of breakdown.

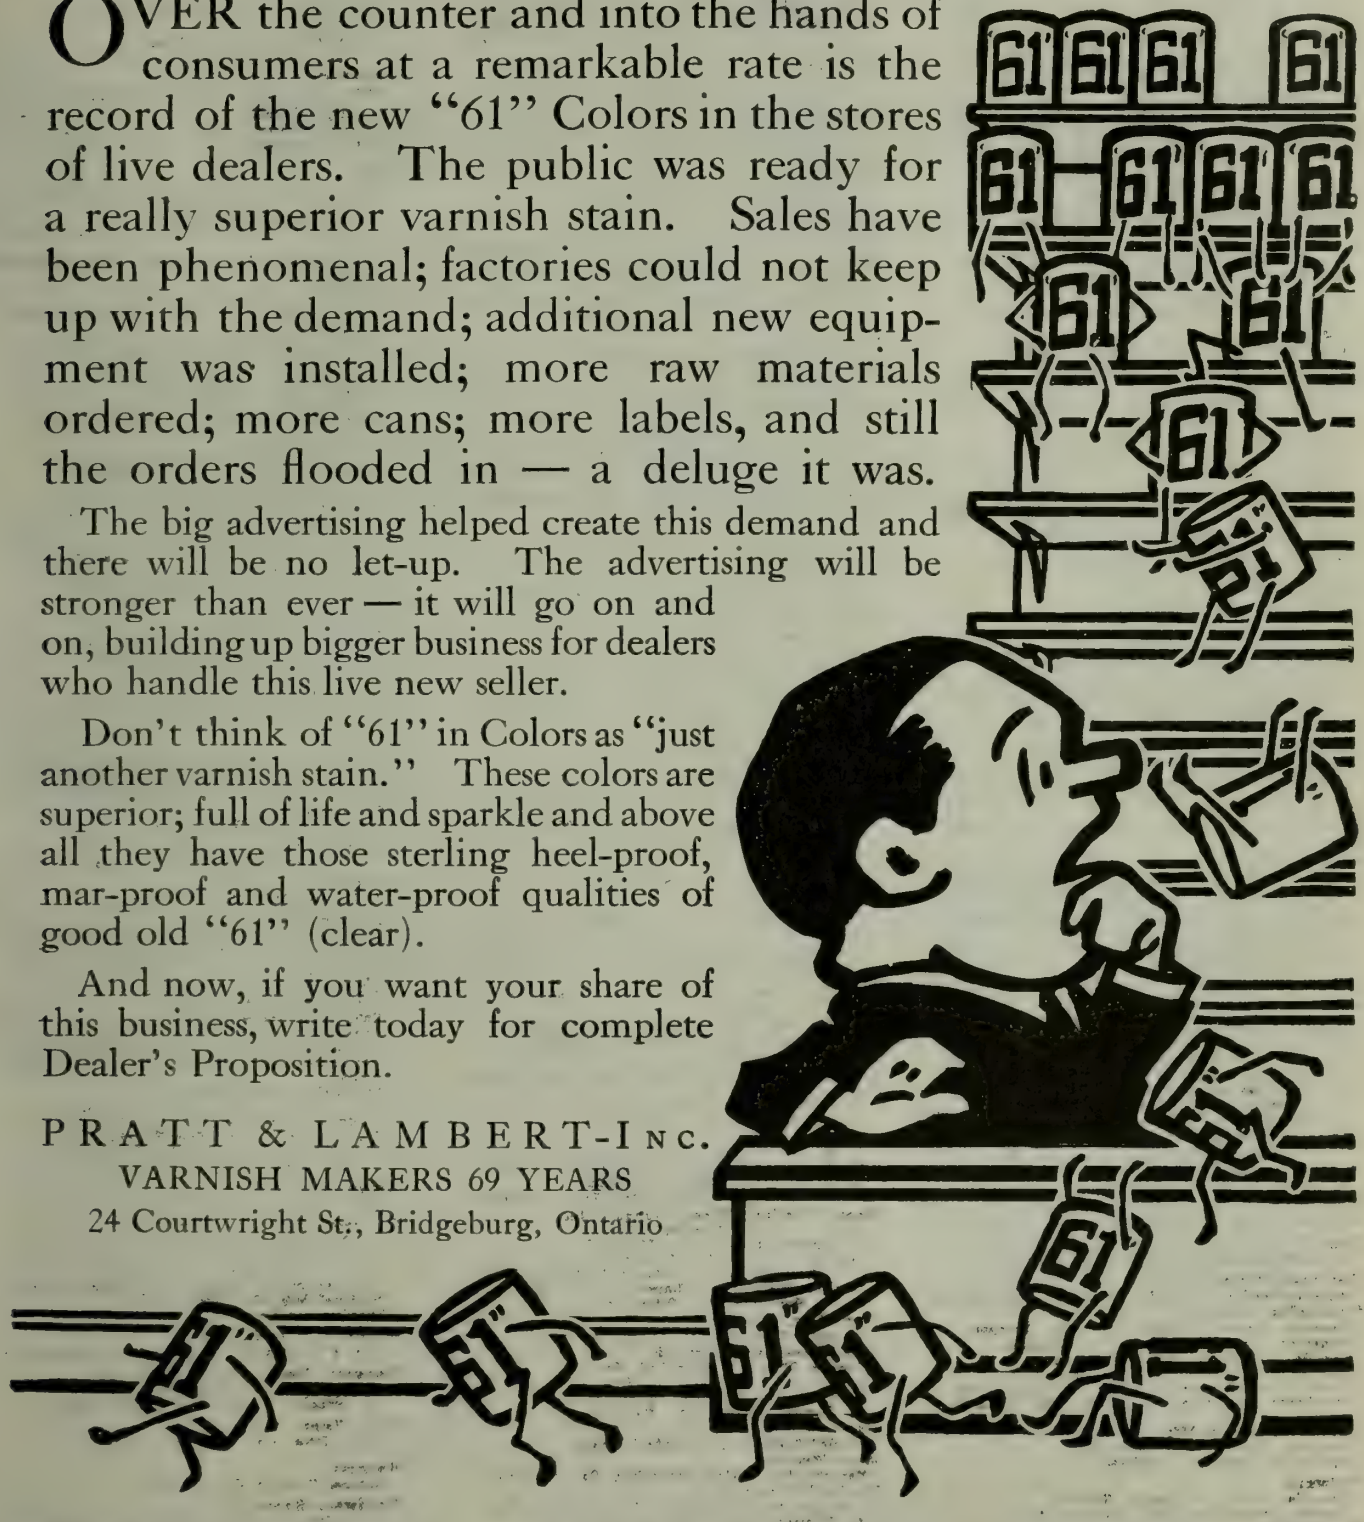
"Over the Counter"



OVER the counter and into the hands of consumers at a remarkable rate is the record of the new "61" Colors in the stores of live dealers. The public was ready for a really superior varnish stain. Sales have been phenomenal; factories could not keep up with the demand; additional new equipment was installed; more raw materials ordered; more cans; more labels, and still the orders flooded in — a deluge it was.

The big advertising helped create this demand and there will be no let-up. The advertising will be stronger than ever — it will go on and on, building up bigger business for dealers who handle this live new seller.

Don't think of "61" in Colors as "just another varnish stain." These colors are superior; full of life and sparkle and above all they have those sterling heel-proof, mar-proof and water-proof qualities of good old "61" (clear).

And now, if you want your share of this business, write today for complete Dealer's Proposition.

PRATT & LAMBERT-INC.
VARNISH MAKERS 69 YEARS
24 Courtwright St., Bridgeburg, Ontario

"61" FLOOR VARNISH
for Floors, Furniture and all Woodwork
Now made in Eight Colors

Many Painters Insist on Using

Dougall Varnish

Experience has taught them that it is the easiest to use—looks best and lasts longest and that it is by far the most economical varnish obtainable.

Put in a Stock of Dougall Varnish

You can then be certain of selling to your customers varnish which will be good value and which will give entire satistion.

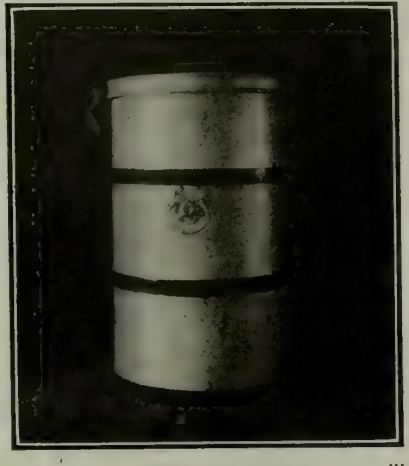
Write for Dealer Proposition—it's a good one.

The Dougall Varnish Co., Ltd., Montreal

QUALITY DOUGALL VARNISHES FIRST

President Wilson Says---

I am going to make an offer that every auto accessory man will want to take advantage of.



I'll supply him with auto parts and accessories at a positive saving of from five to seven per cent.

My Special Direct-by-Mail selling plan is the reason for this remarkable offer.

Send for my new Fall and Winter Bulletin. It contains hundreds of standard lines, including everything that is worth while in the Accessory Trade.

Wilson Auto Specialties
Company
C. E. WILSON, President
HAMILTON CANADA

Reed's Sanitary Garbage and Ash Cans

STYLE "A"

A large Galvanized Steel Can for use where large quantities of garbage accumulate.

18 inches diameter, 30 inches high, reinforced with top, bottom and two intermediate bands. Bottom set up to clear ground, milk can handles.

When writing ask about the famous Economy Ash Sifter. Saves Coal!

MADE IN CANADA

BUFFALO OILS

These are a few of our most staple lines, so well and favorably known throughout Western Canada, and are sold only through reliable merchants.

Special Cylinder Oil for Steam Engines

Harness Oil. Neatsfoot Oil

A Gas Engine Oil (for gasoline engines).

Tractorlene Oil (for oil burning engines).

Ideal Thresher's Machines Oil (for general use).

Automobile Oil and Transmission Greases.

PRAIRIE CITY OIL COMPANY, LIMITED, WINNIPEG

Needed in the Stable

The man in the stable wants brushes that will hold the bristles, brushes that will fetch out the dirt.

"KEYSTONE" BRUSHES

Are the ones you can conscientiously recommend. Your customers will come back for more of the same kind. Every brush that is needed in the stable will be found in our line.

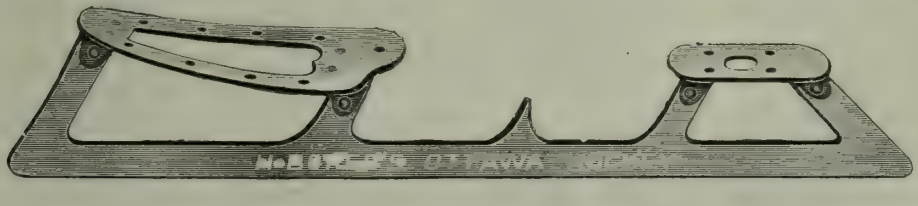
Write for prices, etc.

STEVENS-HEPNER CO., Ltd.

Port Elgin, Ontario

Get prices and information about the "Nugget" Broom and the rest of the famous Keystone Brand Brooms and Brushes.

"TALLMAN'S SPECIAL" ARCTIC METAL



a medium priced babbitt specially adapted for Saw Mill and Woodworking machinery.

Will remain cool under exceptionally high speed.

Its long life proves its efficiency.

Tallman Brass & Metal Limited

HAMILTON, ONT.

"Get a skate on, we can fit you in price, style and size."

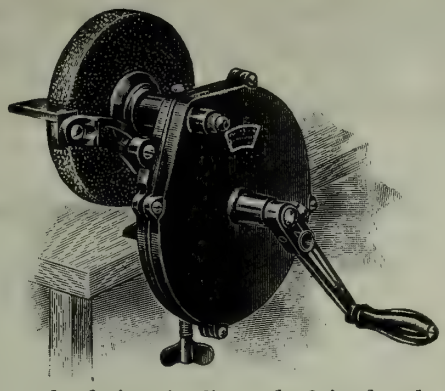
Consult Hardware and Metal Buyers' Guide

If what you want isn't advertised in this issue, consult our Buyers' Directory. If it isn't listed in our Directory, write us and we will give you the information.

Pyrene
KILLS FIRE
SAVES LIFE

Every Dealer in Canada



is asked daily for this wonderful little fire fighter.

It is being advertised, that every home, auto, factory etc., will want, and get one. You will be asked for it to-morrow. . . stock it to-day.

Your nearest jobber can supply you or write for literature.

Pyrene Mfg. Co., Ltd.
3 St. Nicholas St.
MONTREAL

WHEN WRITING TO ADVERTISERS KINDLY MENTION THIS PAPER

GRINDERS

The Mehasco Line—well and favorably known throughout the West. Stocked in 4, 5, 6 and 7-inch fine carborundum wheels, spiral steel cut gears completely enclosed and entirely noiseless; working parts run in a bath of oil, no wear and tear. **The Champion** is a cheaper line, but exceptional value. It is stocked in 4, 5 and 6-inch wheels.

MEHASCO

ANOTHER MEHASCO MESSAGE
13

The **No. 6 Tilting Grinder** runs in oil and on ball bearings, is offset from the handle, and is easily adjusted to any position without the use of set screws. The **No. 5 Sickle Grinder** has the gears completely enclosed, and is furnished with two grinding wheels, one for grinding sickles, and the other general purpose farm work. We also have the **No. 60 Power Grinder,** driven by belt. We have a special proposition of a display stand with a one-dozen assortment. Write us for information.

Electrical

The "1900" Cataract Electric Washer

The Washers the Women Want

The articles that are in demand are the profitable ones, from the Hardware Man's standpoint. Those that are hard to sell—the unknown ones—prove less lucrative in the long run.

It's Profits That You Want

and you can get them from "1900" Washers.

For more than twenty years we have been making and selling nothing but washing machines—the very best that can be made. Our whole attention has been centred on "1900" Washers, on perfecting and developing new models.

With the addition of our two newest and greatest models, the "1900" line is complete.

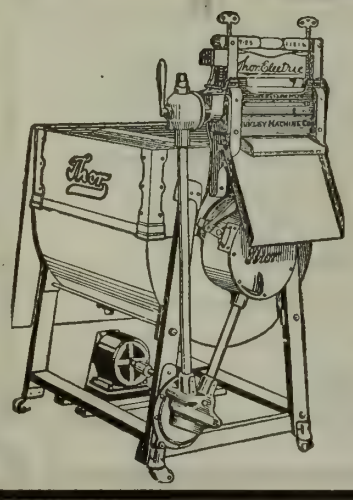
The "1900" Cataract Electric Washer

These most modern washers, as well as the other "1900" machines—the Gravity, Water Power and Gasoline Motor Washers—are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from

The "1900" Agitator Electric Washer

his advertising and these inquiries are turned over to such "1900" dealers as have proven their worth in their different territories.

If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the Wholesale Department.



THE "1900" WASHER COMPANY

357 Yonge Street - - Toronto

The "1900" Agitator Electric Washer.

Thor

Wartime Duties

Even now the plants which manufacture the materials for war are calling for more women—men alone cannot meet the demand for labor.

The patriotic housewife will do her own housework and she will insist upon efficient tools to lessen the drudgery.

Thor Washers, Ironer, Vacuum Cleaners give the answer. People simply must have them—and it is your duty to supply them. Start now—increase your stock—the business is yours.

The Laco Lamp Store is the Brightest in Town

LACO LAMPS will make *you* money because they will save your customers money. Show them the results. Demonstrate. Put in a Laco display and watch the pulling power of Laco Lamps. We are letting the people know their superior features through our nation-wide advertising. Take advantage of this business by announcing to your customers that you handle Laco Lamps. Your sales will be easy.

LACO LAMPS

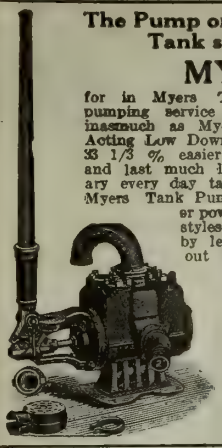
Be a "Lighting Specialist"

HAVE the consumer consult you as to the proper lighting for houses, etc. You can do it with the co-operation of our experienced men. Laco Lamps offer the dealer a splendid opportunity because of their undoubted superiority.

The Laco Nitro Lamp

THE "Big Brother" of Laco Tungsten---for larger buildings, includes sizes from 60 to 1000 watts. It is the accepted lamp for store, factory and warehouse use, and you can make "big business" by going after this class of trade.

Laco Lamps, with their Guaranteed Life of 1500 Hours, are the Best Line for Both Buyer and Seller



WITH the complete Laco range of stock---with Laco talking points---with Laco continuous advertising, and the interesting pamphlets and show cards we will cheerfully furnish---you can easily corral the lamp trade of your district.

The MacLean Business and Class Publications in Canada

TO SELL or buy from Canada such lines as machinery, hardware, food products, dry goods, books and stationery, paper, printing machinery and supplies and general merchandise of almost every description, raw or manufactured, use or consult the MacLean Business and Class Publications, as per list below. For special information, write the publishers. Concerning the quality of the MacLean publications, let this copy of HARDWARE AND METAL which you hold in your hands speak for all. The MacLean list of 14 publications is as follows:—

THE CANADIAN GROCER (Est. 1886)
HARDWARE AND METAL (Est. 1889)
DRY GOODS REVIEW (Est. 1889)
MEN'S WEAR REVIEW (Est. 1898)
CANADIAN MACHINERY (Est. 1905)
THE POWER HOUSE (Est. 1907)
BOOKSELLER AND STATIONER (Est. 1884)
THE SANITARY ENGINEER (Est. 1907)
MARINE ENGINEERING OF CANADA (Est. 1910)
CANADIAN FOUNDRYMAN (Est. 1909)
PRINTER AND PUBLISHER (Est. 1892)
THE FINANCIAL POST (Est. 1907)
MACLEAN'S MAGAZINE (Est. 1896)
THE FARMER'S MAGAZINE (Est. 1910)

This fact may interest you: namely, the MacLean organization is the largest concern of its kind in the British Empire. The output of its mechanical department every working day is the equivalent of a 112-page publication of the size and type of this copy of HARDWARE AND METAL.

Our London Office, 88 Fleet Street, E.C.

Also at: NEW YORK, BOSTON, CHICAGO, MONTREAL, WINNIPEG

For over 20 years the MacLean Publishing Company has maintained a fully-staffed London office, and has rendered British and Continental manufacturers, shippers, and traders an invaluable service in many directions.

Specimen copies of the MacLean publications will be cheerfully forwarded to all asking for them. Address us at London or Toronto.

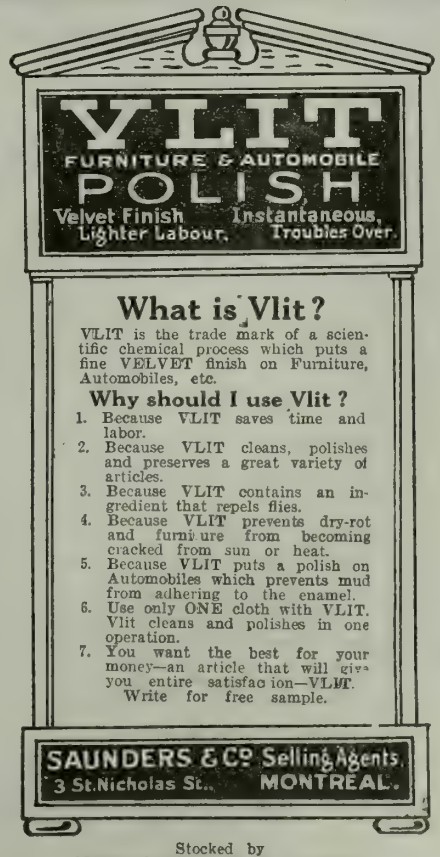
Here Is Your Way to Profits in the Trapping Season!!

New Humane Collapsible Animal Trap is Superior to Any Other Trap

This is the only collapsible animal trap on this continent. Retails at $1.50

Its method of construction is very simple, and easy to set—far less trouble is experienced than in the spring trap.

It is a surer catch than the spring trap, and in no way injures the fur.



It is freeze-proof and rust-proof—weighs only 1½ pounds, and can be carried in an overcoat pocket with ease.

Note: In this company every man is a returned fighter.

Do You Want Export Business?

ADVERTISERS in the "Export Numbers" not only reach every worth-while hardware buyer in Canada, but also reach a select list of 1,200 buyers in foreign lands. The next "Export Number" will be issued Nov. 2. Last forms close Oct. 26. Copy and cuts for the export section this issue should be sent in without delay. Regular advertisers may use space pro rata on contract. Rates same as in ordinary issues. Two pages, $80; one page, $45; half page, $25. Extra color if desired, $15 page.

It would cost you many thousands of dollars and take years for a representative to call on the 1,200 foreign buyers who receive the "Export Numbers" of HARDWARE AND METAL. For the modest rates given above, you can reach these buyers simultaneously.

Write for evidence of direct results secured by advertisers in these numbers.

Number 2

Wright Trawling Spoon Baits are superior in every respect, run very smoothly, have less resistance and least friction of any bait made.

Manufactured in two sizes, 5½ and 6-inch blades. Each design made in two lengths mentioned, and are of best hard spring brass plate and wire. Hooks and swivels made of very best material. Entire bait is brass except hook. Baits are beautifully constructed, which photographs show, are nickel-plated on both sides and highly polished.

DESIGN No. 2 is a similarly constructed bait, except that it has no lead sinker attached. A slot is cut in centre of blade allowing the spindle to pass through the blade, thereby allowing the blade to revolve more centrally. It is a very attractive bait.

No. 25½" .....Blade 5½"
No. 26 .....Blade 6"

Dealers' Price .....$7.00 per dozen
Sell .....$1.15 each

DESIGN No. 3 is made along the most familiar lines. It is plainly constructed, the spindle passing along the side of the blade. It is very neatly made and also very attractive.

No. 35½ .....Blade 5½"
No. 36 .....Blade 6"

Dealers' Price .....$6.50 per dozen
Sell .....$1.00 each

Number 3

Thoroughly tested and pronounced to be best bait on the market. Specially adapted for heavy game fish.

A look at and a trial will convince you that they are all that is said of them.

DESIRED BY RESPONSIBLE FIRM HAVING representatives calling regularly on the hardware trade, fence dealers, and kindred trades in Eastern Ontario and Quebec, sale or exclusive agency for some staple line which might interest any of above trades. Communicate with P.O. Box 1842, Montreal.

MANUFACTURING AGENCIES WANTED FOR builders' hardware, cutlery, tools, auto accessories etc. Could carry a stock. For further information write Box 90, Hardware and Metal.

AGENCY WANTED FOR QUEBEC. SALARY or commission. First-class references. Write A. S., 154 Desfranciscains, Quebec.

FOR SALE

HARDWARE BUSINESS IN PORT DOVER. Stock and fixtures about $4,500. Reason for selling, ill health. J. G. James, Port Dover, Ont.

HARDWARE IN ONE OF BEST SMALL towns in Saskatchewan, in splendid district that has never known a crop failure. Stock, fixtures and property, $15,000; turnover, $30,000 annually. No better buy in Canada. Half cash, balance easy, or will take choice half section improved land at good value, with or without stock and implements and balance cash. Box 98, Hardware and Metal.

A SPLENDID OPPORTUNITY TO BUY PROperty, store and hardware stock, 1¼ acres of land; house in connection; store lighted by gasoline; good barns and sheds; location main road; splendid locality for garage. This business promises splendid opportunities. Good reasons for selling; help short. Established 25 years, Box 94, Bailieboro, Ont.

FOR SALE—HARDWARE AND FURNITURE business in the best district in the West. Stock about $5,000, fixtures $500. Building can be bought or rented. Owner must sell. Very little cash will handle this. Box 92, Hardware and Metal.

READY FOR SHIPMENT, 2,000 WELL-FINished children's sleds, assorted sizes, offered in lots 200 and over. Prices low. Write Box 98, Hardware and Metal, 128 Bleury St., Montreal.

HARDWARE—AN OLD ESTABLISHED HARDware, stove and house furnishing business, in a good Western Ontario town, and a fine farming district. Box 767, Hardware and Metal.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

MISCELLANEOUS

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada. (tf)

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensome hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis Fensome Elevator Co., Toronto.

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

STOVE REPAIRS FOR GARLANDS, PEN Esthers, Acmes, Sunlights, Silver Kings, Souvenirs, Welcomes, Crown Hurons, Peninsulars, Jewels, Pandoras, Favorites, Imperial Oxfords, and all kinds of Ranges and Heaters. Write for list and prices. Grundy Bros., Strathroy.

The Cost of Selling

SCARCELY necessary, is it? to protest that you must spend some money, much or little, to keep yourself and your merchandise known to your customers and should-be customers.

This you admit, but—DO YOU FOLLOW CLOSE UP THE LEAD OF YOUR CONVICTION?

Are you spending the money?

Let's look at the cost of close up work in

The FARMER'S MAGAZINE

A half-page 12 times will cost you $367.20 ($30.60 per insertion). A full page, $714.00 ($59.60 per insertion).

Not a heavy annual cost to canvass the choicest class of farmers in this country—farm homes of greatest prosperity, progressiveness and capacity.

But—are you keeping a salesman always on the job?

You should—and can, at so low a price.

Write in about it.

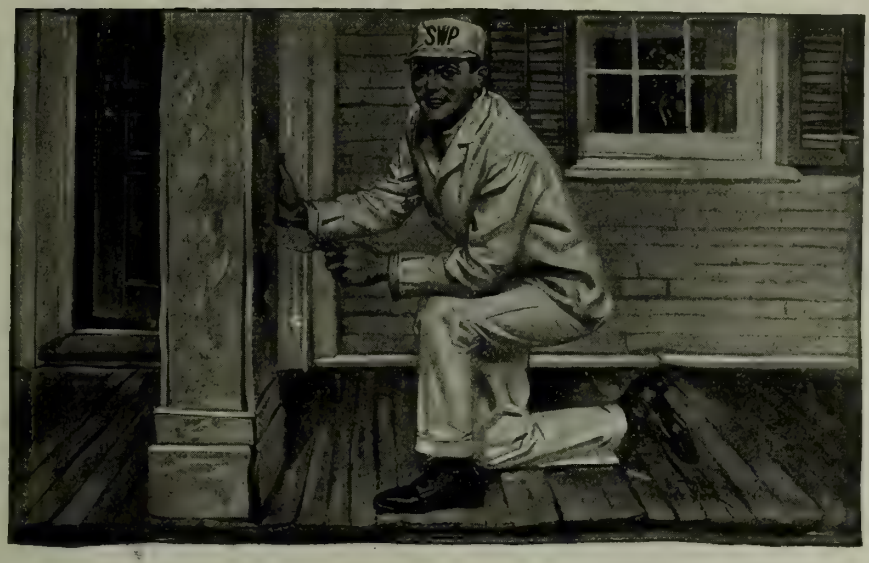
Hardware Merchant's Influence

¶The local hardware merchant exerts a great influence throughout the district in which his store is located. The majority of hardware merchants have been established for many years; they are reputable merchants who have built up their businesses on sound business principles and who have endeavored in every possible way to give the best possible service to their customers and supply them with goods which will give satisfaction.

¶Is it any wonder, therefore, that when customers visit the store of a well-known and long-established hardware merchant, they consider him an authority on lines which he is selling and will usually follow out his recommendation regarding the lines which they wish to buy. Actual investigations have proven that in the majority of cases customers place absolute confidence in the recommendation of their local dealer.

¶The chief problem, therefore, confronting the manufacturer who wishes to distribute products to the hardware trade or to introduce new lines, whether direct or through wholesalers, is to sell the hardware merchant and his sales staff. When you sell the hardware merchant and his salesmen on your line, you can rest assured that you have then gained the co-operation of the strongest retail selling force in the Dominion.



¶Practically every worth-while buyer and seller of hardware in Canada can be reached through the advertising pages of HARDWARE AND METAL. The keenest hardware buyers in Canada are the closest readers of the advertising pages in HARDWARE AND METAL, because it pays them.

Fall Business

is

GOOD BUSINESS

Your Painters Want S W P

Your Customers Want S W P

Cash In On S W P Sales

TAKE advantage of the extensive advertising campaign which we are running this fall, creating a big demand for S.W. Products.

Here is a big opportunity to increase your sales and profits. Order your paint requirements, so that you will have the goods in stock when your customers call. Delay means loss of sales, customers and profits.

High Speed Bench Grinder

The Goodell-Pratt High Speed Bench Grinder No. 485 will stand a most critical structural or practical comparison. It is a speedy, powerful, compact, serviceable machine of great durability that will enable the user to sharpen edge tools with a surprising degree of smoothness and ease.

A series of completed enclosed gears, which are packed in grease for proper lubrication and smooth running, revolve the high grade 5 x 1 inch abrasive wheel 22 times to each turn of the crank.

An exceptionally good tool for the home workshop, garage or tool kit.

RICE LEWIS & SON LIMITED TORONTO HARDWARE ESTD 1847

Household Goods

—feature them this month, everything from "Pyrex" ware to housecleaning requisites

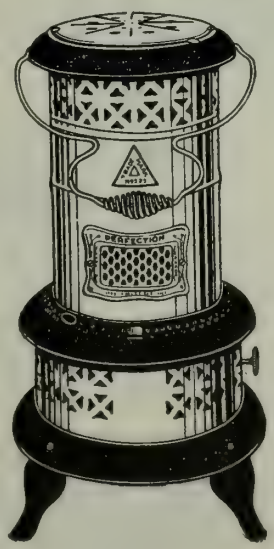
With the many home changes during the month of October come requirements which must be met on short notice by the householder.

Thanksgiving, too, brings demands, especially in table and cooking ware.

Be ready to meet the needs of your patrons. The following are a few suggestions:

"Pyrex" TRANSPARENT Ovenware

No kitchen equipment is complete without at least a few pieces of "Pyrex" ovenware — glass utensils which stand the heat of baking (guaranteed). "Pyrex" helps save food, bakes quicker than other wares, does not burn food, keeps hot for a long time, lessens drudgery of dish-washing, lends beauty to the table, is practical in the kitchen.



"Pyrex" is a big seller—well advertised.

Send a trial order for best selling lines.

Fall CLEANING TIME Requisites

Changes made necessary by moving always calls for a great many odds and ends in house-cleaning lines—temporary heating appliances, such as electric and oil heaters, cleaning utensils, mops, dusters, carpet sweepers, vacuum cleaners, polishes, disinfectants, etc. How are your stocks?

Don't wait for the Rice Lewis & Son traveller. Mail your order.

Perfection OIL Heaters

The shortage of coal has no terror for the family who have a "Perfection" Oil Heater or two ready for immediate action. There is no shortage of kerosene oil, and it is always easily obtained, so that the "Perfection" need never be without fuel and the home without heat. We have anticipated a big demand and can supply the dealer on short notice. Don't let your stock get low. **Reorder to-day.** New list prices in effect:

No. 520—$7.25	No. 530—$ 8.25
No. 525—$7.00	No. 630—$10.25

Hotpoint ELECTRIC Appliances

Trim up your front showcase and window with a good showing of Hotpoint Electric Appliances. It may be early for Christmas suggestions, but the power of suggestion is strong, besides electric appliances are of every-day use in the average home to-day. Keep them to the front.

Push "Samuels'" Canada Ash Sifter for the next few weeks.

National No. 806

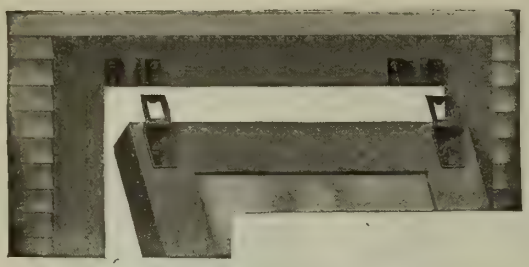
Garage Door Set

The Sign of a National—

Note the neat, clean appearance from the outside. No structural iron work is visible, track and hanger being on the inside. Note also how the one door opens without disturbing the others, thus giving free access to the garage without necessitating opening of all doors.

These are two of the features which recommend this set to builders and motorists.

This set opens the doors inwards, preventing any trouble from ice and snow. Its action is easy and certain, without friction or binding. The Hanger operates on a swivel, which permits the wheels to follow the track without sticking. A gentle push opens the doors; a slight pull closes them.



Set No. 806 *includes*: *No.* 27 *Latch,* 1 *Swivel Hanger,* 6-*foot Braced Rail,* 4½ *pair* 4 *x* 4-*inch Jap. No.* 505 *T. P. Butts,* 1 *No.* 820 *Chain Bolt,* 1 *No.* 830 *Foot Bolt,* 1 *No.* 5 *Pull,* 1 *No.* 30 *Safety Hasp* (4½-*inch*), *and all the necessary bolts and screws.*

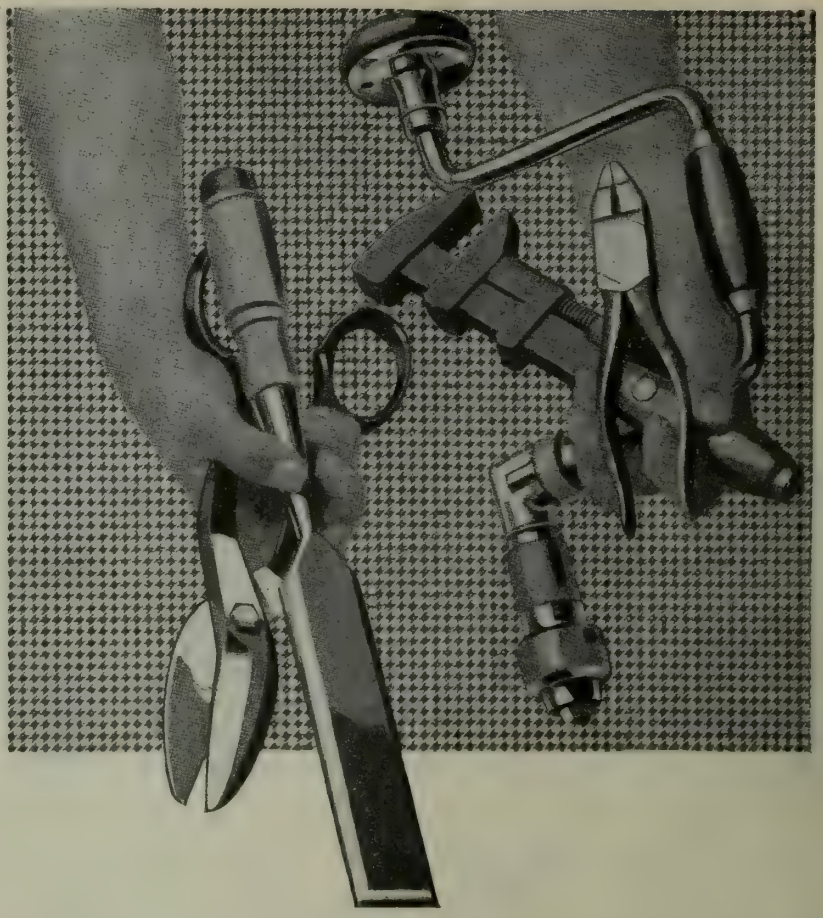
The Needs of the Empire

NEVER BEFORE in the history of Canada has greater opportunity been offered her Sons and Daughters to render SERVICE to the Empire;—and

NEVER BEFORE have the needs of the Empire demanded as high a standard of QUALITY in thought, deed and product as at present.

HOW NOBLY CANADA has responded is now known around the World and history will record it for the future.

THE PRODUCTS OF OUR MILLS are at the Fronts and on the Seas, in the Shipyards and Factories and in the Fields, faithfully fulfilling their mission of reliable performance wherever the Government's War-Winning Programme directs, as we are, and have been, stripped for action since the first call to arms.



THE NEEDS OF THE EMPIRE are many and the War-Winning Programme changes as necessity demands; but it matters not, the needs of the Empire are paramount and must be supplied.

THEREFORE, if in these trying times, we do not deliver promptly to you such of the products of our Mills or Blast Furnaces as you may need, console yourself with the thought that through us, you are rendering Service to the Empire and to the Cause that matters most for, the Liberty, Justice and Freedom of the World.

AUTOMATIC SELLERS

NO effort required to move RELIABLE Colored Enameled Metal Tubular Searchlights. Just display them in your window. That's enough to make every passerby want one.

Now look the searchlight situation straight in the face. All fibre searchlight lines are pretty much alike as are the nickeled lines.

Here's a line of **Colored** searchlights — of METAL. Nothing else in the world like them. They're in a class by themselves as a line—absolutely alone and above everything else as sellers. They're a novelty—now—but it won't be long before they're staple. Here's why: In factories each man can have a special color for his searchlight; every member of the family has his own searchlight and knows it by color.

We want you to see these searchlights. So write for a line of samples. Then put them alongside the searchlights you now carry. Decide for yourself their selling qualities. Don't forget to write TO-DAY for samples and prices.

Get our prices on RELIABLE Searchlight Batteries and RELIABLE Dry Cells.

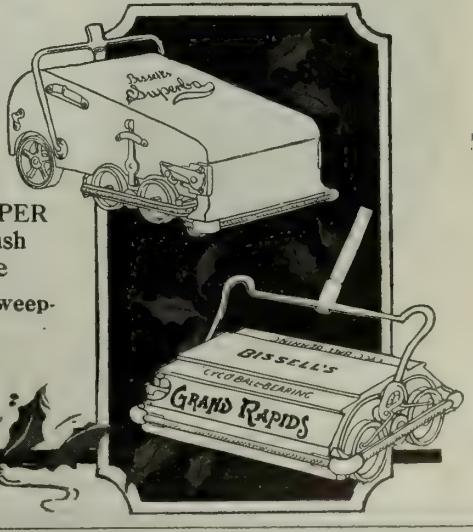
MILLIONS OF ADS — MILLIONS OF SWEEPERS

BISSELL advertising was one of the early successes. It created a stable demand for Bissell sweepers. Millions of housewives are Bissell's users. Each year has seen remarkable gains and the name "Bissell" has become a household word the world over. Today our forceful advertisements reach millions of homes. Present Bissell advertising is maintaining a heavy repeat business and carrying a labor-saving message to housewives who have not yet experienced Bissell economies. The Bissell advertising policy is effective if not spectacular.

These Profits For You



The Christmas trade this year will reflect the thrift spirit as never before. The country will be asked to confine its Christmas giving to useful gifts at most. The Bissell's fits into this program and will go into thousands of homes. Few household utilities are more essential.

Will you share in this business? Powerful selling helps await you.

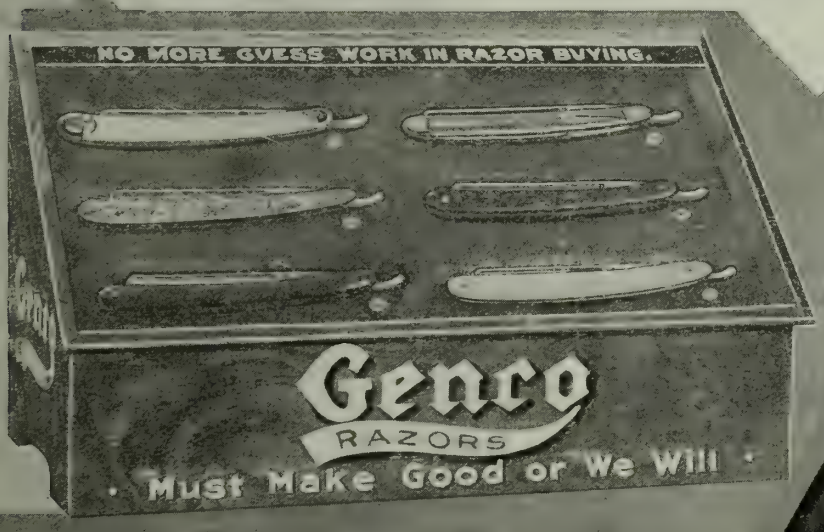
Genco RAZORS

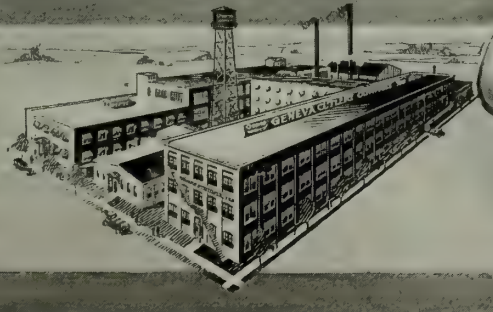
A Square Foot of Selling Space

That Can Be Made Very Profitable In Your Store

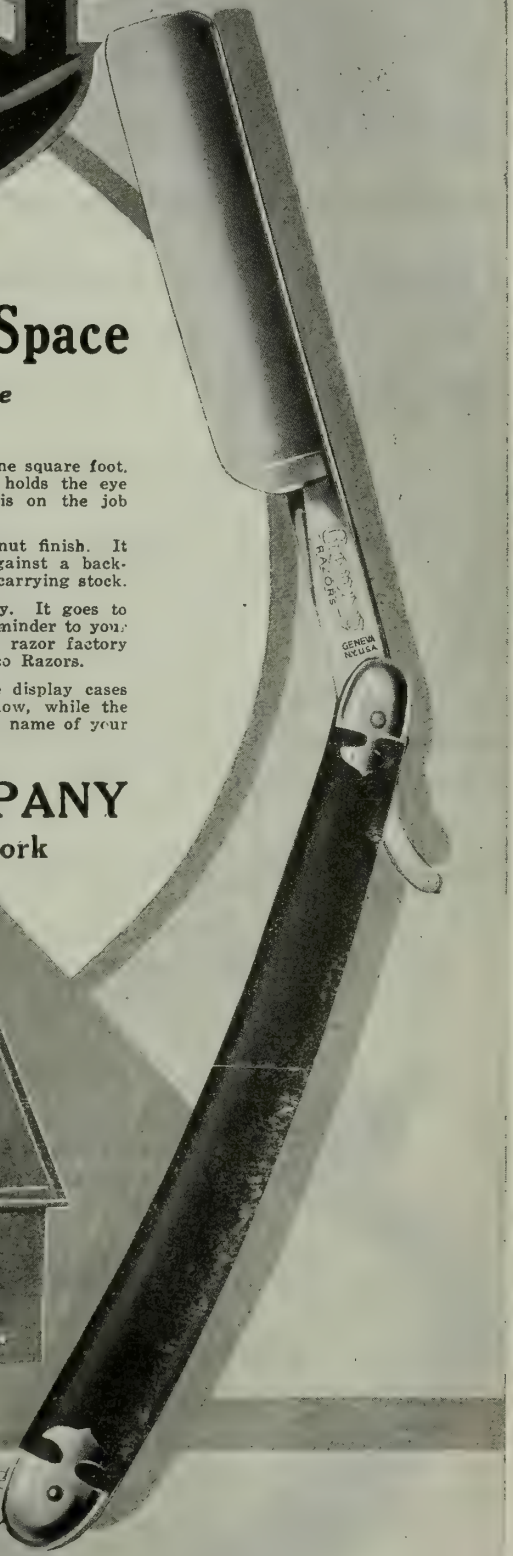
THE space occupied by this Genco Razor Display Case is about one square foot. Besides containing and protecting the razors, it catches and holds the eye and gives the goods a pleasing display. As a salesman it is on the job every minute.



The case is made of pressed steel, with handsome Circassian walnut finish. It holds six Genco Razors of different design on constant display against a background of Royal Purple plush and there is ample room beneath for carrying stock.



All current Genco Razor advertising features this case prominently. It goes to work for you the minute it appears on your counter. Let it be a reminder to your customers of the 500 master cutlers who, in the largest high grade razor factory in the world, grind the quality in and the guess work out of Genco Razors.



We are making a special proposition which included one of those display cases free with your first order. Write for the details of this offer now, while the matter is fresh in your mind. It's quite a good thing. Mention the name of your jobber when writing us.

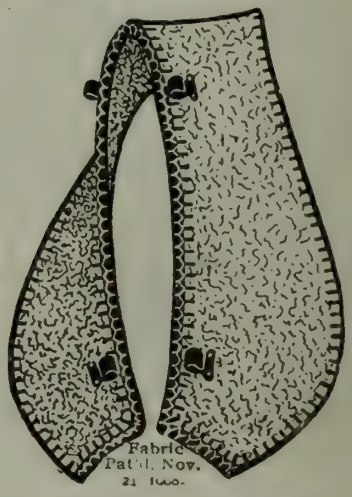
Undoubtedly The Sifter For Sales!



Samuels' Ash Sifter

The SAMUELS' Ash Sifter is something different and new and will instantly appeal to your customers as it is now appealing to consumers everywhere throughout Canada.
Fine screen has been adopted in making the sifter which saves much more of the fine cinders, and is stronger. As the illustration indicates, the smaller ash can or pail may be placed inside the waste can and so catch all the screenings which can then be removed more easily than when the larger can had to be carried out. The new feature also makes for longer life for the SAMUELS' Sifter, since the waste can is not subject to the ashman's abuse.
The SAMUELS' leaves all other sifters hopelessly behind.

"Belleville" Hardware

A "Made-in-Canada" Product Equal to the Best in the World

We are all apt to look up to imported goods as superior to home-made lines. Pause before you concede anything to foreign products over "BELLEVILLE" HARDWARE. Here is a Canadian-made product that is as good as the best.

"Belleville" hardware is meeting the demand of the most particular architects and builders, and is recording wonderful success throughout Canada. It is a worthy Canadian product, worthy of the best Canadian patronage. All hardware looks very much alike to builders and architects until they have had experience with "Belleville."

Best line for dealers to handle. Has greatest demand. Get our proposition.

Those Hard-To-Get-At Nuts

In every garage, machine shop, blacksmith shop and factory in your locality there's a lot of unnecessary cussing that you can turn to profit.

Those nuts that are so hard to get at with an ordinary wrench are easy prey to the Original "Westcott" adjustable "S" Wrench. The "Westcott," besides being the most convenient and useful wrench for ordinary use, can be used in places inaccessible to the Monkey-Wrench. It stops the cussing and adjusts the nut quickly and effectively.

"Westcott" Wrenches are fully guaranteed to do their duty. We empower you to refund the purchase price of any "Westcott" that fails.

The "Westcott" is easily adjusted by the hand that holds it. Its handle is made of first-class refined malleable iron and the jaws of forged steel scientifically h treated.

If your jobber cannot supply the "Westcott," write us nd we will tell you who can.

The Business Papers Got The Volunteers

EDWARD N. HURLEY, the clear-headed, resourceful Chairman of the United States Shipping Board —the man who induced Chas. Schwab to take the general management — puts a big rating on the national importance of the business paper. In the recent campaign for shipyard volunteers the business papers aided greatly in getting the required number of men.

Mr. Hurley, writing the Secretary of the Associated Business Papers, which includes a large number of the most progressive in North America, says:

> "I WANT to tell you and those connected with the division of advertising that the services rendered the United States Shipping Board and the Emergency Fleet Corporation by the Business Papers in our recent campaign for shipyard volunteers, deserves our highest commendation.
>
> "The editorials which these papers published and the advertisements bearing coupons and postcards to be filled in by those desiring to enrol in the shipyard volunteers, materially helped us in securing our full quota of volunteers.
>
> "I recognize the great force of the Technical and Trade Press of the country, and particularly in these critical times, both with relation to business as well as to the war.
>
> "Please accept this as a testimonial of my appreciation of your very valuable services and the assistance given us by the Associated Business Papers."

It is only since the beginning of the war that many have come to recognize the value and power of the Business Paper. Manufacturers who have subscribed for and used the Business Press in their own campaigns have long known its power in developing not only the business of its readers but the resources of the country. The Business Paper to-day stands high in the estimation of those executive heads connected with war endeavors, because they realize it is a mighty force in stabilizing business and in giving technical knowledge which cannot be secured in any other way.

Following MacLean Trade and Technical Papers and Magazines stand at the top for Service to readers:

The Poster Is Pulling Hard

A NUMBER of dealers who have been interviewed are enthusiastic about the Gillette Poster. It is not necessary to say that they are more interested in Cash Returns than in Artistic Merit.

The immediate result of the poster display from Coast to Coast is the number of orders received for the quickest possible delivery.

Evidently dealers are feeling the pull. It is an auspicious opening for the Christmas selling season—the harvest season for aggressive dealers.

What are YOU getting out of it?

A word about Cartons

We suggested recently that **Cartons** of Blades could be sold to customers with friends or relatives overseas. This gives the customer a supply so that he or she may slip a packet in letters going overseas.

There is a well-founded impression abroad that a shortage of blades is imminent. The demand on us for blades is strong.

HARDWARE AND METAL

Published Every Saturday Since 1888

Vol. 30 TORONTO, OCTOBER 5, 1918. No. 40

1919 Paint Prices Are Announced

Mixed Paints Advance 25c Gallon—Same Increase Applies to Porch, Floor, Marine and Barn Paints—Shingle Stains Up 25c—Carriage, Wagon, Gloss and Enamel Paints Advanced 10%—New Can Differentials—New Western Terms

ANNOUNCEMENT of the basis for booking paint orders for 1919 was made to HARDWARE AND METAL early this week and the following changes were effected at the special meeting of the Canadian Paint, Oil and Varnish Association held in Montreal on September 27, reference to which was made in these columns on September 21.

Mixed Paints Up 25c Per Gallon

The advance of 25c per gallon for mixed paints is really a small one. This figures out at around six per cent. over previous prices on the average. As pointed out in HARDWARE AND METAL on September 14 it seemed improbable that there would be a big advance for mixed paints, and it would seem that manufacturers have made the barest increase sufficient to cover their increased raw material costs.

In view of the fact that it is impossible to define or forecast the future raw material markets it is stated that the likelihood of new prices being maintained indefinitely is most uncertain. Bookings will be accepted on the new basis for spring shipment but this does not mean that further consideration of costs will be deferred until after the usual spring business is booked up.

Special Lines Affected

In addition to the advance for regular house paints a like increase is applied to porch, floor, floor enamels and marine paints. Shingle stains and barn paints are also subject to the same advance. Since these lines are not uniform in price as made by various makers, the new prices are being figured out now and will be available at once.

Carriage and Wagon Paints, Too

Ten per cent. has been added to the previous costs for all carriage and wagon paints. This increase is net, and with the considerable variety represented it will be some time before the new prices are definitely available, each manufacturer having a more or less comprehensive line of his own. This advance is considerably more than that applied to the regular lines of paint.

PAINT CHANGES IN BRIEF

House paints, ordinary colors and white advance 25c gallon, 1 gallon cans.

Inside floor paints, ordinary colors advance 25c gallon, 1 gallon cans.

Porch floor paints advance 25c gallon, 1 gallon cans.

Marine paints, ordinary colors and white advance 25c gallon, 1 gallon cans.

New differentials for net goods, such as mentioned above:

Barrels.....	25c	a gal. under	gal. cans
5 gal. cans ...	10c	" "	"
½ gal. cans ..	15c	" over	"
Quarts	30c	" "	"
Pints	60c	" "	"
½ pints ...	.$1.20	" "	"
¼ pints	$2.40	" "	"

New differentials for varnish:

½ gal. cans	20c	a gallon over	1 gal.
Quarts	40c	" "	"
Pints	80c	" "	"
½ pints $1.60		" "	"
5 gals.	10c	" under	"
Barrels	25c	" "	".

Carriage, wagon and implement paints, enamels, etc., advance 10 per cent.

Package Differentials

A new package differential has been made necessary owing to the higher prices manufacturers have to pay for cans through the shortage of tinplate. This is as follows and two schedules are required, one for paint tins and the other for varnish containers. Paint cans: For half gallons add 15c to the gallon price; quarts 30c; pints 60c and half pints $1.20. For varnish cans these are: Half gallons, 20c; quarts 40c; pints 80c, and half pints $1.60. On the other hand, for 5-gallon cans a 10c reduction per gallon applies, and for barrels 25c per gallon less than the gallon price.

Change Western Terms

Heretofore the terms granted the Western trade have been considered better than those applying to the Eastern merchant. Previously these were 2 per cent. 30 days or 90 days net, and they have been altered to read 2 per cent. 15 days, 60 days net. This makes a uniform arrangement and all Canada is now on the same basis. With stocks quite as readily available there as in the eastern territories, this will probably work little hardship on the trade.

All the changes date as from September 27 and travellers will accept business on this basis.

Enough Containers?

One or two paint makers have perfected containers of their own which they will probably use in the near future. Reference to these has already been made in the columns of HARDWARE AND METAL. In speaking with a prominent paint maker this week he was very sure that the can problem was going to be serious. It is impossible to plan far ahead, and in his own words: "I am afraid that some manufacturers are not going to have enough containers for their requirements; it is a serious situation and I would not advise anyone to leave his spring buying too late. In addition to this, it must be remembered that the paint maker has based his new schedules on to-day's markets. He cannot go out and arrange for his February wants now and linseed oil may then cost him $2.50 per gallon or even $3. We are taking considerable chances now in selling goods for later delivery, when we cannot foresee what market that we have to buy in will be at a future date. There is no guarantee that prices will hold on the basis just established."

Elimination of Sizes

Attention has again been drawn to the fact that December 31 of the present year is the extreme date for continuing the pint and half gallon cans. This matter was fully discussed again at the meeting above referred to and it is impossible to continue offering these packages longer. Due consideration has been given the contention of various arguments that these sizes should be retained and every side of the case has been weighed. It is simply a matter of adopting the situation and making the best of it, confronted with the container problem more seriously than ever before

BICYCLE DEALERS ARE PLACING BIG ORDERS

REPRESENTATIVE concerns of the Canadian bicycle industry are continuing to hustle for orders for both immediate and future delivery despite unsettled manufacturing prospects. The Canadian industry can take care of a good demand for some time to come. A number of dealers are ordering juvenile, ladies' and special models as a precaution against the restriction of these lines in Canada. No attempt is being made by Canadian companies to secure any business in the United States with lines which the American makers can no longer produce. One reason for this is that there is a duty of forty-two per cent. on bicycles imported into the States.

SAVE WRAPPING PAPER ORDER TO RETAILERS

AN order which will affect every retail store in the United States, and which may be followed in Canada soon, was issued this week by the War Industries Board. It says:

Notice to Retail Merchants

Paper conservation is essential as a war measure. Every retail store is, therefore, directed to discontinue the unnecessary wrapping of merchandise, and to reduce its consumption of wrapping paper, bags, paper boxes, office stationery, etc., to that which is absolutely necessary.

The officials of the War Industries Board feel confident that the public will co-operate with the stores in making this order effective. Economy in the use of paper will release chemicals, fuel, cars and men—all necessary to win the war—and will also enable the Government to secure its requirements of paper, which are increasing rapidly.

The necessity for this order became apparent this week, when it was realized that the Government would soon be obliged to divert to the ammunition manufacturers a large quantity of chemical pulp formerly used in making wrapping, tissue, book, and other strong papers. The increasing production of ammunition and the short cotton crop make this necessary.

The administration of this order has been placed in the hands of the pulp and paper section, and Dr. E. O. Merchant, in charge of the economy program, has prepared a set of instructions for retail merchants and designed a placard, which will be of assistance to them in complying with the Government's order.

CANADA BUYING LESS AMERICAN TURPENTINE

TRANSPORTATION difficulties are blamed by those in touch with the situation for a considerable falling off of the sales of American turpentine in Canada this year. For the official year sales totalled 19,357 casks, each fifty gallons, of turpentine, and 74,036 barrels of resin, each containing 500 pounds, as against 22,157 casks of turpentine and 85,545 barrels of resin in the previous year.

In many of the large distributing centers where there has been a steady demand for this product there have been insufficient shipments to fill all the orders. Canadian dealers have been doing their best to meet the demands by parcelling out what goods they have among as many as possible.

The latest advices indicate that there will be no substantial relief for some time. The dearth from which both dealers and consumers are suffering indicates that the yield of 1918 will be entirely used up and large drafts made on supplies carried over from the previous year.

EXEMPTIONS ARE MADE IN U. S. BUILDING RULES

IMPORTANT exemptions from the building restrictions announced some time ago by the United States War Industries Board were made this week with a view to helping the erection of essential structures and buildings necessary for war work or those engaged in war work or greater production. Work may proceed on farm buildings not costing more than $1,000; on certain kinds of road work, and on buildings necessary for railways or mine owners. Producers of coal are relieved of all restriction. Where no important demands are made upon either labor, the railways or quantities of materials, there will be little restriction upon construction work. Repairs to or extensions of existing buildings may be made where the outlay does not exceed $2,500.

BRITISH HARDWAREMEN ASK FOR CASH

THE hardware merchants in England are adopting the cash basis idea of running business. Discussing what is being done. "The Ironmonger" of old London, says:

"It is a common complaint with ironmongers in country towns that it is almost impossible to shorten credit because farmers expect to let their accounts run until they market their crops. Happily the war is breaking down that tradition and quarterly accounts and monthly statements even are coming to be recognized as reasonable terms. It has been left for one of your subscribers in an agricultural town in the Home Counties to curtail credit on paraffin and petrol to twenty-four hours. He has issued a circular pointing out that:

> Since May last the oil distributing companies, being under Government control, have revised their terms of payment for paraffin and petrol, and they now demand "cash on delivery" from us. We are, therefore, reluctantly compelled to make similar arrangements with our customers, but, in order to avoid the inconvenience of "cash on delivery" we will render an invoice within 24 hours of delivery of the oil, and we have to ask the favor of payment on receipt of our invoice.

The customers have received this injunction with good grace, sales have not suffered, and the money comes in promptly and regularly. The moral is not to be frightened by the bogey of Long Credits."

Steel Situation Likely to Improve

Many Canadian Firms Practically Out of Sheets—Drastic Restrictions for the United States May Result in Relief Before Long—Favorable War Situation May Also Help.

THE steel situation as far as Canada is concerned is still very uncertain. Many firms, especially those dealing in sheets, are practically out of stock and do not know when they will get any more. There are rumors that some of the stove manufacturers may have to close down shortly because of lack of supplies, and a deputation may be sent to Ottawa to ask assistance.

The Canadian War Board is getting to the stage where it can turn down orders and cut them pretty close in order to keep the allotment of steel coming to this country centered entirely on war work. For instance, one of the large public utilities of the province sent in an order for plate during the last week. It was returned, and will not be filled. The plate was not for any specific purpose, but simply to keep up the warehouse stock for repair purposes. Canadian warehouses are getting quite generous shipments of material that is of the lighter gauge, but on material that comes within the scope of the Canadian allotment they are not receiving such generous treatment.

The Matter Of Price

There is quite a big gap between the prices at U. S. mills and the prices that are now recognised in Canada. The trade seems to think that if the governments of both countries stepped out of the way and allowed the steel situation to work out its own level there would be changes on both sides of the line. The Canadian market would be due to come down and the U. S. price might advance a bit. At present plate costs $7.50 at the mill, which is at the rate of $150 per ton. On this allow $10 for freight and handling and you have $160 plate in Toronto. The American price is $3.25 at the mills, which is $65 per ton. To this add $3 duty and $5 freight and it gives plate from the U. S. mill laid down here at $73, against the present Canadian price of $160. In competitive times this difference would have to be taken up quickly. The Canadian price would not have to meet the existing price in United States, for the trade seems to think that steel will find its level around $4 per hundred, which is a fair lift over the present set figure of $3.25.

May Be Better

Canadian trade, however, is looking for something better in the supply of plates than has been coming to this country for some time. The United States has been cutting off so many of the non-essential users that there is bound sooner or later to be an improvement in the situation. Every week sees a cut made in the list.

Extend Conservation

Important steps to still further conserve steel supplies has been taken by the United States War Industries Board, and as a result twenty-two industries will have their supplies of steel greatly reduced. In addition to curtailing the less essential uses of steel the board has presented to the steel industry plans for stimulating production that will assist in reducing the shortage and meet the war demands. But these conservation measures and curtailment of industries, it was announced, will continue and will be extended as long as the shortage in essential war materials exists.

Those Affected

The Priorities Division of the War Industries Board listed as follows the industries so far curtailed:

Passenger Automobiles.—For the last six months of 1918 curtailed to 25 per cent. of 1917 production, provided the manufacturer will limit his purchases of materials, equipment and supplies to such as are absolutely necessary to match up stocks on hand.

Cutlery.—For the last four months of 1918 curtailed to 70 per cent. of the production of the last four months of 1917, which 70 per cent. shall include government orders.

Stoves Reduced

Stoves.—For the last four months of 1918 curtailed to 50 per cent. of the production of the last four months of 1917, which 50 per cent. shall include government orders.

Black, Galvanized and Enameled Ware. —For the last four months of 1918 curtailed to 50 per cent. of the production for the last four months of 1917, which 50 per cent. shall include government orders.

Clothes Wringers.—For the last four months of 1918 curtailed to two-thirds of the production for the last four months of 1917.

Metal Beds.—For the last four months of 1918 curtailed to 50 per cent. of the production of the last four months of 1917, which 50 per cent. shall include government and Allies' order, and that no brass beds be built except from stock now on hand, and no brass scrap be purchased.

Heating Equipment

Boilers and Radiators.—For the last four months of 1918 curtailed to 40 per cent. of the production for the last four months of 1917, and all production and sale shall be under license from the War Industries Board or for government buildings.

Breweries. — All brewery products cease on and after December 1. 1918.

Baby Buggies.—For the last four months of 1918 curtailed to 50 per cent. of the production for the last four months of 1917, and that they be given a Class C rating for enough metal to match up stock now on hand, provided discard steel only shall be used.

Restrict Roofing

Composite Roofing. — Manufacturers restricted to production and sale for buildings built by the government and the Allies, or under license from the War Industries Board.

Sporting Goods.—For the last four months of 1918 curtailed as compared with production for the last four months of 1917, as follows: Tennis balls, 40 per cent.; footballs and equipment, 60 per cent.; baseballs, bats and equipment, 60 per cent.; golf balls and golf clubs, 40 per cent.; no athletic clothing manufactured after the stocks on hand have been used up.

Gas Stoves and Gas Appliances.—For the last four months of 1918 curtailed to 50 per cent. of the production for the last four months of 1917, all copper eliminated except that on hand, which should be conserved for repairs to existing installations.

Automobile Tires

Automobile Pneumatic Tires. — War Industries Board will deal with rubber industry as a controlled industry. Using as a basis the production for the eighteen months ending June 30, 1918, the maximum production of each manufacturer for the last four months of 1918 is fixed at 50 per cent. of the average four months' period production during the eighteen months' period.

Tinplate.—For the last three months of 1918 curtailed the use of steel 30 per cent. from consumption of the last three months of 1917, an estimated saving of approximately 150,000 tons of steel.

Talking Machines

Talking Machines.—For the last four months of 1918 curtailed 40 per cent. of the production for the last four months of 1917 in units and on a tonnage basis with recommendation the industry secure war work before January 1, 1919.

Agricultural Implements and Farm Tractors.—Effective October 1 on a twelve months' schedule, curtailed in use of iron and steel 25 per cent. from consumption for calendar year ending September 30, 1918.

Bicycles.—For the last four months of 1918 curtailed 25 per cent. in iron and steel of the consumption for the last four months of 1917, with elimination of bicycles for children and for racing purposes.

Refrigerators.—For the last four months of 1918 curtailed 33 1-3 per cent. in iron and steel of the consumption for the last four months of 1917, with orders for substitution of zinc plate where possible.

Above is shown an effective and most attractive fall shooting display in the window of the Summer Company of Moncton New Brunswick. The display was arrangement of the rifles and the grouping of the shells and other goods about the cabin is good, while the figure of the old hunter and the pine trees adds a most lifelike touch to the whole. Windows like these set the sportsmen longing for the bush and are most effective in "pulling" business to a store.

Big Money in Household Business

Hardware Firms Making Fine Profits By Going Aggressively After This Trade—Housewife Is One of Canada's Greatest Purchasing Agents To-day—Tremendous Increase In Sale of Electrical Utilities.

MR. RETAILER, are you going after the household trade this fall? If you are not doing this, and doing it aggressively, you are missing a golden opportunity. Most of this trade is clean cut business and well defined. The goods are easy to sell, in fact many of them almost sell themselves, and there is no doubt about the demand that exists for them. It is only a question of reaching out for this business and you will get it. You can not only make your sales numerous but you can lay the foundation for a lot of future orders. Your profits will convince you that you can spend your time to no better advantage than in expanding this end of your business.

To get after this trade successfully you should recognize that perhaps the greatest purchasing agent to-day in many lines of hardware is the housewife. This is one of the results of the war. The men are not here to do the buying now in anything like the numbers they were and the women are making the purchases.

Is Seldom Wrong

Every woman of course is a born bargain hunter. Most of them are also always on the lookout for any articles that will save them work or money in their homes or make home more attractive. A woman is seldom wrong in her choice of goods that will do these things for her. If you have really good goods and bring them to her attention, demonstrating that they are all you claim for them, she is more than half sold, and it is an easy matter to cinch the sale. A striking illustration of this is to be seen in the sale of washing machines, especially electric washers. In the United States and Canada figures indicate that an average of two hundred electrically operated washing machines were sold every day last year. That means that electric washers went into more than 70,000 homes and that housewives paid out for labor saving and time saving equipment more than $10,000,000.

Farmers Buy Many

It is expected that this year's sales will be even greater. Many firms have been having difficulty in keeping up with their orders owing to the troubles in securing motors and other parts of the machines. In Canada large sales have been made, and among the most extensive buyers have been farmers' wives. Owing to the shortage of help on the farms and the money that has been

pouring in for everything they have to sell, farmers' wives have the money to buy and also the inclination because every minute they can get away from their housework they can turn to most profitable account in producing foodstuffs that will bring them in big money. They will buy labor-saving devices also for the reason that they want to get away from the drudgery of the farm, especially such hard work as washing.

Average Ten a Month

Nelson Mills, of the Mills Hardware Co., Hamilton, stated to HARDWARE AND METAL that he has been selling an average of ten washing machines a month throughout the year.

"Most of them are electrical," he said, "and a big percentage of them go to the farmers' wives. There is no question about the labor saving value of these machines, and another reason why the farmers' wives are buying electrical machines is that scores of homes in the country now have hydro that do not have water in the house. The farmers' wives could not use a washing machine driven by a water motor but they jump at the chance to get one that they can work by hydro. Our business is steadily increasing in this line."

Heaters Big Sellers

Never in the history of Canada has there been such a demand for electric heaters as there is this fall. The manufacturers are simply swamped with orders, and scores of hardware firms are doing a record trade. The beauty of it is that most of the heaters sell themselves.

One firm simply keeps one of the heaters it is featuring prominently displayed on a counter near the door. Everyone going into that store simply cannot help seeing the heater, and what is even more effective they cannot help feeling it. Coming in from outside on one of the cold, wet, rainy days which have been so frequent this month, they are met by a cheery wave of warmth that is most satisfying. It puts them in a good humor right there. They linger a minute to get more warmth or to look over the heater and a salesman who is also close at hand engages them in conversation at once.

Thirty in a Day

"We have sold as high as thirty of those heaters in a day" he told HARDWARE AND METAL. "I guess I should say they sold themselves. They are one of the very best sellers we ever handled. People who have been worrying about not being able to get coal see in these heaters a solution of their winter heating problem, and the only thing that has been worrying us is that we cannot get the goods fast enough to keep customers supplied. We have a good line. It is fully guaranteed, and we can go as far as we like in recommending it. Many people who have bought one heater came back for more. That is the kind of service we like to render. It not only satisfies them now, but it brings them to our store for future business."

One Man Took Fifteen

"We have been selling a lot of electric heaters," said Robert Doran, manager of the Vokes Hardware Co., Toronto. "The coal situation has got people guessing, and the electrical heaters are giving them splendid service. One hotelman came to me and got a little heater. He tried it out thoroughly and in a few days came back and bought fifteen. He plans to put them in various rooms to keep the guests comfortable and by this plan will not need to start up his hot water heating system for some time and will thus save coal. Selling electric heaters is somewhat easy. It is a whole lot easier than getting them. They are so manifestly a good thing that people are favorably impressed with them almost from the moment they see them."

Shifting of Business

The war has been responsible for a peculiar shifting of buying power. Formerly only the well to do people purchased many lines that are being bought largely by the working people to-day. This is because the working people are getting wages that a short time ago were not even dreamed of, and many of them are getting in all kinds of extra time. They are making big money and they are spending it. They are putting a lot of it into comforts that will make their homes better. To their credit it may be said that most of them are buying wisely. They are willing to pay for good articles and they are willing to buy, but ninety per cent. of these people have to be shown. How to reach them is the problem for the retailer. Newspaper advertising and attractive window displays are the two methods that are winning an enormous trade for many retailers. Some of the biggest and most successful sales of kitchen ware, glassware, cutlery and similar household lines that have ever been held in Canada have been put on this fall.

Made Big Sales

Window displays have sold thousands of dollars' worth of aluminum ware, food choppers, vacuum cleaners, stoves, tools and electrical utilities this fall. Some really splendid window displays of paints have been made, and the sales that have followed have been most gratifying to the firms. Many firms have found it good business policy to keep both their windows and their store arrangements constantly changing, especially when they have special sales on. They move the stock around and the effect on customers has been to stimulate business.

"People have been quick to note and comment on our methods of changing our goods around" said the manager of one store. "We can tell by the remarks we hear just what they think. The general impression seems to be that we are continually getting in new goods. Customers, especially women, like to come into the store and look around and of course we are only too glad to have them as it means a lot of good business. We encourage them in every way we can. We move our stock around a great deal. It changes the appearance of the store and we keep everything clean and bright, and our customers get a most favorable impression."

Fall Paint Sales

Hardware retailers have been giving their paint departments considerable attention this month, and the results have been well worth while as a big volume of business has been obtained and prospects are for just as much, probably more, next month as the weather may be more favorable. Paint selling used to be largely a spring business, but the aggressive hardwaremen have gone after trade and boosted it, until now, with many firms, paint is a good seller all the year round.

Stove dealers have done a splendid business. With many of them it has only been limited by their ability to get shipments. Firms who stocked stoves and heaters that will burn either coal or wood have found a big demand for them and many repeat orders have been sent in to manufacturers.

Saving 40,000 Tons of Tin in England

Manufacturers of syrup and molasses have promised to do everything in their power to assist in the conservation of tin. Their product, until the need for conservation passes, will be packed in only three standard sized cans, they promised at a conference Thursday with the United States Food Administration. All small and odd sizes will be discontinued, only 2½, 5 and 10 pound containers being used.

Packing in small cans calls for needless consumption of steel, tin plate, labor and transportation facilities. A 1-pound can, for instance, represents a saving in tin of about 20 per cent over four 4-ounce cans. In addition, the expense of filling and handling the smaller container is practically equal to that of the larger one, requiring less shipping space for equal bulk of contents.

The manufacturers will, of course, be allowed to use containers now on hand before adopting the new blockade schedule.

Packing of spaghetti and macaroni in cans will be discontinued after October 15. This action, in the form of a unanimous resolution, was taken by a committee representing practically every large American canner of alimentary pastes, in conference with the United States Food Administration. The manufacturers declared that they were willing to take any measures that might be suggested by the Food Administration for the conservation of tin.

Experiments are being made at the Ebbw Vale steel and iron works, England, in the construction of railway wagons of reinforced concrete. Already several have been constructed, and hopes are entertained that wagons will be turned out at a low cost and equal in durability to existing rolling stock.

War Time Economies for Hardwaremen

How Canadian Firms Are Making Little Savings Here and There That Run Into a Lot Of Money in a Year—There Are Many Ideas Here, Mr. Retailer, Which You Can Turn to Practical Account.

THE war certainly has not hurt the hardware business. On the contrary it has shown firms all over the Dominion many opportunities in which they can expand various departments and do a bigger and better business than ever. Many firms state that after the war they are planning to make big extensions to their stores in order to develop their trade along new lines and stock goods which before they did not carry in large quantities. The spirit in the hardware trade to-day is one of optimism. Most hardware men have troubles of their own, but they are more or less temporary troubles, such as shortage of help, difficulty in getting shipments and other things of a similar nature. The hardware men are meeting all these difficulties with the same aggressive spirit they have always shown, the spirit that makes for success and that will enable them to make the very best of conditions which they cannot help for the present.

What They Are Doing

The successful retailers have realized that there are certain things they must do in order to "carry on" during an abnormal period. Some of the things they are putting into effect with excellent results are: the curtailing of expenses, both direct and overhead, selling for cash, building up sales in new side lines, especially all lines of articles which appeal to women as labor savers in the home or to farmers for a similar reason, and co-operating with the manufacturers whose goods they handle, particularly in regard to instructions as to demonstrating what the goods will do. Many firms instead of figuring profits on a 1918 or 1919 basis are considering their profits on an average five year basis. They know that the hardware business is a necessity and that they handle many lines which are essential in every home. By going aggressively after business and developing advertising with a "pull" they are maintaining progress and at the same time laying progress for big business when conditions are more settled.

Helps The Retailer

The general trend of the retail trade now, especially in the thousands of stores which deal more or less directly with the farm trade, is to put all business on an absolutely cash basis. This is working out tremendously satisfactorily to firms who have been handicapped by long standing "carry" accounts or by customers who are "slow" pay. Retailers who have made the change realize now what they often did not see before, that they collect no interest on slow accounts and that it costs the retailer money to carry such accounts and more money still to collect them, to say nothing of the annoyances and inconveniences of having to wait. They have found that they can make a really definite saving in dollars and cents and also in time and worry by a determination to carry as few accounts as possible and to follow up collections with vigor.

Another big factor in the changed conditions that is tending to help the retailer is the standardization which many manufacturers have been compelled to make in their various lines of goods. Both the manufacturers and the retailers agree now that there was room for much improvement in this respect. Some firms were making fifty or more lines of one article where half a dozen were ample to meet all the needs of the trade. Because some other firm came out with a new design of locks for instance, many firms felt compelled to follow suit. The result was that the retailer became loaded up with a lot of stock that was absolutely unnecessary and this meant the tying up often of large sums of money in stocks that did not always move as quickly as the retailer would desire. Under the new conditions both manufacturers and retailers benefit. Instead of being overstocked it has happened very often occasionally that both manufacturers and retailers have had to turn away business because they could not get the goods asked for.

Turned Them Down

"I had to turn down sales for 125 electrical heaters this week," said one retailer to HARDWARE AND METAL. "I could not get the stuff. The manufacturers we buy from are weeks behind with their orders because they cannot get the raw materials and because they are swamped with orders. Business has been good with us all through the war period and never better than right now. As soon as things get a little more normal we are planning to build and double our store capacity. We will put in big stocks and there isn't a doubt in the world that we will get far more business than we ever had. Canada is going to grow and we are planning to grow with it. There are enormous possibilities in the electrical specialties trade for instance. We have been doing a good business in them, but we are only now beginning to realize the possibilities there are in it. After the war we plan to have one store in which there will be nothing else but a most complete line of electrical goods. Our paint sales have kept up splendidly and yet we know that after the war there are hundreds of people who will want paints. They have been putting it off and putting it off and we will get all that business. In the meantime our paint department is steadily growing. The war has shown us many new places in which we can develop paint sales, especially in the homes. To-day we showed a woman who was planning to buy new linoleums where she could save many dollars by simply going over her old linoleum with a good floor varnish. We were able to show her just exactly what she could do and as a result she will see other places in her home where she can apply paint and make things last instead of buying new ones. This is good missionary work and will help our future sales."

War Time Economies

Below will be found a number of little plans which hardware men have discovered will help them meet war time conditions more successfully and economically. They are all in operation in some of the best stores in Canada.

If you need more shelf room be sure that you are using all your present shelf area before you invest in more equipment. Often a section of shelf is only partially filled up, and a new, but of course smaller, section can be made by inserting a new shelf. Adjustable shelving is usually more economical than the unadjustable kind.

Team Work Counts

Cut down your labor turnover by creating a team-work spirit among your employees. One retailer holds a meeting of his employees regularly and talks on conditions in the business. In this day of war wages employees are inclined to shift easily from place to place, looking for the largest possible wage. Carefully planned meetings of employees enthusiastically carried out will help to create a better spirit, keep employees on the job and reduce the number of "green hands" that must be broken into store work and contract work.

This retailer also takes full advantage of the visits of all travellers to have them explain thoroughly to his clerks all that their goods will do. In this way many questions are asked that bring out much useful sales talk and the effects of this policy are much in evidence in a steadily growing business.

Buyers Carry Goods

If your store maintains a delivery service, the quantity of goods delivered can be cut down by urging your customers to carry home their small purchases, requesting them to bring in appliances

(Continued on page 48)

Current Events in Photograph

GENERAL HAIG PRAISES CANADIANS

Some of the highest commendations the soldiers from the Dominion have won have been those of the British commander-in-chief. He is shown here personally addressing a cheery word to a party of Canadians who have just come out of the trenches and are on their way back for a rest. In spite of the desperate fighting they have been through the Canadian boys show little sign of being worn out and are plainly eager to catch every word Sir Douglas Haig has to say.

Bicycle Dealers Have a Grievance

Declare Fall Trade Was Injured by Action of the Manufacturers in Raising Prices—Dealers Decide to Go in Strongly for Window Displays in Future

AT a meeting of the Toronto Bicycle Dealers' Association, called to discuss general conditions in the trade, strong objection was taken to the action of manufacturers and jobbers in raising prices on bicycles early in the fall. This year the price increase came on September 9. One result, it was declared, is that people decided to wait until next spring before buying. If prices were not increased until the winter or early spring, buying in the autumn would be encouraged. There would be still more inducement for people to buy at once if they knew prices would be higher in the spring. Prices are now in a jumbled state, it was stated, through a number of dealers clearing out old stocks at old prices and others raising their prices when notified.

Plenty On Hand

Representatives of several Canadian manufacturers and jobbers told of restrictions which they had adopted voluntarily, including the abolishment of several color combinations and other details. They also reported that stocks on hand were sufficient to keep the retail trade supplied for some time regardless of possible material shortage in the future and restrictions by the Canadian Government. Shipments of wood rims from the United States might be cut off because of an embargo on the exportation of forest products, but a considerable number of rims are made in Canada.

Cutting Down Models

The dealers discussed the situation relative to the cutting down of various bicycle models for 1919 and the elimination of various extras by order of the Conservation Division of the War Industries Board of the United States. They decided to hold a bicycle run on Sunday, October 6, over the course from the South African Monument at Queen street and University avenue, to High Park, the event to be staged primarily to emphasize the independence of the bicycle from the gasoline situation.

Window Displays

To encourage local dealers to keep their windows in good shape, even at this time of the year, it was decided to hold a window-dressing contest for members of the association. The decision led to a discussion regarding window dressing and it was decided to arrange with the wholesalers for the dressing of local bicycle windows by a qualified window trimmer under the auspices of the Toronto Bicycle Dealers' Association, the individual dealers to pay for the work. This plan will go into effect, it was decided, immediately after the holding of the proposed contest. Those present were agreed that all windows should be kept attractive at all times of the year. Reference was also made to the sale of accessories through the power of window displays. Several dealers declared that accessories and supplies always sell well in places where the dealers make a practice of displaying the goods attractively. The dealers were urged to place price tickets on all accessories.

Don't Waste Ammunition

"Don't burn an unnecessary shell," said the manager of a large Canadian cartridge company to HARDWARE AND METAL. "Orders for ammunition are coming in very freely. There is more business than we anticipated so late in the season and this indicates a shortage of stocks elsewhere. We have enough powder for near requirements, but the difficulty of late has been that of securing caps, paper, etc. We find that when we have enough material of one variety another is scarce. This has been a problem since the governmental restrictions last summer. My advice is that all unnecessary firing of cartridges be cut out."

WAR-TIME ECONOMIES

(Continued from page 46)

to be repaired rather than ask to have the wagon call, and by having demonstrators make deliveries of one or two small packages while going to see or returning from a prospect.

Training Help

Somebody has said that a "green" salesman can sell goods sometimes, but a "blue" salesman never. In replacing men clerks with women in your store you will acquire a staff of "green" salespeople. If they do not understand their work and make many mistakes, they are likely to become "blue" also. One of the best ways to prevent this and to make them less "green" as well is to put your copy of HARDWARE AND METAL into their hands and urge them to read it.

Saving Stationery

Use the half-size letterhead and cut down your stationery costs. Also the smaller page suggests brevity. This helps the correspondent to conserve his time.

Why spend 3 cents when 2 are enough? In other words, why send a letter when a postal card will do as well? Many business messages can be carried on a postal card without loss of dignity and without revealing information about your business.

Cutting The Cost

Janitor service will be at a premium during the coming winter. Why not "go fifty-fifty" with your neighbor and have one man look after the furnace for both stores? If the stores are small and the heating equipment simple and easy to operate, one man should be able to do the work for the two stores.

Dust Protection

If window shades or cloth curtains are hung in front of otherwise open shelves and lowered at night, appliances and shelving will be protected from dust. Maintenance costs and depreciation of goods should be lower as a result.

Clean and unwrinkled newspapers often make a good substitute for the more expensive manila wrapping paper. Not all, but many of the articles sold in the hardware store can be wrapped neatly in newspaper.

Large stores employing a number of clerks are finding it worth while to have them wrap up irons, toasters, grills and other articles during spare moments. A supply of wrapped articles all ready to pass across the counter helps to speed up the selling effort.

A Simple Saving

If goods are wrapped so that the corners can be folded into the package in such a way that the string need be wound in one direction only instead of the usual two ways around, the saving should be almost a 50 per cent. reduction in the amount used. See Figure 1.

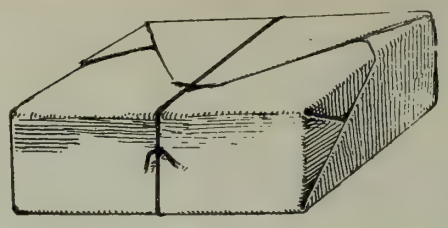

Figure 1

How much capital do you have invested in old stock—old appliances, old fittings, and old parts? Advertise it, sell it at a big reduction if necessary, but get your money out of it before it becomes junk and a dead loss.

Accurate Weighing

Be more accurate in selling by length or weight. Clerks too often are careless in this matter of accuracy. An inch or two extra or an ounce or two overweight often mean annual losses which otherwise would cover telephone, supplies, insurance or some other item in the cost of doing business for an entire year.

Window Displays

Do not buy accessory materials for window display purposes. If you need furniture for a display, a furniture dealer will usually be glad to lend you what you need, provided you put a card in your window, "The furniture in this window is for sale by Blank & Co." Dealers in other lines are also willing to profit by an opportunity to display their goods in your window.

Better Bookkeeping

Better bookkeeping is always an economy. It may cost some time and effort to put better accounting methods into operation, but the expenditure pays for itself many times over.

If you need a bit more shelf room build shelves around any posts you may have in your store. They can be made either square or circular. Be your own carpenter. The shelves will carry stock in winter and will be a good location for fans in summer. Two or more shelves can be built on the same post, one above the other. See Figure 2.

Displaying Lamps

Don't buy another table for displaying portable lamps. Rather increase the capacity of your present table by putting small pedestals under the middle row of lamps. This permits them to be placed closer together because the shades overlap and thus more lamps can be carried on the table. See Figure 3.

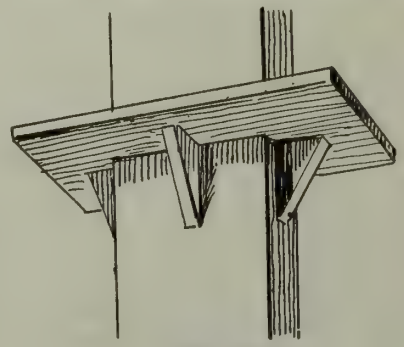

Figure 2

Delivery Co-operation

Why not co-operate with other retailers in making deliveries? War has forced business men to recognize the economies of co-operative delivery service. Many systems are being built up throughout the country. If such a system exists in your town or city its service ought to handle any delivery work that you may have at a lower cost than you can reach with your own delivery service.

Useless Wrapping

Stop wrapping up articles that do not need wrapping. This will cut down your cost of supplies. Many articles are sufficiently protected by the manufacturer's container. If the customer objects, a smile and a courteous statement of your wish to conserve paper will send the customer away contented.

Use The Phone

Why should demonstrators walk miles to see prospects and arrange for demonstrations when the same arrangements can be made by using the telephone in the store The telephone approach will help a demonstrator to use his time to much better advantage and that in turn should mean fewer demonstrators, hence fewer dollars for wages.

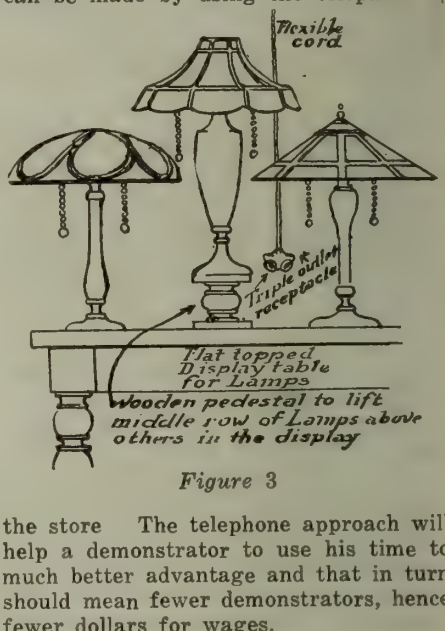

Figure 3

Do not throw away twine, rope, wire, paper, and cartons used on incoming shipments of goods. Much of this material can be used again, where the appearance of a package is not as important as the appearance of a package sold over the counter.

Keep Store Clean

Keep a foot mat outside of the front door of your store, especially during the winter. This will keep your floors cleaner and reduce the number of times you will need to have the store swept out during the week. And do not forget to clean the door mat too.

A dealer who operates a motor truck has effected a considerable saving by restricting his own use of his truck to four days during the week and renting it out along with the driver to a local

Hardware Dealer With Good Stock, Fortunate

Generous Treatment From U.S. — Some Unique Facts — Canada's Producing Power—Views Expressed by One of Canada's Steel Manufacturers

ACCORDING to Col. A. F. Hatch, manager of the Canada Steel Goods Co., Ltd., Hamilton, the hardware dealer who has been able to maintain a good stock of steel goods is in a fortunate position. Available supplies of material are now much reduced and the recent restrictions imposed have served to curtail the probable available material more than ever in the history of the trade.

COL. A. F. HATCH.
Manager Canada Steel Goods Co., Hamilton.

Liberal U. S. Treatment

In speaking with HARDWARE AND METAL Col. Hatch stated that the treatment which Canada had received in a general way with regard to supplies of steel at the hands of the United States was of a most generous nature. They, across the border, had even deprived themselves of essential requirements in order to let Canada have a goodly share of the steel that was available from time to time. This is a fact that should be borne in mind and were it not for the generosity of the United States mills and the authorities there, a much greater shortage than that existing to-day would have been apparent months ago. It is now up to Canada to show her appreciation by conserving in every possible way and in assisting the War Trade Board in making up the deficiency that exists for steel and iron.

Some Unique Facts

Col. Hatch pointed out that it had been impossible to provide against the shortages of to-day four years ago. Canadian firms had, in great measure, sized the situation up on the outbreak of the war and it was only due to the provisions that had been made in securing large stocks of raw material that the trade demands had been as well met as they have.

One of the peculiarities of the steel manufacturer's position to-day was that of not knowing just what class of business he might be called upon to accept. Essential war orders were now figuring big in the program of industry and what might be called "freak" orders came to hand for quick dispatch every once in a while. It might be for a staple line or for some special line of goods. For instance, a large Montreal firm just secured an order for some 1,700 dozen pairs of a certain kind of steel shelf brackets. These would be used on government work in a maritime province. And one of the features of this business was that these were to be used only temporarily. In another case a very large specification came through for a regular line of butts, but for a quantity that would not be asked for ordinarily in these days of restricted building.

Canada's Producing Power

In opinion of Col. Hatch, Canada will not be in a position to increase her production of material to any great extent. There are several furnaces due to be blown in within the next few weeks, but a survey of this total capacity will not begin to make up the deficiency already figured out by the committee on steel production. There is one thing that must ever be borne in mind, and that is the fact that every other consideration is subservient to the needs of war prosecution in every possible way.

Waste Paper Now at High Figures

Prices Double Up—Sell Now, it Pays—How the Market is Influenced—Get Together With Your Neighbor

THERE is no question of doubt but that waste paper is perhaps as elusive an article as any which the retailers could touch. Looking over a period of a year or two years, it will be found that prices are subject to extreme fluctuations, and to the retailer who watches the market very carefully the difference between a good price and a low price will be his.

Perhaps during the next month or six weeks the market will range at as high a figure as it will reach, or has reached, all the past year. Dealers' buying prices on October 1, f.o.b. Toronto basis, were as follows: Scrap paper in bales, $15.00 per ton; Newspapers, 20.00 per ton; Mixed books and magazines, $28.00 per ton; Cardboard, $15.00 per ton.

Prices Double Up

These are not the highest prices which have ever been paid for waste paper, but to-day's quotations are about double what they were 3 months ago. They also compare very favorably with the same period 2 years ago. Last year was rather an unusual one, and the market did not respond as is usually the case at this time of the year.

How The Market Is Influenced

Conditions which influence the waste paper market, during the winter time particularly, can be summarized briefly as follows: Most of the paper mills operate with water power, and in the winter time they have to contend with ice and snow, which curtails production materially. Those depending on the electric power or coal have also to face conditions where power is scarce and coal hard to get. This being the case, plants operating on munitions, or which can be placed in the essential war industry class, get the preference. That means that a paper mill, in which machinery is the big factor in operation, rather than the number of employees, which operate in normal times 24 hours a day and six days a week, may be restricted to 8 or 10 hours a day during the winter months. If this condition develops it will mean a decidedly big decrease in the tonnage used, and consequently prices paid for waste paper will drop accordingly.

Sell Now—It Pays

Right now is a good time for merchants to sell. Some merchants seem to feel that it is hardly worth while to develop the waste paper business. Perhaps if the truth were known, the majority of these merchants have sold at the wrong time, and for this reason have not secured the maximum price, which prevails in the good season. The spring and the fall are splendid times to sell waste paper. The winter and summer are usually rather flat.

Get Together With Your Neighbor

The retail merchant, whether he is a hardware merchant, grocer, dry goods merchant, in fact in nearly any line of business, uses and receives a very large quantity of paper which becomes waste. If he can receive ¾c per pound, to-day's price, there is no question of doubt but that this would run up to a very tidy sum with the majority of merchants. Waste paper dealers tell how the larger retailers are taking advantage of the market offered them for waste paper, and it is also on record that retail merchants in the smaller towns club together and make up carload shipments to the different dealers. One waste paper dealer quoted the towns of Sudbury and Port Arthur as examples of those towns which are clubbing together and making up carload shipments to

EDITORIAL COMMENT

THRIFT A PATRIOTIC DUTY

THE necessity of thrift is being driven home to the public in many ways, especially through the curtailment of the production of luxuries and the means of amusement and entertainment. It is also being conclusively demonstrated that thrift is profitable, more profitable indeed to-day that it was before the war, since savings command a higher return. But it should not be forgotten that thrift is also a patriotic duty. Our people must save if they are to win this war. For what would all our enterprise and industry profit us if Germany were to win? So saving means national self-preservation. Save that we may win.

FIRE PREVENTION DAY

OCTOBER 9 will be observed throughout the Dominion as Fire Prevention Day and it is hoped that a great deal of good will result in the way of stopping Canada's enormous fire losses by drawing attention to the waste that is largely due to carelessness. Many retailers are strongly of the opinion that the authorities at Ottawa could help along the work that is being done by framing legislation that would assist in the protection of property by compelling the heedless and the careless to observe reasonable precautions. The province of Saskatchewan has led the way with an act which is designed to work out along this line. Imitation is the sincerest flattery and the province of Alberta has shown its appreciation by adopting the legislation of Saskatchewan. It will become law shortly. Merchants believe that it is time Ottawa took some action. Canada's fire losses have become so serious that it is necessary that something be done. Conservation is one of the greatest needs of the time and one of the greatest foes of conservation is the fire demon. The European countries long ago recognized this and took steps to minimize the losses due to fire. Much good work has been done across the line, also, and now Canada is going ahead regardless of whether the authorities at Ottawa see fit to lead the way or not.

MAINTAIN YOUR STOCKS

THE problem of just how much stock to purchase is one that is causing retail merchants all over Canada no small anxiety. After four years of war it would seem that more firms have lost money through not buying enough to meet the demands of their trade than are out of pocket through buying too much. Not a few firms who laid in good stocks have been able to sell everything they had and add a good percentage to the profit they had already figured on. Many firms to-day would gladly place orders, and large orders, too, for goods which they could have obtained a few months ago but which are now off the market. The firms who placed the orders then will be the ones to benefit in the next little while. As long as the war is on prices are bound to remain high and goods scarce. The stocks of many lines of goods will be so depleted when the war ends that prices will go even higher than now, because there are some things which it takes time to grow or produce. Many of the shrewdest merchants in Canada believe that prices on many lines of goods will never again go back to their former levels and are laying their plans accordingly. Many of these merchants are looking forward to an enormous development in Canada in the next few years and they are laying their plans now to be ready to get their share of the business. It may be accepted as a good general rule that avoiding a nervous policy in regard to buying is a safe one. When the war started, thousands of merchants in England believed they would be ruined in a short time. Conditions exactly opposite resulted and many of those firms have doubled and trebled their turnover. They have learned that it pays to maintain sufficient stocks not only to look after the needs of their present customers but to take care of the needs of a few new ones. The men who worked along this line have been able very often to secure business which ordinarily would have gone to other firms, but because the other firms were too nervous to buy sufficient stock, they have lost out and many of them have lost good trade permanently.

BIG BUSINESS COMING

THE end of the war will find Canadian business operating on a much broader basis than it was in 1914. This is especially true of the Dominion's manufacturing interests. Canada has many important new industries and many of the old ones have been greatly developed. Many firms are busy with plans now for maintaining after the war the increased business they have secured. They will have the capacity for production and plan to make

the most of it and keep on growing. Canada is after world trade and will undoubtedly get a share of it. The retail firms of the Dominion are also busy with plans for expansion when peace comes and conditions are more normal. Few businesses will have better opportunities for enlarged trade than the hardware trade. There will be an enormous increase in building and an unlimited demand for hardware of all kinds, paints and other necessities. Some of the best firms in Canada are getting ready now for taking care of this trade. It will be theirs for going after it. The man who goes after business always gets it provided he is prepared to give service and has the goods. This is one reason why the hardware business of Canada is on such a firm foundation. Hardware dealers handle essential commodities for which there is always a demand and they have proven themselves second to none when it comes to going after trade and giving real service to the buying public.

GOOD ROADS ESSENTIAL

ROAD work is an "essential industry." It is an important business. Nothing must be permitted to stand in the way of it, and the pathway from producer to consumer must be kept free at all cost. It is not enough that the farmer raises a bumper crop; that is only a part of the work, important as it is. Wheat, corn, oats and other grains and vegetables, products of the dairy, live stock and other staples of the agricultural industry must be gotten away from the farm, garden and ranch. They must be delivered to railroad centers, whence they are distributed to our own people at home, to our soldiers and to our allies abroad. Roads serve a fundamental need. They are the backbone of our economic structure. To hold back from spending money for good roads is little short of courting disaster. No county official is serving the best interests of his constituents or the best interests of the Province or Dominion by pursuing a niggardly course in the county's highway program. He has no right to obstruct the progress of the community in this way. Such a course shows poor judgment and convicts him of a lack of far-seeing patriotism.

MUCH TO BE THANKFUL FOR

THE smashing victories of the Allied armies this week will do much to shorten the war. The elimination of Bulgaria from the struggle will have a big effect on Turkey and may compel that Empire to sue for peace. During August and September the British forces alone captured approximately 125,000 prisoners and about 1,400 guns. Thanksgiving will soon be here and the Allies have much to feel truly thankful for. Canadians have many special reasons for gratitude. They have been favored with the most bountiful crops. They have been sharers in abundant business prosperity and a steady increasing trade. The boys of the Dominion overseas have won undying glory in the terrific fighting that has marked this year and have won for the Dominion a proud place in the eyes of the world. While Canada has been partaking to the full in the fight against the Huns, she has been spared the horrors of devastation which have made heaps of ruins in France and Belgium. This is something that Canadians cannot appreciate unless they have seen it and know just how thankful they should be that they are so far from the big guns. At home there have been no serious labor troubles or other strife and best of all the end of the war appears to be in sight. Canada and her Allies indeed have much to be thankful for.

SETTING THE CLOCKS BACK

WHEN the clocks are set back an hour on Sunday, October 27, all the little differences that arose between advocates of the old and the new time will cease—until next year. To get the benefits of the daylight saving plan it was necessary that it be generally adopted. People in the cities were strongly in favor of starting work an hour earlier and reaped the benefit in the extra period of daylight available for gardening. On the farms where the advantage was not so apparent a few adhered to the old order. In some communities the majority decided to keep things as they were, opening schools and churches on the old standard. Thus in the little matter of time keeping neighbors were divided and criticism was directed against many storekeepers who closed too early to suit the convenience of their customers. Those who tried to compromise kept two clocks, running one on old time to work by and the other new time to indicate how the trains ran. A great deal of misunderstanding and confusion arose, all of which was blamed on the new arrangement.

A NEW MAN ON THE JOB

WHEN a new man comes on the job how much do you try to be his friend? If he wants to know a few things do you look at him as though you were disgusted with his presence, and say, "Why don't you get the information?" or do you help him to get it. The first day on a new job is the most difficult of anyone's association with a company, and if you can say something that is cordial, cheery and helpful, say it. He is bound to carry with him for a long while the memory of his first day with us, and work is more easy for us all because of this cheerful co-operation and helpful spirit, especially during our first days with a new company.

Be a friend to the new man.—The Stanley Worker.

THRIFT will get you further up life's ladder than any other quality, and waste will carry you down faster.

EVENTS IN THE TRADE

Business Changes

Toronto.—University Electric Co., hardware, etc., dissolved.

Petrolea, Ont.—Estate of J. H. Fairbank has been sold to the Canadian Oil Companies, Ltd.

Fordwich, Ont.—William Jamieson and Erle Patterson have purchased the hardware business of J. W. Ratz.

Sault Ste. Marie, Ont.—Edwin Keyes has purchased the interests of J. S. Reynolds, in the firm of Keyes and Reynolds, hardware merchants.

Obituary

Ex-Alderman John C. Swait, aged 83, for many years in the hardware business at 230 Queen St. E., Toronto, died on Sunday. He came to Toronto from Old London in the early 60's. He was a member of the City Council for some years, a director of the Industrial Exhibition, and later became Toronto harbor superintendent. He was a life member of St. Andrew's Masonic Lodge and a Past Grand Master of the Sons of England.

Personals

F. J. Penberthy of Lowe Bros., Toronto, is away on a business trip to Chicago and Winnipeg.

Cecil Dixon, manager of the bicycle department of Hyslop Bros., Limited, Toronto, is now on his second business trip within a year to the Pacific Coast.

Fires

The premises of the C. S. Judson Co., Ltd., of Winnipeg, mail order jobbers in implements and hardware, were damaged by fire to the extent of $250,000. The loss is partially covered by insurance.

A portion of the factory of the Canadian Wood Products, Limited, Toronto, was destroyed by fire. The firm's output of boxes will not be affected, the management stated to HARDWARE AND METAL, as the section of the plant burned was engaged in war work, making shell boxes. The loss is $20,000.

Trade Notes

The Merrill Hardware Co., of Rainton, Sask., is enlarging its store.

The Mannville Hardware Co. has started work on an addition 30x60 feet to its store on Main St. at Shellbrook, Sask.

Robert Gillespie, of Oxbow, Sask., is going after the auto trade of the district and has installed an air compressor to supply customers with free air.

The Lougheed Hardware Co., of Lougheed, Alberta, has purchased the harness stock of J. Hertel, and plans to carry a full line of harness in addition to hardware.

Winteringham Bros., of Glenewen, Sask., have installed complete new fixtures throughout their hardware store, and now have one of the finest stores in their section.

Arrangements have been made by the McClary Mfg. Co. of London, Ont., for the manufacture in Canada of some of the most popular style ranges of the Cribben & Sexton Company of Chicago.

Messrs. Frank and Harold Goodwin have disposed of their interests in the Goodwin Heater Co., of Sarnia, Ont., to W. D. Giffin of Sarnia. Harold Goodwin, who has been travelling salesman for the firm, will continue in that capacity.

The American Hardware Manufacturers' Association and National Hardware Association Convention will be held at Atlantic City, Oct. 23, 24, 25, 1918. Headquarters Marlborough - Blenheim Hotel. F. D. Mitchell, secretary, 4106 Woolworth Building, New York City.

A dispatch from Galt states that cheques are being issued by the Ontario Portland Cement Company, liquidator of $20 per share for all shares of the company, which went into voluntary liquidation. It is expected that further payments will be made as the assets are realized.

The business of the New England Paint, Oil and Varnish Company, at Everett, Massachusetts, has been purchased by the Du Pont Company and it will be made a branch of the company's already large activities in this line. It will be used largely to cover the New England field.

Montreal News

Harry Simpson, of Arthabaska, Que., was in Montreal during the week.

A. Stewart, manufacturer's agent of Peterboro, was a Montreal visitor.

O. N. Parent, with Canadian Yale and Towne, Ltd., was in Montreal this week.

A. St. Amant, of Pointe-Aux-Chenes, Que., was a Montreal visitor this week.

G. Marquis, of Batiscan, Que., hardware merchant, was in Montreal this week.

The Reading Hardware Co. was represented in Montreal this week by W. F. Duffield.

G. A. Whitelaw, representing the Martin Mfg. Co., of Whitby, Ont., will be in Montreal in a few days.

Ernest Bureau, of Richardson and Bureau, manufacturers' agents, Montreal, visited Ottawa last week.

Col. A. F. Hatch, manager of the Canada Steel Goods Co., of Hamilton, was in Montreal on Monday of this week.

Brandram-Henderson, Ltd., will hold a managers' and salesmens' convention in Montreal on October 9-10-11, at the Windsor Hotel.

Members from a distance attending the special meeting of the Canadian Paint, Oil and Varnish Dealers' meeting on September 27 were: M. F. Christie, of Geo. F. Stephens, Winnipeg; T. F. Moneypenny, Toronto, of the Imperial Varnish and Color Co., and Chas. Hickman of the Ottawa Paint Works.

Bicycle News

W. E. Woodley, Vancouver agent for the Excelsior motorcycle, is now in his new store on Abbott street.

Harry Rutledge, formerly with Fred Deeley of Vancouver, has opened the "Modern Machine Shop" on Seymour street, where he is conducting a bicycle and motorcycle repair business.

There are a number of interesting developments in bicycle trade circles of British Columbia. The Collingwood Hardware Company, Vancouver, is one of the new concerns to take on the bicycle and accessories as a special department.

New motorcycles are scarce in Vancouver, but Fred Deeley has received a shipment of English bicycles. It is almost impossible to get any new motorcycles at all and used machines are much in demand. The second-hand motorcycles are bought freely, some of them selling for well over $400.

Catalogues

"Plymouth Products," a bulletin issued by the Plymouth Cordage Co., of Welland, Ont., contains information regarding the company's products and items of general interest to rope buyers.

Catalogue No. 19 just issued by the Iver Johnson's Arms and Cycle Works, of Fitchburg, Mass., contains twenty pages of most attractively illustrated matter descriptive of Iver Johnson bicycles, saddles and sundries. The Iver Johnson superior truss bridge roadster is featured especially, and also the Iver Johnson Mobicycle.

Corp. L. Ryan, formerly employed with W. H. Thorne & Co., Ltd., St. John, N.B., is suffering from gunshot wounds in the left leg.

Sgt. Wm. R. Allan, a bookkeeper with T. McAvity & Sons, Ltd., St. John, before going overseas, is in a French hospital with gunshot wounds in the face.

Pte. Norman J. Stewart, who enlisted with the Vancouver Cycle Corps in January, 1917, has been killed in action after serving overseas for a year and a half.

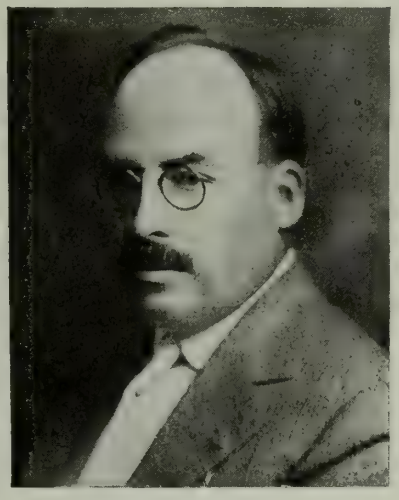
W. A. Maclauchlan, hardware manufacturers' agent, St. John, N.B., has been advised that his son, Captain R. F. Maclauchlan, has a gunshot wound above the knee.

Ernest Cooke, formerly with J. E. Wilson Co., Ltd., St. John, N.B., has been wounded in France, soon after recovering from the effects of a gas attack. He is a Boer War veteran.

Thomas Bradley, employed with the Union Foundry and Machine Works, West St. John, at the time of enlisting, was killed in action recently while serving with a New Brunswick battalion.

Corporal Roy Wintermute, formerly employed with the Canadian Iron Foundries at St. Thomas, Ont., is in the General Hospital at Etaples, France, suffering from gunshot wounds. He went over with the 94th Battalion.

Lieut. Harold J. Clark, R.A.F., son of W. J. Clark of Pickering, Ont., is returning to Canada on leave. He recently fell 2,000 feet while flying in England. Lt. Clark was formerly with H. S. Howland, Sons & Co., Ltd., of Toronto.



Harry H. Neal, formerly with the Mueller Brass Co. at Sarnia, Ont., but recenntly with the Curtiss Aeroplane Co. at Buffalo, has enlisted and is now training for overseas service with the United States Marine Corps at Paris Island, South Carolina.

Flight Lieut. Clinton C. Conover is reported missing. He is a son of J. H. Conover, manager of the Toronto branch of the Martin-Senour Company. Flight Lieut. Conover went overseas in November, 1917, and has been flying in France since last March.

Berton F. Ramsay, a member of the office staff of T. McAvity & Sons' King street stores, St. John, N.B., has been reported wounded and missing since August 28. He had recently returned to the line after convalescing from shrapnel wounds.

Pte. James Paddock, 27 Broadview Ave., Toronto, is again in a French hospital with a gunshot wound. He was wounded some time ago and after returning to the trenches was severely gassed. He was with the Toronto Plate Glass Works before going overseas with the 81st Battalion.

On September 4 it was reported that George Mundie, formerly Associate Editor of HARDWARE AND METAL had been killed in action. Word has just been received that he was not killed, but was very severely wounded with shrapnel. It is understood he is now in an English hospital, having undergone an operation.

H. M. ASHBY.

H. M. Ashby Given Dinner

On the evening of September 27, H. M. Ashby, late managing director of the Sherwin-Williams Co., of Canada, Ltd., was tendered a farewell dinner at the St. James Club, Montreal, by his former associates in the paint and varnish trades, and a number of other friends.

While the duration of Mr. Ashby's residence in Montreal was really brief, there was probably no figure in the paint trade who had made more friends in the space of three years. Although his friends knew him to be a close student of his own work, he had the gift of making real friends who were sorry to learn of his departure.

President George Henderson, of the Canadian Paint, Oil and Varnish Association occupied the chair and made the initial address of the evening. Following him were Vice-President Walter Ramsay, and Messrs. W. S. Fallis, A. T. Black, W. W. Ingersoll, Norman Holland and W. Beverley Robinson, all of whom referred to the friendly and pleasant relations that had existed as between Mr. Ashby and his associates, and wishing him every success in his new field. To these felicitations Mr. Ashby suitably replied.

New Brunswick News

Restrictions on big game hunting in New Brunswick this year have reduced the number of sportsmen entering the woods and sales of hunting equipment and supplies.

Cyril Berwick and Miss Helen Waters, of the office staff of T. McAvity & Sons, Ltd., St. John, were married recently. A cheque was received from the company and a chest of silver from the staff.

J. G. Harrison, secretary of W. H. Thorne & Company, hardware, and other St. John men have been incorporated as the St. John Steamship Company. The company will provide steamers for the trade between St. John and Nova Scotia, which has been greatly hampered by the withdrawal of vessels. One steamer is already under construction.

New Companies

A provincial charter has been granted to the Universal Cartridge Company, Limited, capital $2,000,000, with the head office in Toronto. The firm plans to manufacture and deal in explosives, munitions, metallic and wooden ware.

Wire Orders Show Shortage of Steel

Orders have just been allocated covering a big tonnage of American barbed wire for shipment overseas. Pittsburgh district mills will supply a large part of the wire, and as a result of the placing of these orders and of other urgent American government orders which were distributed recently, in the face of reduced operations at wire plants, the delivery situation is now the worst that has ever been experienced. Priority certificates are of little avail, as the great difficulty continues to be the shortage of steel, wire makers turning over their steel in big tonnages to other manufacturers whose product is considered more essential, and under present conditions wire can be had only on direct government, or AA or A priorities.

One Price For Oil In New Brunswick

The Imperial Oil Company has adopted a one price policy for the Province of New Brunswick. Oil is now sold from all the company's tank stations at the same price.

New tank stations are being erected at Shediac, Chatham, Newcastle, Campbellton, Grand Falls and Florenceville.

Distribution facilities at St. John have been improved by the erection of the most modern oil storage warehouse east of Toronto. Concrete and tile construction makes it fireproof. All electric light wires are in conduits, the lights are vapor proof and all switches are outside the building.

The storage capacity of the plant is 300,000 gallons of refined oil and gasoline and in the tank room are eight tanks, each of 9,000 gallons capacity for lubricating oils. This room is steam heated so as to obviate any difficulty in handling heavy oils in the coldest weather.

THE CLERKS DEPARTMENT

What a Young Man Must Do to Become a Merchant

The Author Knows Whereof He Speaks, Being the Controlling Genius in an Enterprise Embracing 197 Retail Stores in the United States, Which Recently Wrote a Check to the Internal Revenue Department For $874,821 For War Taxes

A MERCHANT is one who buys and sells for service and profit. He must buy his wares with judgment and dispose of them at a profit if he is to be successful. The commercial agencies, Dun and Bradstreet, state that 95 per cent. of all business men fail. On the face of it, this seems almost incredible, but we are not justified in disputing their figures. Evidently, there must be something radically wrong in the prevailing methods of business. These failures must be a result either of lack of knowledge of business or the result of insufficient capital with which to finance business.

Yet, in my opinion, there is another cause. Many merchants fail simply through lack of training.

In Great Britain and Scandinavia, young store men serve an apprenticeship just as they do in any other trade. We find them trained thoroughly even to the minutest detail. In the first place, they are taught obedience to discipline; no man can ever hope to become a merchant unless he can ultimately learn to discipline himself and those who work for him.

No Apprenticeship

In the United States, unfortunately, no apprenticeship system exists in business. The average young man is attracted to and free to accept that position which pays the largest salary. To secure such a position without training is decidedly not for his best interest. No greater misfortune could possibly be his. More young men have been ruined by drawing large salaries early in life than by any other one thing. The young man, generally speaking, feels that while he is young and before he settles down, he must see some of the "world," as he calls it. He makes money; he spends it. Instead of devoting his evenings to reading and study to improve his mind, he often spends them in idleness and dissipation. Ere long, not only has he acquired bad habits that will be hard to break, but his health may have become impaired. It is absolutely impossible for a young man to spend his night in dissipation and be at his best the next day.

A Wrong View

I have often heard young men argue that if they put in their working time faithfully it is none of the employer's business what they do outside of business hours. Such argument is nonsense, and any man of experience will declare that it is not the work that kills men, but the temptations that assail them from 6 p.m. to midnight. In the city of New York where the temptation for a good time is perhaps greater than in any city in the country, I have often observed ambitious young men and women going to night school in order to acquire a better education. That kind of determination is not found in ordinary people; they are the extraordinary; they are the kind of people who are ready to open the door when Opportunity comes to knock.

They are the young men and women who are ambitious and bound to succeed.

Learning Homely Tasks

We have in our employ a number of young men who came to us upon their graduation from high school. These young men were placed in our store on a very nominal salary, in some cases a mere living. Our object in starting them on a low salary was to encourage in them the practice of economy. It has been our idea to help these young men build for the future. We have in each case insisted on a careful, thorough training. We invariably start young men at sweeping, opening boxes, washing windows, and doing stock work. These duties are humble but important ones. A store should be kept as clean and tidy as a proud housewife keeps her home. Customers do not like to trade at an untidy store.

Stock Keeping

To be a good stock keeper is one of the important attainments of a merchant. Not only does this apply to keeping stock clean, straight, and in order, but free from odds and ends. Take for instance, a dozen shirts: one must sell ten of them in order to pay the manufacturer. The two that are left represent the merchant's profit, and he has made no money on the dozen shirts until he has sold these two. That is exactly the reason why our system will not permit of sales, cut and slash prices.

Therefore, one of the first principles for the young man to acquire in becoming a merchant is to know how to keep stock.

Grasping Principles

His advancement and his knowledge of the details of the business will depend largely on his application and ability to grasp fundamental principles. He is taught first the value of truthful statements; not to exaggerate; to make good every statement; to be courteous, pleasant in all his dealings; in short, the word Service, *real* Service, is the one thing we insist on him delivering. It is for this reason that we include Service as a part of a merchant's equipment as pointed out in the beginning.

Valuable Training

If a young man will submit himself to this regime in the same spirit that a man submits himself to college demands, the training that he will get in a J. C. Penney Company store will be worth thousands of dollars to him. No greater opportunity ever existed anywhere than in our organization. True, there may be just now a temporary slow down owing to the war, but the fact that this business has been developed in sixteen years from nothing to its present size is evidence the principles must be right.

What I want to impress on the mind of every young man is this: Do not think of the salary you are drawing, but fit yourself for the future. Let the foundation you are laying to-day be strong and solid, it will then be enduring. You may then build just as high as your ability and capacity will permit.

There is nothing mysterious about success. The trouble with the average individual is that he is not prepared when the opportunity comes. The thing to do is to "dig in," and to strike out with a determination to be something, to be somebody, and success will most certainly crown your efforts.

NOTE.—This article is from "The Dynamo," the internal house organ of the J. C. Penney Co., and was written by Mr. Penney.

Brooms Advance Ten Per Cent.

Freight Rates and Twine Factors—Broom Corn Outlook—What the Figures Show—Exchange an Important Factor

AN immediate advance of ten per cent. will become effective on corn brooms. HARDWARE AND METAL was informed by manufacturers that they are compelled to make this increase over previous prices because of the advance in broom corn, broom handles, wire and twine. New freight rates have also played a part in determining what new quotations would be.

Freight Rates and Twine Factors

The recent meeting of broom manufacturers was called mainly for the purpose of discussing freight rates, on which there has been a very great increase; also to consider what action might be taken with a view to securing an adequate supply of broom twine. The broom manufacturers of Canada have been largely dependent for years upon one factory for their broom twine supplies, and this factory has of late been unable is necessary to make a broom, with the result that every broom manufacturer has been greatly handicapped for want of twine.

Broom Corn Outlook Discussed

The present broom corn situation was also under consideration. The crop of 1917 was unusually short and there was great difficulty last year in obtaining sufficient long corn. This year the corn is quite long and will produce a great amount of waste. There is also a very large proportion of coarse rough corn. The section in Oklahoma, which produces the best grades of fine corn, was badly hit by drought and hot winds, with the result that the crop in that section was very small. There was considerable corn grown in Texas, but the bulk of this corn grew almost twice as long as is necessary to make a broom, with the result that there is an enormous waste in using it. In Illinois the crop promised to be unusually good quality, but during the harvest season there was a great deal of rain with the result that the bulk of this corn is very red. There is also a great deal of what is known as crooked corn in Illinois as a result of wind storms.

What The Figures Show

While the common grades of corn are not much higher than a year ago the fine grades are about one hundred dollars per ton higher, and great deal of the best quality has been selling for prices ranging between $450.00 and $525.00 per ton. Broom handles have recently advanced about 20%, wire 10%, twine 20% and in fact everything that enters into the manufacture of a broom has greatly advanced. As a result of this broom prices have advanced 25 cents per dozen on common grades, 50 cents per dozen on medium grades, and $1.00 per dozen on the fine grades. This advance is net upon the wholesale prices. Whisks have also advanced about 10 per cent.

Not Enough Broom Corn to Meet Requirements

In speaking of the outlook, one Toronto manufacturer was of the opinion that there was not enough broom corn in sight to last until next year's crop would be available. But he added that the average housewife was getting more use from her broom than before, and it was not discarded until completely used up. "Five years ago," he said, "you could go to the dumps and pick out a good broom, but it is different to-day. Even in New York brooms are selling at retail for $1.50 each, a higher price than they bring here. On top of their cost we have the war tax and exchange to take care of, and our selling prices should be higher."

Broom corn sold five years ago for from $50 to $60 per ton. The immediate reason for the tremendous increases is, in large measure, due to the decreased area sown to this crop and is in accordance with the express wishes of the United States government that foodstuffs be raised on every available acre.

As far as the Canadian manufacturer is concerned he has had to face higher costs through exchange to the extent of from $90 to $100 per car. This figures out at about 13c per dozen on the finished brooms. The freight item has shown a tremendous increase, the rate having risen in some instances from $1 to $1.80, and this being the relative increase through the most recent freight advances. Altogether the added charges have increased manufacturing costs about 50c per dozen and this in the past two months.

WASTE PAPER NOW AT HIGH FIGURE

Continued from page 49

Toronto. If merchants in towns thus far away find it of advantage to ship to Toronto, it certainly should be of advantage to dealers located within a 200 mile radius of a large distributing centre of waste paper to send along their supplies also.

Dealers are also glad to quote prices which they are paying for paper, and to those merchants who have supplies at the present time, it would certainly seem that the best market for this year is offering to them right now. It is indicated that supplies are coming along quite freely at the present time, and dealers look for a comparatively busy winter.

Waste paper offers an opportunity for a retail merchant to cut down his overhead to some extent, and by carefully watching the market he will be in a position where he can secure the best price for any offerings that he may have.

WAR-TIME ECONOMIES

(Continued from page 48)

express company during the other two working days. The inconvenience suffered is small and the economy worth while.

Sell Fewer Varieties

Definite savings are possible for the dealer who will cut down the number of varieties of any article he carries in stock. War restrictions are already reducing the number of varieties manufactured, and this fact alone will enforce a reduction in the varieties sold by the retailer. Far-sighted dealers are applying the same economy to articles which have not yet come under such restrictions.

Office Labor Savers

"A man should not do the work a machine will do for him." So runs an advertisement. This suggests the many economies in bookkeeping and selling which are possible through the use of cash registers, adding machines, calculating devices, typewriters and other office and store appliances. It is true that many of these sell at a substantial price, but in the long run this is more than offset by saving effected.

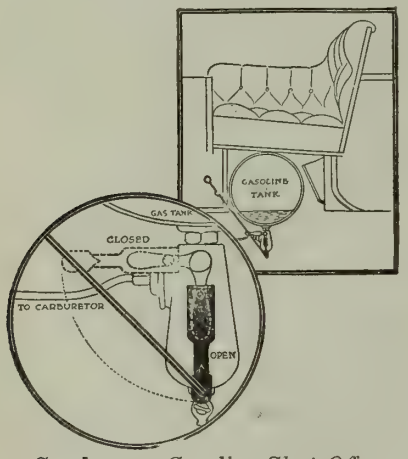
Despite all efforts to save paper, some will be wasted. This need not be a total loss. Don't burn it nor throw it away. Bale it and sell it. The proceeds each month are likely to exceed your postage bill for several months. Try it and see.

Will Save Work

Keep your nickeled goods in cases Electrical appliances standing on the countertop are more easily inspected than in cases. But there is such a thing as having the "bright works" too handy for careless fingering and scratching. It also conveys the idea that they are worth protecting. The show case keeps off dust and dirt and the confined air space greatly lessens the tendency to tarnish and discolor. In many climates goods exposed to the open air readily oxidize and corrode, but a closed show case minimizes this trouble. It reduces the necessity for frequent rubbing up and prevents goods from becoming "shopworn."

AMALGAMATION HALTED

Reports from London indicate that efforts to bring about an amalgamation of dye interests in the United Kingdom by the merging of British Dyes, Ltd., and Messrs. Levinstein, Ltd., are doomed to failure, because of a failure to reach an understanding among the chiefs of the two great concerns.



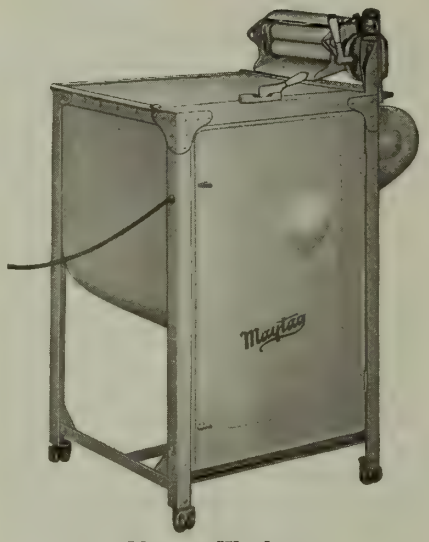
Each organization, it is known, has its own peculiar advantages, British Dyes being financed by the Government, or partially subsidized, and Messrs. Levinstein having a peculiarly strong financial footing otherwise. It is pointed out that the only possible outcome of the tangle is that each of the two companies may be allowed to go its own way, with provisions for a pooling of profits and losses and a co-operative operation effected through a joint committee.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

GASOLINE SHUT-OFF

The Sunderman Gasoline Shut-Off for Ford cars, patent applied for, is made by the Sunderman Corp., 9-11 Chambers street, Newburgh, N.Y., and so designed that all that is necessary to cut off or restore the gasoline is to pull or push the lever. To install this device it is only necessary to bore a hole in the floor board of the car, lift it, slip the shut-off over the handle of the gasoline pet cock, tighten the setscrew, attach the shut-off handle to the shut-off with a cotter pin and slip it through the floor board. This obviates any necessity for getting out of or under the car on the road or in the garage, when for any reason it is necessary to shut off the gasoline, regardless of whether it is to stop a leak,



Sunderman Gasoline Shut Off.

drain the carburetor, or cut off the flame from a backfire. In operation a pull of the handle shuts off and a push in the opposite direction starts the flow again of gasoline.

NEW MAYTAG WASHER

The claim is made for the new Maytag washer that it runs as silently as an electric fan and that it will do the entire week's washing for an average family in one hour. The design of the new Maytag is radically different from other machines and the resemblance to a cabinet phonograph is rather striking. It stands thirty-five inches high, is 21½ inches wide, and 24 inches deep. The Maytag is of metal construction throughout. The cylinder is of aluminum and the body of the machine of heavy non-corrosive metal, securely fitted and bolted on all sides to heavy angle iron. The claim is made that there is absolutely no place in which even a child can be caught in the machinery. The machine is driven by an electric motor. The com-

Maytag Washer.

plete washing is handled by two controlling levers, one for the washer and one for the wringer. Once the clothes are placed in the cylinder it is claimed that no further attention need be given the machine until they are ready to wring in fifteen minutes. The construction of the cylinder is such that hot suds are forced through the meshes of every piece of clothes six times with every revolution. It is claimed that dirt cannot withstand this vigorous action. The Maytag Washer is manufactured by the Maytag Co., of Newton, Iowa.

CASSCO TIRE PUMP

An engine-driven tire pump is being offered to the trade. It is sold for various cars and is adapted to a large variety of well-known makes. The manufacturers of the pump, the West Side

Cassco Pump for Ford Cars

Foundry Company, claim that their large output of grey iron castings has enabled them to produce this pump at a popular selling price and that it does the work of inflating tires quickly and effectively.

TRAWLING SPOON BAIT

Wright trawling spoons are made in two sizes of the best hard spring brass plate and wire. The entire bait is brass

Wright Trawling Spoon.

except the hook. The baits are nickel-plated on both sides and highly polished. The claim is made that these baits are thoroughly tested and are specially adapted for heavy game fish. They are manufactured by T. I. Thompson, Limited, of Owen Sound, Ontario.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

MIXED paints of all kinds feature the markets this week by substantial advances. Inside and outside house paints, inside floor paint, porch floor paint and marine paints all advance 25c per gallon. Carriage, wagon and implement paint, enamels and other specialties show a 10 per cent. increase over previous prices. Differentials on the various-sized containers for both paint and varnish have been changed, those smaller than gallon showing an increase of from 15c to $1.60 per gallon, according to size over the one-gallon cans. The new schedule of prices and differentials is immediately effective, and spring booking orders are being accepted on this basis.

A sharp decline in prices prevailing on solder has become effective during the week. The market on tin has gradually receded from the high levels reached in its meteoric flight a couple of months ago, and this has been the main factor in the easier tendency on solder. Lead, however, is very scarce, and practically all available supplies are being used in the prosecution of essential war work. This provides for a very firm undertone to the market on manufactured lead products, such as traps, bends, etc.

A 15 per cent. advance is provided for in new prices issued on eavetrough, conductor pipe and kindred lines. This is in line with tendencies outlined in HARDWARE AND METAL during the past couple of weeks, being brought about by continued scarcity of materials and high production cost.

Manufacturers of corrugated sheets are urging the trade to conserve in the use of this commodity and indicating that preference will be given in supplying essential industries with their requirements. Nominal quotations only may be said to prevail, and retailers have been advised to accept no business on firm basis until manufacturer has confirmed prices at which material will be available.

An advance of $1 per 100 pounds in galvanized sheets has been made in some quarters, and the feeling generally is towards a higher level. The situation in regard to supplies of sheets seems likely to improve. Jobbers indicate that shipments now rolling will help out materially in both black and galvanized.

An increase of from 10 to 15 per cent. is provided for in new prices issued on one line of silver-plated flatware. Wipers' waste is another line to advance, present prices being up 1c per pound. Small twines are up from 2c to 6c per pound, and other items joining the upward trend this week are butt and socket firmer chisels, drawknives, lard presses, raisin seeders, sausage stuffers, roller skates and fly oil. Mops are also higher, and glass lamps are up about 20 per cent. Sleigh bells have been revised; new prices show a 10 per cent. advance.

MONTREAL MARKETS

MONTREAL, Oct. 3—Numerous advances have been made in hardware lines this week. These include jack screws, brooms, saws, pliers, blacksmith forges and blowers, post drills, wrapping paper self-wringing mops and various lines of builders' hardware. Solder has declined somewhat, and this is the resultant effect of a lower tin market, although tin itself has not changed from last week. The lead market is decidedly firm and advances are likely for various manufactured lead products. Anvils are so scarce that one large jobber has had to cease selling this line. In a general way business has not been as active as expected. A deal of uncertainty exists with regard to supplies. It is thought that, in some respects at least, retailers have fairly good stocks on hand. Nails and fall goods are moving very well, while heating stoves and ranges are especially active.

Hand and Other Saws Advance 5% to 10%

Montreal.

SAWS.—Hand, rip, pruning, compass, and other saws are advanced in price. This is not uniform but will run from 5 to 10 per cent. This change applies to the lines manufactured by Shurly and Dietrich.

Pliers up 5% to 10%; File List Changed

Montreal.

PLIERS, FILES.—An advance has been effected for Utica pliers, and this will be from 5 to 10 per cent. A change has been made in certain file lists. This is not a general change and in no way affects prices. It is rather a move to conserve material and some some odd lengths and sizes are being discontinued. For instance, a customer wanting a mill file of 13 inch length would require to take either a 12 inch or a 14 inch size. This should work little hardship.

Washboards, Brooms Record Advances

Montreal.

WASH BOARDS, BROOMS.—New advanced prices are out on wash boards of various styles. The price of Canuck is now $6.30 per dozen; Enamel Queen, $7.35 per dozen; supreme zinc., $5.15 per dozen; best heavy zinc, $5.65; Wash Day Surprise, $3.50. Brooms also have recorded advances. A few of the new prices applied here are: No. 2, $10.50 per dozen; No. 4, $10.60; "C," $8.50, and No. 2 cable, $12.50. The advance in a general way is about 10 per cent., and even further increases may be expected.

New High Prices For B.S. Forges, Drills

Montreal.

FORGES, BLOWERS, POST DRILLS.—Increased prices are out for blacksmith forges, and one line of blowers. These are as follows: No. 73, $43.50 each; No. 76, $36; No. 61, $46; No. 83, $38; No. 85, $22; No. 86, $25; No. 100, $14; No. 101, $16; No. 150, $12.50; No. 151, $13.75; No. 401, $36; No. 402, $67; No. 42, 36; No. 43, $40; No. 45, $38; No. 46, $30, and No. 40 blowers, $40. Post drills are also up; No. 93 is selling at $19 each; No. 98, $26.40; No. 200, $39; No. 92, $9.35, and No 98, $16.

Higher Prices Named For Jack Screws

Montreal.

JACK SCREWS.—Advances are made for jack screws. The prices per dozen for some of the regular lines are as follows: For 1¼-inch, $36 per dozen; 1½-inch, $50; 1¾-inch, $80; 2-in., $85; 2¼-in., $138, and 2½-in., $170. Ratchet jack screws are priced at $77 per dozen.

Wrapping Paper, Mops Builders' Hardware Up

Montreal.

PAPER, MOPS, BUELDERS' HARDWARE.—Increased prices are applied this week to kraft wrapping paper. This is now selling at 10½c per pound. Self-wringing mops are quoted at $5.75, and extra cloths at $2.90 per dozen. Various lines of Taylor-Forbes hardware are undergoing revision and the lines affected are barrel bolts, chain bolts, hand rail brackets and door buttons. Quilting frame clamps, chest handles, sash lifts, push plates, pulls, saw vises, etc., are also included.

Coal Oil Up ½c; Gasoline Unchanged

Montreal.

GASOLINE, COAL OIL.—A steady and unchanged position still applies for gasoline. There has been little new in the situation although stocks are stated to be a little larger, due to the conservation practised. Coal oil is up ½c gallon, and there is plenty here to meet the demand. It would seem that there is every reason to conserve stocks of this as the productive capacity on this continent is not equal to the demands in sight. Motor gasoline is still selling at 34c, coal oil now ranges from 19½c to 22½c per gallon according to grade.

Stoves Move Freely; Wares Selling

Montreal.

STOVES AND WARES.—A heavy movement of stoves is reported, and for the immediate present stocks have been large enough to take care of orders received. How long the supplies will last it is difficult to state. The getting of materials now is a serious problem, and with respect to the future the situation looks more difficult than it has to date. With respect to wares, there is a good demand and manufacturers are busy. Materials have been slow in arriving and certain supplies of coal hod and stove board material are just coming that were expected weeks ago.

Still Enough Nails; Undertone is Firm

Montreal.

NAILS AND WIRE.—A firm position surrounds the wire nail market but there are no quotable changes. Jobbers report a fair amount of business and they express the feeling that retailers are fairly well supplied with what they will require for a while. The base price is still $5.35 and for cut nails the basis is $5.60 per 100 pounds. Standard smooth wire is still based at $6.25 per 100 pounds.

Sheets Strong; Supplies Smaller

Montreal.

SHEETS.—An evident lowering of stocks in jobbers' hands is responsible for a firming of the market and the position will be increasingly stronger in coming weeks. There is a very fair movement and this is absorbing stocks, some being without certain gauges already.

BLACK SHEETS—	Per 100 lbs.		
10 gauge	$9 75	$9 75	$11 50
12 gauge	9 50	9 65	11 00
14 gauge	8 25	9 00	7 95
16 gauge	8 40	9 15	8 00
18-20 gauge	8 50	9 25	8 05
22-24 gauge	8 75	9 60	8 10
26 gauge	9 70	9 75	8 15
28 gauge	....	9 90	8 25
GALVANIZED SHEETS—			
10¾ oz.	$10 50	$10 75	$12 00
28 gauge	10 25	10 40	11 65
26 gauge	10 00	10 10	11 35
22 and 24 gauge	9 75	9 90	11 15
20 gauge	9 60	9 70	11 05
18 gauge	9 45	9 70	10 95
16 gauge	9 35	9 55	10 85

NOTE.—These prices are for full bundles, an extra charge of 25c per 100 lbs. is made for broken lots.

Iron Bars and Steel Very Firm

Montreal.

IRON AND STEEL.—The markets are very firm and the jobbers have been able to take care of the business coming to them very well. When special or odd sizes are wanted the position is different and there is delay in securing them. No changes are recorded for the week but the undertone is firm.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Rope Sales Normal on Held Basis

Montreal.

ROPE.—Sales of rope are made on an unchanged basis and the business conditions are about normal. It is not a time of great activity and stocks are fully maintained to meet all demand. Soft fibres still are moving upward. Pure manila rope is selling on a basis of 39c; British manila at 33c, and sisal 27½c per pound.

Solder is Lower; Lead Products Firmer

Montreal.

LEAD PRODUCTS.—Declines are registered in the prices for solder. This applies to the various grades and new prices are given below. The changes apply also to wire solder. Lead pipe and other lead products are decidedly firm, with a strong probability of advances being made in the immediate future. This will be a direct result of the lead position, which is firmer than ever.

Lead pipe, lb.	$0 15	$....
Lead waste pipe, lb.	0 16	....
Lead traps and bends	Net list.	
Lead wool, lb.	0 15½	0 16
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 13¼
Lead sheets, 4 to 8 lbs., sq. ft.	0 12½	0 13
Cut sheets, ¾c lb. extra, and cut sheets to size, 1c. lb. extra.

Solder, strictly, lb.	....	0 47
Solder, commercial, lb.	....	0 43
Solder, wiping, lb.	....	0 43
Solder, wire, lb.	0 56	0 70
Solder wire (8 gauge)—		
40-60	....	0 53
45-55	....	0 57½
Zinc sheets, casks	....	....
Do., broken lots	....	....

Old Material Steady; Movement Small

Montreal.

OLD MATERIAL.—No changes have been made in old materials. The market is somewhat quiet and this is probably to be expected. The old lead products are firm, of course, and this will continue with lead so scarce and the price high. Some stock still arrives from country dealers and all heavy iron and steel available is in better demand than the lighter scrap.

Dealers' Buying Prices:		
Tea lead	0 05	0 05¾
Heavy lead pipe	....	0 07½
Yellow brass	....	0 13½
Red brass	....	0 23½
Light brass	....	0 08

Stove plate, per ton	26 00	28 00
No. 2 busheling	13 00	14 00
Old rubbers, boots and shoes	....	0 07¼
Overshoes, lumbermen's rubber boots	....	0 05
Bicycle tires	0 04½	0 05
Automobile tires	0 04¾	0 05

No American Lead; Copper Firm

Montreal.

INGOT METALS.—Jobbers are unable to secure any supply of American produced lead and the market holds de-

cidedly firm. Copper is firm also, the trade finding it necessary to trade largely in casting grade. Tin markets are fairly easy, but without change.

COPPER.—The demand for copper is light and stocks also are short; the undertone is naturally firm and all that the Canadian jobbers seem able to supply is that of casting or electrolitic grade. Price holds at 28¾ to 30c per pound.

TIN.—An easier tone characterizes the market. Large buyers, some think, are resting on their oars as far as purchasing is concerned. This would be due to the probability of price fixing which has not yet been arranged. Local business is rather light at 95c to $1 per pound.

SPELTER.—The tone is firm, although there is very little movement. Supplies have moved more freely in the States of late. Local prices are still unchanged at 10½ to 10¾c per pound.

LEAD.—Jobbers state that they are unable to get any but Canadian lead, and this is none too free. The firmness of the last week continues but there is no actual change with prices at 10 to 10¾c per pound.

ANTIMONY.—This is dull and without change here. Prices are steady at 15 to 16c.

ALUMINUM.—The price being fixed on this and with no great demand obtaining, the position is quite unchanged. Prices are still 50 to 55c per pound.

TORONTO MARKETS

TORONTO, October 3—Price changes are again numerous during the week and among the lines which have gone to higher levels are to be noticed: carriage heaters and coal, raisin seeders, sausage stuffers, and roller skates. A change has also been made in at least one line of mops, floor polishers and dusters, present quotations showing a substantial increase over previous figures. A change in Community plate has also been put into effect during the week amounting to about ten per cent. Coal oil has registered an advance of one-half cent per gallon. Solder shows a sharp decline, whereas eavetrough and conductor pipe are up 15 per cent.

Sales of oil heaters, electric heaters, coal oil, in fact all fall lines, have been maintained at a very satisfactory level. Difficulty in securing the necessary merchandise to carry on with increases and the outlook for spring is by no means too bright.

Raisin Seeders, Stuffers Higher

Toronto.

RAISIN SEEDERS, SAUSAGE STUFFERS.—New prices have been named on raisin seeders and sausage stuffers, which provide for advances over former figures. The Enterprise raisin seeder No. 36 is now quoted at $31.00 per dozen. Extra rolls for this are available at $6.00 per dozen. The Enterprise sausage stuffer No. 25 is now quoted at $11.35 each, and the No. 35 at $13.50 each. Large plates for No. 25 sausage stuffer are now invoiced to the trade at 85c each, and for the No. 35, $1.50. Enterprise lard presses are also up, the No. 15 selling at $9.00 each, No. 25 at $11.00 and No. 35 at $13.50.

Revised Prices on Carriage Heaters

Toronto.

CARRIAGE HEATERS.—A further revision has been deemed necesary on carriage heaters. The manufacturers intimate that the scarcity of material is becoming more evident every day, and the difficulty of securing competent labor is also considered a factor in this move. Prices which are now being made to the trade on the carriage heater No. 5B are $2.35 each; No. 7C, $2.60; No. 7D, $2.85. The Clark carbon bricks are quoted at 80c a dozen.

Mops, Dusters Revised Upward

Toronto.

MOPS, DUSTERS.—Revised prices have been issued on the Tarbox line of mops, mop cloths, floor polishers and dusters. These provide for advances in each instance, and under existing conditions are considered justified. To-day's prices on the various items are as follows: self wringing mops, $5.00 per dozen; No. 1 mop cloths, $3.15 per dozen; Star mop sticks, $2.00 per dozen; Tarbox circular mops, $9.75 per dozen; triangular mops, $12.20 per dozen; floor polisher No. 1, $14.65 per dozen; handled dusters, $4.90; dusting cloths, No. 1, $2.45 per dozen.

Silver Plated Flat-Ware Up 10 Per Cent.

Toronto.

SILVER PLATED WARE.—An advance approximating ten per cent has been made in Community plate during the week, and new prices on the Sheraton pattern which also rule on other patterns are as follows: Tea and coffee spoons, $4.55 per dozen; dessert spoons, $8.45; table spoons, $9.10; flat handled forks, dessert size, $8.45 per dozen; medium size, $9.10; model handle knives, dessert size, $8.20; medium size, $8.40; Hollow handle knives, dessert size, $13.10 per dozen; medium size, $13.50. Hollow handle pie servers are now quoted at $28.56 per dozen; sugar shells have advanced to $9.50; berry spoons are selling at $21.75 per dozen; butter knives, flat handled, are up to $9.50 per dozen; cold meat forks at $14.55 and pickle forks at $9.25 per dozen have each followed the upward trend.

Roller Skates Climb; Clothes Pins

Toronto.

ROLLER SKATES, CLOTHES PINS.—New prices have been named on roller skates during the week, which provide for an advance in these lines. An embargo has been placed on the shipment of these to Canada from the States so prices are named subject to goods being in stock. Jobbers in some instances are in fairly good shape to take care of orders for a little while, but it is not thought likely that existing stocks will carry through for a very long period. The No. 4, ball bearing, have advanced to $3.25 per pair, and the No. 2280 are quoted at 95c per pair.

Common clothes pins have registered a sharp advance and are quoted at $1.45 per case.

Profit Deals Cancelled; Prices Firm

Toronto.

O'CEDAR PROFIT DEALS. — It is intimated by the manufacturers that owing to the continual increases in the cost of raw materials of all descriptions, including packing cases, and the general advance in freight rates and operating expenses they have been compelled to cancel, on and after October 1, 1918, all Profit Deals on O-Cedar Products, namely, No. 51, 52, 54, 59, 61, 62, 63, 64, 65, 66, 67, and 68.

Duster No. 11 and Duster Cloths No. 12 and 13 have also been cancelled as the advancing cost of material and difficulty of delivery, it is stated, makes such action necessary.

No change in prices of regular lines has been made, these ruling at following levels.

O-Cedar Products—	Per doz.
4 oz. Polish (bottles)	$ 2 00
12 oz. Polish (bottles)	4 00
Quarts Polish (cans)	10 00
Half Gallons Polish (cans)	16 00

Rugs To Advance; Fly Oil Higher

Toronto.

RUGS, FLY OIL.—Higher prices on Congoleum rugs in the near future seems a probability. Indications are that the United States Government will materially curtail production, this being effected through cutting off fuel supplies, rather than direct legislation, and the result of this action will mean sharp advances in prices.

Creonoid fly oil has also undergone an advance in price. Quotations have been named for spring at higher levels than immediate business. Half-gallon cans, immediate delivery, are now quoted at $7.50 per dozen; spring delivery, $7.75; one gallon cans, immediate delivery, are up to $10.00 per dozen, and spring delivery, $11.00. Orders for spring are

being taken subject to being able to supply.

Chisels, Draw Knives, Hammers Higher

Toronto.

CHISELS, DRAW KNIVES, HAMMERS.—Revised discounts on chisels have been issued which provide for an advance in net prices. Butt and socket firmer chisels are now quoted at a discount of 55 and 5 per cent. Draw knives are also on the upward move, the present selling basis being arrived at from a list of $25.00 per dozen for 9-inch and $26.00 per dozen for 10-inch, subject to a discount of 45 and 5 per cent. New prices just issued on ball pin hammers provide for an advance of approximately 10 per cent.

Table Cutlery Goes Higher

Toronto.

TABLE CUTLERY.—Quotations on the popular 900 line of table cutlery show an advance in prices issued to the trade during the week. Figures reached in these latest increased prices are as follows: No. 900 tea spoons, $4.75 gross; dessert spoons, $9.30 gross; table spoons, $9.50 gross; dessert forks, $9.75 gross; table forks, $10.10 gross.

Bung Borers Up; Pine Tar, Too

Toronto.

BUNG BORERS, PINE TAR.—Higher levels have been reached on bung borers in new prices named to the trade this week. The No. 1 is now being quoted at $2.25 each, the No. 2 at $3.15, and the No. 3 at $4.50. Pine tar in pints is higher, being now quoted at $2.00 per dozen.

Rope Clips, Riddles, Chain Blocks Change

Toronto.

ROPE CLIPS, RIDDLES, CHAIN BLOCKS.—Wire rope clips have reached a new scale of quotations, ⅜-inch now selling at $9.50 per 100, ½-inch at $12.35, and ⅝-inch at $15.00. Moulders' riddles have undergone a further revision upward, the brass selling at $29.75 per dozen and the galvanized at $15.00. Ford's Weston chain blocks shown an advance of 20 per cent. in prices issued to the trade to-day.

Wipers Up 1c lb.; Oakum in Demand

Toronto.

WASTE, OAKUM.—Wipers show an advance of 1c per pound in prices now being issued to the trade, while other lines of waste remain unchanged. The demand for all grades is good and requirements of trade being met. Oakum is firm and unchanged with the demand along a very satisfactory basis. Prices appear in current market quotations.

Sharp Advance in Soil Pipe, Fittings

Toronto.

SOIL PIPE, FITTINGS.—Owing to restricted output, lack of raw material and labor conditions, a sharp advance has been made in cast iron soil pipe and fittings dating from September 27. In view of said conditions it is considered inadvisable to make any bookings ahead —in other words, if this commodity is required for a specific purpose it should be purchased and taken into stock to insure delivery. Quotations are now based as follows: Medium and extra heavy soil pipe, 2 in. to 6 in. 15 per cent.; medium and extra heavy fittings, 2 in. to 6 in., 25 per cent.; 8 in. soil pipe and fittings, net list.

Weigh Beams Go Up; Wrenches

Toronto.

WEIGH BEAMS, WRENCHES.—A change in weigh beams is reported and new prices are being quoted at a discount of 5 per cent. from list. A further change in agricultural wrenches has also been made and new discount of 30 per cent., which provides for an advance, is now ruling.

Sleigh Bells Up 10%; Glass Lamps 20%

Toronto.

SLEIGH BELLS, GLASS LAMPS.—An advance in sleigh bells amounting to 10 per cent. and affecting the following styles has been made. The lines changing are the York Eye collar bells on strap and team bells, including Swiss. Manufacturers of the common glass oil lamps announce a sharp advance in these which amounts to about 20 per cent.

Nails Hold Firm; Wire Steady

Toronto.

NAILS, WIRE.—Nails have held firm and unchanged during the week, the wire selling at a base price of $5.30, and the cut at $5.60 per 100 pounds to the retail trade. It is understood that a minimum price of $5.55 on wire nails, and $5.85 on cut to the user has been agreed upon by Toronto merchants. Other items on which minimum prices have been adopted to the user are sash weights at $4.75 per 100 pounds; sash cord at 85c to 90c per pound, and asbestos sheathing at 15c per pound.

Stove Outlook Is No Better; Wares

Toronto.

STOVES, ENAMELWARE.—Latest advices from the United States are to the effect that stove manufacturers there are held down to 50 per cent of their normal production for the last four months of the year, and in this 50 per cent. Government orders will have to be taken care of. Locally the situation shows little change, unless it can be said that conditions are growing worse. Materials are increasingly hard to get, and the War Trade Boards at Ottawa and Washington show no disposition to modify the recent rulings which they have put into effect with regard to supplies of materials.

Enamelware is moving forward fairly freely, and this is another line which will suffer by the restriction on sheets. Whether the day will come when the householder will be unable to buy a tin pan seems hardly likely. However, the situation as a whole is not very encouraging from the manufacturer's standpoint, and it necessarily must be reflected on the merchant who deals with the consumer. Prices show no further change, and at the present time the requirements of the trade are being fairly well met.

Coal Oil Up ½ Cent Gallon; Gasoline

Toronto.

OILS, GASOLINE.—An advance of one-half cent per gallon has been made in the price of coal oil during the week. No particular reason is assigned for this, but it is assumed that recent advanced freight rates have affected this commodity along with all other classes of goods, and is primarily back of this change. Prices range from 18½ to 21½ cents per gallon, according to grade, under the new scale of quotations. Gasoline continues to move forward quite freely, but it is indicated that the gasless Sundays have resulted in a curtailment of the use of this much needed commodity. The requirements of the trade are being met, and it is not thought likely that any shortage will develop for the balance of this year. The price on the motor grade at 33c per gallon shows no change.

Cordage Firm; Twines Go Up

Toronto.

CORDAGE, TWINES.—The cordage situation shows an unchanged level. The market at the present time is rather dull, although a fair movement to retail centres has been in progress. Prices are very firmly held and the undertone is decidedly strong. To-day's prices which now rule for the various grades are as follows: pure manilla, 39c per lb.; British manilla, 33c, and sisal, 27½c.

Twines show an advance for both jute and hemp, averaging from 2c to 6c per pound. The question of supplies is an uncertain one and no improvement in conditions surrounding getting materials is in evidence.

Firm Undertone in Iron and Steel

Toronto.

IRON AND STEEL. — The market rules with a very firm undertone. No price changes have become effective as yet, but a slight increase to higher levels would not come as any great surprise.

Business is along normal lines and considered quite satisfactory.

TORONTO—	Per 100 lbs.	
Common bar iron	....	$ 5 25

Some Sheets Coming; Galvanized Up

Toronto.

SHEETS, PLATES.—Indications are that stocks of both galvanized and black sheets will be augmented by arrivals during the next couple of weeks. As a matter of fact one jobber stated he would be in very good shape by that time. That supplies will be absorbed quickly seems more than likely too, and it is thought conditions will show little consistent improvement for some time to some. Commercially, sheets are almost unobtainable. This should mean a cleaning up of stocks throughout the country, and it is intimated that to-day supplies in jobbers' hands are the lowest they have ever been. Galvanized are up $1.00 per 100 pounds, making basis on 10¾ oz. $12.00 with corresponding increase in other grades. Both 10¾ and 28 gauge are practically off the market locally and supplies of 12 gauge, 14 gauge and 16 gauge black sheets in some quarters are exhausted for the present.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	....	$10 00

Prices shown are for full cases An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

Orders Being Carefully Watched

Toronto.

CORRUGATED SHEETS.—Manufacturers intimate that stocks have reached such a low point that they are compelled to exercise greatest discrimination in taking care of orders. They further indicate that preference will be given to supplying sheets for essential industries. Quotations shown can be termed nominal only, and dealers are advised not to quote firm prices on this basis until they have had an opportunity to confirm with the manufacturers.

TORONTO—	Per 100 Sq. Feet Gal'zed	Painted
Corrugated Sheets—		
No. 28 gauge	$ 9 00	$ 7 50

No 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Eavetrough, Conductor Pipe Up 15 Per Cent.

Toronto.

EAVETROUGH, CONDUCTOR PIPE.—In line with firm tendencies outlined in these columns, an advance of 15 per cent. has been made in eavetrough, conductor pipe and kindred lines. Scarcity of materials and labor shortage are factors contributing to this change. Lists which are now subject to an advance of 15 per cent will be found in current market quotations.

Firm Market in Wrot. Pipe; Tubes

Toronto.

WROUGHT PIPE, BOILER TUBES.—A firm market continues to manifest itself in wrought pipe and conditions outlined during the past week or two show no improvement. Materials are hard to get and stocks of some grades are reaching the vanishing point. Prices appear in current market quotations.

Supplies of boiler tubes are getting smaller, but dealers are still looking for shipments of some of the larger sizes. Quotations are firm and unchanged.

BOILER TUBES—

Toronto—	Per 100 feet Cold drawn	Lapweld

Sharp Drop in Solder Recorded

Toronto.

LEAD AND ZINC PRODUCTS.—Lower prices are again in evidence during the week, and new quotations provide for a sharp decline. Guaranteed is being sold at 50c per pound; strictly at 47c; commercial at 42c and wiping at 40½c. The easing away of the tin market is primarily responsible for this move.

Manufactured lead products are holding very firm. Supplies of pig lead are being largely absorbed in essential war work, and this provides a strong undertone to manufactured goods for commercial requirements. Quotations show the following range.

Lead pipe, lb.		0 15
Lead waste pipe, lb.	....	0 16
Lead traps and bends	....	Net-list
Lead wool, lb.	....	0 14
Lead sheets, 2½ lb. s. ft., lb.	....	0 14½

No. 1 busheling	16 00	17 00
No. 2 busheling	....	12 00
Country mixed scrap	....	16 00

Tin Goes Lower; Lead Scarce

Toronto.

INGOT METALS.—Quotations on tin show a further easing away and supplies generally are sufficient for the demand. Supplies of lead are being used exclusively for war work, and even at that it is difficult to take care of the demand. Spelter is quiet and there is little interest in antimony.

COPPER.—There is no surplus being accumulated in spite of the efforts of the producers to keep fairly well ahead of the demand. War requirements seem to be on the increase, but there are no indications that any essential industry is suffering. Locally prices are unchanged at 30c to 32c per pound.

TIN.—The basis of quotations prevailing locally, 95c to $1.00 per pound, represents a decline. This is now general and it is indicated that supplies are sufficient for the demand of the trade.

SPELTER.—The market is dull and without any particular feature. Supplies are fair and the demand within narrow channels. The price holds at 11c per pound.

LEAD.—Supplies are being used practically altogether in the output of war materials. Production has fallen away and producers are finding it difficult to take care of the war industries themselves. Nominally quotations remain unchanged at 10½c to 11c per pound.

ALUMINUM.—Government requirements must be met, and outside sources continue to get little of the available supply. Prices hold around 50c per pound.

ANTIMONY.—No new feature marks the market. Supplies are equal to the demand, but little interest is apparent. The price of 18c per pound locally is unchanged.

LONDON MARKETS

LONDON, October 3—New prices established on silver plated flatware show an advance of about 15 per cent. during the week. Other important changes made include metal box binding, flour mills, mop wringers, combination padlocks, shoe polish and fly oil. In each instance the change represents an advance in price. Prices on all lines continue very firm with an ever widening range of goods placed on the short list.

Business here continues good. There is an exceptionally heavy sale at present for oil heaters, wood stoves, and kindred lines. Axes, cross-cut saws, loaded shells, horse blankets, lanterns, and stove pipes, etc., are other lines which are moving forward to the trade very freely.

Silver Plated Flatware Up 15%

London.

SILVER-PLATED FLATWARE.—New prices just issued on Community silver-plated flatware show an advance of 15 per cent. It is understood that conditions warrant this advance, and scarcity of materials and shortage of labor are factors with which the manufacturers have to contend. The new prices on some of the best sellers follow: Tea spoons, $4.54 per dozen; coffee spoons, $4.54; dessert spoons, $8.44; table spoons, $9.08; dessert forks, $8.44; medium forks, $9.08; cold meat forks, plain, $14.52; berry spoons, plain, $21.72; sugar shells, plain, $9.48; sets model handle dessert knives and flat forks, $8.60 per set; sets model handle medium knives and flat forks, $9.00.

Tinned Spoons, Forks Up; Flour Mills, Too

London.

TINNED SPOONS, FLOUR MILLS.—Higher levels have also been reached on tinned spoons and forks in new prices issued to the trade this week. The present basis of quotations is as follows for the No. 900 line: teaspoons $4.50 per gross; dessert spoons, $8.75; tablespoons, $9.00; medium forks, $9.50. Flour mills are aonther line of goods which have registered an advance in price. The No. 1 Home is now quoted at $3.75 each and the No. 2 Power at $9.50 each.

Padlocks Higher; Nails Firm

London.

PADLOCKS, NAILS.—Revised prices have been issued on combination padlocks which provide for an increase of price over former levels. The No. D is now quoted at $1.00 each, the No. E at $1.25, and the No. B at $1.15. No change in the situation on nails is reported during the week. Market rules with a very firm undertone and a firm movement to the retail trade is in progress. Wire nails at a base price of $5.30 and cut nails at $5.60 per 100 pounds are unchanged.

Shoe Polish, Fly Oil Go Higher

London.

SHOE POLISH, FLY OIL.—Another advance has occurred in 2 in 1 shoe polish and price now being named to the trade on black, tan or ox blood is $1.30 per dozen. A change in Dr. Williams' fly oil has also been made and spring booking orders are now being accepted at the following new prices: 1 gal. tins, $12.00 per dozen; ½ gal. tins $8.00 per dozen; these are advances.

Mop Wringers Up; Weather Strip Selling

London.

MOP WRINGERS, WEATHERSTRIP.—Mop wringers have also followed the upward trend and new prices issued to the trade this week show a substantial advance. The present basis of quoting, complete with pail, is for the Domestic, $25 per dozen, Standard, $27.75, and Janitor, $32.50. A very good sale of weatherstrip is in progress and prices show no change for the week. Wood and felt are quoted at a discount of 60 per cent., the Swan hardwood at 75c per set, and the Frost King at $4.40 per doz. packages.

Revision in Box Binding; Stove Casters

London.

BOX BINDING, CASTERS.—Metal box binding is another line to register an advance during the week. The new price on the ⅝ in. wide in 600 ft. coils is $3.75 per coil. Stove and range casters are also being quoted at higher figures. The Adams stove casters are now selling at a new price of $1.70 per set of four.

Linseed Oil Firm; Turps Steady

London.

LINSEED OIL, TURPENTINE.—No change in the market on linseed oil is reported for the week. Sales are small and supplies ample to meet the demand. Quotations range as follows: 1 to 2 bbls, raw, $2.10, boiled, $2.13 per gal.; 3 to 5 bbls., raw, $2.09, boiled, $2.12 per gal.; 6 to 9 bbls., raw, $2.07, boiled, $2.10 per gal., less bbls., add 10c per gal. Turpentine is also without feature, sales being confined to narrow channels and prices unchanged at following levels: 1 bbl. lots, $1 per Imp. gal.; 2 to 4 bbl. lots, 99c per Imp. gal.; 5-gal. lots $1.10 per Imp. gal.

WINNIPEG MARKETS

WINNIPEG, October 3—Stiff advances are revealed in many important lines affecting the hardware trade during the week. Market prices show increases in stove pipe and elbows, taper pipes, tee pipes, oil stoves and heaters, drive well points, floor wax, lamp chimneys, lamp reflectors, grub hoes, clay picks, mattocks, crowbars, and window glass. Indications are that all other lines are holding very firm.

Business is reported heavier than immediately preceding weeks and a steady improvement is expected from now on.

Stove Pipes, Elbows Up 10 Per Cent.

Winnipeg.

STOVE PIPE ELBOWS.—Stove pipes and elbows have undergone a further revision due to the extreme shortage of material and heavier freight rates. New prices are from 5 to 10 per cent. higher than former quotations. Quotations now ruling are as follows:

Stove Pipe—Riveted—6-inch, $21.40; 7-inch, $22.65, 100 lengths. Ready to rivet—6-inch, $20.35; 7-inch, $21.70, 100 lengths. Patent—6-inch, $23.55; 7-inch, $25.25, 100 lengths.

Stove Pipe Elbows—Light—6-inch, $2.50; 7-inch, $2.70, dozen. Heavy—6-inch, $2.95; 7-inch, $3.30; 8-inch, $4.90 dozen.

Taper Pipes 6 to 7-inch, $3.15; 7 to 6-inch, $3.15 dozen.

Tee Pipes—6 and 7-inch, $5.12 dozen.

Oil Stoves, Heaters, Register Advance

Winnipeg.

OIL STOVES, HEATERS.—New prices have just been announced covering oil stoves and heaters. All lines show a slight upward trend in price and are quoted to-day as follows: Oil heaters, No. 525, $5.25; No. 530, $6.20; No. 630, $7.70 each. Oil stoves (New Perfection) No. 32, $14.80; No. 33, $18.95; No. 34, $24.20 each. Oil stove ovens No. 41, $4.50; No. 42, $5.85 each.

Higher Levels For Window Glass

Winnipeg.

WINDOW GLASS.—Recent predictions by HARDWARE AND METAL as to higher prices on glass have been fulfilled by an advance during the week of from 5 to 10 per cent. The curtailment of production by the United States government with a consequent increase in overhead expense along with higher freight rates, exchange, etc., are factors contributing to this change. New prices now in effect on the various breaks are as follows:

WINDOW GLASS—

	Single.	Double.
Up to 25-inch....	$15 50	$19 50 per 100 ft.
26 to 40-inch....	16 50	22 00 " " "
41 to 50-inch....	19 50	25 00 " " "

51 to 60-inch....	20 50	25 50	"	"	"
61 to 70-inch....	21 50	27 00	"	"	"
71 to 80-inch....	.....	29 00	"	"	"
81 to 85-inch....	.....	36 50	"	"	"
86 to 90-inch....	.....	39 00	"	"	"
91 to 95-inch....	.....	40 00	"	"	"
96 to 100-inch....	.....	46 50	"	"	"
101 to 105-inch....	.....	51 50	"	"	"
106 to 110-inch....	.....	57 50	"	"	"

Single lights, 25% discount from pane price list.

Drive Well Points Revised Upward

Winnipeg.

DRIVE WELL POINTS.—The shortage of brass as well as increased labor costs is given as the chief cause for the present advance in drive well points. These move up approximately 5 per cent. and are quoted to-day at the following figures: No. 90, $26.10; No. 94, $33.35; No. 98, $40.60; No 140, $43.50; No. 144, $52.20; No. 164, $65.25; No. 168, $76.10; No. 184, $130.50 per dozen.

Sharp Increases in Lamp Chimneys

Winnipeg.

LAMP CHIMNEYS, LANTERN GLOBES, REFLECTORS.—Prices on lamp chimneys and lantern globes which have remained firm for the past year have just been revised. Lamp chimneys show an advance of approximately 20 per cent., while the lantern globes show 5c per dozen advance on the long pattern, and a reduction of 5c per dozen on the squat pattern. Stocks are reported as fairly well assorted and shipments are moving freely. Prices now in effect are given herewith:

LAMP CHIMNEYS—

Size A—4 doz. case, $4.95 case.
Size A—8 doz. case, $9.10 case.
Size A—Less than full cases, $1.25 dozen.
Size B—3 doz. case, $4.30 case.
Size B—6 doz. case, $7.80 case.
Size B—Less than full cases, $1.40 dozen.
Rochester Chimneys—No. 2, $2.00; No. 3, $3.10 dozen.
Lantern Globes—Long pattern, $1.05; squat pattern—$1.05 dozen.
Lamp Reflectors—7-inch, $4.30; 8-inch, $5.15 dozen.

Picks, Grub Hoes, Crow Bars, All Up

Winnipeg.

PICKS, GRUB HOES, CROWBARS.—New prices just received from the manufacturers announce further increases in prices on grub hoes, clay picks, mattocks and crowbars. The majority of the advance is due to increased freight rates, which is more noticeable on these heavier lines of hardware. New prices just issued are given as follows: Grub hoes, $10.90 per dozen; clay picks, 5-6 lb., $12.60 per dozen; 6-7 lb., $13.50 per dozen; long-cutter mattocks, $13.85 per dozen; pick mattocks, $13.85 per dozen; crowbars, wedge or chisel point, 11¼c per pound.

Enamelware, Tinware At New Discounts

Winnipeg.

ENAMELWARE, TINWARE, ETC.—In line with predictions made in HARDWARE AND METAL with regard to higher prices on tinware, enamelware, etc., new prices are now to hand which show advances of from 10 to 15 per cent. To-day's discounts to the trade are as follows:

Enamelware—Scotch Grey—40% discount; Colonial, Imperial, Pearl, 20% discount; Premier, Canada, Diamond, 12½% on list; Whiteware, 40% discount.
Japanned Ware—Ordinary, 30% on list; White, 50% on list; Sprinklers, 40% on list.
Stamped Ware—Plain, 40% discount; retinned, 33 1/3% discount.
Pieced Ware—Ordinary, 65% on list; Copper Bottoms, 85% on list.
Sheet Iron Ware—30% on list.
Light Galv'd Pails and Tubs—40% on list.
Heavy Galv'd Pails and Tubs—30% on list.
Japanned Coal Hods—50% on list.
Galvanized Coal Hods—60% on list.

New High Levels On Floor Wax

Winnipeg.

FLOOR WAX.—Floor wax has again registered a heavy advance as supplies daily become harder to procure due to transportation difficulties. This is now selling to the trade at 70c per pound, making the net prices on the different sizes as follows: 1-lb. tins, $8.40; 2-lb. tins, $16.80; 4-lb. tins, $29.40 per dozen.

Linseed Oil Firm; Turpentine Steady

Winnipeg.

LINSEED OIL, TURPENTINE.—Linseed oil prices continue firm on the local market at the following prices: Raw linseed oil $2.20 per gal., boiled, $2.23 per gal. in single barrel lots. Turpentine prices are reported as holding steady, with about the usual seasonable demand. Prices now ruling are as follows: Barrels, $1.10 gal.; ½ barrels, $1.13 gal.; 5-gal. lots, $1.15 gal; 1-gal lots, $1.15 gal., plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Oct. 3.—Through the combination of stimulating production and curtailing the supply of steel at all points to the actual needs of war activities, instead of looking to the creation of possible reserves, production and requirements may make a more even break at the end of the year than has been in prospect from the figures so frequently mentioned by the War Industries Board. First, early in July, the board placed the half year's requirements at 20,000,000 net tons of finished rolled steel, intimating that there was no likelihood of more than 16,500,000 tons being made. Later it increased its estimate of production to 17,000,000 tons, while by successive stages it advanced the requirements to 23,000,000 tons and then spoke of the possibility of 25,000,000 tons being made.

Production in the past three months has been fully 9,000,000 tons, and as the period included the hot weather, which always curtails output, while strenuous efforts are being made to increase production, the output in the next three months ought to be more than 10,000,000 tons rather than less. The September report of steel ingot production, which should be available within a fortnight, will give an inkling of the autumn pace in steel production.

Curtailing Steel Supplies

The War Industries Board has announced a large batch of steel curtailment arrangements made with various consumers, from the makers of clothes wringers to the makers of phonographs. On an average, the restriction during the last four months of the year is to be one-half the output in the corresponding period of 1917. It is desired that the manufacture of passenger automobiles and phonographs cease entirely January 1. Except in the case of a few items, not much steel, in point of tonnage, will be saved by this curtailment in industrial operations, but there will be a very important saving in man power. In the case of tin plate conservation, the work is being done by the Food Administration which has been making agreements with the packers of non-perishable food products to curtail their consumption of tin plate, or stop it altogether. As recently reported, a curtailment in tin plate production for the fourth quarter to 70 per cent of the former rate was ordered, but this conservation program is expected to make feasible a still greater reduction.

The War Industries Board, besides seeking agreements with ultimate consumers as to restriction in steel consumption, is also negotiating with the finished steel producers themselves, looking to a curtailment in their consumption of raw steel. The pipe mills, for instance, have been asked to consider whether a reduction in their output would cause difficulty in any important war activity.

A very important point in connection with all this steel conservation work is that it is not directed towards the saving of steel for the purpose of putting the steel into some particular product or channel of consumption. Except for the item of rails, it is not definitely shown that the supply of steel is distinctly short in any direction, at least with respect to any considerable tonnage. To illustrate this point, the case of shells may be taken. It is quite clear that there would be no desire to save steel at the expense of shells. Nevertheless, the supply of shell steel has been scrutinized, not on the basis of how many shells the prosecution of the war requires, but on the basis of how much shell steel the forge shops can actually work. Ship steel has also been studied. No statement has been made as to how much, if any, steel has been found that can be taken out of these programs, but it is hinted from Washington that a new and revised estimate of the half-year's steel requirements may be forthcoming.

WEEKLY PAINT DEPARTMENT

Customers Value Good Suggestions

Hardwaremen Can Increase Sales by Explaining Best Ways to Paint—What Brushes to Use

HERE'S a little incident that shows how the hardware retailer can put it all over the mail order house when it comes to rendering real service. Last week a farmer who resides fifty miles out of Toronto decided he would paint up his automobile and make it do another year or so. He has been making frequent purchases from mail order houses, especially of clothing, and he wrote asking one of the firms for information about painting his auto. He got a reply suggesting that two tins of one color and one tin of another would produce a nice finish. The letter suggested that a flat brush for the work could be purchased for so much and that it would be well to sandpaper the parts to be painted and that sandpaper would be furnished for so many cents additional.

What He Found Out.

The total ran into more money than the farmer had expected. He was undecided about going ahead until a friend said: "Why not drop into Brown's hardware store when you are in town this afternoon and see what they can do?" The farmer did so and as a result the mail order house will not get the order for paint and the chances are that it will not get many other orders. The clerk in the hardware store found out just what the farmer planned to do and then he told him how to do it. Sandpaper was just the thing for some kinds of work, he said, but if used on the car, would take all kinds of time and involve extra work. A few cents' worth of pumice stone mixed with a little water and rubbed carefully over the work would produce much better results, he explained. He estimated that the farmer could do the work with much less paint than the mail house had suggested and also explained just why a round brush, which he sold at a price much below that asked by the department store, would make the work easier.

A Valuable Point

A point which many might have overlooked and that would have meant much trouble and inconvenience to the worker, and perhaps a spoiled job, was made by the clerk when he explained how necessary it was to make sure that the surface to be painted was thoroughly dry again before the colors were applied.

The farmer was thoroughly convinced by the way the clerk talked to him that the clerk knew what he was talking about. He was surprised at the lower cost and also pleased and started home with the paint. He did just what he was told to do and as a result, produced a finish on his car that made many of his friends think he was running around in a new one. He did it quickly and although he probably did not know it, the clerk's suggestion that he use pumice stone instead of sandpaper saved him hours of work and made a better job. The farmer was satisfied. He realized something that he had never understood before, that he could get better service at home than by sending his money away.

Applies To All.

Service applies equally to all your customers, Mr. Retailer. If you or your clerks know all about the paints you are offering, just what they will do, how much a customer will need for the work in hand, how best to apply it, what brushes to use, etc., you can save them all kinds of money, time and trouble. That they appreciate it will be shown by the way in which they will come back to consult with you when they want to do some more work. When they realize that they can depend upon you to tell them what will give them the best results, in short that they can trust you, you have laid the foundation for a successful business. If your clerks cannot give service of this kind, you will find it most profitable to have them instructed so that they can. It will cost little to get this instruction. Most of the paint firms will be only too glad to give you every assistance because it will mean that you will double, treble or quadruple your turnover. That means their profit and yours and they are willing to help you and help themselves to make more money any time. Many retailers are now taking every chance to have their clerks meet the paint men on their visits and discuss selling points with them. They have found that it pays and pays well.

"Yes, M'am, This is a *Boeckh* Brush. The Bristles *can't* come out and spoil the job!"

Workmen everywhere use Boeckh's Steel Grip Rubber Set Brushes.

The Bristles **cannot** come out. The job is never spoiled, and our customers are always assured of clean, satisfactory work.

Whether you are doing this yourself or whether you are having it done, don't forget, Madam, that Boeckh's Steel Grip Rubber Set will insure a perfect job.

The Boeckh Company, Ltd.
Toronto, Ont.

Autumn—The Season When Inside Decorations Need Freshening Up!

In Autumn prepare for Winter. Your customers will require Moore's House Colors when they return from the seashore, the wood, the country.

Interior decorations will more than ever show that lack of freshness that only Moore's House Colors can give. Now is the time to push their sale; you'll find it will pay you well.

When ordering don't forget
Moore's Varnishes

Benjamin Moore & Co., Ltd., West Toronto

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Oct. 3.—Advances on mixed paints feature the week in paint markets. These changes were made at the recent meeting of the paint makers in Montreal. The increase in mixed paint is considered a small one, while that for specialties is larger. Linseed oil is steady and firm and quotations are unchanged. There is not a great deal of oil available. Turpentine movement is just fair, while putty is very active and the trade is stocking up. There is a fair movement of seasonable lines such as glass, and the market is firm. Travellers will soon be on the road for spring bookings.

Linseed Oil Holds on a Firm Basis

Montreal.

LINSEED OIL.—The situation rules steady and strong and quotations are made on the same basis as last week. There seems to be quite a demand for the product, season considered, and some crushers are not at all anxious to sell freely, one manufacturer stating that he would as soon lay up some surplus for manufacturing needs later. Seed supplies are small and the future position of oil is really uncertain.

Linseed Oil—	Raw Imp. gal.	Boiled Imp. gal.
1 to 2 barrels	$2 02-$2 10	$2 04½-$2 13

Add 10c per gallon in smaller quantities.

Turpentine Steady; Sales Moderate

Montreal.

TURPENTINE.—With prices on a firm basis there is not any new interest in the markets here. A fair amount of business is done, seasonably speaking, but demand is not large at this late date. Stocks of this necessity are not over large. A slight firming in the Savannah market was made the first of the week. Rosin is firmer than ever.

Turpentine.	Per Imp. Ga.	
1 to 4 barrels	0 95	1 00
5 barrels and over	....	....
Small lots	1 01	1 06

(Packages extra)

Heavy Putty Sales on Held Basis

Montreal.

PUTTY.—Prices are well held for putty and the position is expected to hold for the present on an unchanged basis. Sales are reported heavy and the dealers are evidently securing their needs for the coming active season. Supplies are ample and at present the orders are promptly filled from all points. The container position is not reported any worse.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

White Lead in Oil in Fair Demand

Montreal

WHITE LEAD IN OIL.—A steady and firm undertone characterizes the market and sales are very fair. Government workers, or at least those with government contracts in hand, are treated preferentially to-day and supplies that corroders are able to get depend upon the supplies that exist over and above these needs. The surplus is not large and supplies of lead may be considered inadequate later on unless relief be afforded. Five ton lots are still selling at $17 per 100 lbs.; ton lots at $17.35, and small lots at $17.85.

25c *Advance in Mixed Paints; Special Lines*

Montreal.

MIXED PAINTS, SPECIALTIES.—A twenty-five cent advance per gallon is made effective on regular house paints, porch, floor, floor enamels, marine and barn paints. Shingle stains are also up 25c. These changes are referred to in a special article elsewhere and are effective as from Sept. 27. These advances are in accord with the raw material advances and have been definitely forecast in the columns of HARDWARE AND METAL. Travellers will soon be out for orders on the new basis.

Carriage, Wagon, Enamel Gloss Paints Advance

Montreal.

CARRIAGE PAINTS, Etc.—An advance of 10 per cent. has been made in the prices on carriage and wagon paints. This applies to the regular lines and also covers all enamels and gloss paints usually known as specialties. Reference in detail is made to these in a special article appearing elsewhere in this issue..

TORONTO

TORONTO, Oct. 3.—Ready mixed paints and all sundries feature the markets this week, house paint, floor paint and marine paint being up 25c gallon, while carriage and wagon paints and enamels, etc., are up 10 per cent. A change in the differentials on the various sized containers has also been put into effect. The linseed oil situation shows little change, though improvement in supplies is reported in some sources. Turpentine is steady and local supplies ample.

Linseed Oil Declines 10C

Toronto.

LINSEED OIL.—The flax seed market is lower for the week, and this has resulted in a decline in prices on linseed oil. Opinions vary as to the trend of flax seed, but somewhat lower prices are looked for on the marketing of the new crop. However, the feeling seems to be that no further change will be made in linseed oil. Stocks generally are none too heavy, but of more influence is the question of getting further supplies. This involves transportation and consequently is an uncertain factor, which will tend to maintain present range of quotations. These are as follows:

Linseed Oil	Raw Imp. gal.	Boiled Imp gal.
1 to 2 barrels	$2 00-$2 02	$2 03-$2 04½

Turpentine Holds Firm Locally

Toronto.

TURPENTINE.—United States Government action in not setting maximum price standards at the present time caused a slight advance in price in the South this week. The present market, however, is still below that reported a couple of weeks ago. Despite good war news the market in turpentine is heavy. Stocks are increasing and unless purchases are in excess of receipts during the next few weeks, lower levels may be looked for. Local supplies are ample and considerable stocks are en route from the South. Prices are unchanged as follows:

POSTER ADVERTISING SERVICE

The Right Kind of Publicity Creates the Demand

The Martin-Senour Co. in all their publicity efforts have been particularly successful in making these efforts count to the benefit of their Dealer-Agents. The positive evidence of this is an ever-growing business.

MARTIN-SENOUR
PAINTS AND VARNISHES

are widely advertised in all the leading newspapers, magazines, farm and religious journals throughout Canada. The poster reproduced above has been shown on every available billboard in the Dominion during the past year. We supply to all our Dealer-Agents many other strong selling helps in the way of window trims, outdoor signs, interior store displays, all of which do their share in making Martin-Senour the best-known line of paints and varnishes on the market.

That's why they ARE the EASIEST and MOST PROFITABLE to sell.

No better time than now to get full particulars of our Dealer-Agency Plan.

Write at once.

2 to 4 barrels (barrels included)	0 99
5 gallon lots	1 10

Mixed Paints Centre of Interest

Toronto.

MIXED PAINTS.—Interest during the week centres largely in mixed paints on which revised prices have been put into effect. New prices are immediately effective and apply also on spring booking orders. The changes made are: house paints, ordinary colors and white, advance 25c gallon; inside floor paints, ordinary colors go up 25c gallon; porch floor paints advance 25c gallon; marine paints, ordinary colors and white, are up another 25c gallon. New differentials have also been established as follows: barrels, 25c gallon under 1 gallon cans; 5 gallon cans, 10c gallon under gallon cans; ½ gallon cans, 15c gallon over gallon cans; quarts, 30c gallon over gallon cans; pints, 60c gallon over gallon cans; ½ pints, $1.20 gallon over gallon cans; ¼ pints, $2.40 gallon over gallon cans. Carriage, wagon and implement paints, enamels, etc., advance 10 per cent.

New differentials have also been established for varnish as follows: ½ gallon cans, 20c gallon over gallon cans; quarts, 40c gallon over gallon cans; pints, 80c gallon over gallon cans; ½ pints, $1.60 gallon over gallon cans; 5 gallons, 10c gallon under 1 gallon cans; barrels, 25c gallon under 1 gallon cans.

Mixed paint prices on the different brands, gallon can basis, appear in current quotations.

White Lead in Oil Firm; Unchanged

Toronto.

WHITE LEAD IN OIL.—Though no change in price has occurred during the week the market is one of decided strength. The question of securing supplies of pig lead becomes increasingly difficult. Production has fallen below requirements of essential war industries, so an element of uncertainty rules as regards how much may be released for demands of the corroders. Stocks of white lead in oil at present are fair, but how long they would lat were no more pig lead released cannot be judged. Pure white lead in oil in ton lots is quoted at $17.80 per 100 pounds and in smaller quantities $18.15.

Sales Putty on Fair Basis

Toronto.

PUTTY.—Sales are being maintained on a very fair basis and the volume is considered satisfactory. Stocks are good and no difficulty is being experienced in taking care of business offered. Quotations are holding firm and unchanged as follows:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

Glass Holds at Firm Levels

Toronto.

GLASS.—The market rules with a very firm undertone, but as yet no change in price has become evident. Stocks are considered comparatively small, but in view of the light demand there is no difficulty taking care of orders coming to hand. The only change which will be made will be one towards higher levels, but just when this may become effective is uncertain.

Brooms Move Up; Whisks Also

Toronto.

BROOMS, WHISKS.—A general advance in brooms has been made and full details appear in special article in this issue. The decreased production of broom corn with the correspondingly heavy increase in price along with higher prices of handles, wire and string are factors which have contributed to this change. Whisks are also up about 10 per cent. and in some instances even 15 to 20 per cent. over former figures.

WEEKLY MARKET REPORTS

Continued from page 63

Pig Iron Prices

No particular effort is made to disguise the fact that the revision of pig iron prices for the fourth quarter of the year was dictated entirely on grounds of expediency. Some furnaces were making little, if any, money and it was desired to relieve them. A general and large advance could not be considered, and a schedule was worked out which is not logical but which is perfectly practicable, and which gives an increased price to the furnaces that have had the highest costs. Eastern Pennsylvania is put on a Pittsburgh basis, while Tennessee and Virginia are put on the Birmingham basis. As Lake Superior ore was advanced 25 cents, basis prices were advanced, but only on basic and foundry, forge and Bessemer being left unchanged. The ore advance of 25 cents would mean about 45 cents increase per ton in the cost of making pig iron, and the grades that are advanced $1 a ton comprise about three-fourths of all the iron that is sold, being therefore equivalent to an average advance of about 75 cents, and giving a net advantage to the furnaces using Lake Superior ore of say 30 cents. Furnaces using local ores, which are not changed, get the benefit of the full pig iron advance. The additional advantages given by reason of the removed basing points amount to 75 cents to $1 in the case of Tennessee furnaces, perhaps $2 to $4 in the case of Virginia furnaces, and possibly $1 to $3 in the case of eastern furnaces. The lake front furnaces will sell f.o.b. furnace as formerly, and as pig iron required by Canada will doubtless be allotted to them, the only practical interest to Canada in the price revision is that basic and foundry iron will be $1 higher than formerly. There are wider differentials for silicon irons, and this applies even to No. 1 foundry, which is now $1.25 above No. 2 instead of 50 cents, the dividing line being 2.25 per cent. silicon. Buffalo and eastern Pennsylvania No. 2X is above 2.25 per cent, while No. 2 plain is 1.75 to 2.25 cent.

Basic Eight-Hour Day

The iron and steel industry as a whole will adopt the "basic eight-hour day" which the Steel Corporation announced it would make effective in its plants October 1. There has been so much argument in the past year or more about "the basic eight-hour day," much of it ignorant, much of it selfish, and not a little of it decidedly intemperate, that it might be supposed the news that it is being adopted by the iron and steel industry is regarded as of tremendous importance. It is, however, nothing of the sort. The change does not make a ripple in the industry's affairs. Hours of labor are not affected. There is merely a little change in the payroll clerk's arithmetic. Formerly, when a man worked 12 hours, his pay for the day was 12 times the hourly wage rate. Now it will be 14 times. The ten-hour man will get 11 times the hour rate instead of 10 times, for the hours beyond eight are to be paid time and a half. One is a wage advance of 16 2/3 per cent, the other an advance of 10 per cent. Men working eight hours get no advance at all, by the new system, but a little advance may be given some of them. The total increase in payrolls will hardly average 10 per cent. This is the eighth wage advance since the war began, the first being on February 1, 1916. Six were of 10 per cent. while one was of 15 per cent. As to hours of labor being reduced, and the total volume of man power for making steel reduced, the plain fact is that the 12-hour men have wanted to work the 12 hours. When they are paid a bonus for the hours above eight, they will be still more anxious to work them.

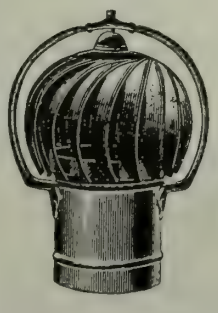
ORDER TO SAVE STEEL

The Secretary of War for the United States has issued the following order:

"Owing to the present acute shortage of steel all bureaus, corps, and departments of the War Department will at once take steps to economize in the purchase and use of steel. The purchase of, or contracting for, steel furniture, beds, tables, chairs, containers, filing cabinets, and safes is forbidden, unless it can be clearly shown that it is necessary that these articles be steel and that no other material or article will answer the purpose."

Quick Results

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word for first insertion, and one cent per word for subsequent insertions, with 5c additional for Box Number or Address.



A Quality Standard

"Equal to Berry Brothers" is a statement often heard by varnish buyers. This is because the uniform dependability of all their products has caused them to become the standard of comparison.

There is no surer prelude to an artistic and lasting finish on woodwork, walls, floors and ceilings than Berry Brothers' varnishes, enamels and stains.

The wide knowledge of this fact among discriminating buyers makes all products bearing the Berry label easy to sell.

Harris Heavy Pressure and its Advantages

1. **A complete immunity from hot bearings is secured, HARRIS HEAVY PRESSURE** having a lower co-efficient of friction than any other known metal.
2. **A scored journal is impossible,** and if through any failure of lubrication a bearing should run hot, **HARRIS HEAVY PRESSURE,** owing to its special properties, will act as a lubricant, saving the journal from injury and preventing any delay to traffic.
3. It will stand the **heaviest pressures,** always running cool, even under the most trying conditions.
4. It will **wear** from 50 to 100 per cent. **longer** on general machinery bearings than any other Babbitt metal.
5. It effects **a saving in lubrication.**
6. It **preserves the journals,** and materially **increases their life.** A journal after running a short time with **HARRIS HEAVY PRESSURE** attains a perfectly smooth and highly polished surface.
7. It is easily applied and, if properly applied, no abrasive force will remove it.
8. **Its cheapness.** The first cost is moderate. It gives a longer life to the bearings, resulting in a great economy, as the number of renewals is thereby considerably reduced; its specific gravity is low in comparison with other metals; does not deteriorate with re-melting; and these advantages, together with its unequalled anti-friction properties, render it the **cheapest** as well as the **best metal** for all general machinery bearings.

EMPIRE SELF-CLOSING BIBBS

BALL BEARING

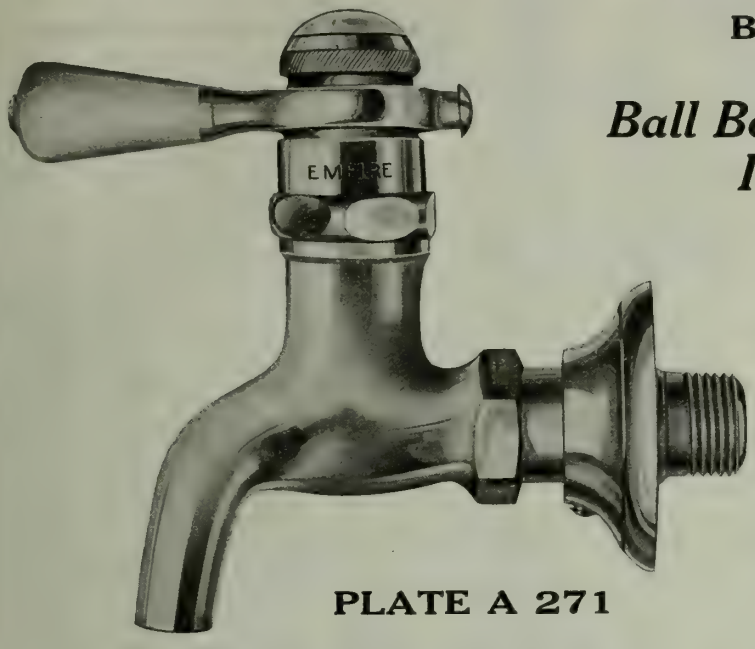

PLATE A 271

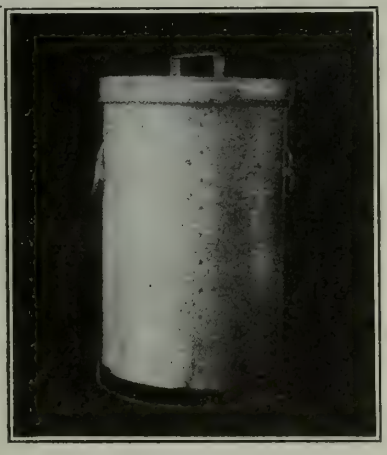
Ball Bearing Lever China Index Handle

If you want to build up bigger business, you need dependable goods. You need to install those goods that are made right and fully guaranteed.



Empire Self-closing Bibbs are made right; they are fully guaranteed, and do not waste water. One of the greatest economic wastes in our towns and cities is water. Most office and factory buildings and public institutions are on the meter system, and wasting water is a serious matter.

Empire Self-closing Bibbs will save the price in water rates in less than a year. It is unpatriotic to waste water, particularly these days, because every gallon of water needs some kind of power to pump same.

Get full information from us about this line right now, it's a real winner.

Empire Manufacturing Company Limited
LONDON TORONTO

The Favorite Can For House School or Office Building

STYLE "C"

Reinforced with top and bottom bands. Bottom sets up to clear ground, milk can handles.
Made in two sizes.
14½ in. diameter, 24 in. high.
On sale by leading hardware dealers.

Are you one of them? Ask about the famous Economy Ash Sifter. It saves coal.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

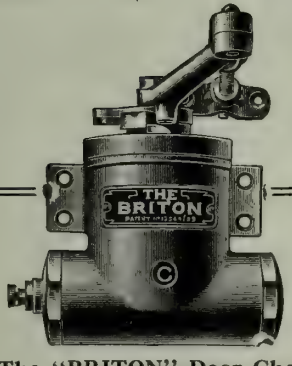
What Varnish Do You Sell?

There is just as big a difference in varnishes as in paints. Cheap varnishes will not stand the test and cause dissatisfaction and disappointment to the user.



Dougall Varnish

is the line of entire satisfaction. Every user is a pleased customer. There is a Dougall Varnish for every purpose and our reputation and guarantee stands behind every gallon sold.

Our Proposition to the dealer is a good one. Write for it.

The Dougall Varnish Co., Ltd., Montreal

QUALITY DOUGALL VARNISHES FIRST

Talk No. One Hundred and Sixty-Seven

Don't ask your jobber for Galvanized Sheets unless for highly essential use: war work, railway or steamship service. Just now that's all we can handle.

TINKER TOM.

ook for Talk No. 168 next week.

DOMINION SHEET METAL CORPORATION, Limited
HAMILTON, CANADA

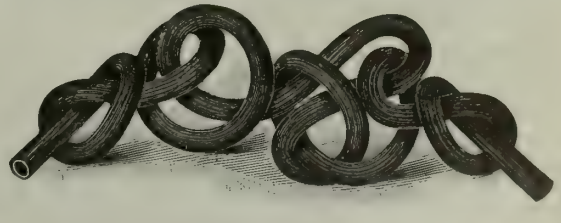
Allith Hangers Also Made In Two Styles of Square Track Trolley

WINTER STORMS SOON—

And no one has any guarantee that another 1917-18 winter will not be repeated with its fury of gale and banks of snow.

The main thing is—be prepared. Barn, stable and outhouse doors should be safe-guarded against winter weather condition by the use of

"ALLITH" ROUND TROLLEY HANGERS



The "Allith" hanger and track shown give A1 insurance against doors being blown down. They're practically trouble-proof.

It's a good time to show the "Allith" Round Track Hanger right now. Set up a sample and show your former customers how perfectly it works. **Sort your stock to-day.**

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

Needed in the Stable

The man in the stable wants brushes that will hold the bristles, brushes that will fetch out the dirt.

"KEYSTONE" BRUSHES

Are the ones you can conscientiously recommend. Your customers will come back for more of the same kind. Every brush that is needed in the stable will be found in our line.

Write for prices, etc.

A Message to Canadian Dealers

At this time, when Canada and the United States are so closely linked, it is especially fitting that Canadian dealers should recognize the superiorities of the Separator and Milker that are every inch American.

P. M. Sharples, President of the Sharples Separator Company, invented the first American Cream Separator. For over a third of a century he has been manufacturing and improving this remarkable saver of butterfat.

Likewise, the Sharples Milker was the earliest perfected modern milking machine in the United States.

Dealers in the United States are urging their customers to install Sharples equipment, as it aids towards saving butterfat, maintaining milk production, and rendering real aid in winning the war.

Sharples' Suction-feed Separator is the **only** separator that **skims clean at any speed.** All other separators lose butterfat when turned **under speed**—the annual waste from this cause being over 80,000,000 pounds of butterfat. Universal use of the Sharples Separator would save it all. No discs or blades in the Sharples bowl makes it easy to clean.

Sharples' Milker is the only milking machine that squeezes and massages the teats while milking. It is the world's fastest milker —and a big labor-saver.

The United States and Canada have largely the responsibility for providing the Allies' food supply. Through the elimination of waste and the saving of man-power, the Sharples Separator and the Sharples Milker are doing yeoman service. It is especially wise now to urge upon your customers the purchase of machines that will do the most efficient work at the least cost and produce the greatest amount of food.

If you are not acquainted with the Sharples dealer proposition, and the remarkable work which Sharples machines are doing on thousands of farms, write us to-day.

"Delta" Files

—we'll help you sell them

TRADE MARK
DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

Better Half-Soles Now

THREE years ago Neōlin was announced as a new and better sole material for shoes.

Since that time millions of people have read of and tested Neōlin. Shoes with Neōlin Soles are Staple in nearly every shoe store.

Now Neōlin holds a broader field and double its usefulness. Now every pair of worn shoes—men's, women's, children's, any style—can have Neōlin Shoes. We have introduced Neōlin Half-Soles.

You can sell them.

And by selling Neōlin's advantages to hundreds of folks in your community you can make big money.

NEOLIN Half-Soles are not only better half-soles but better **selling** half-soles.

For Neōlin is one of the biggest and strongest advertised propositions in the country.

Every man who has ever resoled the family's shoes will now want to try Neōlin half-soles.

And many men who have never tried resoling before will want to practice this new economy.

For we are advertising the advent of Neōlin half-soles in a campaign that is bound to produce good, steady business for you.

Neōlin half-soles come in cartons of a dozen, assorted sizes. The carton is well printed for display. Send an order to-day to your wholesale hardware supplier.

The Goodyear Tire & Rubber Co. of Canada, Limited

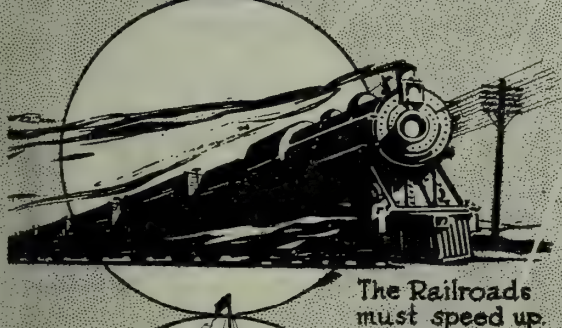
Consult Hardware and Metal Buyers' Guide

If what you want isn't advertised in this issue, consult our Buyers' Directory. If it isn't listed in our Directory, write us and we will give you the information.



Work together for victory.

The Farmer must raise more.

The Mechanic must produce more.

The Railroads must speed up.

The Ships must make more trips.

The Business Man must help the others.

Some months ago I was in Toronto and I saw a sight that went deep into my soul. It was a body of fresh troops entraining for an Atlantic port. Fresh young faces, going out, unafraid, into the maelstrom.

Later I watched a New York City detachment of the new National Army of the United States swing down Fifth Avenue. There were 10,000 of them marching through the heavy, swirling snow.

These scenes have made me wonder how many more would have to go. I wondered if Canada, already heavily represented on Flanders' fields, would have to call her older men, as France had done. I wondered if the United States would need *her* older men, as we did in the Civil war.

None of us want that to happen.

The only way to stop the outflow of soldiers is to beat the Kaiser and his horde of Huns. The only way to do that is to give our boys in the trenches so much of the munitions of war —of such excellent quality—that they will be as superior to the enemy as a workman with a turret lathe is to a workman with an old hand lathe.

So let us think quickly of better ways to do our work. Scarcity of labor has made the people of our western continent inventors. For war alone, North America has given the world the torpedo, the wireless torpedo, the submarine, the ironclad, the repeating rifle, the machine gun, the revolver, the magazine pistol, the airplane and the motor car.

The war to-day demands that we do more than we ever have done before. Let us all speed up, with the thought that we, too, are fighting the enemy, even if we can't see him. Let us hurry our work at our desk and bench s, and thus keep millions of men out of the trenches.

(*Signed*)

John H Patterson

President
The National Cash Register Company

If one slows down all are delayed.

MANUFACTURERS SUPPLIES

Firms advertising in this department are particularly interested in supplying requirements of manufacturers, and solicit their inquiries.

WHY have our sales increased 200% over last year?

BECAUSE our prices, quality equal, are 10% lower than others

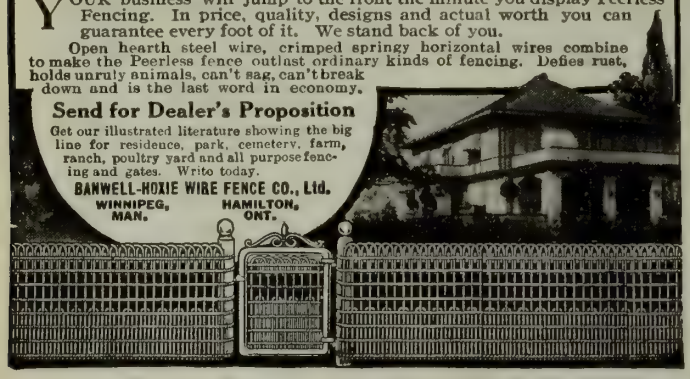
PEERLESS ORNAMENTAL FENCING

A Big Trade Is Waiting for You.



YOUR business will jump to the front the minute you display Peerless Fencing. In price, quality, designs and actual worth you can guarantee every foot of it. We stand back of you.

Open hearth steel wire, crimped springy horizontal wires combine to make the Peerless fence outlast ordinary kinds of fencing. Defies rust, holds unruly animals, can't sag, can't break down and is the last word in economy.

Have You Figured It Out In This Way?

Continued from September number.

Your salesmen running thus for change, fifty times in a day, requires 3,000 seconds or fifty minutes, which are equal to nearly one hour for each salesman each day—and is that much time needlessly lost—and which might have been devoted to the selling of goods had you our Cash Carriers.

To be continued in our next advertisement.

P.S.—Nothing in the above is stated about the advantages of having the cash in your office, and under the supervision of one person (the cashier), who is solely responsible for it.

The Cost of Selling

SCARCELY necessary, is it? to protest that you must spend some money, much or little, to keep yourself and your merchandise known to your customers and should-be customers.

This you admit, but—DO YOU FOLLOW CLOSE UP THE LEAD OF YOUR CONVICTION?

Are you spending the money?

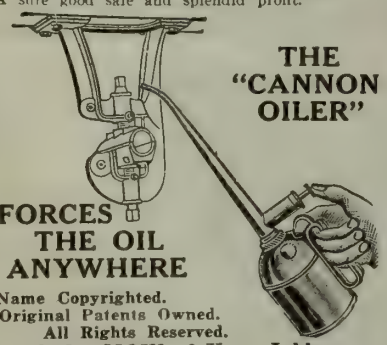
Let's look at the cost of close up work in

The FARMER'S MAGAZINE

A half-page 12 times will cost you $367.20 ($30.60 per insertion). A full page, $714.00 ($59.60 per insertion).

Not a heavy annual cost to canvass the choicest class of farmers in this country—farm homes of greatest prosperity, progressiveness and capacity.

But—are you keeping a salesman always on the job?



You should—and can, at so low a price.

Write in about it.

Cannon Oilers

Easy Seller Because—

It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt, demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.
Ask any Thresherman, Mechanic or user.
A sure good sale and splendid profit.

They come back again and again for Polarine

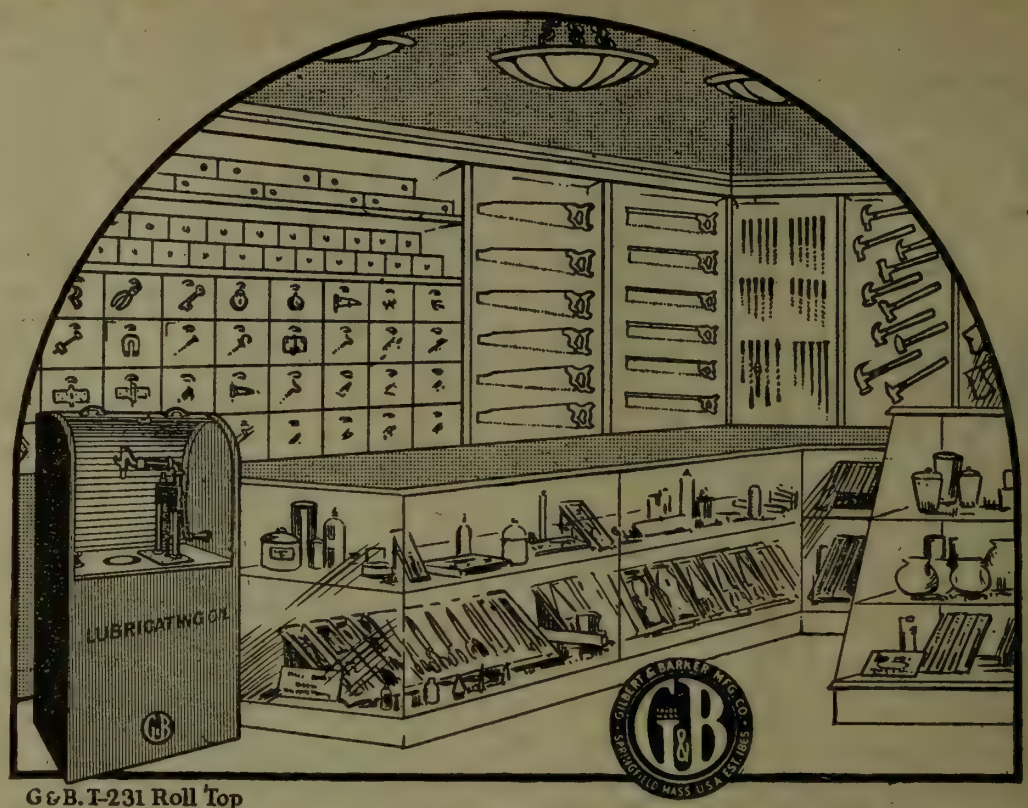
That's the advantage of selling Polarine. Customers come back because they have learned that Polarine does "Make a Good Car Better."

The Red Ball Sign marks your store as a reliable place for motorists to buy their favorite brand of lubricants. Our sign ties your store up to our advertising, and motorists who stop for Polarine often buy many other things before they leave your store. There are more than 200,000 automobile and truck owners in Canada, a big majority of these use Polarine. Put the full line in stock so that you may secure your full share of the trade. There is 33 1/3% or more profit in every Polarine sale you make.

There are two grades of Polarine for cylinder and engine lubrication, Polarine and Polarine heavy. There are also Polarine lubricants for every other bearing and moving part in your car.

Polarine comes in sealed cans, one-half gallon, one gallon and four-gallon, also in 12½-gallon steel kegs, half-barrels and barrels.

If you have not put in a stock of Polarine, write to us at 56 Church Street, Toronto, for our dealer's proposition.



IMPERIAL OIL LIMITED

Manufacturers & Marketers of POLARINE MOTOR OILS & GREASES

Marketers of *Gargoyle Mobiloils* in Canada

BRANCHES IN ALL CITIES

G & B. T-231 Roll Top
Cabinet-height 55in.

Keep Profits In—Shut Waste Out In Your Motor Oil Trade

Your motor oil profits can't drip away when you have a Gilbert and Barker T-231 Roll-Top Cabinet to handle the oil.

Leak-proof, dust-proof, dirt and fire-proof, it pays for itself by eliminating waste. And it's a time-saver, too; enables you to serve the trade with absolutely clean oil quickly as well as conveniently. This measuring pump gives a quart or less, as desired. The outfit is made in one and two-barrel sizes.

Dealers who need larger-capacity equipment will find a battery of G. & B. tanks suitable. Made in a variety of sizes and styles for oils, paints, varnishes, etc.

Gilbert & Barker Gasoline Pumps and Storage Systems give economical, safe and convenient handling of gasoline.

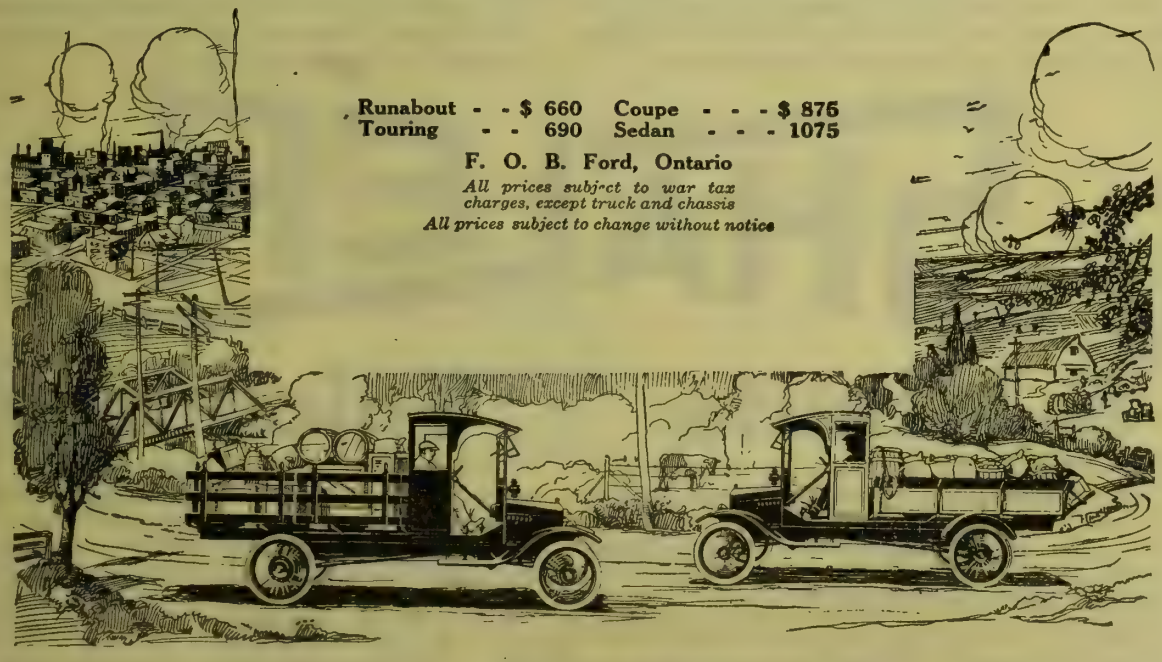
Write for catalogue or call at any branch of Imperial Oil Limited.

IMPERIAL OIL LIMITED

Canadian Distributors of Gilbert & Barker Gasoline and Lubricating Storage Outfits

BRANCHES IN ALL CITIES

Trucks Relieve Freight Congestion



THE interurban highway and the motor truck make a useful combination for solving the short haul transportation problem.

Many business houses have derived material benefits from this method of distribution. Delays through railway car shortage and terminal congestion have been reduced. Delivery costs have been reduced and customers have been served more promptly.

The highway and the motor truck have brought the city nearer the farm and the farmer's products nearer the city. Larger profits have accrued to farmers, and merchants who utilize the motor truck on the highway. The Ford One-Ton Truck Chassis is built for this particular service.

The Ford One-Ton Truck Chassis fitted with a suitable body is *the* equipment for interurban haulage and delivery.

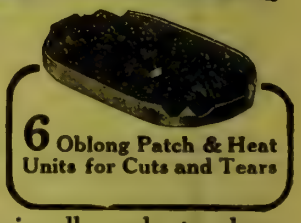
Makes a Perfect Permanent Repair



6 Round Patch & Heat Units for Punctures

Complete Outfit

$2.00 in Canada

Includes

12 Patch & Heat Units

6 Oblong Patch & Heat Units for Cuts and Tears

The Patch & Heat Unit consists of a chemically treated combustible disc on one side and a pure para rubber patch on the other. This fits over the puncture and a match is applied to the chemical disc. Without blaze or flame this disc furnishes the proper heat, which seals the cut in the tube with the new rubber, making a permanent repair.

The Patch & Heat Unit is all ready to clamp on the tube. The fuel in its metal container and the rubber patch itself are all assembled. No different parts to lose or complicated application to the tube. Simply put the unit over the puncture, clamp it down and apply the match.

SHALER

5 Minute Vulcanizer

The fact that over 500,000 motorists are now using the SHALER 5-Minute Vulcanizer is convincing proof of its ever-increasing popularity. Every motorist is a prospect for one of these handy tube vulcanizers—it should be in every car owner's tool kit—for use anywhere—on the road or in the garage.

Sell the SHALER 5-Minute Vulcanizer. Every sale of a 5-Minute Vulcanizer gives you a good profit. Besides, the big resale of patch-and-heat units furnishes you a continuous profit—it brings motorists to your place for SHALER supplies—and for all sorts of other accessories.

The SHALER 5-Minute Vulcanizer with 6 Round and 6 Oblong Patch & Heat Units packed in attractive display carton.

ORDER FROM YOUR JOBBER *NOW!*

Don't delay! The enormous demand for this popular vulcanizer makes it necessary to place your order early if you want to be sure of prompt shipment. Any jobber in the United States can supply you. Our large catalog describes the complete line of SHALER Vulcanizers for motorists' use—also complete equipment for garages and tire repair shops. Mailed free on request.

Why You Should Be A Michelin Dealer

No. 25

The Michelin Dealer-Sign Is the Hall-Mark of Quality

For many years Michelin advertising has reproduced the Michelin dealers-sign with the advice: "Look For This Sign on Leading Garages".

This famous phrase, backed by Michelin's world-wide reputation for unsurpassed quality, has made the Michelin sign stand for an assurance of quality in the store that displays it.

The minute a dealer displays the Michelin sign, his store secures added prestige. Ask any Michelin Dealer and he will tell you this is so.

Write for Michelin's dealer-proposition

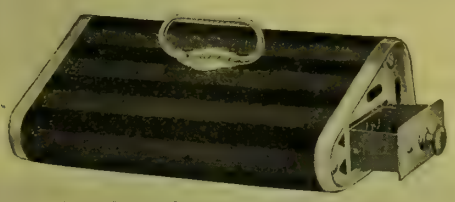
Clark Indestructible Steel Heaters

For Automobiles, Carriages, Sleighs and All Vehicles

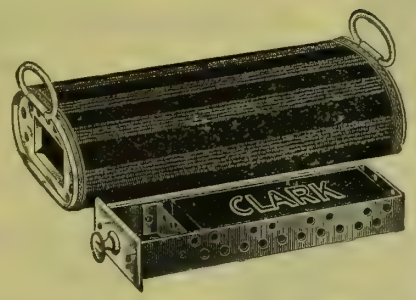
Used extensively by Doctors, Rural Mail Carriers, Auto Tourists, Cab Drivers and others who drive in cold weather

COST LITTLE AND VERY INEXPENSIVE TO OPERATE



DEALERS ORDER NOW

Your Jobber Can Supply You



No. 8XX Clark Automobile Heater—The Duchess

The handsomest heater ever built. Covered with rich velvet plush in blue, green, or maroon shades. Extra wide, highly finished, nickel plated flange at ends. Side and end adjustable ventilators. Re-inforced steel body. Extra heavy asbestos lining. All outside metal parts quadruple nickel plated. De luxe finish, 24 inches long. Weighs 12 lbs.

No. 7D Clark Heater—Slanting Top

Clark indestructible riveted steel body. Drawn steel ends, heavily nickel plated. Side and end adjustable ventilators, allowing perfect regulation of heat. Thick asbestos lining. Covered with extra quality of green Brussels Carpet. A beautiful heater. 14 inches long. Weighs 9 lbs.

Strong, durable, and of good appearance. Covered with Brussels Carpet. Asbestos lining. A good heat giver. Used extensively by farmers, mail carriers, cab drivers, etc. Light and handy, 12 inches long. Weighs 4 lbs.

CLARK CARBON

The World's Best Heater Fuel

Case Containing 100 Bricks

A scientifically prepared carbon densely compressed into bricks yielding a much higher percentage of heat than any other heater fuel. No known substance contains so high a caloric value. One brick in a Clark heater will furnish a strong and steady heat for a period of from 12 to 16 hours.

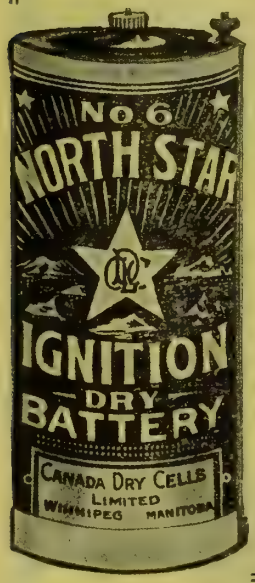
SINGLE BRICK
Sizes 7½ x 2½ x 1¼ inches

The New Carton and Container for Clark Carbon

For the convenience of dealers and customers, Clark carbon scores another big hit in the new package. Three bricks are packed in a neat cardboard carton, and four of these cartons, or one dozen of the bricks, are packed in the larger cardboard container.

This package preserves the brick from breakage in shipment and makes it clean and convenient to retail in packages of ¼ dozen bricks.

Only our Clark Carbon is put up in this way.



CARTON
Containing 1 doz. Bricks

Just as you are doing everything else more efficiently—you can NOW, clean, wipe, etc., faster and cheaper. And because there is much of this to do in the average shop, it is an opportunity for a surprisingly large yearly saving. You save time, and do the job better, by using

MARVEL-KNIT

Marvel-knit are knit cloths, white, sterilized, ready for use and of proper size and shape for fast, clean work. They are not a substitute for waste—they are a big improvement. Marvel-knit saves time because there are no tangled, knotted loose ends and threads to catch or to drag over and smear parts already wiped—parts that must be gone over.

You save money because Marvel-knit can be washed and used repeatedly. The special texture—the same original absorbent qualities—are always returned. The worst car and machine parts, such as around hubs and bearings are easily cleaned with Marvel-knit.

Mechanics welcome this better wipe—it enables them to better prepare parts that need repair. Marvel-knit saves time—they are helping everywhere to make up for the drain of mechanics that are in war work.

Marvel-knit comes packed flat in convenient bales of 50 pounds; each piece a handful. Fill out and mail the attached coupon and learn the superiorities of Marvel-knit —how it will still greater increase the efficiency of your men—your plant, shop, or garage.

RADIATOR NEVERLEAK
Stops All Leaks

Radiator Neverleak is a guaranteed preparation for stopping leaks in Auto Radiators. It is a carefully and scientifically compounded liquid that will, positively, in from five to ten minutes, stop any ordinary leak in a radiator or cooling system. And the repair will be permanent.

It Contains No Acid, Meal, Cement or Sediment to Clog or Impair the Cooling System

It will not evaporate, consequently it remains in the radiator indefinitely, automatically sealing any new leaks that may occur. It also tends to prevent the formation of scale or rust in the cooling system.

As your profit on NEVERLEAK is extra good, it will pay you to investigate. You can sell on an absolute money-back guarantee.

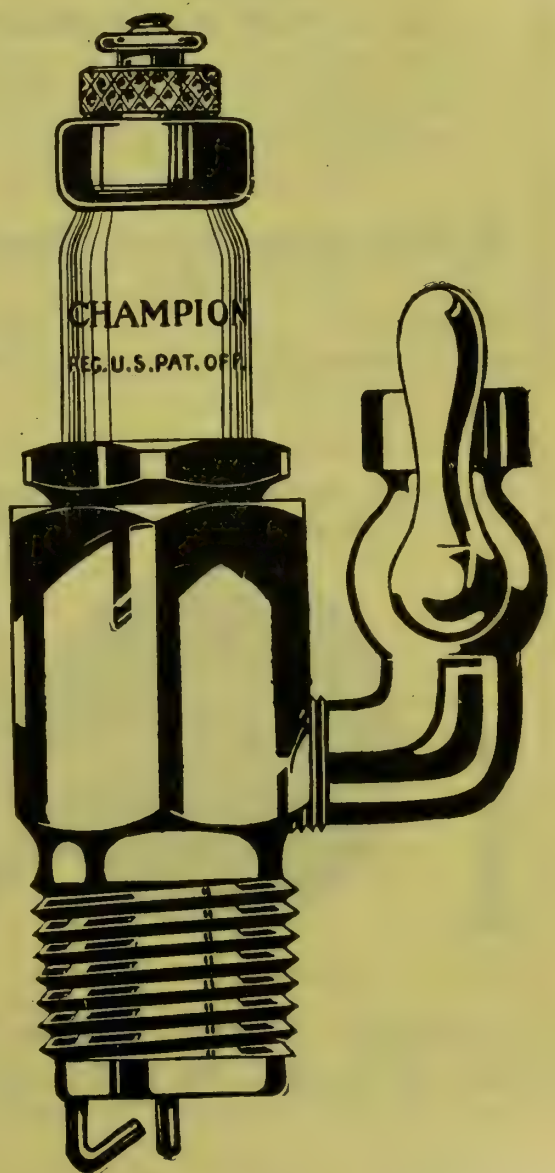
Champion

Priming Plugs

Help Your Customers Conserve Gasoline and Make Cold Motors Start Easily

Stimulate your sales, in a season that is normally quiet, with Champion Priming Plugs. They should be equipment on every motor car or gasoline engine that is operated in cold weather.

The Champion Priming Plug places the gasoline right at the ignition point in each cylinder where the first spark starts the motor humming.

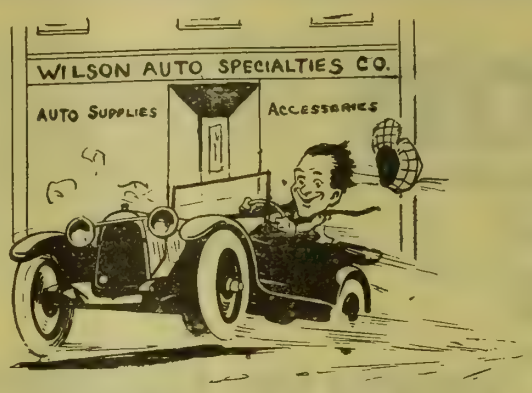


They save time, batteries, worry and trouble when the engine is cold.

Every motorist knows the value of Champion Priming Plugs—every automobile owner is a prospective purchaser of these two-purpose, cold-weather plugs that fit every make of car.

Be ready for the demand in advance of cold weather. Sell your customers now so they will be equipped and ready for cold weather.

Order from your jobber—and insist on Champion Priming Plugs. They mean more sales and more profits.



You and your customers are protected by the Champion Guarantee—"Complete satisfaction to the user, or Free Repair or Replacement will be made."

The Story of War Under the Earth

THE German sappers had discovered and broken into a Canadian tunnel. They had planted a machine gun at their end and sent a shower of bullets down the dark, narrow passage whenever the Canadians made any effort to enter their underground galleries. The story of how two Canadians nailed steel snipers' shields to the front of a push cart and shoved it ahead of them up to the very teeth of the gun, and how they dropped a can of deadly explosive, hopped on to the cart, and let it coast back down the tunnel, while bullets rattled on the shield like hail and, finally, how the explosive blew up the machine gun and its crew and blocked the passage again—this remarkable story is told by Lieut. C. W. Tilbrook (who was one of the two) in the course of an article, "An Underground Tank," in October MACLEAN'S.

Recently a Toronto newspaper declared editorially that the public was tiring of war books and war stories because of the sameness of them. The newspaper was right. But the public literally devours any story of the war that is new. The series of articles that Lieut. Tilbrook has done for MACLEAN'S have been read with an astonishing amount of interest *because they are different from anything that the public has yet read.*

Warfare in the tunnels is a terrible business—grim, silent, cruel. It is a strangely technical phase of warfare and the "sappers" go about their business with queer instruments that might have figured in a Jules Verne phantasy. To read of underground fighting, as Lieut. Tilbrook tells of it, is to get a vision of a new kind of war altogether—something gripping, fearsome and mystifying.

"An Underground Tank," is the best of his series. But, after all, it is only one feature in a long array that makes the October issue of MACLEAN'S one of unparalleled interest.

A STRANGE CHANGE IN WOMAN'S WORLD. By Agnes C. Laut.

The new status of women, arising out of the war, is treated in the powerful style of this famous writer, who came from the Canadian West. It introduces a new thought.

CONSCRIPTION AFTER THE WAR. By Brigadier-General A. C. Critchley.

A young Canadian who rose from Lieutenant to General in three years and originated the "Critchley Method" of military training, tells what he thinks about the need for compulsory service after the war.

THE LIFE OF MARY PICKFORD. By Arthur Stringer.

The second of a series of articles on Canada's most famous woman. No expense has been spared to produce the beautiful illustrations specially posed for the photographs.

THE FOUR FACTIONS AT OTTAWA. By J. K. Munro.

That the House will split into four, more or less, distinct groups is the guess of the author, a trained political observer. He outlines the reasons humorously, pungently and impartially. It is a political article on new lines and will be found refreshing.

BONEHEAD BILL—Another Service Poem.

Robert W. Service, most popular of poets, sends all his war verse to MACLEAN'S. In "Bonehead Bill" he depicts the grief of a soldier for his fallen foe.

THE EVENTS OF A MAD WORLD.

are summed up in the "Review of Reviews" which gives reprints of the best articles from the magazines of the world. All the best and most important articles are selected—five dollars' worth for twenty cents!

No better buy in Canada. Half cash, balance easy, or will take choice half section improved land at good value, with or without stock and implements and balance cash. Box 98, Hardware and Metal.

FOR SALE—HARDWARE AND FURNITURE business in the best district in the West. Stock about $5,000, fixtures $500. Building can be bought or rented. Owner must sell. Very little cash will handle this. Box 92, Hardware and Metal.

FOR SALE—QUICK—HARDWARE, FLOUR and feed business and buildings. Good farming district. An A1 chance. Apply Box 101, Hardware and Metal.

HARDWARE BUSINESS, COUNTY ONTARIO, on Hydro line. Steady farmers' trade. Stock $4,500. Yearly turnover about twenty thousand. Low rent for store and dwelling. Box 102, Hardware and Metal.

WE OFFER FOR IMMEDIATE ACCEPTANCE and delivery: 200 kegs horse shoes, No. 0, H.F. Med., $4.90 keg; 25 kegs horse shoes, No. 1, F. Med., $5.25 keg; 10 kegs horse shoes, No. 2, F. light steel, $5.75 keg; 200 kegs horse shoes, F. & F., 1 to 5 (seconds), $4.25 keg; 40 boxes H. Nails, "C." Brand 3-4-5 (equal 4-5-6 other makes) at 15c lb.; 10 boxes at 10c lb., ass.; 25 horse clippers (side cutting), $1.10 each; 1 blacksmith vise, 35 lbs., $13.00 each; 2 doz. horse rasps (Firth), plain 16", $13.90 doz., net 10 days. F.O.B. Montreal. Ex store. Box No. 100, Hardware and Metal.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

SITUATIONS WANTED

EXPERIENCED HARDWARE AND FURNITURE man will be open for engagement December 1st as Retail Manager or Travelling Salesman. Good references. Box 99, Hardware and Metal, Toronto.

EXPERIENCED HARDWARE SALESMAN desires position as city traveller preferred, to call on the retail trade or factories. A1 salesman. Box 103, Hardware and Metal.

MISCELLANEOUS

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada. (tf)

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fensome hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis Fensome Elevator Co., Toronto.

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

STOVE REPAIRS FOR GARLANDS, PEN Esthers, Acmes, Sunlights, Silver Kings, Souvenirs, Welcomes, Crown Hurons, Peninsulars, Jewels, Pandoras, Favorites, Imperial Oxfords, and all kinds of Ranges and Heaters. Write for list and prices. Grundy Bros., Strathroy.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

Hockey Stick Specialists

Our hockey sticks are made in the largest factory in Canada. They are manufactured out of select 2nd growth air-seasoned Rock Elm.

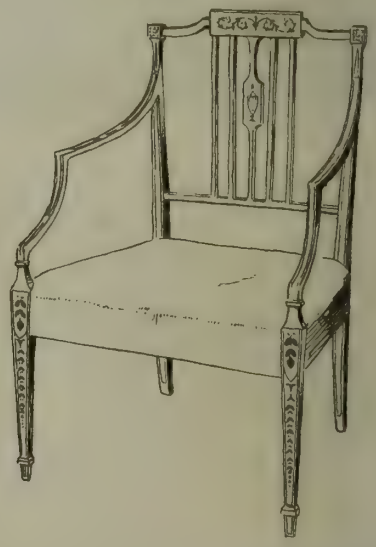
PERIOD SILVER in COMMUNITY PLATE



SHERATON DESIGN
In Community Plate

The SHERATON

PERIOD design as the decorative theme for dining room furnishings is rapidly becoming more and more the vogue.

Dishes, plates, glassware, furniture and even wall decorations are founded on the motifs originated by such craftsmen as Hepplewhite, Sheraton, Chippendale and the Brothers Adam. With this constantly increasing recognition of the Master Designers, it is particularly gratifying to note the genuine appreciation of discriminating purchasers for the Sheraton design in COMMUNITY PLATE.

Possessing to a marked degree the beauty and refinement of form and ornament so characteristic of the work of Thomas Sheraton, this pattern has probably done more than any other to awaken users of choice tableware to the pure delight of graceful simplicity.

LIKE all other patterns of Community Plate, the Sheraton is finished with the heaviest silver plate—each fork and spoon being additionally protected at the points of greatest wear by the Community overlay disc of pure silver.

AT YOUR SERVICE
FOR 50 YEARS

The SHERATON will be specially featured in our advertising in the Saturday Evening Post this Fall.

ONEIDA COMMUNITY, LTD., ONEIDA, N.Y.

A Good Sign

This hardware man has just put up a good sign—the sign of Hercules Dynamite. It helps increase his trade. If you sell Hercules Dynamite to farmers and are not supplied with one of these signs we will gladly send one if you ask for it. If you are not a customer we want to interest you in the sale of

HERCULES DYNAMITE

to farm customers. It is proving a profit-maker for merchants throughout the country. Many of these men hesitated at first to do business in such a commodity. Now they know that their objections and fears were groundless.

We stand ready to assist you in many ways to build up this department of your business. A Hercules sign in front of your store will help attract trade. Free advertising matter of various kinds will be supplied. You will have the assistance of our extensive advertising in farm papers which is continually increasing the use of dynamite on the farm. Fill out the coupon below. Mail it today and we will give you our active co-operation.

NEW SAFETY STOVE PIPE

The lock that holds

The Pipe That Sells

Do not sell ordinary pipe when you can sell the latest in stove pipe construction at the same price with extra advantages to your customer as well as extra sales and profits for you.

Here are the features of the new Safety Stove Pipe:

No. 1—Costs same as ordinary pipe.

No. 2—Made in 6 and 7-inch sizes.

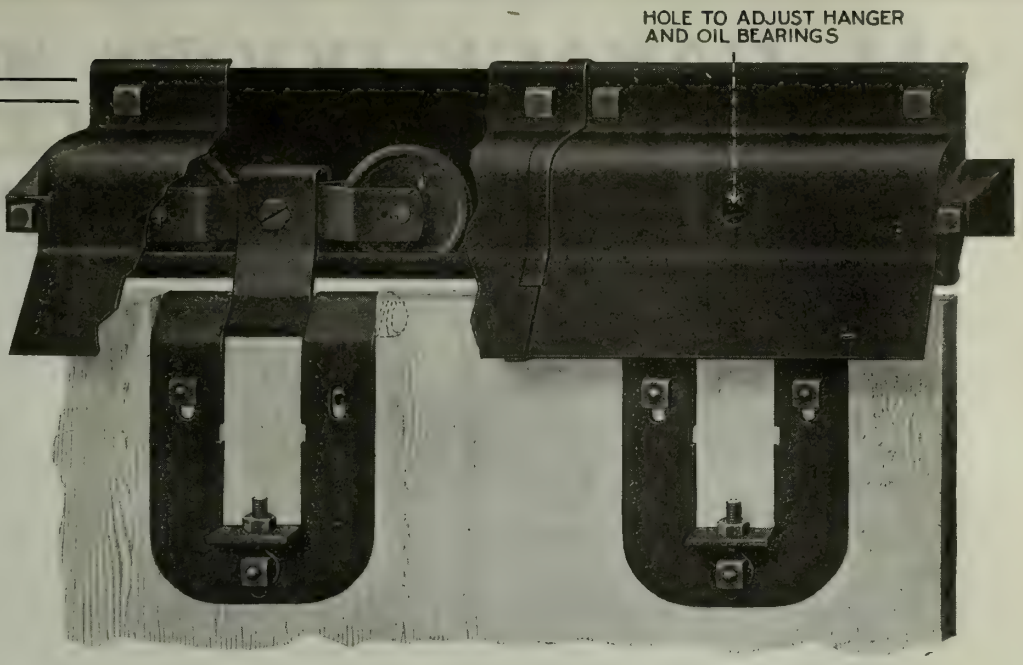
No. 3—Made of 29-gauge iron.

No. 4—Telescope pipe does away with lengths.

No. 5—No wiring needed. Can't be pulled apart.

No. 6—Pipe is nested, saving freight rates and storage room in store.

No. 7—Eliminates all danger of pipe falling down; easy to put up; absolutely leak-proof; cannot come apart; locks automatically; good appearance.



No. 8—New patent lock effects saving on each pipe, making a saving of one length in every 12 of ordinary pipe.

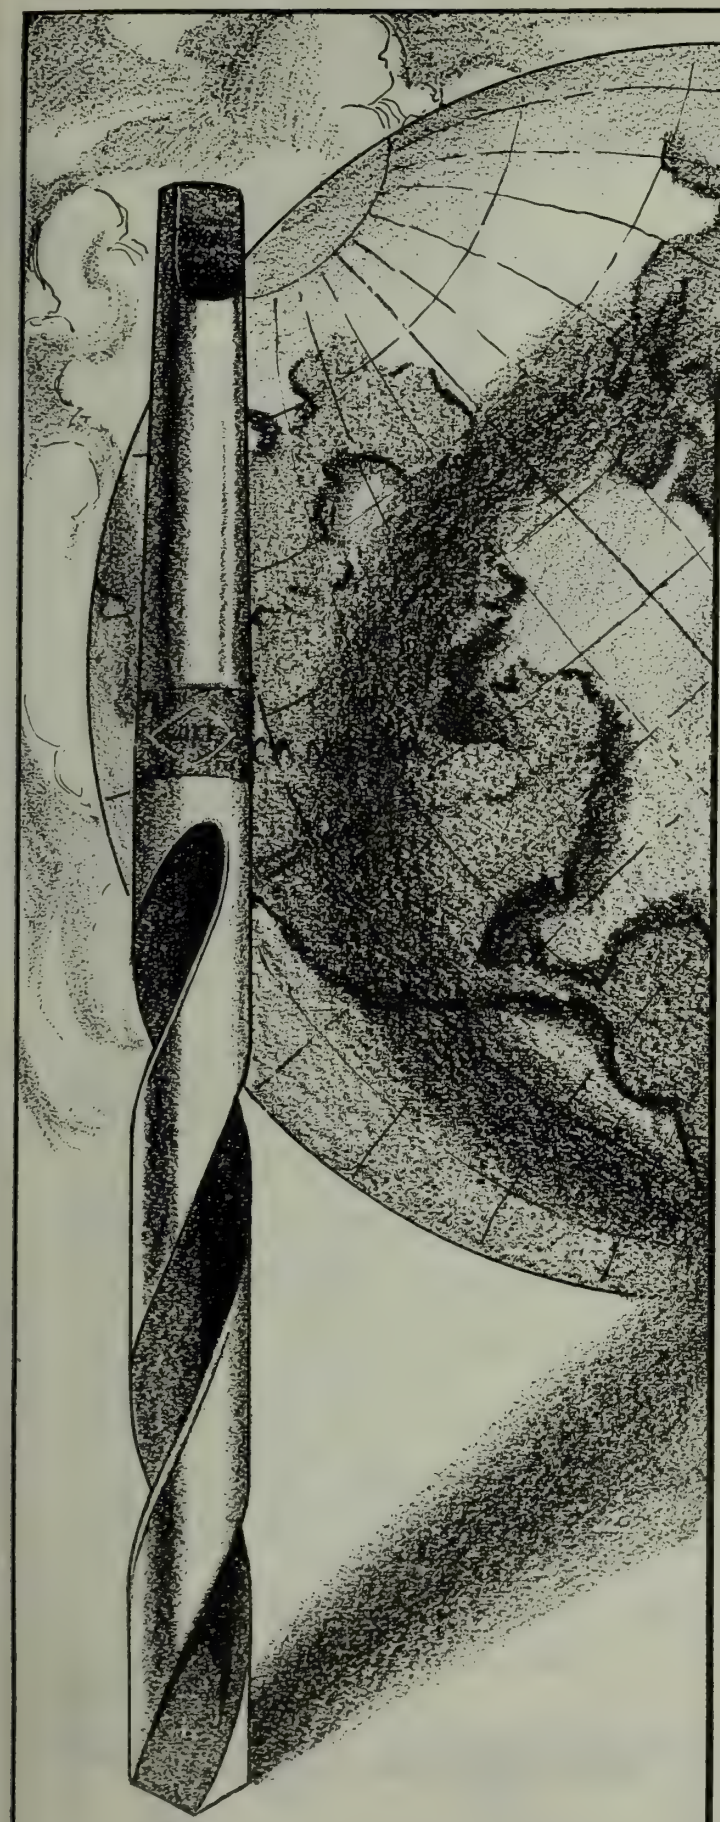
DUST vs. GOODWILL

DUST is the greatest enemy in the store. It lessens public goodwill in proportion as it increases the shop-worn appearance of the stock on the shelves. Although impossible to keep out the dust altogether, it is not only possible, but easy to control and hold 90% of the atmospheric dust in your store by using

STANDARD Floor Dressing

It is sanitary, non-evaporating and non-gumming. Floors and fixtures treated with it gain in appearance and wearing quality. As much as 500-700 square feet of floor space can be treated with one gallon. A floor once dressed requires no further attention for the next three or four months other than regular sweeping with a hard broom.

Supplied in one and four gallon cans and barrels and half barrels.



An ordinary floor sprayer may be used in applying Standard Floor Dressing.

The Choice of the Largest Canadian Jobbers

EVERY really large and reputable jobbing house spends time and money making thorough investigation of a line before handling it. Investigations in the lamp field have prompted the largest jobbing houses in Canada to select from a world-wide market Laco Lamps. Not only that, but they have been handling Laco Lamps for years with a continued increase in sales year after year.

The Following Jobbers Handle Laco Lamps:

It's a Representative List of Canada's Leaders

John Starr, Son & Co., Ltd.
Halifax, N.S.

Eastern Electric Co.
St. John, N.B.

Canadian Fairbanks-Morse Co., Limited
Montreal, Toronto, Winnipeg, Vancouver

Canadian H.W. Johns-Manville Co., Limited
Montreal, Toronto, Winnipeg

Munderloh & Co.

Great West Electric Co. Ltd.
Winnipeg, Man.

Rankin & Cherrill
Vancouver, B.C.

E. B. Horsman & Son
Vancouver, B.C.

W. H. Hazlitt Co., Limited
Vancouver, B.C.

LACO LAMPS

WE take keen pride in the fact that these jobbers continue to recommend Laco Lamps to their dealer customers — and remember, Mr. Retailer: When these firms feel justified in backing the sale of LACO LAMPS with their reputation and their capital —it is good business for you to follow that lead and put in a stock of these successful business-getters.

Laco Lamps are well advertised from Coast to Coast. We are creating a demand that will be very profitable to you. Co-operate with us in meeting it. The LACO Sign in your store is a prestige-earner and trade-builder.

Booklets, folders, window cards, hangers, window trims, etc., will be furnished for your store. If you have a large prospect to close we will gladly send one of our specialists to help you—without cost, of course.

Laco Lamps offer one of the best propositions on the market. Write to-day for details

WE DON'T WORRY ABOUT THE COAL SUPPLY

WE ALWAYS USE C.G.E. ELECTRIC HEATERS

NOTE---These C.G.E. Electric Heaters include a great variety of styles and sizes and are listed in booklet 622 which will be sent by the Canadian General Electric Co., Limited. Offices: Toronto, Montreal, Quebec, Halifax, Sydney, Ottawa, Cobalt, South Porcupine, London, Winnipeg, Calgary, Edmonton, Nelson and Vancouver.

THE HOUSEWIFE NEEDS HELP!

She needs the help of machinery to do everything that can be done by mechanical power.

She needs the dealers' help to show her how machinery can do the work and thus save her the constant drudgery of housekeeping.

Show your customers the "Seafoam" Combination Washer and Wringer. The "Seafoam" is so free from faults and so complete in every detail that its buyers become friends of the firm that makes it and of the dealers who sell it. One sale leads to others, as the merits of the "Seafoam" become better known.

Make a list of people in your district who ought to own a "Seafoam." Send the list to us and we will write each name on it, referring to you as our local representative.

Why Not Stock Them?

WE are Washing Machine specialists. For twenty years we have been manufacturing home laundry equipment exclusively. Our "1900" Cataract and "1900" Agitator Electric Machines are the best designed Washers on the market. They mechanically perfect and give wonderful satisfaction.

A liberal profit is allowed on all "1900" Washers and Wringers. Our complete line includes washers that operate by Hand, Water Power, Engine Power and Electric Motor. We also have a full assortment of sizes and grades of superior, beautifully finished hand and power wringers. The profit made by carrying the "1900" line is limited only by the "prospects" within your reach.

"1900" Cataract Electric

"1900" Agitator Electric

Extensively Advertised— And the Dealer Gets the Benefit

Every dealer who proves his worth is handed all the inquiries from his territory resulting from our twice-a-year advertising campaigns.

If, at the present time, you do not carry a line of washing machines, or are looking for "something better," you will profit by writing our "Wholesale Department."

Why It Pays!

ADVERTISING in HARDWARE AND METAL is economical because it reaches, and the advertiser only pays for, a circulation of tremendous buying power, which is always on the lookout for new lines and information regarding goods which are already in stock.

Manufacturers and wholesalers cannot afford to side-step the dealers. In nine cases out of ten, the customer accepts the retailer's recommendation.

If interested, tear out this page and place with letters to be answered.

Have you put in your stock of Anthes Feed Cookers?

Every farmer and stock raiser in your community will require a Feed Cooker. The superior merits of the "Anthes" will make it a big sales-getter.
The cauldrons are of high-grade cast iron, uniform in thickness and smoothly finished inside and out. They come in 20, 40, 50, 60 and 75-gallon sizes, Imperial measure, conforming to the new law which prohibits the use of wine measure.
In the 20 to 60-gallon sizes the jackets are of 16-gauge sheet steel, and in the 75-gallon size of 14-gauge sheet steel, reinforced at bottom with heavy band iron.
The margin of profit on this Cooker is reasonable, too.

All leading jobbers sell them. Specify "Anthes" when ordering.

In stock for prompt shipment.

Why You Should Be A Michelin Dealer

No. 26

Better Winter Business— Prepare for it Now

The Michelin Universal, because of its broad traction-surface, is an ideal tire not only for rear wheels but for front wheels, too. It gives maximum protection against skidding and yet steers so easily that it can be used with utmost satisfaction on front wheels, where other makers advocate the use of plain-tread tires or so-called "driving tires".

Especially in winter time motorists require all the protection they can get against skidding. Hence Michelin Universals have an extra-ready sale in winter, when the sale of ordinary tires falls off.

Michelin Dealers are busy the year round. Now is the time to prepare for winter business. If you want to make this the best winter you ever had, write for Michelin's dealer proposition today.

83-85-87 DUKE STREET
TORONTO

September 20th, 1918

To the Trade:

IMPORTANT NOTICE

To further the Government's Conservation Policy, the sale of AutoStrop blades in dozen packages, ($1 size), is discontinued.

Subject to change, when conditions will permit, the package of six blades, (50c Size), will be the present standard.

This decision was reached after a thorough investigation of the steel supply, aud existing conditions convinced us that conservation of steel is of urgent need.

We feel that our action will meet with your hearty approval.

Unlike blades for non-stropping razors, six AutoStrop blades will last for a year or more.

Yours very truly,

AUTOSTROP SAFETY RAZOR CO. LIMITED

NOTICE OF CANCELLATION OF O-CEDAR PROFIT DEALS

Owing to the continual increases in the cost of raw materials of all descriptions, including packing cases, and the general advance in freight rates and operating expenses, we feel sure that the trade will realize our position and the circumstances which have determined the cancellation on and after October 1st, 1918, of all profit deals on O-Cedar Products, namely, Nos. 51, 52, 54, 59, 61, 62, 63, 64, 65, 66, 67 and 68.

We are also cancelling Duster No. 11 and Duster Cloths No. 12 and 13, as the advancing cost of material and difficulty of delivery makes such action necessary.

If you purchase O-Cedar Products to the amount of $27.00 (net) we will send you prepaid our Counter Display Stand; if you purchase $40.00 worth (net) we will send you our Electric Sign; if your purchase amounts to $100.00 (net) you will receive one of our handsome Floor Display Stands. When placing an order with your jobber tell him to include whichever one of these display features your purchase will entitle you to. This offer is, of course, contingent upon our present supply, as further metal signs cannot be secured until after the war.

HARDWARE AND METAL

Published Every Saturday Since 1888

Vol. 30 TORONTO, OCTOBER 12, 1918. No. 41

All Gasoline Dealers to be Licensed

Fee Will Vary From $2 to $600, Fuel Controller Tells "Hardware and Metal"— Volume of Business During Previous Year to be Basis of License— New Ruling Will Go Into Effect Soon as Possible

GOVERNMENT regulations which have just been approved provide for the licensing of all persons who deal in gasoline in Canada. This will place the control of the entire wholesale and retail gasoline trade under the direction of Fuel Controller Magrath. Mr. Magrath stated to HARDWARE AND METAL that forms of application for licenses will be mailed from his office in Ottawa and that the license fees will range from $2 to $600 per annum. The fee will be based entirely on the volume of dealers' sales of gasoline during the previous year.

Must Keep Records

Provision is also made for the keeping of certain sales records, and all retailers of gasoline are called upon to post in their places of business the wholesale as well as the retail cost of gasoline handled by them. One important provision of the regulations is that for the duration of the war the sale of gasoline on Sundays is absolutely prohibited.

Prices are Fixed

Retail maximum prices are prescribed for establishments selling gasoline in quantities over a thousand gallons a month. Profits are based on a 10 per cent. advance over the wholesale cost delivered. These regulations mark the first step toward bringing the control of the sale of gasoline under the same sort of supervision as is now extended to the sale of coal and other fuels.

Liable to Fines

In cases where dealers fail to obey the provisions of the law the Fuel Controller has absolute power to cancel or suspend licenses without notice. All persons who continue to deal in gasoline without making application for a permit to do so will be subject to a penalty of $50 for each day such business is conducted in contravention of the regulations.

Not High in Canada

Many dealers pointed out to HARDWARE AND METAL that gasoline prices in Canada are not high. Gasoline has been selling here for some time at much lower prices than were in effect in contiguous territory across the line. This has been due to the action of the distributors. It is not unlikely that there may be an increase in prices made shortly and that dealers will take advantage of the new regulations to put into effect the maximum prices they are allowed under the clauses. This however may be offset by the action the Fuel Controller of the United States is taking to stabilize prices at the refineries and prevent any general increase.

War Needs Pre-eminent

"The whole question centers around the vast war needs," said S. R. Parsons, president of the British-American Oil Company to HARDWARE AND METAL. "The elimination of Sunday driving has helped a great deal in providing millions of gallons of gasoline, which has been sent forward already for war purposes. Placing the wholesale and retail distribution of all available supplies under the direction of the Fuel Controller should enable the government to take any measures that may be necessary to provide against any shortage for war purposes. The sales of gasoline in Canada have I should say been steadily increasing. While there are no figures available, I believe that the increased demands for war purposes, the large number of new automobiles, the steadily increasing number of delivery trucks, and the increasing use of tractors, means that there will be a considerable increase in the consumption of gasoline in Canada this year over last year. I do not look for any material increase in prices.

The regulations in detail as given to HARDWARE AND METAL by the Fuel Controller are given below.

REGULATIONS TO CONTROL THE SALE OF GASOLINE IN CANADA

Interpretation of Fuel Controller's Ruling

1. Every person who sells gasoline in Canada shall be deemed to be a dealer under these regulations.

Dealers' Permits

2. Any person now engaged in or who desires to engage in the business of selling gasoline shall forthwith apply to the Fuel Controller by registered letter in Form "B" for a permit in Form "A" accompanied by the proper fee for such permit.

3. Any dealer carrying on business and accepting or filling orders for gasoline in more than one office or who maintains one or more branch offices or supply stations for wholesale or retail trade within the same municipality or in other municipalities shall secure a permit for each separate place of business where gasoline is sold or orders therefor are accepted.

4. Any such permit issued subsequent to the first day of October in any year shall be valid for the remainder of such year and also for the whole of the succeeding calendar year.

Permit Fees

5. Fees for gasoline dealers' permits to be charged by the Fuel Controller shall be based on the volume of sales made by the applicant during the previous calendar year. Where such sales amounted to:—

(a) Less than 1,000 gallons the fee shall be Two Dollars.
(b) 1,000 to 5,000 gallons the fee shall be Four Dollars.
(c) 5,000 to 10,000 gallons the fee shall be Eight Dollars.
(d 10,000 to 15,000 gallons the fee shall be Ten Dollars.
(e) 15,000 to 20,000 gallons the fee shall be Fifteen Dollars.
(f) 20,000 to 40,000 gallons the fee shall be Twenty-five Dollars.
(g) 40,000 to 70,000 gallons the fee shall be Fifty Dollars.
(h) 70,000 to 100,000 gallons the fee shall be Seventy-five Dollars.
(i) For every additional 100,000 gallons or part of 100,000 gallons the sum of Seventy-five Dollars until a maximum of Six Hundred Dollars is reached.

6. A dealer's permit may be issued to any applicant who was not engaged in the business of selling gasoline during any period of the previous calendar year on payment of the minimum fee herein prescribed.

SUMMARY OF FUEL CONTROLLER'S REGULATIONS RE SALE OF GASOLINE IN CANADA

All Dealers must have permits.

Clauses 1 to 6 of the regulations define the terms upon which permits are issued and the fees payable therefor, with the proviso that applicants not previously engaged in the business of selling gasoline may obtain a permit by paying the minimum fee of $2.

Where gasoline is sold at branch offices or supply stations, the dealer must secure a permit for each separate place of business.

Permits may be cancelled.

Clause 7 states that permits are subject to cancellation if dealers are found guilty of having given short measure or of other default.

Penalty for Transacting Business without permit.

Clause 8 imposes a penalty up to $50 a day on dealers who fail to apply for permits or who continue to do business after having their permits cancelled. This is in addition to penalties stated in clause 15.

Sales Records.

Clause 9: "Every dealer shall keep a record showing volume (in gallons) of daily sales of gasoline, which record shall be available during regular business hours for inspection by any person authorized in writing by the Fuel Controller."

Margin of Profit for Retailers.

Clause 10 states that retailers shall not charge their customers more than 10 per cent. above the wholesale price delivered. This applies to retailers selling 1,000 gallons or more in a month.

Permits must be on view.

Clause 11: "Immediately upon receipt of the official permit every dealer shall expose the same in a prominent place in his office or place of business."

Permit Number on Stationery.

Clause 12: "Every dealer shall display prominently upon his business stationery the words 'Fuel Controller's Gasoline Dealers' Permit No. .....,' followed by the official number of such permit."

Prices must be displayed.

Clause 13: "Every retail dealer shall display in a conspicuous place on his premises, readily visible to purchasers, a notice or bulletin clearly setting forth the wholesale and retail price at which gasoline is being purchased and sold by him."

No Sunday Selling.

Clause 14: "The retail sale of gasoline on Sunday is prohibited"

Penalties.

Clause 15 empowers penalties for contravention of the regulations as follows:—A fine not exceeding $100 for each offence, or imprisonment for a term not exceeding one month, or both fine and imprisonment.

C. A. Magrath,
Fuel Controller.

Ottawa, 14th Sept., 1918.
Approved by Order-in-Council 2nd. Oct., 1918; P.C. 2370.

England Can Now Defy the Huge Potash Trust of Germany

ENGLAND, for the first time in recent years, can now defy the German potash trust. She is no longer dependent upon the Huns for supplies. One of the favorite boasts of Germans has been that the world was dependent upon them for potash. This is another Hun dream that has been shattered by British enterprise.

The efforts of England to achieve independence from Germany in the matter of potash have resulted in a governmental monopoly of the blast furnace and cement dust, manipulation of which has progressed to such an extent that the fear of a potash famine is at an end.

The new progress may have an important bearing on future Canadian industry in view of the huge deposits of marl in the Dominion.

Can Defy Germany

Each month that passes renders Great Britain more independent of German potash, and more able to treat with disregard German's continual threats of holding other nations to ransom on potash. In her attempt to starve her enemies by withholding potash manures, it will be as difficult for Germany to achieve success as it was in her recent attempts to starve out Great Britain by submarine tactics.

Was Badly Needed

Very early in the history of the war one of the results of Great Britain's economic dependence upon Germany for essential commodities was brought home forcibly to the minds of those charged with the supply of optical munitions. The manufacture of optical and scientific glass had passed, in pre-war days, almost entirely into German hands; Germany was heavily favored in this production by the fact that she had practically a world monopoly in potash, an essential ingredient for certain qualities of glass.

Had a Monopoly

This German monopoly rested upon the fact that the largest and best developed potash deposits in the world are located within German territory (around Stassfurt); the mines are all State-controlled and State-protected. The Stassfurt mines are easily able to produce sufficient potash to supply the needs of the whole world, and German State control is directed towards allocating output and fixing prices, in order to create and maintain a monopoly. In 1913, the last complete year before the war, the total sales of German potash amounted to 11,102,740 double cwt. (1,110,274 metric tons), the estimated value of which was 202,000,000 marks (£10,100,000), according to the "Board of Trade Journal." In the same year, potash salts to the value of £1,380,567 were imported into Great Britain; the German contribution to this was over £915,867.

Beatty Bros. are considering making important extensions to their plant at Chelsea Green, London, Ont. Work on a new factory to cost $150,000 may be commenced this fall.

Drastic Order Closes Montreal Stores

Influenza Epidemic Responsible—Idea is to Get Rid of Traffic Congestion at Regular Closing Hours—Exceptions Made in Case of Grocery, Butcher, Candy and Drug Stores, and Also Tobacco Stores

THE following drastic ruling was advertised on Wednesday morning of this week with regard to the early closing of stores in Montreal. It is explicit and is one of the many orders rapidly following one another within the past few days, and made to further stay the ravages of Spanish influenza. In such need it has been considered an imperative measure, and the step was taken after other important legislation had been enacted by the civic government in closing theatres and schools, and in calling off large gatherings.

INFLUENZA

Notice to Storekeepers

PUBLIC NOTICE is hereby given that, as an additional precautionary measure to check the epidemic of influenza, the Board of Health take this means of notifying the proprietors and managers of all stores without exception to close their establishments at 4.30 o'clock every day, in order to avoid congestion in the tramways from 5 o'clock in the afternoon.

This notice, however, does not apply to stores in which are sold exclusively candy and tobacco, groceries, drugs, and also restaurants and butchers' shops.

This Public Notice must be complied with until further orders, under the penalty provided by law.

S. BOUCHER,
Medical Health Officer.

City Hall,
Montreal, October 8th, 1918.

Views of Dealers

HARDWARE AND METAL secured from several retail hardware dealers their opinion on this order and they are not in accord with the decision made. It is not to be understood that they are opposed to the necessity of the hour in using all necessary expedients to stay the epidemic, for this is not the case. They do feel that the order will not be as effective as the authorities hope to make it.

Max Hill, manager of the James Walker Hardware Co., Ltd., stated that it was an apparent mistake and that the matter had not been maturely considered. It was a mistake to argue that by closing the stores at this hour the desired relief in congestion of street and tramway traffic would be avoided. To have the stores close at 4.30 would simply throw an excess of traffic on the transportation facilities of the city at an earlier hour and take it away from the usual period of 6 to 6.30. They would endeavor to use their good offices in having the measure modified and the time of business hours extended.

May Work Hardship

The Philbin Hardware Co. were much opposed to the early hour decided upon. This would work a great hardship. To HARDWARE AND METAL Mr. Philbin stated that fully 50 per cent of their business was done between the hours of 4 and 6.30. It would be impossible to avoid a big loss of custom, for a large portion of their trade came from various workers and others leaving their offices at a late hour. He could not see the particular advantage of the new order and hoped it would be possible to amend it somewhat.

Omer DeSerres thought they would lose 25 per cent. of their business if a readjustment of buying was not made by their trade. He felt, however, that their customers would be governed by the order and that the loss would not total so much. They were quite ready to agree in any necessary way if the order was to accomplish the desired end, and Mr. DeSerres felt that good might result from the closing.

Another dealer stated that the order would probably have the effect of accomplishing the purpose very well. It was argued that if part of the workers were to leave the stores at 4.30 there would be a steady but uncongested traffic from this hour until 6.30 or 7. Some offices closed at 5 p.m., others at 5.30, and the workers usually stopped work at 6 o'clock. This suggested plan would therefore work out fairly well it was thought.

German-Owned Hardware Store is Closed by Government

ALLEGING that a large percentage of the holdings of the firm, Hardware, Limited, of 317 St. James st., Montreal, were controlled by a German named Schmidt, who is now in Germany, the government has closed the business. This action was taken following instructions from the Secretary of State, Hon. Martin Burrell.

An investigation was made and as a result of what was discovered, the Secretary of State deemed it advisable in the interests of the Dominion to liquidate the affairs of the company. All surplus between the assets and liabilities will probably revert to the Crown after the business is wound up.

Hardware, Limited, has been under the management of Mr. Thivierge. Following the investigation and a subsequent petition of Howard Aylmer and Dewitt, acting on behalf of the Secretary of State, the place was closed. Maximilian Schmidt, a native and a resident of Germany is believed to be owner of 75 to 80 per cent. of the stock. The action taken was under the War Power Act.

Liquidator Appointed

Frank E. Donovan, 157 St. James st., is acting as liquidator and is making an inventory of the estate at once. Mr. Donovan intimated to HARDWARE AND METAL that there would be ample assets to meet the firm's liabilities, but that it was impossible to state just what the position would be, until matters had been fully gone into. As soon as the balance sheet can be made up he stated that there would be a winding-up of the estate and that the proceeds, over and above existing obligations, would revert to the Federal Custodian, who would hold the matter over in the usual way until the close of the war, when disposition of any funds in hand would be decided.

The German Capital

M. Thivierge, the manager, stated that the firm was known in Montreal for some time as Peter Ludwig Schmidt, until about two years ago. At that time the name was changed to Hardware, Limited, and the business conducted on Lemoine street until a few months ago, when it was removed to the present address.

Mr. Thivierge stated to HARDWARE AND METAL that Schmidt lived in Germany, and had resided there regularly. He was connected in that country with a manufacturing firm, which, it is further understood, is still a going concern. Mr. Thivierge stated that Hardware, Limited, was solvent, and that as soon as stock could be taken the assets, book and otherwise, would be sold by tender.

The firm handled considerable quantities of hardware, and more recently their activity was largely in automobile accessory lines. Both a retail and wholesale trade was conducted.

IS ANOTHER PAINT MERGER ON THE WAY?

Persistent rumors percolated through paint circles during the week to the effect that important developments were pending, including two or more Canadian paint manufacturing firms. Interviewed by HARDWARE AND METAL, the firms referred to emphatically denied that there was any basis for the rumor. Another vague report emanating from a large United States centre started considerable gossip regarding an alleged merger affecting several paint firms, but definite details are lacking.

CORRECTION

It was stated in HARDWARE AND METAL last week that Nelson Mills, of the Mills Hardware Co., Hamilton, sold on an average ten electrical washing machines per month. This should have read water power washers.

BRIGHTER FUTURE FOR STEEL IS NOW LIKELY

ACCORDING to information given to HARDWARE AND METAL, the future is likely to be much brighter in regard to getting steel supplies. No immediate change in the situation is expected, and it is impossible at the present writing to tell just when supplies will come forward more freely. This depends upon the American Government. It is stated, however, that many Canadian firms have been given assurance that their needs will be looked after as far as possible, and that some of the transportation companies already have their representatives at Pittsburg and other American centers arranging for bringing the steel to Canada. In the meantime, however, there is a most serious shortage in many lines, especially sheets, and also in pig iron. Some of the promises to keep Canadian firms supplied may be due to the fact that the American Government is placing more huge orders for war supplies in Canada. A Brantford firm, it is stated, has a large deal under way, and others are also being negotiated. The Canadian Steel Corporation has a large force of men at work at Ojibway, getting ready for extensive building operations. It is stated that seventeen mills are planned. Just when these will be in operation it is impossible to say. In the meantime, across the line the big plants are speeding up production by every possible means. There have been huge special war demands in connection with the recent advances made by the Allies, and these are being taken care of satisfactorily.

Material for shells, cranes, trucks, tanks, rails for military roads, portable track work, and various other essentials of an attacking and mobile army now are being rushed through the mills to the exclusion of less vital necessities.

As a result the lines have been more sharply drawn for the general distribution of steel, and only a scanty amount of material is available for needs in the B and C classes. The mills insist rigidly that every detail in the way of providing proper priorities and affidavits shall be complied with by the consumer.

WOODEN HANDLES MAY JUMP IN PRICE SOON

FURTHER advances in the prices of all lines of wooden handles are likely to be made shortly. Not long ago the manufacturers made an advance of ten per cent. in prices, but this, it is stated, is not sufficient to meet the increased costs due to higher wages and higher prices for raw materials and freight rates. The manufacturers have been getting orders faster than they can fill them, owing to difficulties in obtaining raw materials. Firms who buy large quantities of hickory and other timber in the Southern States have to get certificates from the War Board at Washington before the goods can come into Canada. In view of the drastic restrictions which are being imposed by the American Government with a view of concentrating all the forces of the nation on war production, and cutting out non-essentials there are often delays in obtaining these certificates. Some manufacturers will not be surprised if in the near future they find it impossible to get in the wood they have purchased across the line. In case the American Government takes action which will hold up the delivery of these supplies the manufacturers will have still another problem to deal with, that of trying to secure materials at home. This may be done, but in many cases it will mean a lot of trouble and expense, and delays in delivery.

REDUCTION LIKELY IN OUTPUT OF TURPENTINE

THE reduction in the receipts of turpentine at the three principal American ports in the South for the remainder of the season will be extremely small. Under the best of conditions they will be only approximately one-half of what they were last season. If labor conditions grow worse, as indicated by report from Pensacola, the slump may run as high as 55 to 60 per cent. In that event the three ports for the seven months of September-March would hardly receive more than 50,000 barrels of turpentine. Under the very best of weather conditions and labor as it is they can hardly pass 60,000 barrels, which is just about what the single port of Jacksonville received for that period of last season. This tells the story plainly of the shrinkage that is ahead in supplies. True, turpentine has not yet been benefited in value by the decreased production as it should have been, but when the season closes and it is found that the crop has been cut so greatly and production for 1919 will be equally as small, or smaller, the effect on values must be pronounced, especially if it is apparent that 1919 will bring peace and a rush from Europe for supplies.

BIG CALL FOR GLASS FOLLOWING EXPLOSION

ONE man was killed and damage that will total $50,000 was caused at London, Ont., on Saturday morning, when an acetylene gas plant, used for refilling the tanks for auto lights, blew up. Among the stores damaged was that of J. A. Page, hardware dealer, at 807 Dundas Street. Mr. Page's garage was blown away, and the plate glass windows of his store smashed to pieces by the explosion. Store fronts and the glass in windows for blocks were shattered, and as a result the hardware dealers in London sold so much glass on Saturday and Monday that their stocks were practically gone. The cause of the explosion is unknown. The acetylene plant was owned by Commissioner Fred Mitchell, of the London Engine Supplies Co. An interesting situation may develop in regard to who is liable for damages. If the city by-laws allowed the plant to be operated the City of London may have to pay a large sum of money to settle the claims of those whose houses were wrecked.

PAINT MAKERS ANXIOUS OVER TIN SITUATION

CANADIAN paint manufacturers are watching the situation across the line with considerable interest. Conditions as far as the priority rights of the paint and varnish industry are concerned have not improved.

The Secretary of the Paint and Varnish Manufacturers' Associations considered the tin plate situation so serious that he issued a bulletin to the general effect that the supply of cans would be cut off. Owing to the shortage of plate and the already big general demand, supplemented by exceptional crops of perishable food stuffs, there has been a call for plate never before equalled in the history of the industry. The Government has summoned to Washington representatives of the various industries, such as coffee, syrup, tobacco and lard, explained the situation frankly and asked the co-operation of these industries in the substitution of fibre packages for tin and has in general received their promises to comply with the Government requests in this particular. Paint, however, with its weight, its dryers and various chemical solvents, cannot, at present and probably never will be packed economically in anything but tin. It is, therefore, important under present priority rulings that the essential nature of the industry be recognized or the shortage of tin plate may be very disastrously felt.

BRISK DEMAND FOR PAINT FROM DEALERS

RETAIL hardware men are ordering freely already for next season. They are also observing the new ruling regarding containers, quite generally, and their specifications are coming to hand for gallon and quart tins, in place of the half-gallons and pints. Manufacturers are anxious that this should be clearly understood, so that there may be no delay through ordering in such sized packages as cannot be supplied after December.

PLAN TO STOP ALL GUESSING CONTESTS

AT the coming session of Parliament steps are to be taken by the Retail Merchants' Association to bring about such amendments in the Trading Stamp Act and the Lottery Act as would prevent the carrying on of all guessing contests by merchants.

It has been a disputed point as to whether a guessing contest is a game of chance or a contest of skill. The aim of the amendments to the existing Act will be to make it illegal to carry on such guessing contests.

As to whether this is a good step or not—that is so far as restricting guessing contests goes—HARDWARE AND METAL need not now say. If, however, the amendments do make the Acts clear as to what is an offence and what is within the law, they will be along the right line. At the present time merchants who are law-abiding citizens in every way, and who have the ordinary man's hatred of being haled into court, are summoned for some supposed infringement of an Act which seems capable of wide interpretation. Anything which makes for a clearer understanding of these Acts should be in the interest of the retail trade as a whole.

SHIPMENTS OF COAL STEADILY INCREASING

ASIDE from the war news the most cheerful news of the week for business men comes from the United States in the announcement that the anthracite operators and miners are keeping their promise to the Fuel Administration that the anthracite production of last year would be maintained and, if humanly possible, exceeded. Shipments in August last established a new record for that month, repeating a similar record made in July. The quantity sent to market last month amounted to 7,180,923 gross tons, an increase of 96,148 tons over July and 96,148 tons over August, 1917. Shipments for the first five months of the present coal year, beginning April 1, have amounted to 34,388,996 tons, as compared with 33,297,109 tons for the corresponding period of last year, a gain of 1,091,887 tons, or a little over 3 per cent.

RAILWAY WORKERS GET SHORTER HOURS

SHORTER hours and increased wages for more than 75,000 Canadian railway employees have been granted by the Canadian Railway War Board. Just what effect this will have on the business of the country remains to be seen. Many of the railways have been working to capacity to handle the volume of business thrust on them. They have been short of help. Help is not as plentiful right now as it was even a few months ago, and with the workers who are available working shorter hours it would seem that the railways must either secure more employees or else move freight less rapidly. Some railwaymen expect that more women will be employed. This is what has happened in England and the United States.

The increases in wages granted by the War Board exceed $22,000,000. This is a big addition to the railway companies' pay rolls and will eat a large hole in the revenue they get from increased freight rates. The War Board at its meeting ordered that hereafter the eight-hour day shall prevail in all Canadian railway freight sheds. Instead of opening at 7 a.m. and remaining open until 5.30 and 6 o'clock, the sheds will now open at 7.30 and close at 5 o'clock for five days in the week, while on Saturday the closing hour shall be 1 o'clock. This goes into effect October 15.

The employees affected are mostly stenographers, clerks, office boys, messengers, watchmen, section men.

A Radical Price Experiment

Retailers Compelled to Show Cost and Selling Prices on Goods in Plain Figures—Order Applies Only to Retail Trade—New Order in State of Arizona

EDITOR'S NOTE:—How would you like to be compelled to make known to all your customers and competitors the gross profit on each individual line sold in your store? Supposing you were ordered to mark both cost and selling price on all goods, in plain figures, thus showing your gross profit to your customers. Would you object to such procedure? Commencing Oct. 1 retail merchants in the State of Arizona are compelled, under orders from the State Council of Defence, to mark their merchandise in plain figures, with both the cost and selling price. This action is of great signifiance. The U.S. War Industries Board is now considering a plan to stamp the wholesale price on all merchandise sold in the United States. The Canadian Fuel Controller has just made it compulsory, through an Order-in-Council, for dealers in gasoline, who sell over 1,000 gallons a month to have posted up in a conspicuous place the cost and selling price of gasoline. The following article, outlining the Arizona plan, and some of the difficulties likely to be encountered, should be read by every merchant, both wholesale and retail. The article is reprinted almost in its entirety from "Printers Ink," New York, and outlines in a most practical manner many of the difficulties likely to be encountered.

IT is a trait of human nature to believe things are much better way off somewhere. Merchants in Tyler, Texas, complain that their townspeople go to Dallas to spend their money when they ought to spend it at home. Dallas merchants are contiually worried at the amount of Dallas money which goes to St. Louis. And in St. Louis it is a big job to keep the moneyed people from doing their trading with the storekeepers on Fifth Avenue, New York City.

Home town people everywhere seem to have an idea that merchants in other places are somehow more up-to-date than the local business men, and sell things much cheaper.

The State of Arizona is so impressed with these things that it is taking matters into its own hands. Beginning October 1 every retail merchant in Arizona must plainly mark every piece of merchandise with the retail selling price, and also the wholesale, or cost price. Arizona folks are about to learn just how much the storekeepers have been "profiteering on them all these years.

Talk about retail profiteering is not confined to Arizona. It has been a burning question everywhere since the war began to send prices skyward. It is a burning question with national advertisers.

In a cantonment town in the South there had been constant complaint of high retail prices. Soldier boys said every merchant along Main street raised his prices the moment a man in uniform entered his store. Civilian customers growled among themselves that the retailers were a bunch of grafters who raised prices because the coming of the soldiers had doubled the population of the town, and they had the public at their mercy. The most well meaning storekeeper in town, returning from work on a Liberty Bond or Red Cross committee, might at any time enter his store to find things in turmoil on account of some indignant customer protesting at the prices asked, and demanding to meet the grafting proprietor face to face.

There were so many complaints at last the chamber of commerce advertised that it would welcome any charges against local business men, and see that any irregularities were adjusted. A committee was named, composed of three leading citizens, and an equal number of army officers, to act as a jury in any case of profiteering.

Accusations of Profiteering

The complaints were varied. One charge was against a clothing firm which had asked 25 cents for a man's collar. The complainant stated that he could buy the same make of collar in any other town at exactly half that price. A soldier boy alleged that he had been charged 7 cents for a package of cigarettes which had sold for a nickel in his home town ever since he could remember. A lady appealed to the committee to make a jeweler refund the $30 which she had paid for a wrist watch some weeks before, because a friend had told her she could get it cheaper by sending to a Chicago mail-order house. She added that she was tired of a wrist watch anyhow, and believed she would rather spend the money for a fur boa.

An army officer—yes, a real officer with gold hat cord, leather puttees and everything—made a written complaint against the proprietor of a watermelon stand, alleging that he had been charged 10 cents for a slice of watermelon which was less than two inches thick, same being carefully and accurately gauged by a tape measure which the officer carried in his pocket.

All of these complaints are on file in writing at the office of the chamber of commerce of the cantonment town in question. Of the first twenty complaints only one might have been considered a case of profiteering. A soldier had bought a plated watch chain at a pawn shop and had really been charged an exorbitant price for it. The chain, however, was of a widely advertised brand, everywhere sold in first class stores at a uniform price, so the pawnbroker, caught red handed, was compelled to refund the amount overcharged.

In spite of the fact that the vast majority of profiteering complaints proved upon investigation to be baseless, citizens felt the reputation of their town might be impaired, and a mass meeting of citizens of all classes was held to consider the matter.

At this meeting a professional man proposed a remedy. "Most of the complaints are made by army people," he said, "and that reflects on our patriotism. Our merchants may, or way not, be charging too much for their wares. But I won't discuss that. What we are most concerned with, is the necessity of saving the reputation of our city. What I propose is that our merchants shall give a 10 per cent. discount to all persons wearing the uniform of the United States Army."

To many of those at the meeting the professional man's proposal seemed rather reasonable. But fortunately for the merchants, one of the leading bankers of the town was present. "I am in position to know a great deal about the inside of retail merchandising," said this banker, "because my institution handles the accounts of a great many retailers. The gentleman's discount plan would not work. I speak from personal knowledge when I say that **not one merchant in fifty makes 10 per cent. net profit on his total sales.** When, therefore, you propose to compel a merchant to give a 10 per cent discount to any class of people you are compelling him to sell his goods at a loss. And if carried to its logical conclusion there would come a time when there would be no storekeepers in our town at all, because every one of them would go bankrupt."

The 10 per cent. discount idea was not adopted. Instead, it was decided to appoint a vigilance committee to

Current Events in Photograph

RATIONS FOR THE AIR FLEET

The unhappiness of the German retreat is emphasized by this picture. Here is displayed one night's rations for the bombing squadron. All these bombs are for German camps, munition dumps, railway stations, in fact anywhere that they will aid in congesting matters for the retreating enemy and make his homeward path the harder.

watch for any cases of overcharging that might occur, and enforce a stern boycott against any storekeeper guilty of such action. So far this has worked well. Frequent stories are carried in the local newspapers regarding the efforts of reputable merchants to keep down prices, and far fewer complaints are made than formerly because the public is convinced that the local people are trying to give them a square deal.

Why It Is Impossible For Merchants To Profiteer

All this has direct bearing on the plan adopted by Arizona, compelling every retail merchant to mark all merchandise with both cost and selling price, so customers may see how much profit they are paying. The writer has recently traveled throughout a large portion of the United States and has everywhere heard that retailers are taking advantage of war time conditions to advance their prices. When the complaints are simmered down it nearly always appears that the complainant believes conditions in his own town are worse than anywhere else. The man who had to pay 25 cents for a collar in the Southern cantonment town believes that the haberdasher back in Rochester N. Y., were he used to live, is still selling them two for a quarter.

Now the question arises—are retail merchants really profiteering? The writer says unhesitatingly that they are not. And a very good reason why they are not profiteering is because they can't. This is not saying that some merchants would not like to profiteer. But the laws of the game are against them.

A Government expert who had been engaged on a campaign to rid one of our large cities of its plague of rats, recently made a very striking statement. "Rats, or any other pest," he said, "invariably increase to the utmost limit of the food supply."

This statement applies to business men as well as rats. There is no longer any frontier in the United States. Men who are thinking of going into business cannot go out West somewhere and find a town where there will be no competition in their line. Every town in the country is supporting just as many business houses as there is a living for. Some, by extra efficiency, get along well and make money. But every year some drop out of the running.

Now let us see how things would work out if merchants in every line were compelled to take the public into their confidence and tell them what their goods cost at wholesale. A line which sells very rapidly can, of course, be retailed at a very much smaller profit than a line which sells slowly. And, contrary to general belief, goods which are necessities do not always move rapidly. Crockery and furniture are two lines of necessities which not only move slowly, but from their nature are expensive to handle, and therefore must bring a large margin of profit.

A state convention of retail merchants was recently held in a middle Western city of something over a hundred thousand population. One evening after the sessions of the day were over a number of the delegates were sitting around their hotel, and one of them remarked that there was no exclusive crockery store in the city, adding that someone was evidently overlooking a good thing.

A man in the group spoke up. "I live here," he said, "and can tell you about the crockery store business, because I lost some money in that line myself. During the past seven years three retail crockery stores have started in this city, and each one of them has gone broke. And the reason they went broke was because they did not have the nerve to charge enough profit.

"You gentlemen doubtless know," the speaker continued, "that the retail crockery dealer must get a long profit on account of breakage, heavy freight charges and similar expenses connected with the line. But you will probably be surprised at the actual figures.

Customers Would Be Up In Arms If They Knew This

"A retail crockery dealer to come out whole must add 20 per cent. to the invoice cost of an article and then double that sum for his retail price. For example, a set of dishes comes into his store, costing wholesale $10. He adds 20 per cent. to that, which make $12. He doubles that amount, which comes to $24. And he has absolutely got to get $24 for that set of dishes or he will be doing business at a loss.

"As I said, three crockery stores have gone broke in this town because they did not realize how much it cost them to do business. Very likely some other man will tackle the proposition, and it can be made to pay if he charges a living profit. But meanwhile the local people have to pay even more than the figures I have quoted, because whenever they want to buy a piece of nice

china they have to send out of town for it, and pay heavy express charges."

It may be presumed that this man knew what he was talking about, and that a margin of more than 100 per cent. is necessary in the retail crockery business. But what chance would a storekeeper have with a frugal woman customer when his sales talk had to run something like this: "Here is a beautiful dinner set, Ma'am, in the very latest decoration. It actually cost us $10; but I can let you have it to-day for the very low price of $24?" Would the lady tell the neighbors that the crockery man was a grafter? She would.

If the plan of marking wholesale cost were to be carried out thoroughly it should of course apply to every one who sells anything for money. Take the case of a lawyer, for instance, who does a piece of legal work and renders a bill of a hundred dollars for it. His cost would probably be something like $5.35, which he would have expended for typewriting and buying a lunch for a good witness. But it might be contended that there is no similarity between the business of lawyering and that of storekeeping. One sells service and the other sells merchandise.

In some lines of retailing, however, the dealer sells both merchandise and service. There is a high grade American gentleman's watch which costs the dealer $50 and retails at $75. That looks like a pretty nice profit on an article which is not expensive to handle, like crockery or furniture. But when the dealer sells one of these watches he is not through with it by any means. He must give service on it for a year. During that time if the mainspring breaks he must replace it without charge. He must spend his time every few days in regulating the timepiece, because it takes months to get a watch adjusted to the owner's habits. And so, at the end of a year, the $25 profit which the dealer apparently made has dwindled down to $5 or $6. But it would be hard to make a customer see it that way who was getting ready to spend his hard earned money.

Predicted That Agitation Will Be Widespread In Arizona

The plan adopted by Arizona, the newspapers say, is being watched by the Washington Government with interest. It is hoped that the measure will "allay agitation and restore public confidence in retail merchandising."

But won't it work just the other way? Any man who has ever sold goods at retail can imagine what real, sure enough agitation will take place when a customer looks at the tag on a wardrobe trunk and sees the wide gap between cost and selling price. And to look at a similar tag on a dining room table would certainly destroy any confidence in retail merchandising that such a person ever possessed.

But such margins have to be maintained if a storekeeper is to stay in business. **There is an average profit on every line of merchandise which has been found correct by years of experience, and the success or bankruptcy of ten thousand merchants.**

Retail profits adjust themselves automatically. All the storekeepers in a town might illegally get together and raise their prices 5 per cent. But before the end of the month some merchant in a nearby town, hearing of it, would open a branch store in their midst with prices at the proper level and take all their business away.

The laws of the Medes and Persians have nothing on the laws which inexorably dictate the percentage of profit which a merchant may put on his goods.

If he puts on too long a profit his competitors cut under him and he goes broke from lack of patronage.

If he puts on too short a profit he goes broke through the activities of his creditors.

Will Plan Work?

The Arizona State Council of Defense is very hopeful that the measure will check profiteering, restore "public confidence in retail merchandising" and allay agitation. Business men, however, are not so enthusiastic about the plan. They can't see how it can be equitably enforced, but if it is enforced they are afraid it will play havoc with business.

As simple as the Arizona plan may seem to its projectors, it is very likely that human nature will nullify it. The public is not a competent judge of how much profit a business man should make. Not possessing all the facts, it is not in a position to give an unprejudiced opinion.

On many products retailers aim to make a gross profit of 33 1/3 per cent on the selling price. That means a gross of fifty cents on a $1.50 article. But if a retailer were to state openly what his profit is, he would be waving a red flag in the face of his customers. Most of them would not believe that his net out of that fifty cents was only five cents or perhaps less. In many cases, despite the large gross, the transaction may show an actual loss.

People as a whole, have no conception of how much it costs to do business. That a merchant needs 30 to 40 per cent. gross on many products in order to come out even taxes the credulity of people who are inexperienced in running a business. Among farmers there was at one time a widespread belief that if a merchant got 10 per cent. above the delivered cost of his goods, it ought to have been ample.

Another objection to the Arizona plan is that people will expect to find uniform profit margins marked on goods. They won't be able to understand why one thing must bear a higher margin than something else. As a matter of fact, though, merchandise has to be priced according to its salability. Goods that turn slowly must bear a higher margin than those that turn rapidly. A number of other factors influence markups. As at present conducted, successful merchandising consists in being able to strike a happy average.

Having a merchant's profit appear on the goods will incline many persons to haggle with him to get it reduced. If the margin appears ample, people will have a good excuse to ask for a cheaper price. Knowing the seller's profit they will shop for a low margin as well as for a low price. This will inevitably lead to price cutting. Each merchant will want to have the profit that he asks lower than that of his competitors. The further fact that retailers do not always buy their goods at uniform prices would lead to other unpleasant complications.

Theoretically, of course, there is much to recommend this ruling of Arizona's War Council. It will be a fine arrangement for showing up the fellow who cuts the prices of well-advertised products and then makes up his loss by charging enormous prices for unfamiliar goods. The scheme will expose the shortcomings of the careless buyer and the indifferent manager. But the chances are that if the ruling is strictly enforced it will in some respects hit the efficient as well as inefficient.

If we were living in an age of absolute standardization this Arizona plan might work smoothly. If prices, qualities and everything else about a product were completely standardized retailers would have to operate on a uniform margin, and then of course there would be no harm in making it known to the public. But as it is there is still too much individualism in business despite the wide socialization that the war has caused to permit this Arizona idea to function easily.

If these dilettante economists insist on enforcing their ruling there is one way the Arizona merchants can lighten the blow, and that is to advertise steadily to their customers what their cost of doing business is. Let them explain their service and tell what it costs them to support it. If it is necessary to make public the gross profit, why not make public the many expenses that eat up that profit,

NAVAL STORES MEN PRESENT CLAIMS

A petition has been presented by the General Naval Stores Committee to the Paint and Pigment Section of the United States War Industries Board, asking that no price be fixed on rosin or turpentine, giving as a reason that such action or threat to take such action, will result in a further serious curtailment in production, and also that any further curtailment would result in a famine in rosin, thereby prohibiting the essential consumers being assured a sufficient supply at whatever price.

The committee also has asked, in order to assure sufficient production, that turpentine labor be given deferred classification up to the amount necessary to produce sufficient rosin to meet the essential requirements; also, that rosin be placed on the essential list.

Drastic Order Will Affect Trade

U.S. War Board Orders Discontinuance of Manufacture of Many Lines Sold Through Hardware Trade

A NEW order of far-reaching effect has been announced by B. M. Baruch, chairman of the United States War Industries Board. The latest order effective December 31, 1918 will affect many lines imported into, and sold in Canada. The lines chiefly affected are electrical heating and cookery appliances.

In the appliances not discontinued, the Conservation Division has cut out 691 different styles and sizes. For instance, in chafing dishes, there were 36 styles and but 3 will be allowed; of electric teapots, 20 styles and 1 allowed; of toasters, 10 styles and but 2 allowed. Manufacturers are to discontinue silver plated and copper finish appliances from the styles and sizes they will continue to make.

The official announcement with details follows:

The conservation division of the War Industries Board, applying its program of eliminations to conserve essential materials and labor to free capital tied up unnecesssarily in manufacturers' and merchants' stocks and to simplify factory production, has issued a schedule for manufacturers of electrical heating appliances which calls for discontinuance of the manufacture of the following electrical utensils and appliances:

List to Be Discontinued

Carburetor heaters, hand-wheel heaters, in-take heaters, manifold heaters, primer heaters, blankets, robes, cigar lighters, frying pans, plate warmers, curling irons, saute pans, waffle irons, fluting irons, egg boilers, soup kettles, stew pans, corn poppers, hand dryers, hosiery forms, peanut roasters, transfer irons, vaporizers, varnish sprayers, entree dishes, cigar lighters for automobile, bookbinding appliances, instantaneous water heaters, automobile foot warmers, fudge warmers, vegetable dishes, and all Sheffield plated ware.

The schedule for domestic appliances (600 watts or less, except ranges) provides:

All appliances that are to be eliminated but which are now in the process of manufacture or are completed and in stock may be sold, but no more material for any of these appliances to be purchased except to balance up stocks on hand, and their manufacture is to be discontinued entirely December 31, 1918.

None to Add to Styles

In no case is any manufacturer to add to the number of styles and sizes that he is now making.

Each manufacturer of the following appliances to restrict his output to the number of styles and sizes specified:

	No. of styles	Total No. of sizes
Chafing dishes	3	1
Percolators with faucets	3	2
Percolators without faucets	3	2
Samovars	1	1
Nursery water heaters	1	2
Teapots	1	1
Hot-water kettles	1	1
Ovens	1	1
Reflector heaters	2	2
Toasters	2	1
Toaster stoves	1	1
Convector heaters	1	1
Disk stoves	2	2
Fireless cookers	1	2
Flatirons, 7½ lbs. or less.	2	2
Grills	2	1
Heating pads	2	2
Hair dryers	2	*1

*1 in each style.

Ranges: Not more than six different ranges covering both styles and sizes to be made at any one factory, and none to be made at any factory that is not producing ranges at this date. Nickel plating and fancy ornamentation to be eliminated.

Output to be Restricted

Industrial appliances (over 660 watts).—Each manufacturer of the following appliances to restrict his output to the number of styles and sizes specified:

	No. of styles	Total No. of sizes
Convection air heaters	3	7
Confectioners' appliances	2	2
Corset irons	1	1
Matrix driers	1	1
Tailor's irons, 12 lbs. or over	2	4
Laundry irons, 7½ to 10 lbs.	1	2
Gluepots (no aluminum pots to be made)	1	3
Circulation water heaters	2	11
Immersion water heaters	1	8
Round disk hot plates, open-coil type	1	4
Round disk hot plates, solid top	1	3

Steam boilers: To be sold only where the electrical energy is generated from water power and there is a surplus of such energy available,

Restaurant equipment.—Each manufacturer of the following appliances to restrict his output to the number of styles and sizes specified:

	No. of styles	Total No. of sizes
Bake ovens	1	5
Broilers	2	3
Grids	2	3
Toasters	2	2
Hotel ranges	1	2

ATLANTIC CITY CONVENTION OCTOBER 22-23-24-25.

Four hardware war conventions will be held this year at the Atlantic City Convention on October 22-23-24-25. A large attendance is expected, including representative hardware manufacturers and wholesalers from Canada.

The opening session of the Hardware Organization for War Service will be held at the Marlborough-Blenheim, in the forenoon of Tuesday. It will be a war service conference, attended by both hardwaremen and mill supply men; followed by a special convention in the Rose Room of the Hotel Traymore during the afternoon.

C. W. Ashbury, president of the Hardware Manufacturers' Organization for War Service, will preside at the morning conference and M. W. Mix, president of the American Supply & Machinery Manufacturers' Association, will preside in the afternoon.

Addresses which will be given by Washington officials, including Murray Sargent, chief of the Hardware and Hand Tool Section of the War Industries Board. Information will be given relative to the plans formulated and the progress made regarding the mill supply man's part in the war programme.

On Wednesday, Thursday and Friday following the War Service Conventions, the hardware manufacturers and hardware jobbers will hold their regular annual convention in the Marlborough-Blenheim.

The schedule of the National Hardware Association, so far as arranged follows:

Monday, October 21, meeting of executive committee.

Tuesday, October 22, meeting of automobile and supply branch.

Wednesday, October 23, 10.30 A. M., opening joint session.

Wednesday, October 23, 2 30 P. M., executive session.

Thursday, October 24, 10 A. M., executive session.

Thursday afternoon, meeting of the metal branch.

Friday, October 25, 10 A. M., executive session.

TRADE NOTES

The annual meeting of the National Glass Distributors' Association will be held at the William Penn Hotel, Pittsburgh, Thursday and Friday, October 17 and 18.

This convention is the first gathering of the national glass body since its reconstruction. Present business conditions as affected by the war and post war-industrial readjustments are problems of vital interest to the trade and discussions of these matters will be a part of the regular business.

Because of the call to service Charles S. Kennedy has resigned his position as general sales manager of Lowe Bros. Co. at Dayton, Ohio. He has also resigned as a director of the company. H. M. McCutcheon, formerly district manager at Kansas City, has been appointed trade sales manager.

EDITORIAL COMMENT

EDITORIAL BRIEFS

THE war and its ravages has made a great demand for artificial limbs. And now, because metal is so scarce, they're talking of putting wooden legs on sewing machines.

* * *

SULPHUR is getting scarce. So scarce, in fact, that the chances seem to be much against the youngsters getting their 1919 spring tonic in the form of sulphur and molasses. It's a great age to be livin' in.

* * *

TIN is coming down to where it will soon be on speaking terms with the rest of us. No long ago it had reached the dizzy height where a pound was worth well night $1.50. Now it can't quite get its chin up to the dollar mark even with one toe on the ground. About the time tin hit the $1.50 mark there should have been a couple of lynchings.

THE END DRAWS NEAR

THIS week the Allied world was startled by the presentation of peace proposals by the Central Powers. Peace proposals have been frequent, but always to the present they have been couched in the phrases of a victor. This latest offer bears on its face the desperateness of the situation that gave it birth. The days of the Central Powers are numbered, but they are still days of struggle. To accept this offer would be to leave the task half done.

The danger is not in the fact that these terms might be accepted, but that the people as a whole should come to look upon the task as nearly done, and relax their effort. Any slowing down at this time would be disastrous. It is this that Germany has hoped for, to bring about divided councils; to lull our industries into inactivity by a false dream of peace. A slackening in our endeavours is a victory for Kaiserism, an increased activity and devotion is another nail in its coffin.

The Victory Loan is announced. Its success or failure will in a measure be taken as the measure of our war enthusiasm. A failure would be heartening news for Germany. A great success would mean a surer consciousness of defeat. Mr. Merchant, this is your opportunity to help. To help your country, and to help yourself. It is the time to do your utmost.

KEEP UP THE WALL OF STEEL.

THE Germans may talk peace—they may get Austria or Turkey to hoist the white flag—but the shell factory gives the answer of the Allied nations.

Did you hear of any shell contracts being cancelled on Monday morning on account of the German peace talk of Sunday?

Did you hear of the call being any less for 18 pounders, the 75-m.m., the 155-m.m., the 9.2 or the six-inch?

Not a bit of it. The forging and the machining were going on just the same as though there had been no peace talk, and the shipments were going on with the same unfailing regularity.

As a matter of real fact, the Kaiser's peace kite didn't get the eyes of the world long enough to make the munitions workers miss a single operation.

And there's no let up in the Allied programme that calls for more than capacity production of the steel plants of the continent. Every day sees the figures shoved up a few hundred or thousand tons; every day sees another non-essential line told to suspend operations; every day sees a customer told that there's no steel or iron for him because he's making a line that can wait; every day sees the whole commercial and mechanical fabric of the continent keyed up tighter and harder for ultra-maximum production.

The men who control the steel output of this continent know the enormous tonnage that is being turned out—they know it is a case of steel or men—the more steel the lower casualties, and they are seeing to it that the wall of steel that precedes the march of the Allies eastward is tremendously efficient and perpetually maintained.

The Kaiser and his war lords started this war; they lived it years ago; they planned for it and they plotted and schemed for it. But the Kaiser and his war lords are not going to finish this war. That part of the performance is going to be attended to by the Allied nations of a free world.

The Allies are not fighting for the sake of fighting. The lives of their men are dear and precious to them. They will not fight five minutes longer than necessary, neither are they disposed to cease five minutes before they have accomplished the task to which they have set their hand.

Will Enforce Law Against Hawkers

Border Cities Retail Merchants' Association Plan to Prosecute Vendors Who Come Over From Detroit—Steps Being Taken to Establish Classes in Salesmanship in City School—How Long-standing Accounts Are Being Successfully Collected

THE Border Cities Retail Merchants' Association at its regular meeting held in Windsor on Tuesday evening of this week appointed a committee to take up immediately with the council and with the police commissioners the proper enforcement of the law regarding hawkers. A report presented by A. J. Wilkinson, chairman of a special committee, which has been investigating this matter, showed that hawkers of all kinds have been doing a big trade in the Border Cities despite civic regulations which were framed with a view of protecting the home merchants and also the buying public. Because no one has taken the trouble to see that the by-laws are enforced they have become a dead letter, with the result that thousands of dollars worth of merchandise, much of it of an inferior quality, is being sold to citizens of the Border Cities. Many of the hawkers come across the river from Detroit and Mr. Wilkinson pointed out that much good Canadian money was being lost to the community and taken out of the country through these hawkers.

"These men are selling all sorts of things," he said. "Some of them have rugs, others have coupons for photographs, others sell grocery articles, others perfumes and toilet articles and some sell stoves. Their method of selling stoves is to sell from a catalogue. They show the prospective buyer a picture of a nice stove and then arrange for payment to be made in Detroit. Many of the lines of goods that these fellows are selling are of poor quality and the people have no protection. They are a source of annoyance to the public and a menace to the home retail trade. We have the necessary laws on the books to prosecute these men and it should be done.

The Foxy Hawkers

"Some of them are extremely foxy in their operations. Warned apparently by their experiences in other communities that they are likely to be apprehended and fined they take every precaution against being caught. Some hawkers will make only one call in a district and then will take a street car to the other side of the city and make another. The third call will be made at a point a mile or two away from where the first two were made. It is often extremely difficult to trace them, but if we work together we can put them out of business. I would suggest that every member of this association, as soon as he learns of the presence of one of these hawkers in the city, at once telephone the secretary of the association. The secretary will notify the police and every effort will be made to have the vendor arrested. The association can then prosecute.

The report of Mr. Wilkinson was unanimously adopted and a committee will get busy at once.

Salesmanship Classes

The members of the association also named a committee to meet with a committee from the Board of Education with a view of arranging for special classes in salesmanship in the city schools. At the request of the Retail Merchants' Association, Principal Gavin of the High School was present and went into the question with them. He spoke strongly in favor of the establishment of such classes.

"Canada is somewhat of a laggard in this important work," he said. "In Boston classes in salesmanship have long been a regular feature of the curriculum and with most excellent results. Across the river in Detroit they have classes and in addition to what is taught in the schools many firms supplement the instruction with special classes dealing more particularly with the needs of their own business. Many of our Border city merchants tell me that they find that very few of the boys and girls coming from our schools can make out accounts. They are neither quick nor accurate at such work. The merchants say that many of the pupils write badly and, of course, because they have had no training they know nothing about salesmanship.

"You may be interested in knowing what has been done in England recently. Owing to the unprecedented shortage of help caused by the war it was decided to allow boys and girls to leave school before the usual age and take positions in the stores and factories. It was soon apparent that the results would be disastrous for the trade of the future. The children were not trained, and what is more important, they were missing school training at a vital period in their lives. By the Fisher Act recently put into force in England, all children who were taken out of school to help in business must be returned, and in addition they must attend school until they are eighteen years old. The regulation about attending school does not necessarily mean that they have to go to day school. They can work in the day and attend night classes if it is desired. But the point is that they must have instruction.

"I have taken the local matter up with the Board of Education and can assure you of the fullest co-operation in your efforts to secure classes in salesmanship. We will arrange for any special classes you may decide on."

The question of collecting outstanding accounts and of eliminating credit has been receiving a great deal of attention from the Retail Merchants' Association. Some four months ago it was decided to place all collections in the hands of the secretary, T. C. Ray. The results have been more than satisfactory. In less than four months Mr. Ray has collected $3,700. Many of these accounts were of so long standing that they were outlawed, and the merchants had given up all hope of ever getting the money. Mr. Ray got busy. Some of the people paid up, others are paying so much a week or so much a month, and he is keeping right after them.

Get Their Cheques

The Border Cities Retail Merchants'

(Continued on page 54)

The story above refers merely to one meeting of the Border Cities Retail Merchants' Association. In next week's issue of HARDWARE AND METAL a full account will be given of the work that is being done by this live-wire organization. It is unquestionably one of the best associations of its kind in Canada to-day, and next week's story will contain much that will interest every retailer from coast to coast. Watch for it.

EVENTS IN THE TRADE

Business Changes

Toronto.—Cawker Guest Hardware Co. is succeeded by A. V. Guest.

Personals

D. A. McKie, Plattsville, Ont., was on a business trip to Toronto this week.

Ernest Bergeron has joined the sales staff of the Ripley Peck Hardware Co. at Windsor, Ont.

Mr. Waite, of Waite's Hardware, Orillia, Ont., was a Toronto business visitor during the week.

T. F. Towers, bookkeeper with the firm of McKenzie Milne & Co., hardware, Sarnia, Ont., for thirty-six years, recently retired.

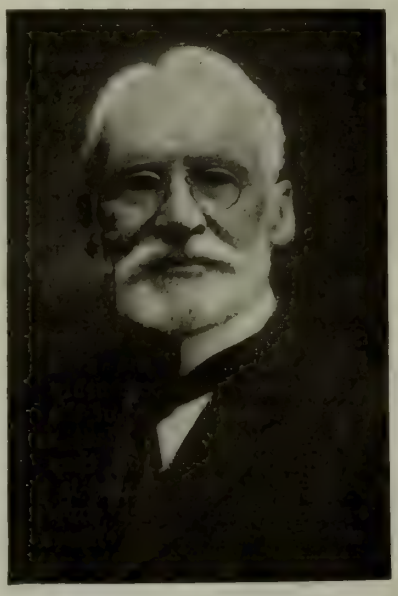
Murray Campbell and F. Smithson, have joined the staff of salesmen at the hardware store of Ingram and Davey, St. Thomas, Ont.

Bert de Wolfe, formerly of Copper Cliff, Ont., has joined the staff of McKenzie Milne & Co., at Sarnia, Ont., as salesman. His home is at St. Stephen, N. B.

Cecil Dixon, bicycle and accessory manager of Hyslop Bros., Ltd., Toronto, is now on his second business trip through the Canadian West within a year.

Carland Campbell for the past ten years with the Geo. A. McMurty Hardware, of St. Thomas, has accepted a position with the Walkerville Hardware Co., of Walkerville, Ont.

Wm. Roughley formerly of the sales department of the Hobbs Hardware Co., of London, Ont., has joined the staff of D. H. Howden & Co. and will go on the road taking territory west of London.



J. R. Johnson, for several years western Ontario traveller for H. S. Howland Sons & Co., Ltd., of Toronto, is now with the D. H. Howden Co., of London and will cover the same territory.

W. D. Ritchie who recently purchased the Collingwood Hardware Co., is ill in a hospital in Montreal. He went to his former home near Montreal to bring his family to Collingwood and while preparing to return was seized with appendicitis.

A. Goddard, wholesale buyer for the Cochrane Hardware, Limited, of Sudbury, has resigned. Mr. Goddard has been associated with the Cochrane Hardware for the past eight years, during which period he was promoted from the position of pricer to sales manager, and from the latter to buyer.

Death Takes Veteran Iron Manufacturer

Randolph Hersey, one of the leading figures in the iron industry in Montreal for many years, died at his home in Westmount on Sunday, at the age of 89. Although retired from active business for the past fifteen years, Mr. Hersey had been in fairly good health, and spent considerable of his time in California. He was born in Canton, Maine, on Nov. 30, 1829, and came to Montreal in 1852. With the firm of Holland and Dunn, he learned the cut nail making trade. Later he became a partner in the Pillow and Hersey Manufacturing

RANDOLPH HERSEY
Former President of the Pillow Hersey Manufacturing Co. of Montreal.

Co., which firm operated one of, if not the first, rolling mills in Montreal. This was originally built and operated by Mr. Hersey's uncle, Mansfield Holland.

In 1862, Mr. Hersey sold his interest in the nail business, and joined the firm of T. D. Bigelow and Son, later known as J. T. Bigelow and Co. The subsequent change of this firm formed the partnership known as Pillow, Hersey and Company, Mr. Hersey being a partner with John A. Pillow. In 1887 the company was incorporated as the Pillow and Hersey Manufacturing Company, Mr. Hersey being president. He held this position until 1890, when Mr. Pillow became president, and on the death of Mr. Pillow in 1902, Mr. Hersey again resumed the presidency. His retirement followed in 1903, when the firm sold out to the National Rolling Mills Company.

Mr. Hersey was philanthropic in his activities, and among other things was a member of the Mechanic's Institute for 54 years. Of the Montreal General Hospital he was a life governor, and also of the Protestant Home for the Insane. He was also a life member of the Montreal Art Association, and in religion, a Unitarian.

Obituary

W. H. Anderson, of the firm of Anderson & Langstaff, died at Kemptville recently. He was one of the oldest hardware and general store merchants in Eastern Ontario.

J. S. Mitchell. of J. S. Mitchell and Son, Sherbrooke, Quebec, will have the sympathy of his many friends in the loss of his wife this week. Mrs. Mitchell, it is understood, was a victim of Spanish influenza.

Fire Losses

Clinton, Ont.—Fire destroyed the glass and oil warehouse, and also the stables of Harland Bros., Clinton, Ont.

The premises of E. T. Wright & Co., of Hamilton, Ont., manufacturers of tinware were damaged by fire, the loss was not serious.

Halifax, N.S.—The large paint warehouse of Frank Reardon and Company, corner Market and Duke streets, caught fire, and the building and contents, valued at nearly $200,000, will be a total loss.

Fire which followed an explosion about four o'clock in the morning in the hardware store of H. Hunter at Hartney, Manitoba, completely destroyed the premises and entire stock. The loss will be about $7,000.

HARDWARE ASSOCIATION MEETING AT MONTREAL.

The annual meeting of the Canadian Wholesale Hardware Association was held this week at Montreal. Only matters of a strictly business nature came up for discussion, the banquet feature of pre-war years being dispensed with.

The Electric Iron Co., of Orillia, Ont., has been granted a Dominion charter.

The Canadian Johns Manville Co., of Montreal, has obtained a Dominion charter.

Pte. W. Earl McMaster, son of Mr. and Mrs. John McMaster of St. Marys, Ont., who enlisted in the 110th Battalion, was shell gassed on August 5 and died September 10. Before enlisting he was employed in the St. Marys Hardware, Limited, St. Marys, Ont.

Lieut. Christopher Trees, aged 35, was killed in action in the recent fighting. Prior to enlisting in the 234th Peel Battalion in 1916, he was a director in the firm of Samuel Trees & Co., Ltd., saddlery hardware, 42 Wellington st. E., Toronto. He was a member of Zetland Masonic Lodge, and the Toronto Board of Trade.

Gunner Eric M. Fraser, for some years connected with the James Walker Hardware Co., Ltd., Montreal, has paid the supreme price in recent fighting. Word was received during the week of his being killed in action. He joined the forces in May, 1917, training for a time in Montreal and later overseas. He had been with the Walker Hardware Co., Ltd., since September, 1909.

Lieut. Fred J. Mills, M.C., was decorated by his majesty King George, at Buckingham palace, on Sept. 11, 1918, for valuable information obtained while serving in the observation post, in the battlefield in Flanders. He has been wounded, having been struck by a 5.9 shrapnel shell, and is at present in the Perkins Bull convalescent hospital, in London. He went to France in September, 1916, with the 40th Sportsman's battery. A brother, Wilfred Mills, who has been serving in Italy was awarded the Italian Cross for meritorious services. Both young heroes are members of the Mills Hardware Company at Hamilton, Ont., and are sons of Charles Mills.

Sherwin-Williams Appointments

H. H. Eager Succeeds W. S. Fallis at Winnipeg—Assistant Will be A. W. Mowl—Both With Firm For Many Years

H. H. Eager has been appointed sales manager, Western district, Winnipeg, for Sherwin-Williams Company of Canada, Limited, succeeding W. S. Fallis, who, as announced in HARDWARE AND METAL some time ago, became managing director of the company with headquarters at Montreal. Mr. Eager has been in the service of the company since 1903, and has travelled every part of Western Canada, from Fort William to the Pacific Coast, in the capacity of representative, and as sales manager of the railway and manufacturing trade. Mr. Eager's intimate knowledge of the West and its requirements, coupled with his long, faithful and successful service, well qualifies him for the position.

H. H. EAGER

Appointed Sales Manager Western District Sherwin-Williams Company of Canada, Limited.

A. W. MOWL

Appointed Assistant Sales Manager, Winnipeg District, Sherwin-Williams Company of Canada, Limited.

A. W. Mowl, who has been appointed to the position of assistant sales manager, has been associated with the company since 1902, having joined their services with the present managing director while in England, and during the past ten years has filled various positions up to that of chief clerk in the Winnipeg office.

The management states that they have every confidence that under the direction of Mr. Eager, assisted by Mr. Mowl, the company's policy of expansion will not only be continued, but enlarged upon in every direction.

Montreal News

W. S. Fallis, Managing director of the Sherwin Williams Paint Company was a business visitor in Toronto this week.

The Otter Mfg. Co. of New York was represented in Montreal by Chas. R. Dietz.

S. E. Hawkins of the Eclipse Mfg. Co., Indianapolis, was in Montreal during the week.

W. G. Harris, Sr., of the Canada Metal Co., Toronto, was in Montreal during the week.

Morris Wheeler of Sargent and Co., New Haven, Conn., was in Montreal calling on the trade.

J. C. Donnelly, with the Standard Woven Fabric Co., Walpole, Mass., visited Montreal in the interest of his firm.

H. Kearns, managing director of B. & S. H. Thompson and Co., Ltd., wholesale metals, Montreal, has returned after a short vacation.

George C. Wiltshire, with F. H. Noble and Co., jewelers' findings, 59th and Wallace streets, Chicago, was in Montreal this week.

W. D. Lewthwaite, heavy goods mananager for Frothingham and Workman, who has been confined to his home with grippe, is improving.

Quite a number of the wholesale and retail firms are seriously handicapped through the illness of members of their staffs. This has affected wholesale and retail hardwares, and manufacturing plants of various kinds are short of scores of workers.

BRANDRAM-HENDERSON CONVENTION.

The annual convention of Brandram-Henderson Ltd., managers and sales staffs was held at Montreal this week.

JOINS BRANDRAM-HENDERSON STAFF

A. N. Creamer has been appointed advertising manager of Brandram-Henderson, Limited, and succeeds J. G. Lorriman, recently resigned.

Mr. Creamer is a native of Montreal, and his experience covers various phases of advertising. Mr. Creamer is said to have special qualifications for his new work. He has already assumed his new duties.

THE CLERKS DEPARTMENT

EVIDENCE AGAINST SUGGESTED STINGINESS OF THE WEALTHY

Financial Princes Who Live Up to Their Incomes But Not Beyond Them, as Those Who Envy Them Sometimes Do

POPULAR opinion to the effect that very rich is synonymous with very mean can be easily exploded by investigation. Some examples of wealthy men's munificence have been already shown here. As a matter of fact the probabilities are that out of a hundred very rich men and a hundred men of average income the quality of "meanness" might be found to run about the same percentage for both conditions of financial ability. Possibly amongst the really poor there would be found a higher percentage of the spendthrift class; people who, when well supplied with cash have been what they call "free-handed," but who in fact have not a true sense of the value of money, knowing its worth only through the lack of it, never through its possession.

Rich But "Good Spenders"

B. C. Forbes, who, for the "Wall Street Journal," has been revealing some of his very intimate knowledge of the characteristics of America's wealthiest men, tells in a recent article of at least two very wealthy men who give the lie to the popular idea that to be rich is to be close-fisted all the time.

Edward L. Doheny believes in living in keeping with his means. It is supposed by many who have the "tipping" habit, and pride themselves upon their liberality, that most wealthy men do not tip well.

"Edward L. Doheny," writes B. C. Forbes, "has the reputation of being one of the most liberal patrons who ever come to New York hotels. I have been told that Mr. and Mrs. Doheny handsomely reward every waiter, every chambermaid, every bellboy, every telephone operator, every elevator boy, and every other hotel employe who renders them any sort of direct service whatsoever.

"Yet Edward L. Doheny, who was a mine prospector for more than twenty years before he discovered indications of oil in the city of Los Angeles, was so anxious to develop his discovery that he worked at the digging of his first well fourteen or sixteen hours every day, lived on next to nothing, and then, when he had proved the existence of oil, he sought capital right and left. For years he kept his living expenses down to rock bottom, putting every dollar into the expansion of his properties."

Tobacco Prince is Princely

James B. Duke, who set out with grim determination to become in tobacco what Rockefeller was in oil, early adopted rigid, systematic saving, and every penny was utilized in his business. The Duke family were ruined by the Civil War, and for a time little James Buchanan Duke had nothing better to sleep on than a bed of straw in a very humble abode in North Carolina. At first, in common with his father and brothers, he peddled tobacco; then a humble factory was opened, the factory consisting of a tiny log cabin.

By and by young Duke branched out, invading New York with a factory in the Bowery. His business blossomed phenomenally; yet when he was making $50,000 a year he lived in a hall-bedroom for which he paid $2.50 a week. Later, when his earnings reached $100,000 a year, he became extravagant enough to hire a $4-a-week room!

Mr. Duke in time handsomely realized his ambition; he became not only the most powerful tobacco figure in America, but became, also, the tobacco king of Europe and is, of course, a millionaire many times over.

A burst-up among the Duke partners was threatened because James B, manager and master mind of the business, would not permit any partner, married or single, to draw more than $1,000 a year from the business.

To-day Mr. Duke owns one of the finest estates in America. "I scraped and slaved for so many years in order to build up my business that I now feel entitled to all reasonable comforts and luxuries," Mr. Duke remarked to me—this was before America entered the war, when spending was not considered a species of disloyalty.

Success Depends Upon Early Saving

The point emphasized by these experiences of business leaders is not that they were niggardly, not that they were unduly selfish, not that they had no natural desire to spend money when young, but that they were wise enough to realize that success depended upon early saving and had willpower enough to exercise control of their appetites. They subordinated luxury and comfort and ease to their ruling passion for success, for achievement, for advancement and expansion. By first learning how to take care of their pennies and their dollars, they learned how subsequently to take care of millions—and how to obtain the means and opportunities to make millions.

This youthful thrift is, when analyzed, nothing but a species of foresight. Its exponents played for the larger stakes of to-morrow in preference to dissipating their earnings day by day.

And, as I have previously remarked, foresight is one of the outstanding characteristics of most captains of industry.

The same enthusiasm they showed in amassing money is often displayed by wealthy men in expending it to good purpose.

Schiff Hard-Working Philanthropist

Jacob H. Schiff works harder as a philanthropist than as a banker. I am told that letters pertaining to his philanthropies receive attention before business letters when he arrives at his office.

This incident will give you a good idea of the manner of man Schiff is: The day the Northern Pacific panic was at its worst there was great excitement in the office of Kuhn, Loeb & Co., as there was in most big banking houses. Mr. Schiff, however, was not on hand. His partners called up his home. He wasn't there. They called up the Union Pacific offices, but he wasn't there either. They frantically tried here, there and everywhere to locate him. But without success.

By and by he walked into the office quite calmly. When his frantic partners pounced upon him remonstratingly, he quietly replied, "I thought the poor people up at the Montefiore Home needed me more than you people down here." He had been attending a meeting at one of his pet charitable institutions!

Mr. Schiff has not only obeyed the biblical injunction to give one tithe of all one earns to the poor, but has gone very much further. He not only gives away money in a thousand different directions, but he devotes probably half of all his working hours to philanthropy. While his own race naturally claims his chief attention, he is neither narrow nor niggardly in his dealings with other races and other causes. He has done, for instance a lot of quiet, effective work for negroes.

Not a "Soft Mark"

Unlike Mr. Morgan, however, he is not a soft mark when it comes to promiscuous "touches." He is wary of strangers. I was extremely amused one day when, as I stood talking with him outside his office, a rather rough-looking diamond, a broad-shouldered husky, came up and demanded in a deep basso-profundo voice: "Are you Mr. Schiff?"

The looks of the man were not prepossessing. I wondered what was coming. So, palpably, did Mr. Schiff. He smiled and tried to give an evasive reply. The husky was not to be put off, however.

Finally, Mr. Schiff said, "Suppose I were Mr. Schiff, my good man, what of it?"

"Then you are Mr. Schiff," the fellow replied, taking off his hat with one hand and holding out the other to shake hands with Mr. Schiff, saying, "I have read so much about you, and know so much about the good things you have done, that I wanted to shake hands with

you and tell you how much I admire you."

Other American Philanthropists

Since war broke out Mr. Schiff has been the outstanding leader in raising money for the relief of the starving and persecuted members of his race in invaded territories. Mr. Schiff takes no special credit for his philanthropic activities. On his seventieth birthday prominent Jewish civic, commercial and other bodies wanted to pay him honor, but he pointblank refused to be feted and, when the day came (January 10, 1917) it was found that he had slipped out of the city.

I asked him why. Here is his reply: "There are any number of people who would like to do just as much as I have ever done, but who have not had it within their power. Because God has blessed me with the means to do something for others, that is no reason why I should set myself up to be praised or feted for doing it."

He celebrated the day by sending no one knows how many cheques to charities. At least four of these cheques, for $100,000 each, were later revealed by the recipients.

There are other American philanthropists of which it will be fitting to say something.

The distribution of one-third of a billion dollars by Carnegie and of perhaps even a larger sum by Rockefeller, to say nothing of gifts of multiple millions by others, has been acclaimed as a phenomenon peculiar to America. Europe gasped when $100,000,000 gifts were announced by Carnegie and Rockefeller, and almost every time some multi-millionaire either gives away or bequeaths colossal sums for philanthropic purposes a chorus arises that never was such bountifulness known in the previous history of the world. True, no modern European nation has produced any race of wealthy philanthropists comparable with our own. Yet it is true even in this connection that "there is nothing new under the sun."

Carnegie-Rockefeller Predecessors

Carnegie and Rockefeller and the others had prototypes centuries ago. Our multi-millionaire philanthropists are really the natural product of this stage of our national development.

The most famous of living historians, Guglielmo Ferrero, in his "Ancient Rome and Modern America," presents intensely interesting and philosophic facts and reflections on this subject. Thus: "One of the social phenomena which are most characteristic of North America, but which would be looked for in vain in Europe, is the munificence of the donations of wealthy men to the public. Families of great wealth in America nowadays feel it incumbent on them, as a social duty, to spend a part of their substance on the people, to encourage education and culture, to bestow benefactions, to help the more needy classes, and to assist with their purses the public authorities in the execution of their functions. In Europe donations in excess of four thousand pounds are rare, and make a great stir.

History Repeats itself

The history of the ancient world shows that this generosity on the part of the rich is a phenomenon peculiar to a certain stage in the development of society, which recurs in all flourishing and prosperous, but as yet not very ancient, societies. In these, some of the public functions are assumed by the rich, because the state has not yet had the time to bring them under its control and to direct them according to laws by it established. If the millionaires of America have, as a matter of fact, but few imitators in Europe, they can boast numberless forerunners in the history of Greece and Rome.

In Athens to begin with, and, later, in the Roman Empire, to mention only the most famous states of the ancient world, education, charity, public amusements, even public works, such as roads, theatres and temples, were always in part left by the state to the generosity of wealthy individuals, who felt it their duty to contribute out of their means to the public welfare. The Roman Emperor himself was, at first at any rate, only the most generous and the best known of these rich donors: a kind of Carnegie, Morgan and Rockefeller of the Empire. The chief men throughout the Empire followed his example, some of them on so elaborate a scale as to challenge comparison with the most munificent American millionaires, when account is taken of the difference in the standards of riches in the respective epochs.

Carnegie a Modern Agrippa

Several of the most highly admired buildings and most imposing ruins in Rome are actually gifts made to the public by ancient citizens. Out of them all, I may cite the Pantheon, that marvellous Pantheon, which we all still admire in the heart of Rome, the monument which stands deathless while the stream of ages flows by. This was constructed by Agrippa, the friend of Augustus, at his own expense, and can be compared in this respect to Carnegie Hall in New York. Agrippa built the Pantheon from the same notions of civic zeal that impelled Carnegie to endow New York with his great Hall. And the two monuments, built by the personal munificence of two ultra-wealthy citizens, with an interval of twenty centuries between them, express the same desire to extend to the whole people a share in the enjoyment of the donor's private fortune."

ENFORCE LAW AGAINST HAWKERS

Continued from page 51

Association has a unique way of making the payment of these collections to the members. Those who have money coming to them must attend the meetings in order to get it. The collections constitute a regular part of the business of the meeting, and when the order is reached for discussion on this matter the chairman calls upon Secretary Ray. At this week's meeting the secretary had a few remarks to make upon the work he has been doing. After he had finished talking he passed out about fifty cheques to members who had given him long standing accounts to collect. One merchant got $118 and was told there was more coming. Many merchants got cheques for from $10 to $50 which they had long ago given up as lost.

"I gave the secretary $400 worth of accounts to collect" said one merchant, who received a cheque for $90. "If anyone had offered me $25 for the whole lot six months ago I would have been glad to take it."

Buy Victory Bonds

"I never expected to see this $50," said another member, "so I guess I might as well buy a Victory bond with it and help along a good cause."

By the system of making the members come to the meetings in order to get their cheques, two important ends are served. A good attendance is assured at the meetings and more general interest in the work of the association is fostered. The secretary deducts ten per cent. from his collections to cover the cost of the work. At this week's meeting it was decided to extend the work, and Crown Attorney Rodd was made an honorary member of the association, and to him will be turned over to handle in the courts any collections which the secretary finds it necessary to take drastic action to collect. Up to the present he has been using a series of three letters, followed by personal appeal. The last letter of the three states that if settlement is not made within a reasonable date that action will be taken.

Will Back It Up

"It is advisable for us to mean what we say," says the secretary." It is no use telling delinquents that we are going to take action and then not do it. We they will pay up, and even if there are laugh at us. When they realize that we are determined to collect and are ready to take the matter to court if necessary they will pay up, and even if there are a few cases in which we lose out it will have the effect of showing others that we are not going to stand any nonsense. When those who buy goods and do not pay realize that this association in full force stands behind any merchant who is a member they will be less inclined to trifle. We can make this body the means of practically eliminating all undesirable credit. If the merchants will cooperate fully and use the facilities they have they need not sell to any parties who have not paid other members. If merchants who have had trouble will send me the names of those who do not pay and turn over all accounts to me, immediate action will be taken. Other merchants who may be doubtful about a party can call me up at my office, and if there is trouble I can soon let them know and save them any loss."

On Cash Basis

President C. H. Smith, who is one of Windsor's leading dry goods merchants declared that he was refusing credit to all who asked for it and putting his business on an actual cash basis. He instructs his clerks to tell anyone who asks for time that it cannot be granted, as owing to present conditions business demands that he get cash for all he sells.

A baker who is a member of the association is so pleased at the collection work that Mr. Ray has done that at this week's meeting he turned over $900 worth of accounts to him to collect.

This week's meeting took the form of a banquet and was held in the Chamber of Commerce rooms. More than 200 members were present and a fine programme was thoroughly enjoyed. Rev. E. T. Collins gave an effective address on fire prevention, pointing out the enormous losses and the importance of taking measures to prevent it.

C. E. Parsons, of the MacLean Publishing Co. spoke on the value of the trade papers to the merchants of Canada.

Hudson Bros., manufacturers of aluminum utensils, 86 Symington avenue, Toronto, are now occuping their new plant on Dundas street, west of Bloor street.

Linseed Oil Situation Depends Largely Upon Transportation

THE position of linseed oil depends upon transportation. This, in a nut shell, is the opinion of a large Montreal crusher, and he is governed in his attitude by the facts which have to be met.

"At present," he stated to HARDWARE AND METAL, "there is a bright outlook as far as the Canadian West and the western United States flax-producing areas are concerned. The crop weather has been reported good and this is one very important bearing on the situation. Tuesday's price on October flax was $3.60 and the feeling has so improved that December oil is being quoted from 10 to 15c per gallon under to-day's figures. But what the situation will be in December is a very different thing and it is probable that the outlook then will be less favorable than it now is.

Railway Troubles

Already the transportation difficulties are serious enough. The lake and river service is very busy and it is not easy to get prompt shipments through. It is the thing we fear most.

In view of the great need for moving war material and supplies, and also for troops to the Atlantic seaboard, and in accordance with rules already announced by the United States Government, there will be little chance of moving additional supplies of goods and raw materials during the rest of this season and into March of next year. This is the feeling of this authority and he believes that there will be little material moving along in December, because of the great need for moving supplies for the government. The submarine menace is less in the winter months and this will prompt the movement of troops and supplies for them during this period. The inevitable result is a curtailment of other business. Flax seed will have to be brought along early if we are to have a supply for the coming season.

Hard To Forecast

It follows, he pointed out, that while the outlook for a very fair crop seems well founded, the market may be held nearer its present basis than it would were freight difficulties less. There may be even a higher price for oil than that obtaining to-day. It is very evident that the situation cannot be definitely forecast by anyone.

One of the immediate difficulties is the strike of freight handlers at Fort William. This, another large crusher thought, would not be permitted to continue. In this case he felt that there would be a fair amount of shipping available and that seed movement would soon be accelerated. Much depends upon the untramelled freight service.

How to Fight the Spanish Influenza

By Charles I. Hastings, M.D., Chief Medical Officer, Toronto

Influenza is an acute communicable disease and is contracted by coming in contact with the secretions from the nose, throat and mouth of a person who is ill with the disease. For this reason, every effort should be made to avoid such contact. This may be done as follows:

1. The person who is taken ill must go to bed promptly. Early going to bed minimizes the danger of the disease. Furthermore he is thus removed from association with healthy persons. He should be provided with his own toilet articles, eating and drinking utensils, which should be sterilized by boiling after use. All discharges from coughing and sneezing should be collected on a piece of gauze and destroyed by burning.

2. The attendant should be extremely careful not to touch his own face or mouth with his hands while handling the patient or infected articles in the sick room, and should cleanse his hands with soap, water and a nail brush, and hold for five minutes in antiseptic solution (1 in 40) Carbolic or (1 in 1000) Bichloride, on leaving the patient. In this way the attendant will protect himself from the disease, and if he washes his hands thoroughly will not carry the disease to another.

3. Every person should endeavor to maintain the highest standard of general health by taking suitable exercise in the fresh air, eating wholesome food, and sleeping with the windows open and arranged so that no draught is produced.

4. Crowded places such as street cars, mass meetings, moving picture shows, theatres and other gatherings should be avoided at this time.

5. Kissing should be avoided.

6. No food should be taken without previously washing the hands, and the hands should be kept away from the mouth and nose at all times.

7. The nose and mouth should always be covered with a handkerchief in the act of coughing or sneezing.

8. All persons, especially those engaged in factories, large business establishments, etc., where a number of people are congregated, should report on the first sign of illness and be relieved of their duties. To endeavour to fight off the disease by continuing at work, not only renders the severity of the illness more severe but also exposes others to the disease.

9. The symptoms in typical cases, are as follows: An acute and sudden onset with headache, intense just behind the eyes, pain in the small of the back and sometimes in the region of the stomach, elevation of temperature from 101 to 104 degrees with a comparatively slow pulse rate. The face is flushed, the tongue coated and in every case there is some redness of the eyes. Great prostration is experienced and the patient usually lies in bed in a "huddled up" position. In some cases sore throat and cough are noted, and with many only part of these symptoms are found.

The temperature becomes normal and the patient recovers within five days, providing complications such as pneumonia, middle ear diseases and affection of the heart do not occur. These may be avoided by prompt and careful treatment.

Consult your physician as soon as you have reason to suppose that you have the disease.

Business Improving In British Columbia

J. C. Pendray, president of the British America Paint Co., stated to HARDWARE AND METAL recently that while there was very little building going on in British Columbia conditions are exceptionally good on account of the shipbuilding, which is making work for everybody. The labor problem, he says, is becoming a difficult one to meet as men are getting such big pay at the ship yards.

There was plenty of evidence, however, that people on the Coast were beginning to spend money on their homes. Furthermore, houses were scarce and new ones would have to be built in spite of the high cost of labor.

MORE GASLESS SUNDAYS.

Washington—The United States Fuel Administration announced that the "gasolineless Sundays" would continue for the present, despite the belief expressed by officials in some sections that the use of automobiles on Sundays might aid in the fight to end the epidemic of Spanish influenza.

TRADE NOTES

Raymond A. Catlin, of the Corbin Cabinet Lock Co., New Britain, Conn., was in Montreal during the past week.

L. A. Willson, manager of Anthes Foundry, Ltd., Winnipeg, is in Milwaukee, attending the Foundrymen's convention. To HARDWARE AND METAL he stated that this has been the best season since the outbreak of war for soil pipe and fittings, the demand being mainly for farm work. Farmers, he said, were building modern houses and installing plumbing.

L. P. Foucar, hardware merchant at Tottenham, Ont., for 47 years was stricken recently with paralysis, which affected his throat and right side.

Partnership has been registered in the Imperial Metal and Heating Co. of Winnipeg.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

LINSEED oil again features the markets this week in a decline of 8c per gallon in some quarters. This is the second decline in a week's time, late advices last week providing for a 10c drop, which means a total decline of 18c. The improved crop harvesting conditions, along with better war news and peace talk, have influenced the cash flax seed market to a level 39c below that of last Wednesday. Even lower prices would not come as any great surprise.

The first change in many months on leather belting has been made this week. New discounts issued provide for an advance of about five per cent. The question of supplies is assuming uncertain proportions, and no guarantee as to the future is held out in respect to getting materials.

Lower prices which have resulted in a narrowing of the range of quotations on solder have been issued this week. The tin situation seems somewhat better, though the metal is unchanged. Lead is very scarce, and the result on manufactured lead products, as supplied for commercial requirements, may be a revision in prices to higher levels.

Higher levels of prices on cotton waste are looked for on completion of present contracts about December 1. Difficulty in securing raw materials is manifest, one firm reporting that they have to use all white cotton thread to complete some of their orders for colored waste, due to shortage of the colored thread. In wool waste a Government standard has been adopted and there will be one grade only. Manufacturers are required now to put in at least 40 per cent. cotton in their wool waste, 60 per cent. being maximum wool permissible.

Many important lines in the hardware merchant's stock have come under revision, providing for advances in practically every instance. An advance of 25c per 100 pounds in cut nails is now effective. Barb wire is up 25c per 100 pounds in some quarters, while others report all quotations on both barb wire and galvanized wire withdrawn.

A change to higher levels has been made through a revision in the discount on some makes of files. Jack screws are higher, and glass lamps show an increased price of about 20 per cent. Sweat pads have followed the upward trend along with wrapping paper, door checks, food choppers, spark plugs, cold chisels and some lines of table cutlery. Business in all fall lines has been remarkably good, and shipments of skates, hockey sticks, snowshoes, etc., are now being made.

MONTREAL MARKETS

MONTREAL, October 10.—Advances for the week have been made on electric irons, scythe stones, files, cut nails, handles, eavetrough, conductor pipe and elbows, and antimony. A firming market for steel sheets is noticeable. Declines have been recorded for solder and tin, and both these lines are reported quiet, a very limited trade being done.

The outlook for business has been maintained very well, and the jobbers have little complaint in this respect. It is simply a question these days as to whether supplies can be maintained in the measure desired.

Electric Irons, Scythe Stones Up

Montreal.

IRONS, SCYTHE STONES.—Electric iron of Gold Coin and Princess makes are up 25c each to $3.75; this is the best price for any quantity. Scythe stones are up about 25 per cent.: Canada Red End No. 1 are now $6.25 per gross; Bay Chaleur $8.15, and Acme $9.40 per gross.

All Kinds Handles Advance About $1 Doz.

Montreal.

HANDLES.—An advance approximating about $1 per dozen is made in the price of handles of all kinds. As showing the new high prices a few sample prices are given: For 36-inch second growth hickory axe handles $7.20 per dozen is asked; pick handles of similar grade and length $7.70; sledge $5.25; hatchet 14-inch $2, and nail hammer of this grade $1.75.

Sheet Packings Make Advances

Montreal.

PACKINGS.—New advanced prices for packings are announced. Samson gas engine packing, 1-32 inch thickness is on the following basis: Pound lots advanced to $1.37 from 90c; 25-lb. lots from 84c to $1.28, and 100 lbs from 78c to $1.18. Raybestos sheet packing in 1-32-inch size and also 1-16-inch are on the same basis at $1.10 in single pounds; $1.04 in 25-lb. lots, and 95c in 100-lb. lots. Previous prices for comparative lots were $1; 94c and 86c per lb.

Gas Tubing Higher; Line Oilers Also

Montreal

TUBING. OILERS.—An increase is made in the prices for red rubber gas tubing. Small quantities selling before at 4½c per foot are now 5c per foot; 50-foot lengths formerly sold at $4.38 per 100 ft. are now priced $4 69, and 250-foot lengths advanced from $4.02 to $4.32 per 100 ft. Lavigne oilers No. 1 are up to $2.07 each from $1.89; $1.94 in lots of six, and $1.78 in lots of twenty-four. The price for No. 2 is now $2.33 each for single lots, $2.19 for lots of six, and $1.92 each for lots of twenty-four; No. 3 are $2.50 each; lots of six $2.35, and twenty-four $2.16 each.

New Prices Out On Grease Cups

Montreal.

GREASE CUPS.—New net prices for Samson grease cups are as follows: No. 801 in single lots, each $1.07; lots of 12, $1; lots of 48, 92c. Respective prices for No. 801 are $1.30, $1.22 and $1.12. No. 802, $1.70, $1.60, and $1.47; No. 803, $1.90, $1.29 and $1.64. No. 804, $2.14, $2.00, and $1.84.

Piston Ring Prices Announced

Montreal.

PISTON RINGS. — McQuay-Norris leak-proof piston rings are now quoted at the following prices: Sizes 2⅜ to 3½, $1.22½; 3⅝ to 6, $1.40; 6⅛ to 6⅝, $1.57½; 6¾ to 7½, $1.75; 7¾, $1.92½; 8 in., $2.10; 8¼ in., $2.27½; 8½ in., $2.45, and 8¾ in. $2.62½. The above are supplied in 3-16, ¼, 5-16, ⅜ and ½ in. widths.

Eavetrough, Conductor Pipe, Elbows, Up

Montreal.

EAVETROUGH, CONDUCTOR PIPE. Advances are made for eavetrough, conductor pipe and elbows. The list price is to be found in the current quotation lists elsewhere and the advance over this is now 15 per cent. This is due largely to the growing scarcity of galvanized sheets for making this line and higher manufacturing costs.

Files Advance; Whips, Mops Scarce

Montreal.

FILES, MOPS, WHIPS.—An advance has been made in the price of Black Diamond files through a revision of the discount from 32½ per cent. to 27½ per cent. The jobbers announce that O'Cedar deals are now cancelled and that dealers wanting this line of mops will require to order their needs in dozens only or in odd lots. A scarcity of whips is reported, it being impossible to get ample supplies of rattan to make them.

Cut Nails Up 25c; Wire Nails Scarce

Montreal

WIRE AND NAILS.—Cut nail furnish the interest for the week, advancing 25c per keg. This is effective at once. As far as the wire nail market is concerned supplies are not very large, some sizes being quite scarce. Shipments are going forward very well. One jobber thought prices would tend to advance with the close of navigation at the latest. Cut nail base price is now $5.85 and wire nails hold at $5.35 per 100 pounds. Smooth steel wire is still $6.25 per 100 pounds.

Gasoline Stocks Better; Coal Oil

Montreal.

COAL OIL, GASOLINE.—A firm and steady position surrounds gasoline here and through the wet weather and gasless Sundays supplies have increased in this district. There is a fair sale of gasoline, for this is one of the active seasons for gasoline tractors, and much is utilized in this manner. Price 34c per gallon. Coal oil is in bigger demand as the days shorten and there is an ample stock of this to meet requirements. Prices are firmly held at 19½c for Royalite and at 22½c for Palacine and Electroline.

Rope Quiet; Basis Unchanged

Montreal.

ROPE AND CORDAGE.—Prices are held without any change for rope and the undertone is steady. Sales are not improved to any extent although these are about seasonable. In the matter of manila hemp imports to the United States have exceeded, to date, those of last year, but there is much need of improvement with so great needs to meet for war work. Pure manila base price is 39c per pound. British manila 38c, and sisal 27½c.

Stove Business Good, Wares Are Moving

Montreal.

STOVES AND WARES.—A good steady business is reported for stoves, and deliveries have been well made to date. There is just a strong likelihood that more money will be asked for the line ere long for the raw material supply is dwindling all the while. Wages are in fairly good demand and the sales made on new price basis recently announced are very good. Stocks are still sufficient to meet requirements of the trade.

Heavy Bars Scarcer; Iron Holds Firm

Montreal.

IRON AND STEEL.—There is a very firm undertone to the market and some feel that advances are probable. The difficulty of maintaining stocks is more acute and this applies to the sizes larger than four inch in width. This is especially true with regard to machinery steel. Prices have ruled without change and the undertone is firm.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Range on Sheets of Less Spread

Montreal.

SHEETS.—Scarcity continues to confront the trade and it is manifestly apparent that there will be more difficulty in getting supplies than ever before. Some jobbers are out of sizes altogether and various lots are quickly picked up. It is just a question whether a buyer can procure his needs in their entirety and then he may have to pay a premium or go without.

BLACK SHEETS—	Per 100 lbs.		
10 gauge	$9 75	$9 75	$11 50
12 gauge	9 50	9 65	11 00
14 gauge	8 25	9 00	7 95
16 gauge	8 40	9 15	8 00
18-20 gauge	8 50	9 25	8 05
22-24 gauge	8 75	9 60	8 10
26 gauge	9 70	9 75	8 15
28 gauge	....	9 90	8 25

GALVANIZED SHEETS—	
10¾ oz.	$12 00
28 gauge	11 65
26 gauge	11 35
22 and 24gauge	11 15
20 gauge	11 05
18 gauge	10 95
16 gauge	10 85

NOTE.—These prices are for full bundles, an extra charge of 25c per 100 lbs. is made for broken lots.

Solder Marked Down; Lead Lines Hold

Montreal.

LEAD PRODUCTS.—Solder has declined 2c to 6c per pound and affects the regular line of bar solder in the different grades. Wire solder is unchanged. It was expected that manufactured lead products would have been advanced before now. This is a strong probability in the immediate future. The somewhat quiet state of trade has probably been a factor in withholding consideration of advances back.

Lead pipe, lb.	$0 15	$....
Lead waste pipe, lb.	0 16	....
Lead traps and bends	Net list.	
Lead wool, lb.	0 15½	0 16
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 13¼
Lead sheets, 4 to 8 lbs., sq. ft.	0 12½	0 13
Cut sheets, ¾c lb. extra, and cut sheets to size, 1c. lb. extra.		
Solder, guaranteed, lb.		0 52
Solder, strictly, lb.		0 45
Solder, commercial, lb.		0 41
Solder, wiping, lb.		0 41
Solder wire (8 gauge)—		
40-60		0 53
45-55		0 57½
Zinc sheets, casks		....
Do., broken lots		....

Note—The above prices for solder are for full boxes of 100 lbs. Jobbers will charge several cents more for small lots.

Old Materials Steady; Interest Small

Montreal.

OLD MATERIAL.—Prices are without change of any kind and the interest in this market is small. It is even quieter than it has been for some time and there does not seem to be a promise of much improvement immediately. Heavy scrap, for the most part is firm.

Dealers' Buying Prices:		
Tea lead	0 05	0 05¾
Heavy lead pipe	....	0 07½
Yellow brass	....	0 13½
Red brass	....	0 23½
Light brass	....	0 08
Scrap zinc	0 06½	0 06¾
Heavy copper	0 24	0 24½
Wrought iron, No. 1, per gr. ton	26 00	27 00
No. 1 machinery cast	38 00	40 00
Heavy melting steel	22 00	23 00
Pipe scrap	18 00	20 00
Stove plate, per ton	26 00	28 00
No. 2 busheling	13 00	14 00
Old rubbers, boots and shoes	....	0 07¼
Overshoes, lumbermen's rubber boots	....	0 05
Bicycle tires	0 04½	0 05
Automobile tires	0 04¾	0 05

Tin Prices Down, Antimony Firmer

Montreal.

INGOT METALS.—The week's features are those of a declining market for tin and a stronger feeling for antimony. The volume of business all around for ingot metals is fair, but jobbers would appreciate desired improvement.

COPPER.—There seems to be little change in any way. Distribution being carefully made in the States, there is some copper to be had and Canadian jobbers are meeting the demand fairly well at 28¾c to 30c per pound.

TIN.—A price of 87c is being quoted here for tin, although small lots would cost more. For ordinary trade needs it can be bought for around 90c to 92c per pound. No price-fixing has yet been arranged.

LEAD.—Aside from the difficulty of getting this commodity there has been no quotable change from last week. Prices obtaining here are from 10 to 10¾c per pound.

SPELTER.—There is a somewhat weaker feeling, although the markets are generally quite steady. Local prices are easier a trifle at 10¼c to 10½c per pound.

ANTIMONY.—Market is somewhat stronger, and while trading is limited the price quoted is 17c per pound.

ALUMINUM.—Very little movement of this is reported and the price holds unchanged at 50c to 55c per pound according to quantity wanted.

TORONTO MARKETS

TORONTO, October 10— Many important lines have been under revision during the week including files, jack screws, lamps, leather belting, cold chisels, and saw sets. An advance in cut nails of 25c per keg has also been made. Prices on galvanized wire and barb wire have been withdrawn by some dealers altogether. This does not mean that there is no wire available, but it does mean that stocks are very limited. Sweat pads, spark plugs, cold chisels, wash tubs and some lines of cutlery are other lines to register advances.

Business has been very good and sales generally are maintained at a very satisfactory level. Seasonable lines including horse blankets, stoves, cross cut saws and axes, are moving out and orders for skates and hockey sticks are now being shipped.

Cold Chisels Advance; Saw Sets

Toronto.

COLD CHISELS, SAW SETS.—Higher prices have been named on the Acme cold chisels during the week and new prices now being given to the trade range as follows: ⅜-inch, 75c per doz.; ½-inch, $1.00; ⅝-inch, $1.40; ¾-inch, $1.95; ⅞-inch, $2.95; 1-inch, $4.10. Another line of saw sets is included in the list of those to follow the upward trend of prices, the Whiting now being quoted at $5.75 per dozen.

New Discount on Files; Oil Higher

Toronto.

FILES, OIL.—New discounts have been named on the Black Diamond and Nicholson files which provide for an advance in the net prices. This, it is intimated, has been brought about by advances in raw material and generally unsatisfactory manufacturing conditions owing to the scarcity of labor. The present basis of quotations for these two range from 25 to 27½ per cent. discount off list.

Owing it is said to the greatly increased cost of raw material, in addition to higher prices for bottles, cases and practically every item handled by the manufacturer, 3 in 1 oil, large size, has been advanced to $2.08 per dozen. The small size has been held at the price formerly prevailing.

Door Checks Up; Stay Rollers

Toronto.

DOOR CHECKS, STAY ROLLERS.—New prices have been issued on Yale door checks, which provide for advances The present range of quotations is given as follows: No. 12, $6.00 each; No. 13, $7.10; No. 14, $8.50.

Stay rollers are also in the list to be revised, and the new prices are at higher levels as follows: No. 68, 50c each; No. 54, 35c each.

Jack Screws, Wash Tub Benches Higher

Toronto.

JACK SCREWS, WASH TUB BENCHES.—An advance is provided for in new prices issued on jack screws, and present lines of quotations being offered to the retail trade are as follows: 1¾ by 10-inch, $5.50 each; 2 by 12-inch, $7.15; 2¼ by 14-inch, $9.50; 2½ by 16-inch, $12.60.

The Ottawa wash tub bench has also been revised and is now selling at $1.75.

New Prices on Glass Lamps

Toronto.

GLASS LAMPS.—Announcement was made in these columns last week of an advance of about 20 per cent. in glass lamps, but at that time the net prices had not been figured out. These are now available and prices being named are as follows: Stand lamps No. 101-A, $2.55 per dozen; No. 101-C, $4.40; No. 102-A, $2.95; No. 102-C, $4.40; Hand lamps No. 20, $2.15 per dozen; hand lamps with foot, No. 102, $2.95; Hand founts No. 15, $2.15 per dozen; No. 25, $2.55; No. 35, $2.15.

Food Choppers Changed; Mop Sticks

Toronto.

FOOD CHOPPERS, MOP STICKS.—Another line of food choppers to be included in the list following the upward trend is the Gem. The present range of quotations offered to the trade is, for the No. 20, $25.20 dozen; No. 22, $30.00 and No. 24, $40.80.

Mop sticks show a different range in some quarters and prices adopted are as follows: Self-wringing, $5.15-$5.40 per dozen; common mop sticks, No. 6, $2.10 dozen; No. 10, $2.35.

Table Cutlery Revised Upward

Toronto.

TABLE CUTLERY.—Another line of table cutlery has followed the upward trend. New prices are now ruling on the Nevada line, teaspoons No. 9 selling at $9.25 per gross; No. 10, $10.75; No. 11, $12.30; Nevada desert spoons, No. 12 are now quoted at $21.50; the Nevada table spoon No. 13, $24.60 per gross. The Nevada desert forks No. 14 are now quoted at $21.50 per gross, and the Nevada table fork No. 15 at $24.60 per gross.

Wrapping Paper Up; Safety Fuse

Toronto.

WRAPPING PAPER, SAFETY FUSE —Higher prices have been named on wrapping paper, the Kraft being quoted in some quarters at 12½c per pound, and the B manila at .08¾c per pound.

Safety fuse is also higher as will be seen in new quotation to the trade of $9.90 per 100 feet.

Slight Revision in Ready Roofing

Toronto.

ROOFING —Revised prices have been found necessary on some lines of roofing and quotations given herewith show some slight changes. Sampson 1 ply is now quoted at $2.30; 2 ply at $2.75 and 3 ply at $3.30 per square; the Waverly 1 ply is now $1.80; 2 ply, $2.30 and 3 ply, $2.70 per square; the Comet 1 ply is now $1.60 and 2 ply, $2.10 per square.

Higher Levels For Sweat Pads

Toronto.

SWEAT PADS.—A change in the price of sweat pads has been made, and new quotations now offered to the trade provide for an advance. The red edge yellow 10-inch are now selling at $8.75 per dozen; the 11-inch at $8.85; and the 12-inch at $9.00. The B.B. 10-inch are now $8.20 per dozen; 11-inch, $8.40 and the 12-inch, $8.70; the Ventiplex pads No. 310 are now up to $6.25 per dozen, and No. 311, $6.50.

Screen Doors Revised for 1919

Toronto.

SCREEN DOORS.—New prices have been issued on Kasement screen doors for the season of 1919. These show an advance of from 10 to 15% over quotations prevailing last season, and now range at the following figures: No. 1, 2 feet 8 inches, $28.80 per dozen; 2 feet 10 inches, $30.00; 3 feet, $31.20; Nos. 2, 3 and 4, 2 feet 8 inches, $31.20 per dozen; 2 feet 10 inches, $32.40; 3 feet, $34.20.

Spark Plugs Now Changed

Toronto.

SPARK PLUGS.—Higher levels are the order of the day for spark plugs, and prices on the Hercules line which have just been adopted range as follows: Hercules Giant are now 75c each; Hercules Junior plugs, less than 100, 50c each, 100 to 150, 47½c each; 150 and more, 45c each.

Leather Belting Makes Advance

Toronto.

LEATHER BELTING.—A slight advance in leather belting has been made amounting to about 5 per cent. The new discount on the extra quality is 30 per cent. where formerly it was 30 and 5 per cent; the new discount on the standard quality is 30 and 10 per cent., replacing the former quotation of 40 per cent. This is the first change to be made in this line for many months. The question of supplies is assuming difficult proportions, and whereas the requirements of the trade are being largely taken care of, there is little opportunity to accumulate a reserve.

Change Made in Other Flashlights

Toronto.

FLASHLIGHTS, BATTERIES.—Another line of flashlights and batteries has followed the upward trend, and new prices on some of the more familiar numbers of the Reliable line are given below:

Reliable Flashlights, complete with battery, each: No. 1322, $1.40; No. 2334, $1.75; No. 3422, $1.40; No. 4423, $2.55; No. 5222, $1.90; No. 6442, $2.50; No. 7443, $3.15; No. 8452, $2.20; No. 9324, $2.20; No. 10422, $1.75; No. 11442, $3.45; No. 12443, $4.05; No. 13452, $2.20; No. 14422, silver, $2.20; No. 26442, $2.20; No. 27443, $2.65; No. 28452, $1.90; No. 30442, $2.65; No. 31443, $3.15.

Reliable Batteries for Flashlights, each: No. 322, 50c; No. 324, 55c; No. 422, 50c; No. 423, 55c; No. 222, 45c; No. 442, 50c; No. 443, 75c; No. 452, 50c.

Cut Nails Up; Barb Wire Too

Toronto.

NAILS, WIRE.—Cut nails feature the market this week an advance of 25c per keg making the price to-day $5.85 per 100 pounds. Wire nails are unchanged, price to the retail trade holding at $5.30 per 100 pounds.

Barb wire is now quoted at $6.75 per 100 pounds. In some quarters prices on barb wire and galvanized wire have been withdrawn. This indicates a decided scarcity of these commodities, and whereas some small quantities may be available for the trade, these are most certainly limited. There has been no effort to secure business on these items for the last few days.

Gasoline To Be Controlled; Oil

Toronto.

OILS, GASOLINE.—An announcement coming from the Fuel Controller's Department advising that the sale of gasoline was to be controlled throws rather an element of uncertainty on future dealings in this commodity. As far as can be learned to date no definite action has been taken, but the advices so far at hand indicate that a maximum retail price is to be established for concerns handling gasoline in quantities of over 1,000 gallons a month. Also, it is said, profits will be limited to a basis of 10 per cent. advance on the wholesale cost delivered. It is further indicated that all persons who deal in gasoline will have to secure a license. Information of a definite character is not forthcoming.

Whether the control of gasoline which is now being mooted will extend to coal oil is uncertain. However, the feeling prevails that such a step may be undertaken by the Fuel Controller's Department. Prices for the week show no change, coal oil selling from 18½ to 21½ cents per gallon according to grade and motor gasoline holding at 33c per gallon.

Cordage Steady; Twines Firm.

Toronto.

CORDAGE, TWINES.—The situation shows no material change during the week. Cordage is held at the same level of prices and sales are maintained on a normal basis. Quotations which are now prevailing on the various grades are as follows: Pure manila, 39c per pound; British manila, 33c; Sisal, 27½c. Twines are very firmly held at the advances provided for last week and no further change is noted in quotations. The matter of supply shows no improvement and this apparently must remain an uncertain quantity for some time to come.

Stove Situation No Better; Enamelware

Toronto.

STOVES, ENAMELWARE.—Restrictions and shortage of material are factors which the stove manufacturers cannot get away from, and this is resulting in a curtailment of production. Sales during the last few weeks have been very good and there is a very nice amount of business coming to hand at the present time. However, manufacturers are experiencing some difficulty in taking care of orders, and indications are that in another six months' period at the outside, the results of the shortage of raw material will be decidedly manifest.

Enamel ware is unchanged for the week, prices holding at the level recently established, and the question of supplies remaining as uncertain a quantity as ever. As a matter of fact the outlook shows no improvement and is not expected to, until war news from the Western Front is such that the mills may be allowed to devote some of their attention to commercial requirements.

Waste To Be Higher; Wool Waste Restricted

Toronto.

WASTE. OAKUM.—Already indications are that higher levels must prevail on cotton waste and definite action is being taken by some manufacturers in this respect. The question of securing supplies is uncertain, and one firm intimated that owing to impossibility of securing colored thread they were compelled to complete some of their contracts with white thread waste, which means a decided loss. It is further intimated now that a government standard wool waste has been developed. There will in future be only one grade, manufacturers being compelled to put in 40 per cent. cotton thread, allowing only 60 per cent. wool.

Oakum is firm and unchanged with the demand continuing along satisfactory lines. Prices appear in current market quotations.

Iron and Steel Firm; Unchanged

Toronto.

IRON AND STEEL.—There has been no material change in the outlook during the week. The market is undoubtedly firm and the supplies hard to procure. However, staple sizes are coming forward from the mills fairly well. It is thought that present prices will prevail for some little time to come.

TORONTO—	Per 100 lbs.	
Common bar iron	....	$ 5 25
Common bar steel	....	5 50
Refined iron	....	5 65
Angle base	....	5 75

Mining drill steel	19 00	30 00

Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Sheet Situation Is No Better

Toronto.

SHEETS, PLATES.—Firms entering the market for steel supplies are still finding that the going is poor. This week a large concern in the east applied to the War Trade Board for supplies for the finishing of a plant where chemicals were to be manufactured, but the Ottawa authorities seemed to have it figured out that it would be some time before they could produce any of the finished article. Their application for material on the embargo list was refused. Houses that have light sheets are selling them out in nearly every case around $12.50 to $12.75, and there is nothing to show that the top has been reached in the matter of prices. Perhaps the industries that are most affected are the stove makers, and the firms using much material for roofing.

BLACK SHEETS—	Per 100 lbs.
10 gauge	$10 00
12 gauge	9 60
14 gauge	$8 40- 8 90
16 gauge	8 50- 8 55
18-20 gauge	8 05 8 30- 8 80

14	9 85	10 85

Prices shown are for full cases An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

Metal Markets Comparatively Quiet

Toronto.

INGOT METALS.—Excitement has not been the order of the day as far as metals are concerned. All lines are comparatively quiet. Tin is in fair supply and whereas lead is still scarce, there has been no material change in price.

COPPER.—Production as attained by the various producers is still no more than ample to take care of the government requirements. It is understood that no war industry is suffering, but there is nothing left for civilian requirements. Prices locally are unchanged at 30-32 cents per pound.

TIN.—Supply is considered ample to meet the present requirements of the trade, and the market seems to have steadied down to a basis of 95c to $1.00 per pound.

SPELTER.—The price is holding at an unchanged level of 11c per pound, and there is no particular item of interest pertaining to this market. Supplies are equal to requirements which are within rather limited amounts.

LEAD.—Reports from primary points indicate that producers are hard put to speed up with the war requirements. This is bound to be reflected in the requirements for commercial purposes, but there has been no particular desire to boost prices. Locally supplies are fair, and quotations hold at 10½ to 11 cents per pound.

ALUMINUM.—The use of aluminum is confined pactically altogether to government account. When these have been met there is little left for domestic consumption, so quotations may be said to be only nominal at 50c per pound.

ANTIMONY.—The market is quiet and featureless. Supplies are very fair and the demand limited. The price unchanged locally at 18c per pound.

PIG IRON.—Every effort to speed production of pig iron is being made and as production seems to increase so do the war requirements. This means that the amount released for commercial purposes is very small and is, it is indicated, becoming a negligible factor.

WASHING MACHINE LISTS REVISED; CLOTHES WRINGERS HIGHER

As HARDWARE AND METAL goes to press, advice has come to hand of an advance in the list on several lines of washing machines. The lines on which the change has been made, along with new lists, each, are as follows: Canadian, $10; Dowswell, $10; Hamilton, $12; Ottawa, $10.50; Peerless, 10.50; Popular No. 1, $10.50; Popular No. 2, $10; Economic, $12.50; Connor Improved, $10; Jubilee, $9.50; Sunshine, $9.50. On the foregoing the list has advanced just $1 each; on the following electric and gasoline engine-drive the advance in list has been $5, making to-day's lists, each, as follows: Seafoam, Electric, $107; Seafoam, engine drive, $49; Hydro, one tub, electric, $108.50; Hydro, one tub, engine drive, $50.50; Perfection, electric, $113.50; Perfection, engine drive, $55.50. Other lines shown in current quotations are unchanged, and the discount remains the same at 30 and 10 per cent.

Clothes wringers have also gone to higher levels, the entire line being affected through a change in the discount. The present basis of quotations is list less 30 and 5 per cent. The former discount was 30 and 10 per cent.

Corrugated Sheets Scarce; Very Firm

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—The situation in regard to corrugated sheets shows no improvement. Supplies are being carefully distributed and no guarantee as to prices or delivery is held out by the manufacturers. Essential work will receive the preference and retailers would do well to secure position of manufacturers in respect to orders they may contemplate placing before encouraging building or quoting firm prices. Quotations nominally range as below. Eavetrough and conductor pipe are now quoted at 15 per cent. advance on list, showing no change from increases recorded last week. List prices appear in current market quotations.

TORONTO—	Per 100 Sq. Feet Gal'zed	Painted
Corrugated Sheets—		
No. 28 gauge	$ 9 00	$ 7 50
No. 26 gauge	10 00	8 50
No. 24 gauge	15 00	11 25
No. 22 gauge	18 00	14 00
No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Range Solder Prices Narrows

Toronto.

LEAD AND ZINC PRODUCTS.—The range of solder prices has narrowed this week and quotations now in effect to the trade range as follows: Guaranteed, 50c to 55c per pound; strictly, 47c to 52c; commercial, 42c to 45c; wiping, 40½c to 50c. The market on manufactured lead products is ruling with a firm undertone but prices are unchanged for the week. Scarcity of the metal is still in evidence and this may assume proportions which will bring about an advance in prices in the manufactured article. In the meantime, however, range of quotations is as follows:

Lead pipe, lb.		0 15
Lead waste pipe, lb.		0 16
Lead traps and bends		Net-list
Lead wool, lb.		0 14
Lead sheets, 2½ lb. s. ft., lb.		0 14½
Lead sheets, 3 to 3½ lbs. sq. ft., lb		0 14¼
Lead sheets, 4 to 9 lbs. sq. ft., lb.		0 13½
Cut sheets ¾c lb. extra, and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	0 50	0 55
Solder, strictly, lb.	0 47	0 52
Solder, commercial, lb.	0 42	0 45
Solder, wiping, lb.	0 40½	0 50
Solder wire, lb.	0 56	0 70
Zinc sheets, lb.		0 26

Wrot. Pipe Very Firm; Tubes Scarce

Toronto.

WROUGHT PIPE, BOILER TUBES.—There is little change in the situation in respect to wrought pipe. It is increasingly hard to secure the raw material and there seems no likelihood of improvement for some time to come No further change in prices has been made over recent advance as shown in current market quotations. Boiler tubes are still

a very scarce article. As far as can be learned there are no tubes on the way to this market and stocks are pretty well cleaned up. There are no changes in prices recorded which are as follows:

Toronto—	Per 100 feet Cold drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00
2 inch	50 00	36 00
2¼ inch	53 00	38 50
2½ inch	55 00	42 00
3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Stagnant Condition in Old Materials

Toronto.

OLD MATERIALS.—The market is dull and trading is pretty well at a standstill. This would seem to be the prelude to a general decline in virtually all lines. Quotations in the meantime range as follows:

Dealers' Buying Prices—		
Tea lead	$0 05¼	....
Heavy lead pipe	....	0 08
Yellow brass	0 12	0 13
Red brass	....	0 21

No. 2 railroad wrought	15 00	16 00
Pipes and flues	....	12 00
No. 1 busheling	16 00	17 00
No. 2 busheling	....	12 00
Country mixed scrap	....	16 00

LONDON MARKETS

LONDON, October 10.—Higher prices generally are noted in lines which have come under revision during the week. Cut nails have advanced 25c a keg, and a new discount has been made on files. Blasting fuse, canned heat and stoves, roofing nails, and snowshoes are additional lines which have undergone a change to higher levels. It is also noted that a slight revision in the quantity price of lantern globes has been effected. Linseed oil is down 18c a gallon.

A good trade is looked for on cross-cut saws, horse blankets, buck saws, etc., and merchants are now taking these lines into stock. Pocket cutlery and the regular straight razors are scarce at present, and retailers jump at the chance to buy from anyone offering a fair variety.

Files Go Up; Hockey Sticks Move

London.

FILES, HOCKEY STICKS, ETC.—Advance is recorded this week in discount on Black Diamond files which provide for an increase in net prices. The new discount which has been made is 27½ per cent. off list. Very good sales are recorded on hockey sticks and kindred lines and booked orders are going forward at the present time. Quotations show no change, hockey sticks being quoted as follows: Boys' red and white $1.25 per dozen; men's rock elm $3.20; men's Spalding $5.75; men's Rex $7.25. Booking orders on Starr skates are being solicited at discount of 30 per cent. Hand sleighs are unchanged, the Canadian Buffalo Sled Co. line holding at a discount of 35 per cent.

Lantern Globes Revised; Shovels

London.

LANTERN GLOBES, SNOW SHOVELS.—A slight adjustment in the quantity price on lantern globes has been effected. In one dozen cases the price remains the same for the short or long patterns at $1.00 per dozen. Three dozen cases are now quoted at 95c per dozen which shows an advance of 5c; six dozen cases at 90c which shows a similar advance. Lanterns are unchanged, the short or long patterns selling at $12.50 per dozen. Already some movement of snow shovels is reported, and prices show no change from recent levels established. The Prince, or No. 20 is now quoted at $9.55 per dozen; Queen or No. 30 at $10.65; King or No. 40 at $12.75; Moose or No. 50 at $15.95. Furnace scoops, long or D handle, are unchanged at $10 65 per dozen.

Cut Nails Up 25c; Ready Roofing

London.

NAILS, ROOFING.—An advance of 25c per keg is recorded in cut nails. This makes the new price $5.85 per 100 pounds base. There has been no change made in wire nails which are still selling at a base price of $5.30 per 100 pounds. Higher levels, however, have been reached on the American large head roofing nail. This amounts to $1 per 100 pound keg, the new price now being $11. A splendid sale of ready-roofing is reported and prices are holding an unchanged level. The Ontario one-ply is quoted at $1 95 per square, the 2-ply at $2.40, and the 3-ply at $3.00.

Snow Shoes Up; Blasting Fuse Too

London.

SNOWSHOES. BLASTING FUSE.—New prices have just been issued on snowshoes which provide for an advance. The present range of quotations being offered on these lines is: Ladies 11 in. x 36 in., $3.00 per pair; men's 12 in. x 42 in., $3 50; men's 14 in. x 42 in. $4.00; men's 16 in. x 42 in. $4.35 Blasting fuse has also been revised and is now showing a new price of $1.20 per 100 ft., which is an increase over former figures.

Alcohol Stoves Advance; Brooms Up

London.

ALCOHOL STOVES, BROOMS.—Revised quotations have been issued on the Sternau alcohol stoves, which are still following the upward trend. The present price of the No. 4001 stove is $7.60 per doz. There has been no change made in the canned heat, price remaining at $1.25 per dozen tins. A general advance in corn brooms amounting to 10 per cent has been put into effect here.

Pocket Cutlery Scarce; Razors Selling

London.

RAZORS, RIFLES.—There appears to be a marked scarcity of pocket cutlery and straight razors. As a matter of fact retail merchants jump at the chance of being able to secure any. Sale for stocks on hand are very good, and a splendid volume of business is being done in the safety razors. Prices are holding firm at unchanged levels on these ,the Gillette selling at $3.75 each, Auto Strop at $3.75 each, Gem Junior at $12.50 per doz., and Eveready at $9.00 per dozen. Sales for guns, rifles, shells and cartridges have been maintained at a splendid level. Stocks are of course becoming pretty well depleted in jobbers hands, but altogether the condition of the trade generally is considered fairly satisfactory. There has been no change in price reported.

Linseed Oil Lower; Turpentine Steady

London.

LINSEED OIL, TURPENTINE.—A decline of 18c per gallon has been registered in linseed oil. The seed market shows a marked decline for the last couple of weeks, owing it is thought to the expected arrival of the new crop, and levels slightly lower may develop. Supplies of oil are very good but there is no surplus, and the uncertainty as regards securing further supplies may result in prices on oil holding at about the present levels. Turpentine shows no change for the week and supplies are equal to requirements of the trade. Quotations now prevailing on both oil and turpentine are given herewith: Linseed oil 1 to 2 barrels raw, $1.92, boiled $1.95; 3 to 5 barrels raw $1.91, boiled $1.94; 6 to 9 barrels raw $1.89, boiled $1.92; less barrels add 10c per gallon. Turpentine, no change; 1 barrel lots, $1 per Imp. gal.; 2 to 4 barrel lots, 99c per Imp. gal.; 5 gal. lots, $1.10 per Imp. gal.

Putty Moving; White Lead in Oil Quiet

London.

PUTTY, WHITE LEAD IN OIL.—A very good sale of putty is reported and conditions surrounding the trade generally are quite satisfactory. Prices are firm and unchanged as follows: Standard 100 lb. drums $6.75; 25 lb. $7.00; Pure 100 lb. drums, $8.75; 25 lb. drums, $9.00 per 100 pounds. White lead in oil is quiet and prices have held firm and unchanged at following levels. Pure, in ton lots, $17.80 per 100 lbs., less than tons $18 50; pure Elephant, in ton lots, $18.30, in less than tons $18.65 per 100 pounds.

WINNIPEG MARKETS

WINNIPEG, October 10.—Price changes during the week are again numerous, and include many lines of interest to the hardware dealers, such as wrought iron washers, scythes, shovel, spade and scoop handles, galvanized sheets, poultry netting and shoe polish. All lines have registered advances.

Business is reported to be fairly brisk in general lines, due to the fact that most of the threshing is now over and farmers are assured of returns.

Ten Per Cent. Advance in Scythes

Winnipeg.

SCYTHES, HANDLES.—New prices have just been issued on scythes showing a further advance of approximately 10 per cent. Today's selling prices at new levels are as given herewith: Bramble scythes No. 85, $15.50 doz.; Bush scythes No. 80, $15.50 doz.; grass scythes No. 65, $17.00; No. 70, $15.00 doz. Owing to the increased costs of production together with advanced freight rates prices on shovel, spade and scoop handles have again advanced and are selling to-day at $7.50 doz. for all styles.

Fry Pans, Fire Shovels Higher

Winnipeg.

FRY PANS, FIRE SHOVELS.—New prices have been issued covering Acme fry pans and fire shovels which show an upward trend. To-day's selling prices are follows:

Acme Fry Pans—No. 00, $1.65; No. 0, $2.00; No. 1, $2.50; No. 2, $2.80; No. 3, $3.15; No. 4, $3.50; No. 5, $4.00; No. 6, $4.65; No. 7, $7.30 dozen.

Fire Shovels—No. 7, $2.47; No. 9, $2.95; No. 57, $2.18; No. 65, $2.95; No. 55, $1.30; No. 60, $1.75; No. 70, 95c dozen.

Galvanized Sheets Up Fifty Cents

Winnipeg.

GALVANIZED SHEETS. — HARDWARE AND METAL'S prediction of higher prices on galvanized sheets is fulfilled in this week's quotations which show an advance of another 50c per 100 pounds. Stocks are very low and cannot be replenished owing to government demands. Prices now ruling are as follows:

Galvanized Sheets—10¾-oz., $12.50; 28-Ga., $12.00; 26-Ga., $11.70; 24-Ga., $11.55; 22-Ga., $11.55; 20-Ga., $11.40; 18-Ga., $11.40; 16-Ga., $11.25 per 100 pounds.

Polishes Revised To Higher Levels

Winnipeg.

POLISHES.—Prices on shoe polish and stove polish again register a slight advance in prices, due mostly to the cost of containers, selling to-day as follows: 2 in 1 shoe polish, black, white or tan, $1.30 per doz.; Black Knight stove polish, $1.30 per doz.

Five Per Cent. Increase In Poultry Netting

Winnipeg.

POULTRY NETTING.—New prices have just been established on Hexagon poultry netting showing an advance of 5 per cent. over former prices. To-day's discount is 10 per cent. off list. Net prices figured on this basis follow:

Hexagon Poultry Netting—1-inch mesh x 24-inch, $6.30; 30-inch, $7.65; 36-inch, $9.00 per roll. 2-inch mesh x 24-inch, $3.05; 30-inch, $3.60; 36-inch, $4.20; 48-inch, $5.60; 60-inch, $6.95; 72-inch, $8.30 roll.

Revised List on Wrought Washers

Winnipeg.

WROUGHT WASHERS.—Manufacturers of wrought washers have issued a new list covering all sizes, same showing a small advance which becomes effective at once. The new discount now in effect is 33 1-3 per cent, plus 1c extra in full boxes and 1½c extra in broken lots. New lists appear in current market quotations and net prices are reproduced herewith on full boxes of 50 pounds and smaller quantities:

Wrought Washers—Per 100 pounds— Hole.	Boxes.	Less
¼	$19 65	$20 15
5/16	17 25	17 75
⅜	15 20	15 70
7/16	15 00	15 50
½	14 05	14 55
9/16	13 55	14 05
⅝	13 40	13 90
11/16	13 25	13 75
13/16	13 15	13 65
15/16	13 00	13 50
1 1/16	13 00	13 50
1¼	13 00	13 50
1⅜	13 25	13 75

Firm Market In Linseed Oil; Turps

Winnipeg.

LINSEED OIL, TURPENTINE.—Linsee oil prices coninue firm on the local market at $2.20 gal. for raw and $2.23 gal. for boiled in single barrel lots. The demand is reported as normal. Turpentine prices continue steady at the following figures. Stocks are reported as rather low. Barrel lots $1.10 gal.; ½ barrel lots $1.13 gal.; 5 gal. lots $1.15 gal.; 1 gal lots $1.15 gal, plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Oct. 10—Production of pig iron and steel has been increasing steadily since summer weather disappeared. The rate of pig iron production, which hovered between 40,000,000 and 41,000,000 tons a year from April to August inclusive, is believed to have crossed 41,000,000 tons, and may have crossed 42,000,000 tons. Production of steel ingots has gained in whatever proportion has obtained with pig iron, as steel production has been hingeing upon pig iron supply for many months past. Improvement in pig iron production is attributed to better weather conditions, with less atmospheric humidity, and to better quality coke being furnished, this latter development being due to the continued and strenuous efforts of the Fuel Administration. There has been little shortage of coke from a tonnage standpoint for several months past.

The official statistics of pig iron production in the first half of 1918 have just appeared, but give little news as to the total since that had been estimated very closely. The half-year's production was very poor. Output in the first quarter was far and away below the output in any quarter for several years by reason of the traffic blockade, which caused a coke shortage. Output in the second quarter probably made a new record for a quarter, but it was nevertheless quite below the rate capacity of the furnaces. Production as officially reported, in tons of 2,240 lbs., has been as follows:

	Tons
First half of 1916	19,619,522
Second half 1916	19,815,275
First half 1917	19,258,235
Second half 1917	19,362,981
First half 1918	18,227,730

From the first half of 1917 to the first half of 1918 there was a decrease in total output of more than a million tons. Production of basic iron was stationary. Foundry and ferro silicon showed a slight decrease but this was a trifle more than made up by an increase in malleable iron, so that the net result was that the million ton loss in total output fell entirely on Bessemer pig iron. The showing is a remarkable one, for the foundries were not supposed to be particularly busy in the first half of this year, while steel making iron, both basic and Bessemer, was badly needed, and it

WEEKLY PAINT DEPARTMENT

War Windows Will Boost Paint Sales

Many Dealers Have Greatly Increased Fall Business by Timely Displays — Here's a Chance to Use Your Ingenuity and Plan a Window That Will Make Your Store the Center of Attraction For the Whole Town

HAVE you tried a war window to boost your fall paint sales. The idea is being worked out with much success by many dealers. It is simple, economical and with a little ingenuity can be made extremely effective. Some of the things you will need are flags, a good map, some war relics if you can get them, an attractive variety of paint tins, brushes, price cards, and some of the advertising material furnished by the companies. The effects you can obtain are only limited by your own ingenuity. Some window dressers have made extremely attractive arrangements of flags. Others use the flags only in the background. Still others use only one big flag, a Union Jack for a background. Some use the Union Jack and Stars and Stripes and some a big Union Jack, and the flags of all the Allies.

Big Draw Card

Some of the most successful windows have been those in which a large map was shown in the center. Everybody has been following the war news with a little more than particular interest lately, and the gains made by the Allies have been so frequent, and so important that they gave the window dressers some of the best possible material to work on. One firm had a map on which arrows were drawn in red indicating the direction of the Allies' advance. Their progress was shown by little Union Jacks. To each little Union Jack was attached a red, white and blue ribbon which led to some particular section of the exhibit and was attached to a display card. The cards were fairly large, and on them were printed in black letters, that stood forth clearly, a phrase designed to hold the attention and compel the reader to read on.

Striking Phrases

For instance, one card read "The Hindenburg Line is Smashed." This was in large letters, and below it was stated "Some of your buildings will be smashed by decay if you do not paint up this fall. A little of our paint used now will save you trouble and money later." Another card stated that "Germans Ask for Peace," and then below "You can never make peace with the forces that are destroying your property unless you protect that property by 'good paint.'" This card stood on cans of paint arranged in a neat pyramid.

"We didn't try to make our displays pretty," said the window dresser to HARDWARE AND METAL. "We tried to make them striking, and I think we succeeded. In fact, I doubt if we ever had windows that attracted such big crowds or held them so long, or what is best of all, brought more people into the store. The display boosted our paint sales right there and then. The window had not been trimmed ten minutes before we had a big crowd around. If we had had a larger window I would have used more cards, but we had to do the best we could."

Some Other Plans

Another dealer who arranged a war display window had a smaller map but a large display of war relics, German helmets, a gas mask, bits of shrapnel, and similar relics. Throughout his window he had cards urging people to help the boys on the firing line by conserving at home, and pointing out that one of the best ways to do this was to save property by painting. He was well satisfied with the increase in his sales, and is planning other war windows later.

A window that boosted sales of paint and was always the center of a large crowd, showed an attractive display of paints, oils and varnishes, with a couple of soldiers on guard with fixed bayonets. The soldiers, of course, were wax figures, but they were lifelike, and a big sign in front bore the inscription "On Guard" in large letters. Below was the following, "Put paint on guard. It will protect your property from its worst enemies, and the cost will be small." Several striking war pictures were also shown in the background, and the whole effect was most striking.

100% Efficient Under Every Condition Common To Canada!

Moore's House Colors

Moore's Paints, Varnishes and House Colors are made to stand the severe tests of the two extremes of Canadian weather.

Say this to your customer:

"Moore's line of paints, varnishes and house colors is an all-weather line that always shows up good and wears like blazes."

Tell him about Moore's famous Muresco too.

There's sales and a customer's confidence in it for you.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, October 10.—Linseed oil furnishes the interest of the week, having declined about five cents a gallon, this being the result of a lowering seed market. This condition has prevailed for several days and the better crop reports have improved the outlook. The markets are likely to decline somewhat further, some think, although it is not expected that there will be a great lowering of prices.

Mixed paint orders are coming in very well from the retail trade. White lead in oil is steady and firm, while putty sales are very active. Glass is steady and firm and the probabilities are that an advance will be made for sheet glass soon.

Linseed Oil Easier; Uncertain

Montreal.

LINSEED OIL.—Lower prices are quoted this week for linseed oil and there is likely to be a temporary easing of the market. Whether this will continue is uncertain, for the difficulty of transportation owing to strikes is looming up more than ever. If seed can be brought forward before the close of navigation there will be an easier feeling, for reports from the west are better as relating to the flax-growing centres. It is largely a matter of getting the seed to the crushers.

Present prices are four to five cents per gallon less than those of last week, and for December delivery better prices may now be obtained, even to the extent of 10 to 15c per gallon. The question still remains, will there be the necessary seed in store then?

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 2 barrels	$1.98-$1.99-$2.05	$2.01-$2.02-$2.08

Add 10c per gallon in smaller quantities.

Turpentine Scarce; Very Firm

Montreal.

TURPENTINE.—A very firm tone characterizes the market locally, but there is no advance in price. One jobber stated that he had nothing to offer, but several dealers are able to meet the requirements of their trade. The situation is without much new feature in any way either here or in primary centres. Rosin tendencies have firmed a little, but this is less than for some time.

Turpentine.	Per Imp. Gal.	
1 to 4 barrels	0 95	0 98	1 00
5 barrels and over	....	....	....
Small lots		1 01	1 06

(Packages extra)

Whiting Big Feature in Putty Outlook

Montreal.

PUTTY.—If the manufacturers are able to maintain an ample supply of whiting, there will be enough putty to last the season through. Sales are now very large and a great demand is being made upon available stocks of English whiting. One large jobber pointed out to HARDWARE AND METAL that there was no knowing just how long stocks would hold out, and it was not an easy matter to replenish them. There was already considerable enquiry from the jobbers among themselves for supplies.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75

1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Prices Hold on White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—The market rules very firm and steady. Supplies as required are still available, but there is not much advantage over that already reported in getting pig lead supplies forward. The manufacturers needs will be heavy from now on and it is a question just how long he will be able to get his required amounts of lead. The market is steady and firm with prices holding at $17 for five ton lots; $17.35 for ton lots, and $17.85 for smaller lots, all based per 100 pounds.

Mixed Paint Active on New Basis

Montreal.

MIXED PAINTS.—On the new basis announced last week orders are beginning to come to the makers for mixed paints. It is evident that retailers are not taking chances on leaving their ordering until late dates. The matter of materials is one of so much uncertainty that paint makers state freely that they do not know how long they will be able to maintain delivery on the basis just arranged. Costs were then figured on the markets of to-day.

TORONTO

TORONTO, October 10.—Linseed oil has featured again in a drop of 8c per gallon in some quarters. The seed market is much easier and this is the reason attributed for this move. Turpentine is steady and no change in the situation has been made. Putty is moving forward quite freely and window glass rules with a firm undertone. Booking orders for ready-mixed paints for spring are the order of the day and a very good volume of business is expected.

Linseed Oil Again Declines; 8c Lower

Toronto.

LINSEED OIL.—A further decline amounting to 8c per gallon has featured the market this week. This is a direct result of the easier market in flax seed which has become so noticeable during the past couple of weeks. Favorable weather is resulting in satisfactory crop harvesting conditions, and undoubtedly the favorable war news has been a factor. The cessation of hostilities may mean Argentine and Russian seed, and whereas the question of transportation is a factor in these markets they exert an influence on the markets here. Supplies of oil are considered fair in most quarters. The strike at the head of the lakes will interfere to some extent with transportation, but hopes that crushers will be able to keep operating are general. The range of quotations on immediate delivery oil follow:

Linseed Oil—	Raw Imp. gal.	Boiled Imp gal.
1 to 2 barrels, gal.	$1 92-$2 02	$1 95-$2 04½
3 to 5 barrels, gal.	1 91- 2 01	1 94- 2 03½

Add 10c gallon in smaller quantities.

Turpentine in Unchanged Position

Toronto.

TURPENTINE.—Speculation as to how the market may go is rife. The better war news, bringing as it may opportunity for overseas shipments will be a factor to shove up prices. On the other hand under the prevailing conditions of

Help Your Customers to Fix Up Their Cars for the Winter

EVERY year more and more auto owners drive their cars throughout the Winter. But they must make adequate provision for cold weather motoring, and one of the most necessary measures is to protect all exposed surfaces against the destructive action of snow, sleet and zero weather.

The top should be made weather-proof. A coat or two of B-H Leather Dressing or Mohair Top Dressing will do it. The cushions and leather trimmings should be treated in the same way, and the result will be not only a more weather-tight car, but one that will better resist the disintegrating influences of Winter.

Then, of course, the spokes, running gear and the body itself should be coated with B-H Auto Enamel, in a wide choice of attractive shades. Any amateur can apply it with pleasing results.

Put our handsome B-H Auto Enamel Display Card in your window. Show the B-H Auto Enamel store cards in your show-case, urging motorists to "Make your car look like new with B-H Auto Enamel." Place a few cans of it on your counter, and talk it up to your motoring customers. Every can you sell will be a good advertisement for you, and will help you make more sales.

NOTE:—B-H Auto Enamel is one of the products included in our Special Varnish Proposition. Write and ask us to explain how you can make more money by selling more B-H Varnishes and gaining our quantity rebates.

comparatively good stocks with little demand, the market is likely to continue around its present level or slightly lower. Developments on the Western front will be watched carefully and the possibilities of a comparatively early peace. In the meantime local conditions are unchanged, supplies largely being equal to demands and prices firm and unchanged.

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1 00
2 to 4 barrels (barrels included)	0 99
5 gallon lots	1 10

Outlook for Mixed Paints Fair

Toronto.

MIXED PAINTS.—The outlook for mixed paints for spring trading is generally considered very fair. It is a little early yet to make definite predictions but another week or two will show the trend of the trade. One manufacturer intimated that they hardly looked for as heavy gallonage but that the value of orders would run away above previous figures. Difficulty in financing would result in more frequent orders rather than placing for probably a four to six months' period. Range of quotations on the various brands appears in current market quotations.

White Lead in Oil Firm; Unchanged

Toronto.

WHITE LEAD IN OIL.—No new developments are reported in the situation this week. The outlook for supplies is considered uncertain as production of pig lead to-day is being largely absorbed in war work. Corroders however are exerting every effort to secure all necessary materials and continued good war news may result in a slight improvement as far as commercial requirements are concerned. In ton lots the price of white lead in oil remains at $17.80 per 100 pounds; in less than tons the price is $18.15.

Glass Steady; Putty Moves Well

Toronto.

GLASS, PUTTY.—The situation in glass is without particular feature. The market is unquestionably firm and the time will come when advances must be made. Just how close this is it is a little hard to say. Conditions favored an increase some time ago it is felt, but as yet prices remain on basis shown in current market quotations. Putty is moving forward in quite liberal quantities and the volume of business handled is considered good Prices are firm and unchanged at levels shown herewith:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

PITTSBURGH MARKET LETTER

(Continued from page 63)

does not look as if the blast furnace capacity was used to the best advantage. Of late the authorities have been making a special effort to curtail the production and use of foundry iron in order to provide more iron for steel making. About a month ago a committee was appointed to seek cases of unnecessary consumption of foundry iron, the object being to shut off the consumption and either supply the foundry iron for making semi-steel shells or discontinue its manufacture in favor of one of the steel making grades.

The Eight-Hour Basic Day

It is well established that, since the Steel Corporation announced adoption of the basic eight-hour day, its adoption will be general in the iron and steel industry. The movement is going farther, however, for the Employers' Association of Pittsburgh, composed largely of foundry and machine shops, has decided to do likewise. In their case the increased wage cost will be relatively small as they do not have a great deal of time beyond eight hours. This association makes the proviso, however, that payment of time and a half shall be on the basis of 48 hours a week straight time, not on the basis of considering each day by itself.

The iron and steel industry has been working out details of application. There will be no double time, and as to regular Sunday work, it is probable that there will be time and a half for the first eight hours. There is much Sunday work that is of regular character, as in the operation of blast furnaces and by-product coke ovens, the men as a rule being given one day off out of the seven. Many men prefer that day to be a week-day rather than Sunday, and in such cases there is no occasion for a bonus for Sunday labor.

Steel Supply Short as Ever

While the War Industries Board has not yet completed its revision of the estimated total steel requirements for the half year, stated early in July at 20,000,000 net tons and later increased to 23,000,000 tons for certain and 25,000,000 tons as a distinct possibility, it now hints that the total will not be reduced. As reported in previous letters, there has been a strong effort to cut down all estimates wherever possible, even shell steel and ship steel being scrutinized to see if they were being furnished in larger tonnages than were being consumed. The intimation that the estimated total is not likely to be reduced does not mean, however, that there has been no opportunity found for curtailing in any direction. Rather it means that new wants have appeared that offset any reductions that may be compassed. For this, General Pershing seems to be chiefly responsible, his demands increasing right along. Probably there are also increased demands from Britain and France. Then the Railroad Administration has been calling for more steel, wanting more rails than the 40,000 tons weekly that have been furnished, and being desirous of placing orders for more cars in addition to the 100,000 ordered a few months ago, and which it is desired to get out of the way before the end of the year.

The Conservation Division of the War Industries Board continues to make agreements with various manufacturers who use more or less steel, with a view to limiting their operations. While these curtailments appear rather impressive, from the viewpoint of the commercial wares that will be cut off from the civilian population, they are not equally impressive from the viewpoint of the tonnage of steel they consume. It does not mean a great deal in point of steel tonnage, and it means much more in point of labor that will be saved in such factories.

Very little definite progress seems to have been made in the matter of arranging for quantity production of semi-steel shells. Foundries do not find that the technics of manufacture have been advanced to such a stage that the work can be undertaken with confidence.

Tin plate production is destined to fall rapidly. The order of a month ago that production be limited in the fourth quarter of 1918 to 70 per cent. of the production in the same quarter of 1917 is in force, but the limitations as to tin plate consumption are so great that nothing like the 70 per cent. could be made. By a general rule tin plate, apart from that bought by the government, can be used only for packing food products, this rule applying equally to the United States, Canada and South America. The perishable foods, however, are about done, and the Food Administration has been making arrangements with packers of non-perishable foods whereby their consumption will be greatly reduced, and the visible market is thus brought far below the 70 per cent. limitation.

Half of Tin Supply Comes From Malaya

One-half of the world's tin supply comes from Malaya, and the smelting works in Singapore are the largest in the world. The bulk of the ore comes from the Federated Malay States, but the non-federated States, Siam, the Dutch Indies, Australia, and even Great Britain, contribute ore. Exports were as follows in the last four years: 1913, £13,171,560; 1914, £9,983,600; 1915, £10,686,800; 1916, £11,392,200.

In 1913 the United Kingdom took £7,039,338 of this, the United States, £3,565,588, and Canada, £54,660. In 1916, the latest date for which returns are available the United States got £4,872,947, the United Kingdom, £3,800,794, and Canada, £6,723.

TO THE WESTERN CANADA DEALER

Does a connection with a progressive and aggressive, amply capitalized and fully equipped concern, grown to be the largest paint and varnish factory in Western Canada, appeal to you?

BRITISH AMERICA PAINT CO., LIMITED

Wants more live dealers in Western Canada. It co-operates with its dealers to make bigger and better business. Join up with a pushing selling organization that will help you put 'em over. Send for booklet "The Evidence." Tells the story in fac-simile letters from Bapco dealers.

DISTRIBUTING POINTS

Established at Victoria in 1900 the British America Paint Co., Ltd., has found ever-widening markets. To care for this trade branches have been opened at VANCOUVER, B.C., CALGARY and EDMONTON, ALBERTA, and REGINA, SASKATCHEWAN.

TO SELL AND RE-SELL

Paint MUST give satisfaction.

Bapco Pure Paint and Bapco Varnish are of the highest possible quality. To insure this the raw materials undergo chemical laboratory tests. Skilled makers see that the ingredients are perfectly proportioned and modern machinery insures proper grinding and blending. Rigid machine and chemical tests are made during process of manufacture and the completed mixtures are subjected to comparative tests with the fixed Standards. One big roof of the factory is devoted to weather tests.

The growth of the British America Paint Co. and its constantly expanding trade territory is convincing evidence, not only of the quality of its goods, but of its resourcefulness and enterprise as well.

EMPIRE SELF-CLOSING BIBBS

BALL BEARING

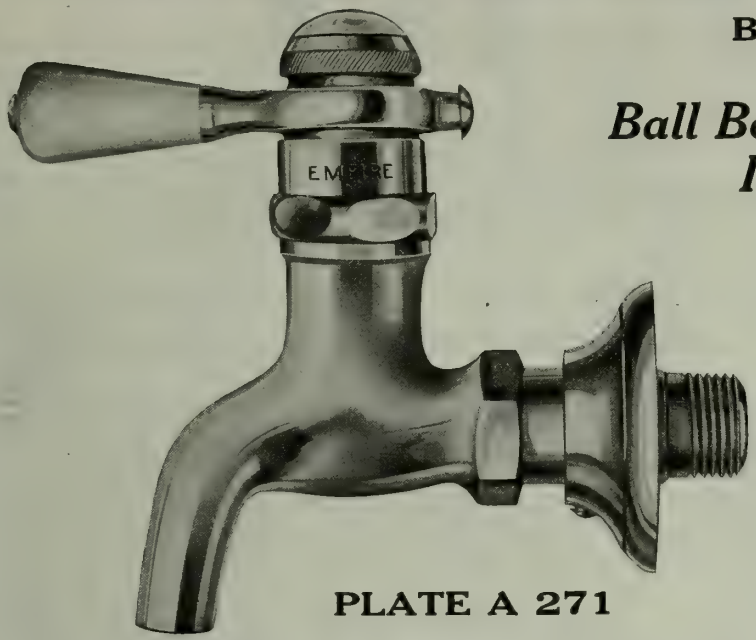

PLATE A 271

Ball Bearing Lever China Index Handle

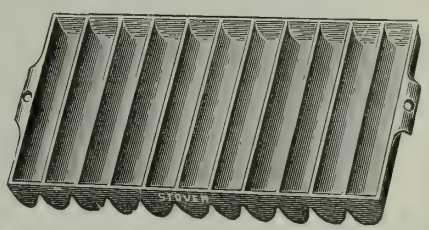
If you want to build up bigger business, you need dependable goods. You need to install those goods that are made right and fully guaranteed.

Empire Self-closing Bibbs are made right; they are fully guaranteed, and do not waste water. One of the greatest economic wastes in our towns and cities is water. Most office and factory buildings and public institutions are on the meter system, and wasting water is a serious matter.

Empire Self-closing Bibbs will save the price in water rates in less than a year. It is unpatriotic to waste water, particularly these days, because every gallon of water needs some kind of power to pump same.

Get full information from us about this line right now, it's a real winner.

Empire Manufacturing Company Limited
LONDON TORONTO



Keep *Sani-Flush* before the eyes of your customers. Many of them have been convinced by the manufacturer's advertising that they need

Sani-Flush

They will buy it as soon as you let them know you handle it.

Harold F. Ritchie & Co., Limited
10-12 McCaul Street, Toronto, Ont.

CORN BREAD PANS

Fast Selling Hardware Specialties

The use of corn meal as a substitute for wheat has created a large demand for these pans.

Every dealer should have them. Be sure you get the STOVER brand. It is a guarantee of clean, smooth castings.

This is also the time of year to lay in your waffle irons. STOVER waffle irons keep on the move and do not lay in stock. Send for our special waffle iron circular.

Gregg Plow Eveners Pull Big Business

Gregg Plow Eveners, like Gregg Wagon Sets, Neck-yokes and Hitches, are built for service. They are guaranteed against defective materials and workmanship.

Send for copy of catalogue describing our full line.

Any jobber in the Canadian West can supply you with Gregg Goods.

Gregg Mfg. Co., Limited
WINNIPEG

"Shipment the day order is received"

—In promising shipment on the day order is received we have committed ourselves to no mean task.

—But we have acted with our eyes open—with a full faith in our complete and well assorted stock of Electrical Supplies and Auto Accessories.

—We know that we can give you irreproachable service — service that is as exact as it is prompt.

—A trial order of any size will demonstrate that we make good our promises.

Great West Electric Co., Limited
Winnipeg

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Carhartt Gloves

All Hardwaremen Should Stock
CARHARTT GLOVES

The hardware dealer is the logical distributor of work gloves. He meets the farmer, the laborer, the driver, the trainman in his store and is in a position to sell Carhartt gloves with their many exclusive features, their superior workmanship and materials.

There's a good margin in selling Carhartt gloves.

Display a range of these gloves in your store and show window.

Carhartt samples mailed on request. Mention in writing the class of trade you have.

Note.—We Make Leather Gloves Only.

For Temporary Construction

There is always a strong demand for a thoroughly reliable, waterproof, durable roofing at a low price. Our Standard Mokawk Roofing meets this demand. It has been tested for years and found entirely satisfactory.

Standard Mohawk Roofing

is specially recommended for covering the roof and sides of temporary homes, factories, saw mills, bunk houses, sheds, camp sites, etc.

Standard Mohawk consists of the same grade of felt and asphalt as our famous Brantford Asphalt Roofing but is lighter in weight and sanded on one side only. One weight only—40 lb. per square.

The same grade of roofing with a smooth surface—Mohawk Rubber Roofing—comes in 35 lb., 45 lb. and 55 lb. weights.

Another excellent roofing for the same purposes is our Leatheroid Roofing. Not quite so durable as Mohawk, but lower in price—35 lb., 45 lb. and 58 lb. weights.

We make roofings suitable for every purpose, for covering the humble shack and the costly home, the temporary saw mill and the permanent, fire-proof factory.

Brantford Roofing is a profitable line for the dealer to handle.

SET IN RUBBER BRUSHES

BUT THERE IS ONLY ONE

TRADE SIMMS SET IN RUBBER MARK

DON'T BE FOOLED BY THE TERM "SET IN RUBBER"

IF A BUNDLE OF STRAW WERE SET IN RUBBER YOU WOULD HARDLY CARE TO LATHER YOUR FACE WITH IT

The making of good Brushes is a complicated art, of which the setting in rubber, however difficult to do well, is but a minor part.

First comes the development of the skilled labor, used for the many different operations, in which years and years of careful training is required; then the accumulated experience of years in the selection of the proper materials; then the blending of these materials in a way to suit the many special needs of the brush-user and the treating and preparing of these materials, and finally the product,

"BETTER BRUSHES"

They are necessarily "Set in Rubber," but so also are the poorer kinds. Protect yourself and your customer by buying

TRADE SIMMS SET IN RUBBER MARK

THE BRUSHES THAT ARE BUILT ON A *QUALITY* BASIS

T. S. SIMMS & COMPANY, LIMITED

Builders of "BETTER BRUSHES"

Put the Right Kind of Body On Your Motor Delivery Chassis

This Style with Rear Screen—$143.00

Four Standard Styles of Bodies Interchangeable on Same Base Unit Body

Have Some Style About Your Delivery

Poor Delivery Service loses more Trade than any other single fault in the average storekeeper's system

Perhaps you have long pondered the question: "How can I improve my delivery?" Here's the answer: Put a Babcock body on the chassis of your motor car.

Babcock Commercial Bodies

are very handsome in appearance, are constructed of steel skeleton framework, rendering them *rigid, strong* and *durable.* If there is no agent representing us in your town, please write us direct for prices and particulars. Babcock bodies are easy to put on—no expert assistance required. Parts all fit perfectly by actual test before shipping.

WRITE TO-DAY—YOU GET OUR REPLY TO-MORROW.

WINNING THE BUYER'S FAVOR

THE best possible buyer is not made an actual buyer at a single step It is one thing to win the buyer's favor for an article and another to make adjustments incident to closing the sale. Winning the buyer's favor is the work of trade paper advertising. Under ordinary conditions it should not be expected to do more.

"No, Sir, said Graydon"

GRAYDON is a hardware dealer. He said, "No, Sir," to a traveller who had asked five minutes of his time in which to demonstrate a new incubator that the M—— Mfg. Co. were putting on the market. "No, I don't know your firm," Mr. Graydon continued in a chilling tone that matched the winter weather without, "I have never heard of it before nor of your incubator, and I have no time just now to listen to you."

But the traveller persisted, asking, "How, then, am I to make the merits of our incubator known to you if you won't take time to hear my explanation?"

"Well, I'll answer that question, since you ask me," replied the dealer in a more genial tone. "Your firm should advertise your incubator in the trade paper that all we hardware men read every week, Hardware and Metal. They should keep on advertising it until we have had time to gain the main points about it and have become sufficiently interested to want to sell the line. Then you could call, talk prices, etc., and little time would be wasted. You know merchants nowadays, because of scarcity of clerk help, have very little time to give to travellers. You should get your firm to do its missionary work in advance through the trade papers. That's the way to save our time and yours, too."

This is what Ross of Lucan, wrote the manager of DRY GOODS REVIEW

J. M. Ross & Co., General Merchants, Lucan, Ont.—The fact that we have been subscribers for THE REVIEW for over ten years is sufficient evidence of our appreciation of its value to us.

Our staff takes advantage of many valuable suggestions appearing monthly.

We see advertisements of certain classes of merchandise that would escape our attention if it were not for THE REVIEW.

Our mail usually consists of 50 per cent. circulars and booklets that find their way to the baler without being read. Were they consolidated with all the interesting matter found in the columns of THE REVIEW, they would not only come under the observation of the retailers but the members of their staff as well and we are sure better results would be obtained.

$300-$1,200 a year to back up and prepare for traveller's calls, when worked down to lowest terms, becomes a very small sum.

Spending	To support the solicitation work of	Means in a year
$300	5 travellers	$60 per traveller or $5 a month
$600	10 "	$60 " " $5 "
$1,200	12 "	$100 " " $8.33 "

A traveller will make probably 125 calls in a month. So it works out about 4c-7c a call to support him. His actual call (salary and expenses) probably cost the firm on an average $2. That is to send a man out will cost, for his salary and expenses quite $10 a day. We suggest that, in McCurdy's case above, an extra $1 spent on making known his incubator and the firm making it would have been well spent money.

Besides which one must take into consideration the resultful influence of advertising on firms travellers never call on and whose business must be courted by advertising.

To spend $300-$1,200 a year for an all-the-year-round campaign of page spaces in one or other of the following retailers' newspapers is cheap business insurance:

CANADIAN GROCER	(Weekly)
HARDWARE AND METAL	(Weekly)
DRY GOODS REVIEW	(Monthly)
MEN'S WEAR REVIEW	(Monthly)
BOOKSELLER AND STATIONER	(Monthly)
SANITARY ENGINEER	(Semi-Monthly)

Keep a page advertisement in the business paper your customer and wanted customer read. Your travellers will get business more easily, and the $10 or so a day it costs to keep them out will be getting you bigger orders.

Send for copies, etc., of the above-named retailers' newspapers. Find what firms are using them and how they are using them, and study the papers on their editorial side, observing their downright money value to retailers; addressing the publishers.

Becoming a Bigger Man

WHAT is the difference between some men you know and others known to you? Why are some men earning $3,000 a year and some $30,000? You can't put it down to heredity or better early opportunities, or even better education. What, then, is the explanation of the stagnation of some men and the elevation and progress of others?

We are reminded of a story. A railroad man, born in Canada, was revisiting his home town on the St. Lawrence River. He wandered up to a group of old-timers who sat in the sun basking in blissful idleness. "Charlie," said one of the old men, "they tell me you are getting $20,000 a year," "Something like that," said Charlie. "Well, all I've got to say, Charlie, is that you're not worth it."

A salary of $20,000 a year to these do-nothing men was incredible. Not one of the group had ever made as much as $2,000 a year, and each man in the company felt that he was a mighty good man.

Charlie had left the old home town when he was a lad He had got into the mill of bigger things. He developed to be a good man, a better man, the best man for certain work. His specialized education, joined to his own energy and labor sent him up, up, up. To put it in another way: Charlie had always more to sell, and the world wanted his merchandise—brain, skill and ability. Having more to sell all the time, he got more pay all the time.

Charlie could have stayed in the old home town; could have stagnated like others; could have been content with common wages. In short, Charlie could have stayed with the common crowd at the foot of the ladder. But Charlie improved himself and pushed himself, and this type of man the Goddess of Fortune likes to take by the hand and lead onward and upward. Almost any man can climb higher if he really wants to try. None but himself will hold him back. As a matter of fact, the world applauds and helps those who try to climb the ladder that reaches towards the stars.

The bank manager in an obscure branch in a village can get out of that bank surely and swiftly, if he makes it clear to his superiors that he is ready for larger service and a larger sphere. The humble retailer can burst the walls of his small store, just as Timothy Eaton did, if he gets the right idea and follows it. It is not a matter of brain or education so much as of purpose joined to energy and labor. The salesman or manager or bookkeeper or secretary can lift himself to a higher plane of service and rewards if he prepares himself diligently for larger work and pay. The small manufacturer, the company director, the broker—all can become enlarged in the nature of their enterprise and in the amount of their income—by resolutely setting themselves about the task of growing to be bigger-minded men.

Specialized information is the great idea. This is what the world pays handsomely for. And to acquire specialized information is really a simple matter, calling for the purposeful and faithful use of time. This chiefly.

One does not have to stop his ordinary work, or go to a university, or to any school. One can acquire the specialized information in the margin of time which is his own—in the after-hours of business. Which means: If a man will read the right kind of books or publications, and make himself a serious student at home, in his hours—the evening hours or the early morning hours—he can climb to heights of position and pay that will dazzle the inert comrades of his youth or day's work.

IF business—BUSINESS—is your chosen field of work, we counsel you to read each week THE FINANCIAL POST. It will stimulate you mentally. It will challenge you to further studious effort. It will give you glimpses into the world of endeavor occupied by the captains of industry and finance. With the guidance of the POST, and with its wealth of specialized information, you, a purposeful man, aiming to go higher in life and pay, will find yourself becoming enlarged in knowledge and ambition, and will be acquiring the bases and facts of knowledge which become the rungs of the ladder you climb by.

It is the first step which costs. But this cost is trivial—a single dollar: We offer you the POST for four months for a dollar. Surely it is worth a dollar to discover how right we are in our argument. If yoou have the will to go higher in position and pay, sign the coupon below.

Serious Shortage of Hydro Power in Ontario

THROUGH a sudden reduction of power delivered under the Hydro-Electric system last week industry was heavily handicapped, and as a result manufacturers and domestic consumers in Toronto and other centres are making strenuous protest. The outlook is that the situation may become even worse as the autumnal load increases, and winter difficulties have to be faced. What is being done in the interests of better hydro-service, and what must be done quickly, are subjects treated in a vigorous article on the matter in THE FINANCIAL POST, dated Oct. 5th. Send for a copy.

Shell Industry Will Keep Up

THE POST also tells in a strong, concise article reasons why the Canadian shell-making industry may be expected to keep up to full earning power for a considerable time yet, though war news is so much better of late. This is an encouraging article. Read it in THE FINANCIAL POST dated Oct. 5th. Send for a copy.

Sulphur Queen a German Canadian

FRIEDA FRASCH was her name. She owns the Louisiana Sulphur Mines which her father developed, and which furnish the world's supply of sulphur. Her dad was Saxon, not Prussian, and had a heart as well as business ability. Now she is Mrs. ———, but read the fascinating story of the sulphur industry and its wealth in THE FINANCIAL POST for Oct. 5th. Send for a copy.

Other Contents of This Issue

ONLY a few leading items in the contents list of THE POST for Oct. 5th are mentioned here, but every item in THE POST is well worth your attention. Pick out your interests amongst these subjects. They are all in the Oct. 5th issue of THE POST. Send for a copy.

Developments Follow Fast in Paper Industry.

Regulations re Butter and Grain Agitate West.

Operating Costs Are Depressing Railway Profits.

Root Evil of Farm Loan is Emphasized.

The Problems of East and West—National Policy.

Butter Supply Commandeered.

Railway Boards' Strange Attitude as to Dividends.

Steps Taken to Insure Increase of 'Phone Rates.

How National Efficiency is Being Sapped.

Strict Economy to Save Fuel Supply.

News of Canadian Securities—Latest Facts.

Germany's Developing Financial Difficulties.

New Bond System Will Mean Work for the Banks.

National Cheque Collecting System Advocated.

Hamilton Will Have Large Size Overdraft.

As mentioned, these items are only a few out of many valuable and interesting subjects clearly and concisely dealt with in THE FINANCIAL POST dated October 5th. Send for a copy.

TORONTO OCTOBER, 1918

Canadian Company Secures Foreign Trade

We need foreign trade as an outlet for the work of our people. A goodly percentage of foreign trade is a remarkable stabilizer. Authorities say that every business should export at least one-third of its production.

Canada Foundries & Forgings, Limited, one of Canada's largest industrial concerns, owning and operating Canadian Billings Spencer Plant, Welland, Ont.; Canada Forge Plant, Welland, Ont., and James Smart Plant, Brockville, writing to HARDWARE AND METAL, state:

"We are very pleased to inform you that we have received one inquiry through your recent export number which has paid us sufficiently to carry our full-page ad for one year.

"As a medium for reaching the hardware trade, your paper certainly performs all the functions you claim.

Yours very truly,
Canada Foundries & Forgings, Limited,
B. J. McCORMICK,
General Sales Manager.

One inquiry through HARDWARE AND METAL has paid for a year's advertising—52 full pages. We make strong claims for HARDWARE AND METAL, and we made strong claims when selling the above firm advertising space in HARDWARE AND METAL. Our claims are backed up by the support and confidence of practically every worth-while hardware buyer in Canada. In addition to covering our unique circulation in Canada, we send out, four times a year, 1,200 extra copies to buyers in foreign countries. Next Export Number Nov. 2. Write us for further proof of the pulling power of the Export Numbers.

The Story of War Under the Earth

THE German sappers had discovered and broken into a Canadian tunnel. They had planted a machine gun at their end and sent a shower of bullets down the dark, narrow passage whenever the Canadians made any effort to enter their underground galleries. The story of how two Canadians nailed steel snipers' shields to the front of a push cart and shoved it ahead of them up to the very teeth of the gun, and how they dropped a can of deadly explosive, hopped on to the cart, and let it coast back down the tunnel, while bullets rattled on the shield like hail and, finally, how the explosive blew up the machine gun and its crew and blocked the passage again—this remarkable story is told by Lieut. C. W. Tilbrook (who was one of the two) in the course of an article, "An Underground Tank," in October MACLEAN'S.

Recently a Toronto newspaper declared editorially that the public was tiring of war books and war stories because of the sameness of them. The newspaper was right. But the public literally devours any story of the war that is new. The series of articles that Lieut. Tilbrook has done for MACLEAN'S have been read with an astonishing amount of interest *because they are different from anything that the public has yet read.*

Warfare in the tunnels is a terrible business—grim, silent, cruel. It is a strangely technical phase of warfare and the "sappers" go about their business with queer instruments that might have figured in a Jules Verne phantasy. To read of underground fighting, as Lieut. Tilbrook tells of it, is to get a vision of a new kind of war altogether—something gripping, fearsome and mystifying.

"An Underground Tank," is the best of his series. But, after all, it is only one feature in a long array that makes the October issue of MACLEAN'S one of unparalleled interest.

A STRANGE CHANGE IN WOMAN'S WORLD. By Agnes C. Laut.
The new status of women, arising out of the war, is treated in the powerful style of this famous writer, who came from the Canadian West. It introduces a new thought.

CONSCRIPTION AFTER THE WAR. By Brigadier-General A. C. Critchley.
A young Canadian who rose from Lieutenant to General in three years and originated the "Critchley Method" of military training, tells what he thinks about the need for compulsory service after the war.

THE LIFE OF MARY PICKFORD. By Arthur Stringer.
The second of a series of articles on Canada's most famous woman. No expense has been spared to produce the beautiful illustrations specially posed for the photographs.

THE FOUR FACTIONS AT OTTAWA. By J. K. Munro.
That the House will split into four, more or less, distinct groups is the guess of the author, a trained political observer. He outlines the reasons humorously, pungently and impartially. It is a political article on new lines and will be found refreshing.

BONEHEAD BILL—Another Service Poem.
Robert W. Service, most popular of poets, sends all his war verse to MACLEAN'S. In "Bonehead Bill" he depicts the grief of a soldier for his fallen foe.

THE EVENTS OF A MAD WORLD.
are summed up in the "Review of Reviews" which gives reprints of the best articles from the magazines of the world. All the best and most important articles are selected—five dollars' worth for twenty cents!

Hardware Merchant's Influence

¶The local hardware merchant exerts a great influence throughout the district in which his store is located. The majority of hardware merchants have been established for many years; they are reputable merchants who have built up their businesses on sound business principles and who have endeavored in every possible way to give the best possible service to their customers and supply them with goods which will give satisfaction.

¶Is it any wonder, therefore, that when customers visit the store of a well-known and long-established hardware merchant, they consider him an authority on lines which he is selling and will usually follow out his recommendation regarding the lines which they wish to buy. Actual investigations have proven that in the majority of cases customers place absolute confidence in the recommendation of their local dealer.

¶The chief problem, therefore, confronting the manufacturer who wishes to distribute products to the hardware trade or to introduce new lines, whether direct or through wholesalers, is to sell the hardware merchant and his sales staff. When you sell the hardware merchant and his salesmen on your line, you can rest assured that you have then gained the co-operation of the strongest retail selling force in the Dominion.

¶Practically every worth-while buyer and seller of hardware in Canada can be reached through the advertising pages of HARDWARE AND METAL. The keenest hardware buyers in Canada are the closest readers of the advertising pages in HARDWARE AND METAL, because it pays them.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

The Cost of Selling

SCARCELY necessary, is it? to protest that you must spend some money, much or little, to keep yourself and your merchandise known to your customers and should-be customers.

This you admit, but—DO YOU FOLLOW CLOSE UP THE LEAD OF YOUR CONVICTION?

Are you spending the money?

Let's look at the cost of close up work in

The FARMER'S MAGAZINE

A half-page 12 times will cost you $367.20 ($30.60 per insertion). A full page, $714.00 ($59.60 per insertion).

Not a heavy annual cost to canvass the choicest class of farmers in this country—farm homes of greatest prosperity, progressiveness and capacity.

But—are you keeping a salesman always on the job?

You should—and can, at so low a price.

Write in about it.

ARMCO IRON

To keep its railroad equipment out of the rust-heap, and to restore broken and worn parts to war-emergency use, is a vital service that Armco (American Ingot) Iron is performing for America-at-war.

Many of the nation's metal cars and other products of the rails are made of Armco Iron. From the standpoint of metal conservation, they symbolize America's grim purpose to hang on until "The world has been made safe for democracy."

For no other metal of its kind hangs on in service as does Armco Iron. The assurance of rust-resistance, of durability, of long-run economy is branded deep into every pound of Armco Iron. Armco Iron is also the quickest and smoothest welding material, because of its purity, its evenness, its uniform melting-point. Whatever it joins, the hardest service can't put asunder. It has no equal for welding fractures in locomotive fire-boxes, welding in place new side-sheets, repairing worn engine wheels and the like.

NEW SAFETY STOVE PIPE

Look Over the Features of This Pipe—*and See Why!*

Even the casual observer can see at a glance the superior advantages of Safety Stove Pipe.

It is made **stronger,** needs no wiring—is easier to put up—and yet is not sold at a fancy price.

Made in 6 and 7-inch sizes. Made of 29 Gauge Iron. Telescope Pipe does away with half lengths. Pipe is nested, saving freight rates and storage room in store. New patent lock effects saving on each pipe, making a saving of one length in every 12 of ordinary pipe. Can be used any place where ordinary pipe is used, or can be used along with ordinary pipe.

Patented in Canada and the United States, and "Made in Canada" by Fairgreave & Sons, Toronto, Ont.

Just what you need for bigger sales.

"Delta" Files

— we'll help you sell them

TRADE MARK
DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

This sketch illustrates the Simonds No. 237 One-Man Cross-cut Saw with Lion Handle. We would like to send you our descriptive booklet and complete discounts covering Simonds Cross-cut, Hand and Jack Saws.

SIMONDS CANADA SAW CO., LIMITED

The superiority of Simonds Crescent Ground Cross-Cut Saws is due to the quality of the steel used in them and the method of grinding. Crescent grinding is an exclusive process, used only in Simonds Saws. It means teeth of even thickness throughout the length of the saw, and the blade tapered for clearance to the greatest degree consistent with strength. This grinding makes cutting easy because it prevents binding in the kerf. Write for Booklet.

Let's Cash In Together on Millers Falls Advertising

Millers Falls Bit Braces have been as staple in the hardware trade for forty years as sugar in a grocery store.

Now we are pushing Millers Falls Bit Braces in a nation-wide consumer advertising campaign which reaches 4,000,000 men—mechanics and amateur users.

We are featuring our bit brace as "The Third Tool" for every householder—the universal boring tool that should come next after the hammer and the screw-driver in every man's tool box.

War time starts new economies. Men are making household repairs themselves to-day who used to call in a carpenter every time they had a screw to drive or a hook to put up.

Amateur users are your best tool prospects, and it pays to get after them strong. Begin by getting behind our advertising and feature our bit braces and other tools. Put Millers Falls Braces and other tools in your windows and out in the front of your store where people can see them.

Here's a counter display stand that shows the same No. 732 brace that we are featuring in our advertising. Free with a half-dozen braces. We also supply mailing slips that feature our braces and connect your store with our big advertising.

Our booklet, "How to Sell More Tools," is full of money-making pointers. Free on request.

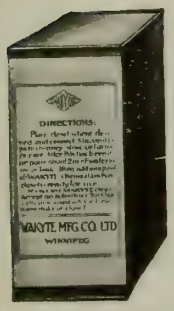
Write us to-day, giving the name of your local jobber.

MILLERS FALLS COMPANY

"Toolmaker to the Master Mechanic"

Millers Falls, Mass. **N.Y. Office, 28 Warren St.**

Wakyte Closets and Wakyte Powder Chemical Are Two Good Lines That Sell



Hardware Jobbers and Dealers all over Canada now handle Wakyte Closets and Chemical in preference to other makes.

Wakyte Closets are made in three sizes: No. 2, No. 3 and Special. The two former are oval in design, and the Special is round. Body of all Wakyte Closets is finished in Maroon Enamel, and Seat in Mahogany. All Wakyte Closets bear our well-known Trade Mark —an absolute guarantee of Quality and Satisfaction.

No. 2 WAKYTE CLOSET

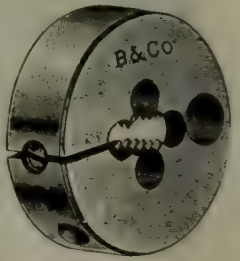
WAKYTE POWDER CHEMICAL

This Chemical is rapidly being adopted to replace the liquid chemical formerly supplied. It is considerably cheaper to use, and may be shipped under Winter weather conditions without damage.

In order to give prompt service to the Trade throughout Canada, Wakyte goods are carried in stock by Jobbers at Winnipeg, Moose Jaw, Calgary, Edmonton, Saskatoon, Fort William, London, Toronto, Montreal and Moncton.

Wakyte Mfg. Co., Limited - Winnipeg

Butterfield



"My Money Always Buys Butterfield Tools---*Because*

—Because I know what they have done."

Butterfield Tools, Taps, Dies, Reamers and Twist Drills have established sounder basis for growth, and will yield a bigger net than cheaper substitutes. The name "Butterfield" embraces tools of sturdier, stronger and more capable qualities that squarely meet the present-day demand.

Butterfield & Company, Inc.

ROCK ISLAND, QUEBEC, CANADA

Ward & Payne's W P Socket Firmer Chisel

This Socket Firmer Chisel is made without a weld, entirely of one piece of steel. It will stand more than ordinary heavy work, takes a keen edge and holds it, is nicely finished and of the usual *W. & P.* high quality.

W. & P. Anvil Brand Light-Edge Tools are recognized as dealers throughout the world.

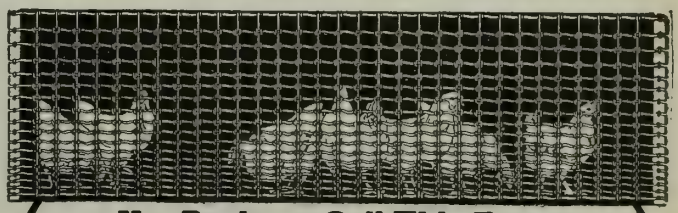
Wentworth Hot Water Bottle

This Letter Tells the Story

Toronto, Ont.,
Sept. 20, '18

Messrs. The Wentworth Manufacturing Co.,
Hamilton, Ont.

Dear Sirs:
The old saying that "it pays to advertise" is a good one. Your recent correspondence has attached to it your advertisement referring to a hot water bottle, and as I have had no end of trouble, not only at home, but on the yacht, with the rubber ones, I made up my mind to try your product. If you can supply me I would like you to send to me, addressed at my home (blank), four of them, and addressed to me c/o yacht (blank), six of them, and on receipt of your account I will immediately forward cheque.
Thanking you for your attention.



Yours very truly,

This letter is but one expression of the many favorable comments on the merit of famous Wentworth products.

Let us tell you how you can represent it profitably.

Made in Canada only by

Wentworth Manufacturing Co., Limited
HAMILTON, CANADA

Mr. Dealer: Sell This Fence

Establish a trade that will stay with you and at the same time will show a substantial growth. Compare this strong, rustless, unyielding fence alongside flimsy netting, and every poultry raiser will flock to your store. Note the close spaces at bottom that turns the small chicks and keeps out intruders.

SEND FOR LITERATURE

Get our catalogue of fencing for all purposes. Every foot of it guaranteed. Write today for agency in open territory. Our fence in every instance backs up our advertising.

K K

Who Does The Washing?

In Ancient Times they pounded out the dirt and the life of the garments on flat stones in the river.

Later on came the era of the back-breaking and finger-tearing tub and washboard — still wearing out the clothes.

The Modern Way is to use an up-to-date washing machine, saving clothes, health, temper and time.

WHEN YOU SELL A KRIBS WASHING MACHINE YOU MAKE A NEW FRIEND.

IT'S PROFITABLE, TOO!

Ask your jobber for the Kribs—most of them carry our lines—all the way from $10 to $90. If he isn't up-to-date, write us direct.

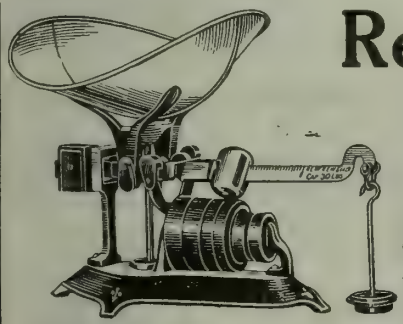
4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.



NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

Stirs up Business

Precious few housewives realize the many uses of an accurate scale in the kitchen—saving losses in careless weighing at butchers and grocers—weighing produce before marketing—weighing flour and other ingredients while baking, etc., etc., etc. It is surprising what a little bit of salesmanship and displaying will accomplish in stirring up big business in Renfrew Scales! The Renfrew is compact, handy, and stands hard knocks. It doesn't get out of order and always tells the truth. A government inspector's certificate accompanies every Renfrew. These features make the Renfrew a lively seller these days. Push business with the

The Samuels Sifter Has a New Appeal!

Fine screen has been adopted in making the Samuels Sifter which saves much more of the fine cinders, and is stronger. As the illustration indicates, the smaller ash can or pail may be placed inside the waste can and so catch all the screenings which can then be removed more easily than when the larger can had to be carried out. The new feature also makes for longer life for the Samuels Sifter since the waste can is not subject to the ash-man's abuse. With this new method of collecting the screenings, the Samuels leaves all other sifters hopelessly behind.

You can become a Samuels representative in time for Fall and Winter trade by sending us a post card of enquiry to-day.
